A solar has a deep and commanding voice, and stands about 9 feet tall. It weighs about 500 pounds.

Combat

Solars are puissant champions of good. Only the most powerful fiends approach their power.

Even more fearsome than their +5 *dancing greatswords* are their +2 *composite longbows* that create any sort of *slaying arrow* when drawn.

A solar's natural weapons, as well as any weapons it wields, are treated as good-aligned and epic for the purpose of overcoming damage reduction.

Regeneration (Ex): A solar takes normal damage from epic evil-aligned weapons, and from spells or effects with the evil descriptor.

Spell-Like Abilities: At will—*aid*, *animate objects*, *commune*, *continual flame*, *dimensional anchor*, *greater dispel magic*, *holy smite* (DC 21), *imprisonment* (DC 26), *invisibility* (self only), *lesser restoration* (DC 19), *polymorph* (self only) power word stun, *remove curse* (DC 20), *remove disease* (DC 20), *remove fear* (DC 18), *resist energy*, *summon monster VII*, *speak with dead* (DC 20), *waves of fatigue*; 3/day—*blade barrier* (DC 23), *earthquake* (DC 25), *heal* (DC 23), *mass charm monster* (DC 25), *permanency*, *resurrection*, *waves of exhaustion*; 1/day—*greater restoration* (DC 24), *power word blind*, *power word kill*, *power word stun*, *prismatic spray* (DC 24), *wish*. Caster level 20th. The save DCs are Charisma-based.

The following abilities are always active on a solar's person, as the spells (caster level 20th): *detect evil*, *detect snares and pits*, *discern lies* (DC 21), *see invisibility*, *true seeing*. They can be dispelled, but the solar can reactivate them as a free action.

Spells: Solars can cast divine spells as 20th-level clerics. A solar has access to two of the following domains: Air, Destruction, Good, Law, or War (plus any others from its deity). The save DCs are Wisdom-based.

Typical Cleric Spells Prepared (6/8/8/7/7/6/6/5/5; save DC 17 + spell level): 0—*create water*, *detect magic*, *guidance* (2), *resistance* (2); 1st—*bless* (2), *cause fear*, *divine favor* (2), *entropic shield*, *obscuring mist**, *shield of faith*; 2nd—*align weapon*, *bear's endurance* (2), *bull's strength* (2), *consecrate*, *eagle's splendor*, *spiritual weapon**; 3rd—*daylight*, *invisibility*, *purge*, *magic circle against evil*, *magic vestment**, *prayer* (2), *protection from energy*, *wind wall*; 4th—*death ward* (2), *dismissal* (2), *divine power**, *neutralize poison* (2); 5th—*break enchantment*, *control winds**, *dispel evil*, *plane shift*, *righteous might* (2), *symbol of pain*; 6th—*banishment*, *chain lightning**, *heroes' feast*, *mass cure moderate wounds*, *undeath to death*, *word of recall*; 7th—*control weather**, *destruction*, *dictum*, *ethereal jaunt*, *holy word*, *regenerate*; 8th—*fire storm*, *holy aura*, *mass cure critical wounds* (2), *whirlwind**; 9th—*ethereality*, *elemental swarm (air)**, *mass heal*, *miracle*, *storm of vengeance*.

Animated objects come in all sizes, shapes, and colors. They owe their existence as creatures to spells such as *animate objects* or similar supernatural abilities.

COMBAT

Animated objects fight only as directed by the animator. They follow orders without question and to the best of their abilities. Since they do not need to breathe and never tire, they can be extremely capable minions.

An animated object can have one or more of the following special abilities, depending on its form.

Blind (Ex): A sheetlike animated object such as a carpet or tapestry can grapple an opponent up to three sizes larger than itself. The object makes a normal grapple check. If it wins, it wraps itself around the opponent's head, causing that creature to be blinded until removed.

Constrict (Ex): A flexible animated object such as a rope, vine, or rug deals damage equal to its slam damage value plus 1-1/2 times its Strength bonus with a successful grapple check against a creature up to one size larger than itself.

An object of at least Large size can make constriction attacks against multiple creatures at once, if they all are at least two sizes smaller than the object and can fit under it.

Hardness (Ex): An animated object has the same hardness it had before it was animated.

Improved Speed (Ex): The base land speed given in the statistics block assume that an animated object lurches, rocks, or slithers along.

Objects with two legs (statues, ladders) or a similar shape that allows faster movement have a +10 foot bonus to speed.

Objects with multiple legs (tables, chairs) have a +20 foot bonus to speed. Wheeled objects have a +40 foot bonus to speed.

Objects might have additional modes of movement. A wooden object can float and has a swim speed equal to half its land speed. A rope or similar sinuous object has a climb speed equal to half its land speed. A sheetlike object can fly (clumsy maneuverability) at half its normal speed.

Trample (Ex): An animated object of at least Large size and with a hardness of at least 10 can trample creatures two or more sizes smaller than itself, dealing damage equal to the object's slam damage + 1-1/2 times its Strength bonus. Opponents who do not make attacks of opportunity against the object can attempt Reflex saves (DC 10 + 1/2 object's HD + object's Str modifier) to halve the damage.

ANKHEG

Alignment:	Always neutral
Advancement:	4 HD (Large); 5–9 HD (Huge)

Level Adjustment:

The ankheg is a burrowing monster with a taste for fresh meat. An ankheg has six legs, and some specimens are yellow rather than brown. It is about 10 feet long and weighs about 800 pounds.

An ankheg burrows with legs and mandibles. A burrowing ankheg usually does not make a usable tunnel, but can construct a tunnel; it burrows at half speed when it does so. It often digs a winding tunnel up to 40 feet below the surface in the rich soil of forests or farmlands. The tunnel is 5 feet tall and wide, and from 60 to 150 feet long ($[1d10 + 5] \times 10$).

COMBAT

An ankheg usually lies 5 to 10 feet below the surface until its antennae detect the approach of prey. It then burrows up to attack. (Treat this as a charge, even though the ankheg does not need to move 10 feet before attacking.)

Clusters of ankhegs share the same territory but do not cooperate.

Improved Grab (Ex): To use this ability, an ankheg must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If the ankheg is damaged after grabbing its prey, it retreats backward down its tunnel at its land speed (not its burrow speed), dragging the victim with it.

Spit Acid (Ex): 30-ft. line, once every 6 hours; damage 4d4 acid, Reflex DC 14 half. One such attack depletes the ankheg's acid supply for 6 hours. It cannot spit acid or deal acid damage during this time. The save DC is Constitution-based.

An ankheg does not use this ability unless it is desperate or frustrated. It most often spits acid when reduced to fewer than half its full normal hit points or when it has not successfully grabbed an opponent.

ARANEA

Environment:	Temperate forests
Organization:	Solitary or colony (3–6)
Challenge Rating:	4
Treasure:	Standard coins; double goods; standard items
Alignment:	Usually neutral
Advancement:	By character class

Level Adjustment:

An aranea is an intelligent, shapechanging spider with sorcerous powers. In its natural form, an aranea resembles a big spider,

with a humpbacked body a little bigger than a human torso. It has fanged mandibles like a normal spider. Two small arms, each about 2 feet long, lie below the mandibles. Each arm has a hand with four many-jointed fingers and a double-jointed thumb.

An aranea weighs about 150 pounds. The hump on its back houses its brain.

Araneas speak Common and Sylvan.

COMBAT

An aranea avoids physical combat and uses its webs and spells when it can. In a battle, it tries to immobilize or distract the most aggressive opponents first. Araneas often subdue opponents for ransom.

Poison (Ex): Injury, Fortitude DC 13, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

Spells: An aranea casts spells as a 3rd-level sorcerer. It prefers illusions and enchantments and avoids fire spells.

Typical Sorcerer Spells Known (6/6; save DC 12 + spell level): 0—*daze, detect magic, ghost sound, light, resistance; 1st—image armor, silent image, sleep.*

Web (Ex): In spider or hybrid form (see below), an aranea can throw a web up to six times per day. This is similar to an attack with a net but has a maximum range of 50 feet, with a range increment of 10 feet, and is effective against targets of up to Large size. The web anchors the target in place, allowing no movement.

An entangled creature can escape with a DC 13 Escape Artist check or burst the web with a DC 17 Strength check. The check DCs are Constitution-based, and the Strength check DC includes a +4 racial bonus. The web has 6 hit points, hardness 0, and takes double damage from fire.

Change Shape (Su): An aranea's natural form is that of a Medium monstrous spider. It can assume two other forms. The first is a unique Small or Medium humanoid; an aranea in its humanoid form always assumes the same appearance and traits, much as a lycanthrope would. In humanoid form, an aranea cannot use its bite attack, webs, or poison.

The second form is a Medium spider-humanoid hybrid. In hybrid form, an aranea looks like a Medium humanoid at first glance, but a DC 18 Spot check reveals the creature's fangs and spinnerets. The aranea retains its bite attack, webs, and poison in this form, and can also wield weapons or wear armor. When in hybrid form, an aranea's speed is 30 feet (6 squares). An aranea remains in one form until it chooses to assume a new one. A change in form cannot be dispelled, nor does an aranea revert to its natural form when killed. A *true seeing* spell, however, reveals its natural form if it is in humanoid or hybrid form.

Skills: Araneas have a +2 racial bonus on Jump, Listen, and Spot checks. They have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks even if rushed or threatened.

ARCHON

Archons are celestials from a lawful good-aligned plane.

Archons speak Celestial, Infernal, and Draconic, but can speak with almost any creature because of their tongues ability.

COMBAT

Archons generally prefer to meet a foe head-on if it is prudent to do so, but if outmatched, they do what they can to even the odds (usually by employing hit-and run tactics or standing off and engaging a foe with magic before moving into melee).

Archon Traits: An archon possesses the following traits (unless otherwise noted in a creature's entry).

—Darkvision out to 60 feet and low-light vision.

—*Aura of Menace (Su):* A righteous aura surrounds archons that fight or get angry. Any hostile creature within a 20-foot radius of an archon must succeed on a Will save to resist its effects. The save DC varies with the type of archon, is Charisma-based, and includes a +2 racial bonus. Those who fail take a -2 penalty on attacks, AC, and saves for 24 hours or until they successfully hit the archon that generated the aura. A creature that has resisted or broken the effect cannot be affected again by the same archon's aura for 24 hours.

—Immunity to electricity and petrification.

—+4 racial bonus on saves against poison.

—*Magic Circle against Evil (Su):* A magic circle against evil effect always surrounds an archon (caster level equals the archon's Hit Dice). (The defensive benefits from the circle are not included in an archon's statistics block.)

—*Teleport (Su):* Archons can use greater teleport at will, as the spell (caster level 14th), except that the creature can transport only itself and up to 50 pounds of objects.

—*Tongues (Su):* All archons can speak with any creature that has a language, as though using a *tongues* spell (caster level 14th). This ability is always active.

Lantern archons appear as floating balls of light that glow about as brightly as a torch. Only their destruction can extinguish the glow, though they can try to hide it.

COMBAT

A lantern archon has little reason to get within melee range. It usually hovers just close enough to bring the enemy within its aura of menace, then blasts away with its light rays. Lantern archons prefer to concentrate on a single opponent, seeking to reduce enemy numbers quickly.

Aura of Menace (Su): Will DC 12 negates.

Light Ray (Ex): A lantern archon's light rays have a range of 30 feet. This attack overcomes damage reduction of any type.

Spell-Like Abilities: At will—*aid*, *detect evil*, *continual flame*. Caster level 3rd.

Adjustment:

Hound archons look like well-muscled humans with canine heads.

COMBAT

Hound archons prefer to attack with their natural weapons but occasionally use greatswords.

A hound archon's natural weapons, as well as any weapons it wields, are treated as good-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*aid, continual flame, detect evil, message*. Caster level 6th.

Aura of Menace (Su): Will DC 16 negates.

Change Shape (Su): A hound archon can assume any canine form of Small to Large size. While in canine form, the hound archon loses its bite, slam, and greatsword attacks, but gains the bite attack of the form it chooses. For the purposes of this ability, canines include any doglike or wolflike animal of the animal type.

Skills: *While in canine form, a hound archon gains a +4 circumstance bonus on Hide and Survival checks.

HOUND ARCHON HERO

The hound archon hero is a mighty champion of justice, devoted to the pursuit and destruction of evil in all its forms.

COMBAT

Hound archon heroes have over time developed a love for their weapons. They prefer to use their *holy greatswords* over their bite and slam attacks.

Spell-Like Abilities: At will—*aid, continual flame, detect evil, message*. Caster level 6th.

Aura of Menace (Su): The save DC for the hound archon hero's aura of menace (DC 18) is adjusted for its higher Charisma score.

Smite Evil (Su): Three times per day a hound archon hero can make a normal melee attack with a +3 bonus that deals an extra 11 points of damage against an evil foe.

Change Shape (Su): A hound archon hero can assume any canine form of Small to Large size. While in canine form, the hound archon loses its bite, slam, and greatsword attacks, but gains the bite attack of the form it chooses. For the purposes of this ability, canines include any doglike or wolflike animal of the animal type.

Skills: *While in canine form, a hound archon hero gains a +4 circumstance bonus on Hide and Survival checks.

Paladin Abilities: Aura of courage, aura of good, *detect evil*, divine grace, divine health, lay on hands (33 points/day), *remove disease* 2/week, special mount (juvenile bronze dragon).

Typical Paladin Spells Prepared (2/2; save DC 12 + spell level): 1st—*divine favor, protection from evil*; 2nd—*bull's strength, eagle's splendor*.

Possessions: +3 full plate armor, +2 cold iron greatsword.

HOUND ARCHON HERO MOUNTS

In the course of their adventures, many hound archon heroes befriend bronze dragons, which may come to serve as their mounts. The relationship between these mounts and their celestial riders goes beyond even the special bond between paladin and mount. The dragon and the archon are naturally allies and friends, as can be expected of two powerful servants of cosmic justice. The juvenile bronze dragon mount gains 2 additional HD, 4 points of Strength, an additional 4 points of natural

armor, improved evasion, and +10 feet to speed in all its movement forms. The dragon cannot, however, command other creatures of its type as other kinds of paladin mounts can.

HOUND ARCHONS AS CHARACTERS

Hound archon characters possess the following racial traits.

— +4 Strength, +2 Constitution, +2 Wisdom, +2 Charisma.

—Medium size.

—A hound archon's base land speed is 40 feet.

—Racial Hit Dice: A hound archon begins with six levels of outsider, which provide 6d8 Hit Dice, a base attack bonus of +6, and base saving throw bonuses of Fort +5, Ref +5, and Will +5.

—Racial Skills: A hound archon's outsider levels give it skill points equal to $9 \times (8 + \text{Int modifier})$. Its class skills are Concentration, Hide, Jump, Listen, Move Silently, Sense Motive, Spot, and Survival.

Each Trumpet Archon carries a gleaming silver trumpet about 6 feet long.

COMBAT

A trumpet archon usually despairs physical combat, preferring to obliterate foes with spells quickly and return to its duties. If forced into an extended battle, it sounds its trumpet and attacks with a vengeance.

A trumpet archon's natural weapons, as well as any weapons it wields, are treated as good-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*detect evil, continual flame, message*. Caster level 12th.

Aura of Menace (Su): Will DC 21 negates.

Spells: Trumpet archons can cast divine spells as 14th-level clerics. A trumpet archon has access to two of the following domains: Air, Destruction, Good, Law, or War (plus any others from its deity). The save DCs are Wisdom-based.

Typical Cleric Spells Prepared (6/7/7/6/5/4/4/3; DC 13 + spell level): 0—*detect magic, light, purify food and drink, read magic, resistance* (2); 1st—*bless* (2), *divine favor* (2), *protection from chaos**, *sanctuary, shield of faith*; 2nd—*aid**, *bull's strength* (2), *consecrate, lesser restoration, owl's wisdom* (2); 3rd—*daylight, invisibility purge, magic circle against chaos**, *magic vestment, protection from energy* (2); 4th—*dismissal, divine power, holy smite*, neutralize poison, spell immunity*; 5th—*dispel evil*, mass cure light wounds, plane shift, raise dead*; 6th—*blade barrier*, banishment, heal, undeath to death*; 7th—*dictum*, holy word, mass cure serious wounds*.

*Domain spell. Domains: Good and Law.

Trumpet (Su): An archon's trumpet produces music of utter clarity, piercing beauty, and, if the trumpet archon wills it, paralyzing awe. All creatures except archons within 100 feet of the blast must succeed on a DC 19 Fortitude save or be paralyzed for 1d4 rounds. The save DC is Charisma-based. The archon can also command its trumpet to become a +4 greatsword as a free action.

If a trumpet is ever stolen, it becomes a chunk of useless metal until the owner can recover it. Woe betide any thief caught with one.

Level Adjustment:

An arrowhawk is a predator and scavenger from the Elemental Plane of Air. By twisting its body and varying the cadence of its wingbeats, an arrowhawk can fly at top speed in any direction. A juvenile arrowhawk (1 to 10 years old) is about 5 feet long from beak to tail, with the body accounting for about one-third of that length. Its wingspan is about 7 feet, and it weighs about 20 pounds. An adult (11 to 40 years old) is about 10 feet long from beak to tail, with a wingspan of about 15 feet and a weight of about 100 pounds. An elder arrowhawk (41 to 75 years old) is about 20 feet long with a wingspan of 30 feet and a weight of about 800 pounds.

Arrowhawks speak Auran, but they are not usually talkative creatures.

COMBAT

Arrowhawks are extremely territorial and always hungry. They attack almost any other creature they meet, seeking a meal or trying to drive away a rival. The primary mode of attack is an electricity ray, fired from the tail. The creature also bites, but it prefers to stay out of reach.

Electricity Ray (Su): An arrowhawk can fire this ray once per round, with a range of 50 feet.

ASSASSIN VINE

Environment:	Temperate forests
Organization:	Solitary or patch (2–4)
Challenge Rating:	3
Treasure:	1/10th coins; 50% goods; 50% items
Alignment:	Always neutral
Advancement:	5–16 HD (Huge); 17–32 HD (Gargantuan); 33+ HD (Colossal)

Level Adjustment:

The assassin vine is a semi-mobile plant that collects its own grisly fertilizer by grabbing and crushing animals and depositing the carcasses near its roots.

A mature plant consists of a main vine, about 20 feet long. Smaller vines up to 5 feet long branch off from the main vine about every 6 inches. These small vines bear clusters of leaves, and in late summer they produce bunches of small fruits that resemble wild grapes. The fruit is tough and has a hearty but bitter flavor. Assassin vine berries make a heady wine.

An assassin vine can move about, albeit very slowly, but usually stays put unless it needs to seek prey in a new vicinity.

A subterranean version of the assassin vine grows near hot springs, volcanic vents, and other sources of thermal energy.

These plants have thin, wiry stems and gray leaves shot through with silver, brown, and white veins so that they resemble mineral deposits. An assassin vine growing underground usually generates enough offal to support a thriving colony of

mushrooms and other fungi, which spring up around the plant and help conceal it.

COMBAT

An assassin vine uses simple tactics:

It lies still until prey comes within reach, then attacks. It uses its entangle ability both to catch prey and to deter counterattacks.

Constrict (Ex): An assassin vine deals 1d6+7 points of damage with a successful grapple check.

Entangle (Su): An assassin vine can animate plants within 30 feet of itself as a free action (Ref DC 13 partial).

The effect lasts until the vine dies or decides to end it (also a free action). The save DC is Wisdom-based. The ability is otherwise similar to *entangle* (caster level 4th).

Improved Grab (Ex): To use this ability, an assassin vine must hit with its slam attack.

It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

If it wins the grapple check, it establishes a hold and can constrict.

Blindsight (Ex): Assassin vines have no visual organs but can ascertain all foes within 30 feet using sound, scent, and vibration.

Camouflage (Ex): Since an assassin vine looks like a normal plant when at rest, it takes a DC 20 Spot check to notice it before it attacks.

Anyone with ranks in Survival or Knowledge (nature) can use one of those skills instead of Spot to notice the plant. Dwarves can use stonecunning to notice the subterranean version.

Alignment:	Often chaotic evil
Advancement:	15–28 HD (Huge)
Level Adjustment:	+5

The athach is a hulking, misshapen biped. An adult stands some 18 feet tall and weighs about 4,500 pounds. Athachs speak a crude dialect of Giant.

COMBAT

Athachs charge into melee combat unless their opponents are out of reach, in which case they throw rocks. They sometimes try to overrun armored opponents to reach unarmored opponents in back ranks. With its first few melee attacks, an athach tends to flail about indiscriminately. After a few rounds, it concentrates on foes that have been hitting it most often and uses its bite on whoever has dealt it the most damage.

Poison (Ex): Injury, Fortitude DC 22, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

AVORAL

Treasure:	No coins; double goods; standard items
Alignment:	Always neutral good
Advancement:	8–14 HD (Medium); 15–21 HD (Large)
Level Adjustment:	—

An avoral's bones are strong but hollow, so even the largest specimens weigh no more than 120 pounds. An avoral is about 7 feet tall. Each of an avoral's wings has a small hand at the midpoint. When the wings are folded, these appendages are about where human hands would be and can do nearly anything hands can do.

An avoral's visual acuity is virtually unmatched: It can see detail on objects up to 10 miles away and is said to be able to discern the color of a creature's eyes at 200 paces.

Avorals speak Celestial, Infernal, and Draconic, but can speak with almost any creature, thanks to their *tongues* ability.

COMBAT

On the ground, an avoral can lash out with its wings to deliver punishing blows. However, it prefers to meet its foes in the air, where it can employ its talons and make full use of its aerial speed and agility. It can't make wing attacks while flying, however.

An avoral's natural weapons, as well as any weapons it wields, are treated as good-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*aid*, *blur* (self only), *command* (DC 14), *detect magic*, *dimension door*, *dispel magic*, *gust of wind* (DC 15), *hold person* (DC 16), *light*, *magic circle against evil* (self only), *magic missile*, *see invisibility*; 3/day—*lightning bolt* (DC 16). Caster level 8th. The save DCs are Charisma-based.

Fear Aura (Su): Once per day an avoral can create an aura of fear in a 20-foot radius. It is otherwise identical with *fear* from an 8th-level caster (save DC 17). The save DC is Charisma-based.

Lay on Hands (Su): As the paladin class feature, except that each day, an avoral can heal an amount of damage equal to its full normal hit points.

Speak with Animals (Su): This ability works like *speak with animals* (caster level 8th) but is a free action and does not require sound.

True Seeing (Su): This ability is identical with *true seeing* (caster level 14th), except that it has personal range and the avoral must concentrate for 1 full round before it takes effect. Thereafter the ability remains in effect as long as the avoral concentrates on it.

Skills: An avoral's sharp eyes give it a +8 racial bonus on Spot checks.

Advancement:	By character class
Level Adjustment:	+4

Azers are dwarflike beings native to the Elemental Plane of Fire. They wear kilts of brass, bronze, or copper, and speak Ignan and Common.

COMBAT

Azers use broad-headed spears or well-crafted hammers in combat. When unarmed, they attempt to grapple foes. Although unfriendly and taciturn, azers rarely provoke a fight except to relieve a foe of gems, which they love. If threatened, they fight to the death, but they see the value of taking prisoners themselves.

Heat (Ex): An azer's body is intensely hot, so its unarmed attacks deal extra fire damage. Its metallic weapons also conduct this heat.

AZERS AS CHARACTERS

Azer characters possess the following racial traits.

— +2 Strength, +2 Dexterity, +2 Constitution, +2 Intelligence, +2 Wisdom, -2 Charisma.

— Medium size.

— An azer's base land speed is 30 feet.

— Darkvision: Azers can see in the dark up to 60 feet.

— Racial Hit Dice: An azer begins with two levels of outsider, which provide 2d8 Hit Dice, a base attack bonus of +2, and base saving throw bonuses of Fort +3, Ref +3, and Will +3.

— Racial Skills: An azer's outsider levels give it skill points equal to $5 \times (8 + \text{Int modifier})$. Its class skills are Appraise, Climb, Craft, Hide, Jump, Listen, Search, and Spot.

— Racial Feats: An azer's outsider levels give it one feat.

— +6 natural armor bonus.

— Special Attacks (see above): Heat.

- Special Qualities (see above): Immunity to fire, spell resistance equal to 13 + class levels, vulnerability to cold.
- Automatic Languages: Common, Ignan. Bonus Languages: Abyssal, Aquan, Auran, Celestial, Infernal, Terran.
- Favored Class: Fighter.
- Level adjustment +4.

Adjustment:

A barghest is a lupine fiend that can take the shape of a wolf or a goblin. In its natural form, it resembles a goblin–wolf hybrid with terrible jaws and sharp claws. As whelps, barghests are nearly indistinguishable from wolves, except for their size and claws. As they grow larger and stronger, their skin darkens to bluishred and eventually becomes blue altogether.

A full-grown barghest is about 6 feet long and weighs 180 pounds. A barghest's eyes glow orange when the creature becomes excited.

Borghests speak Goblin, Worg, and Infernal.

COMBAT

Borghests can claw and bite, no matter what their form, and usually disdain weapons. Though they love killing, they have little stomach for direct combat and attack from ambush whenever possible. Barghests start a combat by using *crushing despair* and *charm monster* to keep opponents off balance. They try to stay away from the enemy's main strength.

A barghest's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction. Its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*blink*, *levitate*, *misdirection* (DC 14), *rage* (DC 15); 1/day—*charm monster* (DC 16), *crushing despair* (DC 16), *dimension door*. Caster level equals the barghest's HD.

The save DCs are Charisma-based.

Feed (Su): When a barghest slays a humanoid opponent, it can feed on the corpse, devouring both flesh and life force, as a

full-round action. Feeding destroys the victim's body and prevents any form of raising or resurrection that requires part of the corpse. There is a 50% chance that a *wish*, *miracle*, or *true resurrection* spell can restore a devoured victim to life. Check once for each destroyed creature. If the check fails, the creature cannot be brought back to life by mortal magic.

A barghest advances in Hit Dice by consuming corpses in this fashion. For every three suitable corpses a barghest devours, it gains 1 Hit Die, and its Strength, Constitution, and natural armor increase by +1. Its attack bonus and saves improve as normal for an outsider of its Hit Dice, and it gains skill points, feats, and ability score improvements normally.

The barghest only advances by consuming the corpses of creatures whose Hit Dice or levels are equal to or greater than its own current total. A barghest that reaches 9 Hit Dice through feeding immediately becomes a greater barghest upon completion of the act.

Change Shape (Su): A barghest can assume the shape of a goblin or a wolf as a standard action. In goblin form, a barghest cannot use its natural weapons but can wield weapons and wear armor. In wolf form, a barghest loses its claw attacks but retains its bite attack.

Pass Without Trace (Ex): A barghest in wolf form can use pass without trace (as the spell) as a free action.

Skills: *A barghest in wolf form gains a +4 circumstance bonus on Hide checks.

GREATER BARGHEST

A barghest that reaches 9 Hit Dice through feeding becomes a greater barghest. These creatures can change shape into a goblinlike creature of Large size (about 8 feet tall and 400 pounds) or a dire wolf. In goblin form, a greater barghest cannot use its natural weapons but can wield weapons and wear armor. In dire wolf form, a greater barghest loses its claw attacks but retains its bite attack.

A greater barghest can reach a maximum of 18 Hit Dice through feeding.

Spell-Like Abilities: In addition to the spelllike abilities all barghests possess, a greater barghest gains the following abilities. At will—*invisibility sphere*; 1/day—*mass bull's strength*, *mass enlarge*. Caster level equals the greater barghest's HD.

COMBAT

Occasionally, a greater barghest uses a magic two-handed weapon in combat instead of its claws, giving it multiple attacks (attack bonus +13/+8). It can also make one bite attack (attack bonus +8) each round. The save DC against a greater barghest's spell-like abilities is 14 + spell level.

A basilisk is a reptilian monster that petrifies living creatures with a mere gaze. A basilisk usually has a dull brown body with a yellowish underbelly. Some specimens sport a short, curved horn atop the nose. An adult basilisk's body grows to about 6 feet long, not including its tail, which can reach an additional length of 5 to 7 feet. The creature weighs about 300 pounds.

COMBAT

A basilisk relies on its gaze attack, biting only when opponents come within reach. Though it has eight legs, its slow metabolism renders it relatively sluggish, so it does not expend energy unnecessarily. Intruders who flee a basilisk rather than fight can expect, at best, a halfhearted pursuit. These creatures tend to spend most of their time lying in wait for prey, which includes small mammals, birds, reptiles, and similar creatures.

Petrifying Gaze (Su): Turn to stone permanently, range 30 feet; Fortitude DC 13 negates. The save DC is Charisma-based.

Skills: *The basilisk's dull coloration and its ability to remain motionless for long periods of time grant it a +4 racial bonus on Hide checks in natural settings.

ABYSSAL GREATER BASILISK

COMBAT

The save DC for the abyssal greater basilisk's petrifying gaze (DC 21) is adjusted for its greater Hit Dice and higher Charisma score.

An abyssal greater basilisk's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Smite Good (Su): Once per day an abyssal greater basilisk can make a normal melee attack to deal an extra 18 points of damage against a good foe.

BEHIR

Huge Magical Beast

Hit Dice:	9d10+45 (94 hp)
Initiative:	+1
Speed:	40 ft. (8 squares), climb 15 ft.

Advancement:	10–13 HD (Huge); 14–27 HD (Gargantuan)
Level Adjustment:	—

The behir is a serpentine monster that can slither like a snake or use its dozen legs to move with considerable speed. A behir is about 40 feet long and weighs about 4,000 pounds. It can fold its limbs close to its long, narrow body and slither in snake fashion if it desires. The coloration of behirs ranges from ultramarine to deep blue with bands of gray-brown. The belly is pale blue. The two large horns curving back over the head look dangerous but are actually used for preening the creature's scales, not for fighting.

Behirs speak Common.

COMBAT

A behir usually bites and grabs its prey first, then either swallows or constricts the opponent. It can employ its claws only against foes caught in its coils. If beset by a large number of foes, it uses its breath weapon.

Breath Weapon (Su): 20-foot line, once every 10 rounds, damage 7d6 electricity, Reflex DC 19 half. The save DC is Constitution-based.

Constrict (Ex): A behir deals 2d8+8 points of damage with a successful grapple check. It can make six rake attacks against a grappled foe as well.

Improved Grab (Ex): To use this ability, a behir must hit a creature of any size with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

If it wins the grapple check, it establishes a hold and can attempt to constrict the opponent or swallow the opponent in the following round.

Rake (Ex): Six claws, attack bonus +15 melee, damage 1d4+4.

Swallow Whole (Ex): A behir can try to swallow a grabbed Medium or smaller opponent by making a successful grapple check.

A behir that swallows an opponent can use its Cleave feat to bite and grab another opponent.

A swallowed creature takes 2d8+8 points of bludgeoning damage and 8 points of acid damage per round from the behir's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 15). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out.

A behir's gizzard can hold 2 Medium, 8 Small, 32 Tiny, or 128 Diminutive or smaller opponents.

Skills: Behirs have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

BELKER

Large Elemental (Air, Extraplanar)

Hit Dice:	7d8+7 (38 hp)
Initiative:	+5

Alignment:	Usually neutral evil
Advancement:	8–10 HD (Large); 11–21 HD (Huge)
Level Adjustment:	—

Belkers are creatures from the Plane of Air. They are composed primarily of smoke. Although undeniably evil, they are very reclusive and usually have no interest in the affairs of others. A belker's winged shape makes it look distinctly demonic. It is about 7 feet long and weighs about 8 pounds.

Belkers speak Auran.

COMBAT

In most cases, a belker fights with its nasty claws and painful bite.

Smoke Claws (Ex): A belker in smoke form (see below) can engulf opponents by moving on top of them. It fills the air around one Medium or smaller opponent without provoking an attack of opportunity. The target must succeed on a DC 14

Fortitude save or inhale part of the creature. The save DC is Constitution-based. Smoke inside the victim solidifies into a claw and begins to rip at the surrounding organs, dealing 3d4 points of damage per round. An affected creature can attempt another Fortitude save each subsequent round to cough out the semivaporous menace.

Smoke Form (Su): Most of the time a belker is more or less solid, but at will it can assume smoke form. It can switch forms once per round as a free action and can spend up to 20 rounds per day in smoke form. A belker in smoke form can fly at a speed of 50 feet (perfect). The ability is otherwise similar to a *gaseous form* spell (caster level 7th).

Skills: Belkers have a +4 racial bonus on Move Silently checks.

Advancement:	5–7 HD (Medium); 8–12 HD (Large)
Level Adjustment:	+2 (cohort)

The blink dog is an intelligent canine that has a limited teleportation ability.

Blink dogs have their own language, a mixture of barks, yaps, whines, and growls that can transmit complex information.

COMBAT

Blink dogs hunt in packs, teleporting in a seemingly random fashion until they surround their prey, allowing some of them to take advantage of flanking.

Blink (Su): A blink dog can use *blink* as the spell (caster level 8th), and can evoke or end the effect as a free action.

Dimension Door (Su): A blink dog can teleport, as *dimension door* (caster level 8th), once per round as a free action. The ability affects only the blink dog, which never appears within a solid object and can act immediately after teleporting.

Bodaks are the undead remnants of humanoids who have been destroyed by the touch of absolute evil.

A bodak retains fleeting memories of its past life and can speak Common (or some other humanoid language).

COMBAT

Death Gaze (Su): Death, range 30 feet, Fortitude DC 15 negates. Humanoids who die from this attack are transformed into bodaks 24 hours later. The save DC is Charisma-based.

Vulnerability to Sunlight (Ex): Bodaks loathe sunlight, for its merest touch burns their impure flesh. Each round of exposure to the direct rays of the sun deals 1 point of damage to the creature.

BRALANI

Medium Outsider (Chaotic, Extraplanar, Good)

Hit Dice:	6d8+18 (45 hp)
Initiative:	+8
Speed:	40 ft. (8 squares), fly 100 ft. (perfect)

Level Adjustment:	+5

In addition to their natural form, bralans can assume the shape of a whirlwind or zephyr of dust, snow, or sand.

Bralanis speak Celestial, Infernal, and Draconic, but can communicate with almost any creature, thanks to their *tongues* ability.

Combat

Bralanis prefer the scimitar and bow, the weapons of the desert nomads they most closely resemble.

A bralani's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and good-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will— *blur*, *charm person* (DC 13), *gust of wind* (DC 14), *mirror image*, *wind wall*; 2/day— *lightning bolt* (DC 15), *cure serious wounds* (DC 15). Caster level 6th. The save DCs are Charisma-based.

Whirlwind Blast (Su): When in whirlwind form, a bralani can attack with a scouring blast of wind, dealing 3d6 points of damage in a 20-foot line (Reflex DC 16 half). The save DC is Constitution-based.

Alternate Form (Su): A bralani can shift between its humanoid and whirlwind forms as a standard action. In humanoid form, it cannot fly or use its whirlwind blast, but it can use its spell-like abilities and its weapons. In whirlwind form, it can fly, make slam attacks and whirlwind blast attacks, and use spell-like abilities.

A bralani remains in one form until it chooses to assume a new one. A change in form cannot be dispelled, nor does the bralani revert to any particular form when killed. A *true seeing* spell, however, reveals both forms simultaneously.

Tongues (Su): Bralanis can speak with any creature that has a language, as though using a *tongues* spell (caster level 14th). This ability is always active.

Bugbears speak Goblin and Common.

COMBAT

Bugbears prefer to ambush opponents whenever possible. When hunting, they normally send scouts ahead of the main group that, if they spy prey, return to report and bring up reinforcements.

Bugbear attacks are coordinated, and their tactics are sound if not brilliant.

Skills: Bugbears have a +4 racial bonus on Move Silently checks.

BUGBEARS AS CHARACTERS

Bugbear characters possess the following racial traits.

— +4 Strength, +2 Dexterity, +2 Constitution, –2 Charisma.

— Medium size.

— A bugbear's base land speed is 30 feet.

— Darkvision out to 60 feet.

— Racial Hit Dice: A bugbear begins with three levels of humanoid, which provide 3d8 Hit Dice, a base attack bonus of +2,

and base saving throw bonuses of Fort +1, Ref +3, and Will +1.

—Racial Skills: A bugbear's humanoid levels give it skill points equal to 6×2 (2 + Int modifier). Its class skills are Climb, Hide, Listen, Move Silently, Search, and Spot.

—Racial Feats: A bugbear's humanoid levels give it two feats.

— +3 natural armor bonus.

— +4 racial bonus on Move Silently checks.

—Automatic Languages: Common, Goblin. Bonus Languages: Draconic, Elven, Giant, Gnoll, Orc.

—Favored Class: Rogue.

Also known as the landshark, the bulette is a terrifying predator that lives only to eat.

COMBAT

A bulette attacks anything it regards as edible, choosing the easiest or closest prey first. The only creatures it refuses to eat are elves (and it dislikes the taste of dwarves). When burrowing underground, a landshark relies on its tremorsense ability to detect prey.

When it senses something edible (that is, senses movement), it breaks to the surface, crest first, and begins its attack.

Leap (Ex): A bulette can jump into the air during combat. This allows it to make four claw attacks instead of two, each with a +15 attack bonus, but it cannot bite.

CELESTIAL CREATURE

Celestial creatures dwell on the upper planes, the realms of good, although they resemble beings found on the Material Plane. They are more regal and more beautiful than their earthly counterparts.

Celestial creatures often come in metallic colors (usually silver, gold, or platinum). They can be mistaken for half-celestials, more powerful creatures that are created when a celestial mates with a non-celestial creature.

CREATING A CELESTIAL CREATURE

“Celestial” is an inherited template that can be added to any corporeal animal, aberration, animal, dragon, fey, giant, humanoid, magical beast, monstrous humanoid, plant, or vermin of good or neutral alignment (referred to hereafter as the base creature).

A celestial creature uses all the base creature’s statistics and abilities except as noted here. Do not recalculate the creature’s Hit Dice, base attack bonus, saves, or skill points if its type changes.

Size and Type: Animals or vermin with this template become magical beasts, but otherwise the creature type is unchanged.

Size is unchanged. Celestial creatures encountered on the Material Plane have the extraplanar subtype.

Special Attacks: A celestial creature retains all the special attacks of the base creature and also gains the following attack.

Smite Evil (Su): Once per day a celestial creature can make a normal melee attack to deal extra damage equal to its HD (maximum of +20) against an evil foe.

Special Qualities: A celestial creature retains all the special qualities of the base creature and also gains the following qualities.

—Darkvision out to 60 feet.

—Damage reduction (see the table below).

—Resistance to acid, cold, and electricity (see the table below).

—Spell resistance equal to HD + 5 (maximum 25).

Hit Dice	Resistance to Acid, Cold, Electricity	Damage Reduction
1–3	5	—
4–7	5	5/magic
8–11	10	5/magic
12 or more	10	10/magic

If the base creature already has one or more of these special qualities, use the better value.

If a celestial creature gains damage reduction, its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Abilities: Same as the base creature, but Intelligence is at least 3.

Environment: Any good-aligned plane.

Challenge Rating: HD 3 or less, as base creature; HD 4 to 7, as base creature +1; HD 8 or more, as base creature +2.

Alignment: Always good (any).

Level Adjustment: Same as the base creature +2.

A centaur is as big as a heavy horse, but much taller and slightly heavier. A centaur is about 7 feet tall and weighs about 2,100 pounds.

Centaurs speak Sylvan and Elven.

COMBAT

A centaur employing a lance deals double damage when it charges, just as a rider on a mount does.

CENTAURS AS CHARACTERS

A centaur druid is usually a tribe's designated leader and speaker. Centaur characters possess the following racial traits.

— +8 Strength, +4 Dexterity, +4 Constitution, -2 Intelligence, +2 Wisdom.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/5 feet.

— A centaur's base land speed is 50 feet.

— Darkvision out to 60 feet.

— Racial Hit Dice: A centaur begins with four levels of monstrous humanoid, which provide 4d8 Hit Dice, a base attack bonus of +4, and base saving throw bonuses of Fort +1, Ref +4, and Will +4.

— Racial Skills: A centaur's monstrous humanoid levels give it skill points equal to $7 \times e^{\frac{1}{2}}$ (2 + Int modifier). Its class skills are Listen, Move Silently, Spot, and Survival.

— Racial Feats: A centaur's monstrous humanoid levels give it two feats.

— +3 natural armor bonus.

— Automatic Languages: Sylvan, Elven. Bonus Languages: Common, Gnome, Halfling.

— Favored Class: Ranger.

Advancement:	9–12 HD (Medium); 13–24 HD (Large)
Level Adjustment:	—

The horrific creatures known as chaos beasts have mutable, ever-changing forms. A chaos beast's dimensions vary, but it always weighs about 200 pounds.

Chaos beasts do not speak.

COMBAT

For all its fearsome appearances, whether it has claws, fangs, pincers, tentacles, or spines, a chaos beast does little physical harm. Regardless of form, the creature seems unable to manage more than two attacks per round. Its continual transmutations prevent the coordination needed to do more.

A chaos beast's claw attacks, as well as any weapons it wields, are treated as chaotic-aligned for the purpose of overcoming damage reduction.

Corporeal Instability (Su): A blow from a chaos beast against a living creature can cause a terrible transformation. The creature must succeed on a DC 15 Fortitude save or become a spongy, amorphous mass. Unless the victim manages to control the effect (see below), its shape melts, flows, writhes, and boils. The save DC is Constitution-based.

An affected creature is unable to hold or use any item. Clothing, armor, rings, and helmets become useless. Large items worn or carried—armor, backpacks, even shirts—hamper more than help, reducing the victim's Dexterity score by 4. Soft or misshapen feet and legs reduce speed to 10 feet or one-quarter normal, whichever is less. Searing pain courses along the nerves, so strong that the victim cannot act coherently. The victim cannot cast spells or use magic items, and it attacks blindly, unable to distinguish friend from foe (−4 penalty on attack rolls and a 50% miss chance, regardless of the attack roll). Each round the victim spends in an amorphous state causes 1 point of Wisdom drain from mental shock. If the victim's Wisdom score falls to 0, it becomes a chaos beast.

A victim can regain its own shape by taking a standard action to attempt a DC 15 Charisma check (this check DC does not vary for a chaos beast with different Hit Dice or ability scores). A success reestablishes the creature's normal form for 1 minute. On a failure, the victim can still repeat this check each round until successful.

Corporeal instability is not a disease or a curse and so is hard to remove. A *shapechange* or *stoneskin* spell does not cure an afflicted creature but fixes its form for the duration of the spell. A *restoration*, *heal*, or *greater restoration* spell removes the affliction (a separate *restoration* is necessary to restore any drained points of Wisdom).

Immunity to Transformation (Ex): No mortal magic can permanently affect or fix a chaos beast's form. Effects such as polymorphing or petrification force the creature into a new shape, but at the start of its next turn it immediately returns to its mutable form as a free action.

Alignment:	Usually chaotic evil
Advancement:	10–13 HD (Large); 14–27 HD (Huge)
Level Adjustment:	+2 (cohort)

A chimera is about 5 feet tall at the shoulder, nearly 10 feet long, and weighs about 4,000 pounds. A chimera's dragon head might be black, blue, green, red, or white.

Chimeras can speak Draconic but seldom bother to do so, except when toadying to more powerful creatures.

COMBAT

The chimera prefers to surprise prey. It often swoops down from the sky or lies concealed until it charges. The dragon head can loose a breath weapon instead of biting. Several chimeras attack in concert.

Breath Weapon (Su): A chimera's breath weapon depends on the color of its dragon head, as summarized on the table below. Regardless of its type, a chimera's breath weapon is usable once every 1d4 rounds, deals 3d8 points of damage, and allows a DC 17 Reflex save for half damage. The save DC is Constitution-based.

To determine a chimera's head color and breath weapon randomly, roll 1d10 and consult the table below.

1d10	Head Color	Breath Weapon
1–2	Black	40-foot line of acid
3–4	Blue	40-foot line of lightning
5–6	Green	20-foot cone of gas (acid)
7–8	Red	20-foot cone of fire
9–10	White	20-foot cone of cold

Skills: A chimera's three heads give it a +2 racial bonus on Spot and Listen checks.

*In areas of scrubland or brush, a chimera gains a +4 racial bonus on Hide checks.

Carrying Capacity: A light load for a chimera is up to 348 pounds; a medium load, 349–699 pounds, and a heavy load, 700–1,050 pounds.

CHOKER

Small Aberration	
Hit Dice:	3d8+3 (16 hp)
Initiative:	+6
Speed:	20 ft. (4 squares), climb 10 ft.
Armor Class:	17 (+1 size, +2 Dex, +4 natural), touch 13, flat-footed 15
Base Attack/Grapple:	+2/+5
Attack:	Tentacle +6 melee (1d3+3)
Full Attack:	2 tentacles +6 melee (1d3+3)

Special Attacks:	Improved grab, constrict 1d3+3
Special Qualities:	Darkvision 60 ft., quickness
Saves:	Fort +2, Ref +5, Will +4
Abilities:	Str 16, Dex 14, Con 13, Int 4, Wis 13, Cha 7
Skills:	Climb +13, Hide +10, Move Silently +6
Feats:	Improved Initiative ^B , Lightning Reflexes, Stealthy
Environment:	Underground
Organization:	Solitary
Challenge Rating:	2
Treasure:	1/10 coins; 50% goods; 50% items
Alignment:	Usually chaotic evil
Advancement:	4–6 HD (Small); 7–12 HD (Medium)

Level Adjustment:

These vicious little predators lurk underground, grabbing whatever prey happens by. Its hands and feet have spiny pads that help the choker grip almost any surface. The creature weighs about 35 pounds.

Chokers speak Undercommon.

COMBAT

A choker likes to perch near the ceiling, often at intersections, archways, wells, or staircases, and reach down to attack its prey. A choker attacks creatures of almost any size, but prefers lone prey of its size or larger. If one is very hungry, it may attack a group, but it waits to grab the last creature in line.

Constrict (Ex): A choker deals 1d3+3 points of damage with a successful grapple check against a Large or smaller creature. Because it seizes its victim by the neck, a creature in the choker's grasp cannot speak or cast spells with verbal components.

Improved Grab (Ex): To use this ability, a choker must hit a Large or smaller opponent with a tentacle attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict. Chokers receive a +4 racial bonus on grapple checks, which is already included in the statistics block.

Quickness (Su): Although not particularly dexterous, a choker is supernaturally quick. It can take an extra standard action or move action during its turn each round.

Skills: A chokers has a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

CHUUL

	Large Aberration (Aquatic)
Hit Dice:	11d8+44 (93 hp)
Initiative:	+7
Speed:	30 ft. (6 squares), swim 20 ft.
Armor Class:	22 (-1 size, +3 Dex, +10 natural), touch 12, flat-footed 19
Base Attack/Grapple:	+8/+17
Attack:	Claw +12 melee (2d6+5)
Full Attack:	2 claws +12 melee (2d6+5)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Constrict 3d6+5, improved grab, paralytic tentacles
Special Qualities:	Amphibious, darkvision 60 ft., immunity to poison
Saves:	Fort +7, Ref +6, Will +9
Abilities:	Str 20, Dex 16, Con 18, Int 10, Wis 14, Cha 5
Skills:	Hide +13, Listen +11, Spot +11, Swim +13
Feats:	Alertness, Blind-Fight, Combat Reflexes, Improved Initiative
Environment:	Temperate marshes
Organization:	Solitary, pair, or pack (3–5)
Challenge Rating:	7
Treasure:	1/10th coins; 50% goods; standard items
Alignment:	Usually chaotic evil
Advancement:	12–16 HD (Large); 17–33 HD (Huge)
Level Adjustment:	—

A horrible mix of crustacean, insect, and serpent, the chuul is an abomination that lurks submerged or partially submerged, awaiting intelligent prey to devour. Although amphibious, chuuls are not good swimmers and actually prefer to be on land or in very shallow water when they attack. A chuul is about 8 feet long and weighs 650 pounds.

Chuuls speak Common (or Undercommon, for the underground variety).

COMBAT

A chuul prefers to wait by the shore, submerged in murky water, until it hears nearby prey (in or out of the water) that it can attack with surprise. A chuul grabs with its claws and constricts its foe, then passes the opponent to its paralytic tentacles. It tries to always have one claw free, so if it faces a large number of opponents, it drops a paralyzed or dead victim and continues attempting to grab, constrict, and paralyze the rest.

Constrict (Ex): On a successful grapple check, a chuul deals 3d6+5 points of damage.

Improved Grab (Ex): To use this ability, a chuul must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict or on its next turn transfer a grabbed opponent to its tentacles.

Paralytic Tentacles (Ex): A chuul can transfer grabbed victims from a claw to its tentacles as a move action. The tentacles grapple with the same strength as the claw but deal no damage. However, they exude a paralytic secretion. Anyone held in the tentacles must succeed on a DC 19 Fortitude save each round on the chuul's turn or be paralyzed for 6 rounds. The save DC is Constitution-based. While held in the tentacles, paralyzed or not, a victim automatically takes 1d8+2 points of damage each round from the creature's mandibles.

Amphibious (Ex): Although chuuls are aquatic, they can survive indefinitely on land.

Skills: A chuul has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

CLOAKER

	Large Aberration
Hit Dice:	6d8+18 (45 hp)
Initiative:	+7
Speed:	10 ft. (2 squares), fly 40 ft. (average)
Armor Class:	19 (-1 size, +3 Dex, +7 natural), touch 12, flat-footed 16
Base Attack/Grapple:	+4/+13
Attack:	Tail slap +8 melee (1d6+5)
Full Attack:	Tail slap +8 melee (1d6+5) and bite +3 melee (1d4+2)
Space/Reach:	10 ft./10 ft. (5 ft. with bite)

Special Attacks:	Moan, engulf
Special Qualities:	Darkvision 60 ft., shadow shift
Saves:	Fort +5, Ref +5, Will +7
Abilities:	Str 21, Dex 16, Con 17, Int 14, Wis 15, Cha 15
Skills:	Hide +8, Listen +13, Move Silently +12, Spot +13
Feats:	Alertness, Combat Reflexes, Improved Initiative
Environment:	Underground
Organization:	Solitary, mob (3–6), or flock (7–12)
Challenge Rating:	5
Treasure:	Standard
Alignment:	Usually chaotic neutral
Advancement:	7–9 HD (Large); 10–18 HD (Huge)

Level Adjustment:

When resting or lying in wait, these creatures are almost impossible to distinguish from common black cloaks (the cloaker's ivory claws look very much like bone clasps). Only when it unfurls does the horrific nature of the creature become apparent. A cloaker has a wingspan of about 8 feet. It weighs about 100 pounds.

Cloakers speak Undercommon.

COMBAT

Cloakers usually lie still, watching and listening for prey. If facing a single opponent, a cloaker uses its engulf attack. Against multiple foes, it lashes with its tail in concert with its moan and shadow shift abilities to reduce the opposition's numbers, then engulfs a survivor. Multiple cloakers usually split up, leaving one or two behind to use special abilities while the rest make melee attacks.

Moan (Ex): A cloaker can emit a dangerous subsonic moan as a standard action. By changing the frequency, the cloaker can cause one of four effects. Cloakers are immune to these sonic, mindaffecting attacks. Unless otherwise specified, a creature that successfully saves against one of these effects cannot be affected by the same moan effect from the same cloaker for 24 hours. All save DCs for moan effects are Charisma-based.

Unnerve: Anyone within a 60-foot spread automatically takes a –2 penalty on attack and damage rolls. Those forced to hear the moan for more than 6 consecutive rounds must succeed on a DC 15 Will save or enter a trance, unable to attack or defend themselves until the moaning stops.

Fear: Anyone within a 30-foot spread must succeed on a DC 15 Will save or become panicked for 2 rounds.

Nausea: Anyone in a 30-foot cone must succeed on a DC 15 Fortitude save or be overcome by nausea and weakness.

Affected characters fall prone and become nauseated for 1d4+1 rounds.

Stupor: A single creature within 30 feet of the cloaker must succeed on a DC 15 Fortitude save or be affected as though by a *hold monster* spell for 5 rounds. Even after a successful save, the creature must repeat the save if the cloaker uses this effect again.

Engulf (Ex): A cloaker can try to wrap a Medium or smaller creature in its body as a standard action. The cloaker attempts a grapple that does not provoke an attack of opportunity. If it wins the grapple check, it establishes a hold and bites the engulfed victim with a +4 bonus on its attack roll. It can still use its whiplike tail to strike at other targets.

Attacks that hit an engulfing cloaker deal half their damage to the monster and half to the trapped victim.

Shadow Shift (Su): A cloaker can manipulate shadows. This ability is effective only in shadowy areas and has three possible effects.

Obscure Vision: The cloaker gains concealment (20% miss chance) for 1d4 rounds.

Dancing Images: This effect duplicates a *mirror image* spell (caster level 6th).

Silent Image: This effect duplicates a *silent image* spell (DC 15, caster level 6th). The save DC is Charisma-based.

COCKATRICE

Small Magical Beast

Hit Dice:	5d10 (27 hp)
Initiative:	+3
Speed:	20 ft. (4 squares), fly 60 ft. (poor)
Armor Class:	14 (+1 size, +3 Dex), touch 14, flat-footed 11
Base Attack/Grapple:	+5/-1
Attack:	Bite +9 melee (1d4–2 plus petrification)
Full Attack:	Bite +9 melee (1d4–2 plus petrification)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Petrification

Special Qualities:	Darkvision 60 ft., low-light vision
Saves:	Fort +4, Ref +7, Will +2
Abilities:	Str 6, Dex 17, Con 11, Int 2, Wis 13, Cha 9
Skills:	Listen +7, Spot +7
Feats:	Alertness, Dodge, Weapon Finesse ^B
Environment:	Temperate plains
Organization:	Solitary, pair, flight (3–5), or flock (6–13)
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	6–8 HD (Small); 9–15 HD (Medium)

Level Adjustment: —

A male cockatrice has wattles and a comb, just like a rooster. Females, much rarer than males, differ only in that they have no wattles or comb. A cockatrice weighs about 25 pounds.

COMBAT

A cockatrice fiercely attacks anything that it deems a threat to itself or its lair. Flocks of cockatrices do their utmost to overwhelm and confuse their foes, and sometimes fly directly into their opponents' faces.

Petrification (Su): Creatures hit by a cockatrice's bite attack must succeed on a DC 12 Fortitude save or instantly turn to stone. The save DC is Constitution-based. Cockatrices have immunity to the petrification ability of other cockatrices, but other petrification attacks affect them normally.

COUATL

	Large Outsider (Native)
Hit Dice:	9d8+18 (58 hp)
Initiative:	+7
Speed:	20 ft. (4 squares), fly 60 ft. (good)
Armor Class:	21 (–1 size, +3 Dex, +9 natural), touch 12, flat-footed 18
Base Attack/Grapple:	+9/+17
Attack:	Bite +12 melee (1d3+6 plus poison)
Full Attack:	Bite +12 melee (1d3+6 plus poison)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Constrict 2d8+6, improved grab, poison, psionics, spells
Special Qualities:	Darkvision 60 ft., ethereal jaunt, telepathy 90 ft.
Saves:	Fort +8, Ref +9, Will +10
Abilities:	Str 18, Dex 16, Con 14, Int 17, Wis 19, Cha 17
Skills:	Concentration +14, Diplomacy +17, Jump +0, Knowledge (any two) +15, Listen +16, Search +15, Sense Motive +16, Spellcraft +15 (+17 scrolls), Spot +16, Survival +4 (+6 following tracks), Tumble +15, Use Magic Device +15 (+17 scrolls)
Feats:	Dodge, Empower Spell, Eschew Materials ^B , Hover, Improved Initiative
Environment:	Warm forests
Organization:	Solitary, pair, or flight (3–6)
Challenge Rating:	10
Treasure:	Standard
Alignment:	Always lawful good
Advancement:	10–13 HD (Large); 14–27 HD (Huge)
Level Adjustment:	+7

A couatl is about 12 feet long, with a wingspan of about 15 feet. It weighs about 1,800 pounds.

Couatls speak Celestial, Common, and Draconic, and also have the power of telepathy (see below).

COMBAT

A couatl uses its *detect thoughts* ability on any creature that arouses its suspicions. Since it is highly intelligent, a couatl usually casts spells from a distance before closing. If more than one couatl is involved, they discuss their strategy before a battle.

Constrict (Ex): A couatl deals 2d8+6 points of damage with a successful grapple check.

Improved Grab (Ex): To use this ability, a couatl must hit a creature of up to two size categories larger with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Poison (Ex): Injury, Fortitude DC 16, initial damage 2d4 Str, secondary damage 4d4 Str.

The save DC is Constitution-based.

Psionics (Sp): At will—*detect chaos, detect evil, detect good, detect law, detect thoughts* (DC 15), *invisibility, plane shift* (DC 20), *polymorph* (self only). Effective caster level 9th. The save DCs are Charisma-based.

Spells: A couatl casts spells as a 9th-level sorcerer.

It can choose its spells known from the sorcerer list, the cleric list, and from the lists for the Air, Good, and Law domains.

The cleric spells and domain spells are considered arcane spells for a couatl, meaning that the creature does not need a divine focus to cast them.

Typical Spells Known (6/7/7/7/4; save DC 13 + spell level): 0—*cure minor wounds, daze, disrupt undead, light, obscuring mist, ray of frost, read magic, resistance*; 1st—*endure elements, mage armor, protection from chaos, true strike, wind wall*; 2nd—*cure moderate wounds, eagle's splendor, scorching ray, silence*; 3rd—*gaseous form, magic circle against evil, summon monster III*; 4th—*charm monster, freedom of movement*.

Ethereal Jaunt (Su): This ability works like the *ethereal jaunt* spell (caster level 16th).

Telepathy (Su): A couatl can communicate telepathically with any creature within 90 feet that has an Intelligence score. The creature can respond to the couatl if it wishes—no common language is needed.

MONSTERS (D-De)

DARKMANTLE

Small Magical Beast

Hit Dice:	1d10+1 (6 hp)
Initiative:	+4
Speed:	20 ft. (4 squares), fly 30 ft. (poor)
Armor Class:	17 (+1 size, +6 natural), touch 11, flat-footed 17
Base Attack/Grapple:	+1/+0
Attack:	Slam +5 melee (1d4+4)
Full Attack:	Slam +5 melee (1d4+4)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Darkness, improved grab, constrict 1d4+4
Special Qualities:	Blindsight 90 ft.
Saves:	Fort +3, Ref +2, Will +0
Abilities:	Str 16, Dex 10, Con 13, Int 2, Wis 10, Cha 10
Skills:	Hide +10, Listen +5*, Spot +5*
Feats:	Improved Initiative
Environment:	Underground
Organization:	Solitary, pair, clutch (3–9), or swarm (6–15)
Challenge Rating:	1
Treasure:	None
Alignment:	Always neutral
Advancement:	2–3 HD (Small)

Level Adjustment: —

The darkmantle hangs from a ceiling by a muscular “foot” at the top of its body. It can look like a stalactite, by holding its tentacles stiffly under itself, or like a lump of rock, spreading its tentacles so the membrane between them covers its body. Its shell and skin usually resemble limestone, but a darkmantle can change its color to match almost any type of stony background.

A darkmantle is about 4 feet long from the tips of its tentacles to the top of its head. It weighs about 30 pounds.

COMBAT

A darkmantle attacks by dropping onto its prey and wrapping its tentacles around the opponent’s head. Once attached, it squeezes and tries to suffocate the foe. A darkmantle that misses its initial attack often flies up and tries to drop on the opponent again.

Darkness (Su): Once per day a darkmantle can cause darkness as the *darkness* spell (caster level 5th). It most often uses this ability just before attacking.

Improved Grab (Ex): To use this ability, a darkmantle must hit a Large or smaller creature with its slam attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

If it wins the grapple check, it attaches to the opponent’s head and can constrict.

Constrict (Ex): A darkmantle deals 1d4+4 points of damage with a successful grapple check.

Blindsight (Ex): A darkmantle can “see” by emitting high-frequency sounds, inaudible to most other creatures, that allows it to ascertain objects and creatures within 90 feet. A *silence* spell negates this ability and effectively blinds the darkmantle.

Skills: A darkmantle has a +4 racial bonus on Listen and Spot checks.

These bonuses are lost if its blindsight is negated. The creature’s variable coloration gives it a +4 racial bonus on Hide checks.

DELVER

Huge Aberration

Hit Dice:	15d8+78 (145 hp)
Initiative:	+5
Speed:	30 ft. (6 squares), burrow 10 ft.
Armor Class:	24 (−2 size, +1 Dex, +15 natural), touch 9, flat-footed 23

Base Attack/Grapple:	+11/+27
Attack:	Slam +17 melee (1d6+8 plus 2d6 acid)
Full Attack:	2 slams +17 melee (1d6+8 plus 2d6 acid)
Space/Reach:	15 ft./10 ft.
Special Attacks:	Corrosive slime
Special Qualities:	Darkvision 60 ft., immunity to acid, stone shape, tremorsense 60 ft.
Saves:	Fort +12, Ref +6, Will +11
Abilities:	Str 27, Dex 13, Con 21, Int 14, Wis 14, Cha 12

Feats:	Alertness, Blind-Fight, Great Fortitude, Improved Initiative, Power Attack, Toughness
Environment:	Underground
Organization:	Solitary
Challenge Rating:	9
Treasure:	None
Alignment:	Usually neutral
Advancement:	16–30 HD (Huge); 31–45 HD (Gargantuan)

Level Adjustment:

—
A delver is about 15 feet long and 10 feet wide. It weighs about 6,000 pounds.

Delvers speak Terran and Undercommon.

COMBAT

A delver prefers to fight from its tunnel, which it uses to protect its flanks while lashing out with its flippers.

A delver expecting trouble may honeycomb an area with tunnels, leaving most closed with layers of stone 1 or 2 inches thick. The delver can quickly dissolve the stone cover and pop up to attack unexpectedly.

Corrosive Slime (Ex): A delver produces a mucuslike slime that contains a highly corrosive substance. The slime is particularly effective against stone. A delver's mere touch deals 2d6 points of acid damage to organic creatures or objects. Against metallic creatures or objects, a delver's slime deals 4d8 points of damage, and against stony creatures (including earth elementals) or objects it deals 8d10 points of damage. A slam attack by a delver leaves a patch of slime that deals 2d6 points of damage on contact and another 2d6 points of damage in each of the next 2 rounds. A large quantity (at least a quart) of water or weak acid, such as vinegar, washes off the slime. An opponent's armor and clothing dissolve and become useless immediately unless the wearer succeeds on a DC 22 Reflex save. Weapons that strike a delver also dissolve immediately unless the wielder succeeds on a DC 22 Reflex save. A creature attacking a delver with natural weapons takes damage from its slime each time an attack hits unless the creature succeeds on a DC 22 Reflex save. These save DCs are Constitution-based.

Stone Shape (Ex): A delver can alter its slime to temporarily soften stone instead of dissolving it. Once every 10 minutes, a delver can soften and shape up to 25 cubic feet of stone, as a *stone shape* spell (caster level 15th).

DEMON

Demons are a race of creatures native to chaotic evil-aligned planes. They are ferocity personified and will attack any creature just for the sheer fun of it—even other demons.

Demon Traits: Most demons possess the following traits (unless otherwise noted in a creature's entry).

—Immunity to electricity and poison.

—Resistance to acid 10, cold 10, and fire 10.

—*Summon* (Sp): Many demons share the ability to summon others of their kind (the success chance and type of demon summoned are noted in each monster description). Demons are often reluctant to use this power until in obvious peril or extreme circumstances.

—Telepathy.

Except where otherwise noted, demons speak Abyssal, Celestial, and Draconic.

BABAU

Medium Outsider (Chaotic, Extraplanar, Evil)

Hit Dice:	7d8+35 (66 hp)
Initiative:	+1

Speed:	30 ft. (6 squares)
Armor Class:	19 (+1 Dex, +8 natural), touch 11, flat-footed 18
Base Attack/Grapple:	+7/+12
Attack:	Claw +12 melee (1d6+5)
Full Attack:	2 claws +12 melee (1d6+5) and bite +7 melee (1d6+2)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Sneak attack +2d6, spell-like abilities, <i>summon demon</i>
Special Qualities:	Damage reduction 10/cold iron or good, darkvision 60 ft., immunity to electricity and poison, protective slime, resistance to acid 10, cold 10, and fire 10, spell resistance 14, telepathy 100 ft.
Saves:	Fort +10, Ref +6, Will +6
Abilities:	Str 21, Dex 12, Con 20, Int 14, Wis 13, Cha 16
Skills:	Climb +15, Disable Device +12, Disguise +13, Escape Artist +11, Hide +19, Listen +19, Move Silently +19, Open Lock +11, Search +20, Sleight of Hand +11, Survival +1 (+3 following tracks), Use Rope +1 (+3 with bindings)
Feats:	Cleave, Multiattack, Power Attack
Environment:	A chaotic evil-aligned plane
Organization:	Solitary or gang (3–6)
Challenge Rating:	6
Treasure:	Standard
Alignment:	Always chaotic evil
Advancement:	8–14 HD (Large); 15–21 HD (Huge)

Level Adjustment:

A babau is about 6 feet tall and weighs about 140 pounds.

Combat

Babaus are sneaky and sly. They attack the most powerful foe first, hoping to eliminate the true threats quickly and then toy with the rest. When ambushing their opponents, they make excellent use of the combination of multiple attacks and sneak attacks.

A babau's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Sneak Attack (Ex): A babau can make a sneak attack like a rogue, dealing an extra 2d6 points of damage whenever a foe is denied his or her Dexterity bonus, or when the babau is flanking.

Spell-Like Abilities: At will—*darkness*, *dispel magic*, *see invisibility*, *greater teleport* (self plus 50 pounds of objects only). Caster level 7th.

Protective Slime (Su): A slimy red jelly coats the babau's skin. Any weapon that touches it takes 1d8 points of acid damage from the corrosive goo, and the weapon's hardness does not reduce this damage. A magic weapon may attempt a DC 18 Reflex save to avoid taking this damage. A creature who strikes the babau with an unarmed attack, unarmed strike, touch spell, or natural weapon takes this damage as well but can negate the damage with a DC 18 Reflex save. The save DCs are Constitution-based.

Summon Demon (Sp): Once per day a babau can attempt to summon 1 babau with a 40% chance of success. This ability is the equivalent of a 3rd-level spell.

Skills: Babaus have a +8 racial bonus on Hide, Listen, Move Silently, and Search checks.

BALOR

Feats:	Cleave, Improved Initiative, Improved Two-Weapon Fighting, Power Attack, Quicken Spell-Like Ability (<i>telekinesis</i>), Two-Weapon Fighting, Weapon Focus (longsword)
Environment:	A chaotic evil-aligned plane
Organization:	Solitary or troupe (1 balor, 1 marilith, and 2–5 hezrous)
Challenge Rating:	20
Treasure:	Standard coins; double goods; standard items, plus +1 <i>voral greatsword</i> and +1 <i>flaming whip</i>
Alignment:	Always chaotic evil
Advancement:	21–30 HD (Large); 31–60 HD (Huge)

Level Adjustment:

A balor stands about 12 feet tall. Its skin is usually dark red. It weighs about 4,500 pounds.

Combat

Balors love to join battle armed with their swords and whips. If they face stiff resistance, they may teleport away to loose a few spell-like effects at the foe.

A balor's +1 *flaming whip* is a long, flexible weapon with many tails tipped with hooks, spikes, and balls. The weapon deals bludgeoning and slashing damage, in addition to fire damage.

A balor's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Death Throes (Ex): When killed, a balor explodes in a blinding flash of light that deals 100 points of damage to anything within 100 feet (Reflex DC 30 half). This explosion automatically destroys any weapons the balor is holding. The save DC is Constitution-based.

Entangle (Ex): A balor's +1 *flaming whip* entangles foes much like an attack with a net. The whip has 20 hit points. The whip needs no folding. If it hits, the target and the balor immediately make opposed Strength checks; if the balor wins, it drags the target against its flaming body (see below). The target remains anchored against the balor's body until it escapes the whip.

Spell-Like Abilities: At will—*blasphemy* (DC 25), *dominate monster* (DC 27), *greater dispel magic*, *greater teleport* (self plus 50 pounds of objects only), *insanity* (DC 25), *power word stun*, *telekinesis* (DC 23), *unholy aura* (DC 26); 1/day—*fire storm* (DC 26), *implosion* (DC 27). Caster level 20th. The save DCs are Charisma-based.

Voral Sword (Su): Every balor carries a +1 *voral longsword* that looks like a flame or a bolt of lightning.

Summon Demon (Sp): Once per day a balor can automatically summon 4d10 dretches, 1d4 hezrous, or one nalfeshnee, glabrezu, marilith, or balor. This ability is the equivalent of a 9th-level spell.

Flaming Body (Su): The body of a balor is wreathed in flame.

Anyone grappling a balor takes 6d6 points of fire damage each round.

True Seeing (Su): Balors have a continuous true seeing ability, as the spell (caster level 20th).

Skills: Balors have a +8 racial bonus on Listen and Spot checks.

Tactics Round-by-Round

The balor is most effective as a ranged combatant, using its spell-like abilities to attack from a distance.

Prior to combat: *Unholy aura*.

Round 1: *Fire storm* or *implosion* and quickened *telekinesis*, or summon additional demons. If the balor does not deem itself

seriously threatened, it conserves abilities usable only once per day and uses *blasphemy* instead.

Round 2: Insanity or power word stun.

Round 3: Full melee attack with weapons, including entangle with whip.

Round 4: Teleport or fly away with entangled foe to reestablish range; repeat round 1 and continue.

A balor who wants to drive off or neutralize a party without slaying its foes avoids lethal attacks.

Prior to combat: Unholy aura.

Round 1: Dominate monster.

Round 2: Power word stun.

Round 3: Insanity or telekinesis to incapacitate or repel a dangerous opponent.

Round 4: Teleport or fly away to reestablish range; repeat round 1 and continue.

Environment:	A chaotic evil-aligned plane
Organization:	Solitary
Challenge Rating:	10
Treasure:	None
Alignment:	Always chaotic evil
Advancement:	13–18 HD (Huge); 19–36 HD (Gargantuan)

Level Adjustment: —

Bebiliths are enormous, predatory, arachnid demons that hunt other demons. A bebilith has a body the size of a plow horse, with legs spanning more than 14 feet. It weighs more than two tons.

Bebiliths understand but do not speak Abyssal. Their telepathy allows them to communicate silently with one another.

COMBAT

A bebilith attacks any creature it sees. It usually picks one target and concentrates its attacks on that opponent, using its webs to isolate the target from its comrades. Should the bebilith become overwhelmed by tougher opponents, it often attempts to bite one or more of its victims and retreats, allowing its poison to do its work.

A bebilith's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Poison (Ex): Injury, Fortitude DC 24, initial damage 1d6 Con, secondary damage 2d6 Con. Bebilith venom is highly perishable, losing its potency and becoming inert, foul-smelling goo almost as soon as it comes into contact with air. The save DC is Constitution-based.

Rend Armor (Ex): If a bebilith hits with both claw attacks, it pulls apart any armor worn by its foe. This attack deals 4d6+18 points of damage to the opponent's armor. Creatures not wearing armor are unaffected by this special attack. Armor reduced to 0 hit points is destroyed. Damaged armor may be repaired with a successful Craft (armorsmithing) check.

Web (Ex): A bebilith can throw a web up to four times per day. This is similar to an attack with a net but has a maximum range of 30 feet, with a range increment of 10 feet. This attack is effective against targets of up to Gargantuan size. The web anchors the target in place, allowing no movement.

An entangled creature can escape with a DC 24 Escape Artist check or burst the web with a DC 24 Strength check. The check DCs are Constitution-based. The web has 14 hit points and hardness 0. There is a 75% chance that the webbing will not burn if any sort of fire is applied to it (check each round).

Plane Shift (Su): This ability affects only the bebilith. It is otherwise similar to the spell (caster level 12th).

Skills: A bebilith has mottled coloration that gives it a +8 racial bonus on Hide checks.

DRETCH

Small Outsider (Chaotic, Extraplanar, Evil)

Hit Dice:	2d8+4 (13 hp)
Initiative:	+0

Feats:	Multiaction
Environment:	A chaotic evil-aligned plane
Organization:	Solitary, pair, gang (3–5), crowd (6–15), or mob (10–40)
Challenge Rating:	2
Treasure:	None
Alignment:	Always chaotic evil
Advancement:	3–6 HD (Small)
Level Adjustment:	+2

A dretch is about 4 feet tall and weighs about 60 pounds.

Dretches cannot speak but can communicate telepathically.

Combat

Dretches are slow, stupid, and not very effective combatants. In one-on-one combat, they rely on their damage reduction to keep them alive. In groups, they depend on sheer numbers to overcome foes and immediately summon other dretches to improve the odds in battle. They flee at the first sign of adversity unless more powerful demons are present to intimidate them into fighting. Dretches' fear of their greater kin is stronger than even their fear of death.

A dretch's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: 1/day—*scare* (DC 12), *stinking cloud* (DC 13). Caster level 2nd. The save DCs are Charisma-based.

Summon Demon (Sp): Once per day a dretch can attempt to summon another dretch with a 35% chance of success. This ability is the equivalent of a 1st-level spell.

Telepathy (Su): Dretches can communicate telepathically with creatures within 100 feet that speak Abyssal.

GLABREZU

Huge Outsider (Chaotic, Extraplanar, Evil)

Hit Dice:	12d8+120 (174 hp)
Initiative:	+0

Feats:	Cleave, Great Cleave, Multiattack, Persuasive, Power Attack
Environment:	A chaotic evil-aligned plane
Organization:	Solitary or troupe (1 glabrezu, 1 succubus, and 2–5 vrocks)
Challenge Rating:	13
Treasure:	Standard coins; double goods; standard items
Alignment:	Always chaotic evil
Advancement:	13–18 HD (Huge); 19–36 HD (Gargantuan)

Level Adjustment: —

Like succubi, glabrezu tempt victims into ruin, but they lure their prey with power or wealth rather than passion.

Glabrezu have penetrating violet eyes, and their skin color ranges from deep russet to pitch black. A glabrezu stands about 15 feet tall and weighs about 5,500 pounds.

Combat

Glabrezu prefer subterfuge to combat. However, if their attempts to entice or deceive fail, these enormous demons attack with a vengeance. They follow a *confusion* attack with melee attacks, hoping to finish off wounded foes with *chaos hammer* or *unholy blight*.

A glabrezu's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Improved Grab (Ex): To use this ability, a glabrezu must hit a Medium or smaller opponent with a pincer attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Spell-Like Abilities: At will—*chaos hammer* (DC 19), *confusion* (DC 19), *dispel magic*, *mirror image*, *reverse gravity* (DC 22), *greater teleport* (self plus 50 pounds of objects only), *unholy blight* (DC 19); 1/day—*power word stun*. Caster level 14th. The save DCs are Charisma-based.

Once per month, a glabrezu can fulfill a *wish* for a mortal humanoid. The demon can use this ability to offer a mortal whatever he or she desires—but unless the *wish* is used to create pain and suffering in the world, the glabrezu demands either terrible evil acts or great sacrifice as compensation.

Summon Demon (Sp): Once per day a glabrezu can attempt to summon 4d10 dretches or 1d2 vrocks with a 50% chance of success, or another glabrezu with a 20% chance of success. This ability is the equivalent of a 4th-level spell.

True Seeing (Su): Glabrezu continuously use true seeing as the spell (caster level 14th).

Skills: Glabrezu have a +8 racial bonus on Listen and Spot checks.

HEZROU

Large Outsider (Chaotic, Extraplanar, Evil)

Hit Dice:	10d8+93 (138 hp)

Alignment:	Always chaotic evil
Advancement:	11–15 HD (Large); 16–30 HD (Huge)
Level Adjustment:	+9

A hezrou can walk both upright and on all fours, but it always fights standing up

A hezrou is about 8 feet tall and weighs about 750 pounds.

Combat

Hezrous enjoy melee combat even more than vrocks do. They eagerly press an attack deep into the heart of enemy forces, so their stench can take effect as quickly as possible. They enter most battles by using *blasphemy*, and follow it with an occasional *chaos hammer* or *unholy blight*, depending on the alignment of their opponents.

A hezrou's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Improved Grab (Ex): To use this ability, a hezrou must hit with both claw attacks. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Spell-Like Abilities: At will—*chaos hammer* (DC 18), *greater teleport* (self plus 50 pounds of objects only), *unholy blight* (DC 18); 3/day—*blasphemy* (DC 21), *gaseous form*. Caster level 13th. The save DCs are Charisma-based.

Stench (Ex): A hezrou's skin produces a foul-smelling, toxic liquid whenever it fights. Any living creature (except other demons) within 10 feet must succeed on a DC 24 Fortitude save or be nauseated for as long as it remains within the affected area and for 1d4 rounds afterward. Creatures that successfully save are sickened for as long as they remain in the area. A creature that successfully saves cannot be affected again by the same hezrou's stench for 24 hours. A *delay poison* or *neutralize poison* spell removes either condition from one creature. Creatures that have immunity to poison are unaffected, and creatures resistant to poison receive their normal bonus on their saving throws.. The save DC is Constitution-based.

Summon Demon (Sp): Once per day a hezrou can attempt to summon 4d10 dretches or another hezrou with a 35% chance of success. This ability is the equivalent of a 4th-level spell.

Skills: Hezrous have a +8 racial bonus on Listen and Spot checks.

Environment:	A chaotic evil-aligned plane
Organization:	Solitary or pair
Challenge Rating:	17
Treasure:	Standard coins; double goods; standard items, plus 1d4 magic weapons
Alignment:	Always chaotic evil
Advancement:	17–20 HD (Large); 21–48 HD (Huge)

Level Adjustment: —

A marilith usually holds a longsword in each of its six hands and wears many bangles and jewels.

A marilith stands about 9 feet tall and measures about 20 feet from head to tip of tail. It weighs about 4,000 pounds.

Combat

Though mariliths thrive on grand strategy and army-level tactics, they love physical combat and never pass up an opportunity to fight. Each of a marilith's six arms can wield a weapon, and the creature gets an additional three weapon attacks with its primary arm. Mariliths seldom rush headlong into battle, however, preferring to hang back and size up the situation first. They always seek to gain the best possible advantage from the local terrain, obstacles, and any vulnerability or weakness in their opponents.

A marilith's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Constrict (Ex): A marilith deals 4d6+13 points of damage with a successful grapple check. The constricted creature must succeed on a DC 27 Fortitude save or lose consciousness for as long as it remains in the coils and for 2d4 rounds thereafter. The save DC is Strength-based.

Improved Grab (Ex): To use this ability, a marilith must hit with its tail slap attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it succeeds on the grapple check, it can constrict.

Spell-Like Abilities: At will—*align weapon, blade barrier* (DC 23), *magic weapon, project image* (DC 23), *polymorph, see invisibility, telekinesis* (DC 22), *greater teleport* (self plus 50 pounds of objects only), *unholy aura* (DC 25). Caster level 16th. The save DCs are Charisma-based.

Summon Demon (Sp): Once per day a marilith can attempt to summon 4d10 dretches, 1d4 hezrou, or one nalfeshnee with a 50% chance of success, or one glabrezu or another marilith with a 20% chance of success. This ability is the equivalent of a 5th-level spell.

True Seeing (Su): Mariliths continuously use this ability, as the spell (caster level 16th).

Skills: Mariliths have a +8 racial bonus on Listen and Spot checks.

Feats: In combination with its natural abilities, a marilith's Multiweapon Fighting feat allows it to attack with all its arms at no penalty.

NALFESHNEE

Huge Outsider (Chaotic, Extraplanar, Evil)

Hit Dice:	14d8+112 (175 hp)

Feats:	Cleave, Improved Bull Rush, Multiattack, Power Attack, Weapon Focus (bite)
Environment:	A chaotic evil-aligned plane
Organization:	Solitary or troupe (1 nalfeshnee, 1 hezrou, and 2–5 vrocks)
Challenge Rating:	14
Treasure:	Standard coins; double goods; standard items
Alignment:	Always chaotic evil
Advancement:	15–20 HD (Huge); 21–42 HD (Gargantuan)

Level Adjustment:

A nalfeshnee can fly despite its small wings.

A nalfeshnee is more than 20 feet tall and weighs 8,000 pounds.

Combat

When fulfilling their duties in the underworld, nalfeshnees usually disdain combat as being beneath them. Given the opportunity, they succumb to blood lust and do battle. They disable opponents with their smite ability and slaughter them while they can't fight back.

A nalfeshnee's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Smite (Su): Three times per day a nalfeshnee can create a nimbus of unholy light. When the demon triggers the ability, rainbow-colored beams play around its body. One round later they burst in a 60-foot radius. Any creature within this area must succeed on a DC 22 Will save or be dazed for 1d10 rounds as visions of its worst fears hound it. The creature receives its full Dexterity and shield bonuses to AC if attacked but can take no actions. Other demons are immune to this effect. The save DC is Charisma-based.

Spell-Like Abilities: At will—*call lightning* (DC 18), *feeblemind* (DC 20), *greater dispel magic*, *slow* (DC 18), *greater teleport* (self plus 50 pounds of objects only), *unholy aura* (DC 23). Caster level 12th. The save DCs are Charisma-based.

Summon Demon (Sp): Twice per day a nalfeshnee can attempt to summon 1d4 vrocks, 1d4 hezrous, or one glabrezu with a 50% chance of success, or another nalfeshnee with a 20% chance of success. This ability is the equivalent of a 5th-level spell.

True Seeing (Su): Nalfeshnees continuously use true seeing, as the spell (caster level 14th).

Skills: Nalfeshnees have a +8 racial bonus on Listen and Spot checks.

QUASIT

Feats:	Improved Initiative, Weapon Finesse
Environment:	A chaotic evil-aligned plane
Organization:	Solitary
Challenge Rating:	2
Treasure:	None
Alignment:	Always chaotic evil
Advancement:	4–6 HD (Tiny)
Level Adjustment:	— (Improved Familiar)

In its natural form, a quasit stands about 1-1/2 feet tall and weighs about 8 pounds. Quasits speak Common and Abyssal.

Combat

Although quasits thirst for victory and power as other demons do, they are cowards at heart. They typically attack from ambush, using their alternate form ability and *invisibility* to get within reach, then try to scuttle away. When retreating, they use their *cause fear* ability to deter pursuit.

A quasit's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Poison (Ex): Injury, Fortitude DC 13, initial damage 1d4 Dex, secondary damage 2d4 Dex. The save DC is Constitution-based and includes a +2 racial bonus.

Spell-Like Abilities: At will—*detect good*, *detect magic*, and *invisibility* (self only); 1/day—*cause fear* (as the spell, except that its area is a 30-foot radius from the quasit, save DC 11). Caster level 6th.

The save DCs are Charisma-based.

Once per week a quasit can use *commune* to ask six questions. The ability otherwise works as the spell (caster level 12th).

Alternate Form (Su): A quasit can assume other forms at will as a standard action. This ability functions as a *polymorph* spell cast on itself (caster level 12th), except that a quasit does not regain hit points for changing form, and any individual quasit can assume only one or two forms no larger than Medium. Common forms include bat, monstrous centipede, toad, and wolf. A quasit in alternate form loses its poison attack.

RETRIEVER

	Huge Construct (Extraplanar)
Hit Dice:	10d10+80 (135 hp)

A retriever specializes in recovering lost or desired objects, runaway slaves, and enemies and bringing them back to its master. A retriever has a body the size of an ox, with legs spanning more than 14 feet. It weighs about 6,500 pounds.

Combat

Retrievers attack with four claws, but their eye rays are far more deadly.

Eye Rays (Su): A retriever's eyes can produce four different magical rays with a range of 100 feet. Each round, it can fire one ray as a free action. A particular ray is usable only once every 4 rounds. A retriever can fire an eye ray in the same round that it makes physical attacks. The save DC for all rays is 18. The save DC is Dexterity-based.

The four eye effects are:

Fire: Deals 12d6 points of fire damage to the target (Reflex half).

Cold: Deals 12d6 points of cold damage to the target (Reflex half).

Electricity: Deals 12d6 points of electricity damage to the target (Reflex half).

Petrification: The target must succeed on a Fortitude save or turn to stone permanently.

Find Target (Sp): When ordered to find an item or a creature, a retriever does so unerringly, as though guided by *discern location*.

The being giving the order must have seen (or must have an item belonging to) the creature to be found, or must have touched the object to be located. This ability is the equivalent of an 8th-level spell.

Improved Grab (Ex): To use this ability, a retriever must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and grips the opponent fast in its mouth. This is the method by which it usually “retrieves” things.

A succubus is 6 feet tall in its natural form and weighs about 125 pounds.

Combat

Succubi are not warriors. They flee combat whenever they can. If forced to fight, they can attack with their claws, but they prefer to turn foes against one another. Succubi use their *polymorph* ability to assume humanoid guise, and can maintain this

deception indefinitely. Their preferred tactic when dealing with heroes is to feign friendship and create an opportunity to be alone with one of them, whereupon the succubus applies her life-draining kiss. Succubi are not above taking on the role of a damsel in distress when encountered within a dungeon.

A succubus's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Energy Drain (Su): A succubus drains energy from a mortal it lures into some act of passion, or by simply planting a kiss on the victim. If the target is not willing to be kissed, the succubus must start a grapple, which provokes an attack of opportunity. The succubus's kiss or embrace bestows one negative level. The kiss also has the effect of a *suggestion* spell, asking the victim to accept another kiss from the succubus. The victim must succeed on a DC 21 Will save to negate the effect of the *suggestion*. The DC is 21 for the Fortitude save to remove a negative level. These save DCs are Charisma-based.

Spell-Like Abilities: At will—*charm monster* (DC 22), *detect good*, *detect thoughts* (DC 20), *ethereal jaunt* (self plus 50 pounds of objects only), *polymorph* (humanoid form only, no limit on duration), *suggestion* (DC 21), *greater teleport* (self plus 50 pounds of objects only). Caster level 12th. The save DCs are Charisma-based.

Summon Demon (Sp): Once per day a succubus can attempt to summon 1 vrock with a 30% chance of success. This ability is the equivalent of a 3rd-level spell.

Tongues (Su): A succubus has a permanent tongues ability (as the spell, caster level 12th). Succubi usually use verbal communication with mortals.

Skills: Succubi have a +8 racial bonus on Listen and Spot checks.

*While using her *polymorph* ability, a succubus gains a +10 circumstance bonus on Disguise checks.

A vrock is about 8 feet tall and weighs about 500 pounds.

Combat

Vrocks are vicious fighters who like to fly down into the enemy and cause as much damage as possible. They prance about in battle, taking briefly to the air and bringing their clawed feet into play. Despite their advantage in mobility, the vrocks' deep love of battle frequently leads them into melee combats against heavy odds.

A vrock's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Dance of Ruin (Su): To use this ability, a group of at least three vrocks must join hands in a circle, dancing wildly and chanting. At the end of 3 rounds of dancing, a wave of crackling energy flashes outward in a 100-foot radius. All creatures except for demons within the radius take 20d6 points of damage (Reflex DC 18 half). Stunning, paralyzing, or slaying one of the vrocks stops the dance. The save DC is Charisma-based.

Spell-Like Abilities: At will—*mirror image*, *telekinesis* (DC 18), *greater teleport* (self plus 50 pounds of objects only); 1/day—*heroism*. Caster level 12th. The save DCs are Charisma-based.

Spores (Ex): A vrock can release masses of spores from its body once every 3 rounds as a free action. The spores automatically deal 1d8 points of damage to all creatures adjacent to the vrock. They then penetrate the skin and grow, dealing an additional 1d4 points of damage each round for 10 rounds. At the end of this time, the victim is covered with a tangle of viny growths. (The vines are harmless and wither away in 1d4 days.) A *delay poison* spell stops the spores' growth for its duration. *Bless*, *neutralize poison*, or *remove disease* kills the spores, as does sprinkling the victim with a vial of holy water.

Stunning Screech (Su): Once per hour a vrock can emit a piercing screech. All creatures except for demons within a 30-foot radius must succeed on a DC 22 Fortitude save or be stunned for 1 round. The save DC is Constitution-based.

Summon Demon (Sp): Once per day a vrock can attempt to summon 2d10 dretches or another vrock with a 35% chance of success. This ability is the equivalent of a 3rd-level spell.

Skills: Vrocks have a +8 racial bonus on Listen and Spot checks.

Treasure:	Standard coins; double goods; standard items
Alignment:	Usually chaotic evil
Advancement:	By character class
Level Adjustment:	— (+2 if sane)

Derro are afflicted by a form of racial madness, which most often manifests as delusions of grandeur coupled with an overpowering urge to inflict torment on other creatures. Derro are capable of holding their murderous impulses in check for short periods of time in order to cooperate with creatures of other races, but such arrangements rarely last more than a few weeks. Of course, no derro is capable of recognizing that he is out of his mind.

COMBAT

Derro are stealthy and bloodthirsty. They like to carefully arrange cruel traps and deadly ambushes, and strike savagely from hiding. They delight in taking captives who can be tortured to death later, and favor traps and poisons that disable without killing.

Madness (Ex): Derro use their Charisma modifier on Will saves instead of their Wisdom modifier, and have immunity to

confusion and *insanity* effects. A derro cannot be restored to sanity by any means short of a *miracle* or *wish* spell.

*The racial madness of the derro provides a +6 bonus to their Charisma scores and a -6 penalty to their Wisdom scores. A derro restored to sanity gains 6 points of Wisdom and loses 6 points of Charisma.

Poison Use (Ex): Derro typically carry 2d4 doses of greenblood oil or Medium monstrous spider venom, applying it to their crossbow bolts. Derro are not at risk of poisoning themselves when handling poison.

Sneak Attack (Ex): Any time a derro's opponent is denied his Dexterity bonus to AC, or if a derro flanks his opponent, he deals an extra 1d6 points of damage. This ability is just like the rogue's sneak attack and subject to the same limitations.

Spell-Like Abilities: At will—*darkness*, *ghost sound*; 1/day—*daze* (DC 13), *sound burst* (DC 15). Caster level 3rd. The save DCs are Charisma-based.

Vulnerability to Sunlight (Ex): A derro takes 1 point of Constitution damage for every hour it is exposed to sunlight, and it dies if its Constitution score reaches 0. Lost Constitution points are recovered at the rate of 1 per every 24-hour period spent underground or otherwise sheltered from the sun.

Skills: Derro have a +4 racial bonus on Hide and Move Silently checks.

Level Adjustment:

The dungeon-dwelling destrachan looks like some bizarre, nonintelligent beast, but it's an incredibly evil and crafty sadist. A destrachan has a pair of complex, three-part ears that it can adjust to be more or less sensitive to various sounds. It is blind, yet hunts with a sense of hearing more precise than most creatures' sight.

From its tubular mouth a destrachan emits carefully focused harmonics, producing sonic energy so powerful it can shatter a stone wall. So skilled is a destrachan at controlling the sounds it emits that it can choose what type of material to affect with its attack.

A destrachan is about 10 feet long from its mouth to the tip of the tail and weighs about 4,000 pounds.

A destrachan speaks no language but understands Common. If a destrachan must communicate, it does so through action.

COMBAT

A destrachan uses its claws only as a last resort or to finish off foes weakened by its sonic attacks. It often enters battle with surprise if possible. It first focuses on destroying metal armor and weapons and then changes to harmonics that disrupt flesh.

Destructive Harmonics (Su): A destrachan can blast sonic energy in a cone up to 80 feet long. It can also use this attack to affect any creatures or objects within a 30-foot radius. It can tune the harmonics of this destructive power to affect different types of targets. All save DCs are Charisma-based.

Flesh: Disrupting tissue and rending bone, this attack deals 4d6 points of damage to all within the area (Reflex DC 15 half).

Nerves: A destrachan can focus its harmonics to knock out foes rather than slay them. This attack deals 6d6 points of nonlethal damage to all within the area (Reflex DC 15 half).

Material: When using this form of harmonics, a destrachan chooses wood, stone, metal, or glass. All objects made of that

material within the area must succeed on a DC 15 Fortitude save or shatter. Objects (or portions of objects) that have up to 30 hit points are potentially affected by this attack.

Blindsight (Ex): A destrachan can use hearing to ascertain all foes within 100 feet as a sighted creature would.

Immunities: Destrachans have immunity to gaze attacks, visual effects, illusions, and other attack forms that rely on sight.

Protection from Sonics (Ex): While they can be affected by loud noises and sonic spells (such as *ghost sound* or *silence*), destrachans are less vulnerable to sonic attacks (+4 circumstance bonus on all saves) because they can protect their ears. A destrachan whose sense of hearing is impaired is effectively blinded, and all targets are treated as having total concealment.

Skills: A destrachan has a +10 racial bonus on Listen checks.

DEVIL

Devils are fiends from lawful evil-aligned planes.

Many devils are surrounded by a fear aura, which they use to break up powerful groups and defeat opponents piecemeal. Devils with spell-like abilities use their illusion abilities to delude and confuse foes as much as possible. A favorite trick is to create illusory reinforcements; enemies can never be entirely sure if a threat is only a figment or real summoned devils joining the fray.

Devil Traits: Most devils possess the following traits (unless otherwise noted in a creature's entry).

- Immunity to fire and poison.
- Resistance to acid 10 and cold 10.
- See in Darkness (Su): Some devils can see perfectly in darkness of any kind, even that created by a *deeper darkness* spell.
- Summon* (Sp): Some devils share the ability to summon others of their kind (the success chance and type of devils summoned are noted in each monster description).
- Telepathy.

Except when otherwise noted, devils speak Infernal, Celestial, and Draconic.

A barbed devil is about 7 feet tall and weighs about 300 pounds.

Combat

Barbed devils eagerly fight with their claws, trying to impale their opponents. They use *hold person* to immobilize those who avoid their hug attacks.

A barbed devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Fear (Su): A creature hit by a barbed devil must succeed on a DC 20 Will save or be affected as though by *fear* (caster level 9th).

Whether or not the save is successful, that creature cannot be affected by that same barbed devil's fear ability for 24 hours. The save DC is Charisma-based.

Impale (Ex): A barbed devil deals $3d8+9$ points of piercing damage to a grabbed opponent with a successful grapple check.

Improved Grab (Ex): To use this ability, a barbed devil must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can impale the opponent on its barbed body.

Summon Devil (Sp): Once per day a barbed devil can attempt to summon $1d6$ bearded devils or another barbed devil with a 35% chance of success. This ability is the equivalent of a 4th-level spell.

Barbed Defense (Su): Any creature striking a barbed devil with handheld weapons or natural weapons takes $1d8+6$ points of piercing and slashing damage from the devil's barbs. Note that weapons with exceptional reach, such as longspears, do not endanger their users in this way.

Spell-Like Abilities: At will—*greater teleport* (self plus 50 pounds of objects only), *hold person* (DC 16), *major image* (DC 17), *scorching ray* (2 rays only). 1/day—*order's wrath* (DC 18), *unholy blight* (DC 18). Caster level 12th. The save DCs are Charisma-based.

Every bearded devil carries a sawtoothed glaive.

A bearded devil stands 6 feet tall and weighs about 225 pounds.

Combat

Bearded devils are aggressive and love to fight. They revel in their battle frenzy, spreading mayhem among their foes.

A bearded devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the

purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*greater teleport* (self plus 50 pounds of objects only). Caster level 12th.

Infernal Wound (Su): The damage a bearded devil deals with its glaive causes a persistent wound. An injured creature loses 2 additional hit points each round. The wound does not heal naturally and resists healing spells. The continuing hit point loss can be stopped by a DC 16 Heal check, a *cure* spell, or a *heal* spell. However, a character attempting to cast a *cure* spell or a *heal* spell on a creature damaged by a bearded devil's glaive must succeed on a DC 16 caster level check, or the spell has no effect on the injured character.

A successful Heal check automatically stops the continuing hit point loss as well as restoring hit points. The infernal wound is a supernatural ability of the bearded devil, not of the weapon. The check DC is Constitution-based.

Beard (Ex): If a bearded devil hits a single opponent with both claw attacks, it automatically hits with its beard. The affected creature takes 1d8+2 points of damage and must succeed on a DC 16 Fortitude save or be infected with a vile disease known as devil chills (incubation period 1d4 days, damage 1d4 Str). Damage is dealt each day until the afflicted creature succeeds on three consecutive Fortitude saves, the disease is cured magically, or the creature dies. The save DC is Constitution-based.

Battle Frenzy (Ex): Twice per day, a bearded devil can work itself into a battle frenzy similar to the barbarian's rage (+4 Strength, +4 Constitution, +2 morale bonus on Will saves, -2 AC penalty). The frenzy lasts for 6 rounds, and the bearded devil suffers no ill effects afterward.

Summon Devil (Sp): Once per day a bearded devil can attempt to summon 2d10 lemures with a 50% chance of success, or another bearded devil with a 35% chance of success. This ability is the equivalent of a 3rd-level spell.

Bone devils stand about 9 feet tall and weigh about 500 pounds.

Combat

Bone devils hate all other creatures and attack ruthlessly. They freely use *wall of ice* to keep the enemy divided.

A bone devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Fear Aura (Su): Bone devils can radiate a 5-foot-radius fear aura as a free action. Affected creatures must succeed on a DC 17 Will save or be affected as though by a *fear* spell (caster level 7th). A creature that successfully saves cannot be affected again by the same bone devil's aura for 24 hours. Other devils are immune to the aura. The save DC is Charisma-based.

Poison (Ex): Injury, Fortitude DC 20, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

Spell-Like Abilities: At will—*greater teleport* (self plus 50 pounds of objects only), *dimensional anchor*, *fly*, *invisibility* (self only), *major image* (DC 15), *wall of ice*. Caster level 12th. The save DC is Charisma-based.

Summon Devil (Sp): Once per day a bone devil can attempt to summon 2d10 lemures with a 50% chance of success, or another bone devil with a 35% chance of success. This ability is the equivalent of a 4th-level spell.

Kytons are humanlike devils, wrapped in chains instead of clothing. A chain devil is 6 feet tall and weighs about 300 pounds, chains included.

Chain devils speak Infernal and Common.

Combat

A chain devil attacks by flailing away with the spiked chains that serve as its clothing, armor, and weapons.

A chain devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Dancing Chains (Su): A chain devil's most awesome attack is its ability to control up to four chains within 20 feet as a standard action, making the chains dance or move as it wishes. In addition, a chain devil can increase these chains' length by up to 15 feet and cause them to sprout razor-edged barbs. These chains attack as effectively as the devil itself. If a chain is in another creature's possession, the creature can attempt a DC 15 Will save to break the chain devil's power over that chain. If the save is successful, the kyton cannot attempt to control that particular chain again for 24 hours or until the chain leaves the creature's possession. The save DC is Charisma-based.

A chain devil can climb chains it controls at its normal speed without making Climb checks.

Unnerving Gaze (Su): Range 30 ft., Will DC 15 negates. A chain devil can make its face resemble one of an opponent's departed loved ones or bitter enemies. Those who fail their saves take a –2 penalty on attack rolls for 1d3 rounds. The save DC is Charisma-based.

Regeneration (Ex): Chain devils take normal damage from silvered weapons, good-aligned weapons, and spells or effects with the good descriptor. A chain devil that loses a piece of its body regrows it in 2d6x10 minutes. Holding the severed member against the stump enables it to reattach instantly.

Skills: Chain devils have a +8 racial bonus on Craft checks involving metalwork.

Unlike other devils, erinyes appear attractive to humans, resembling very comely women or men. An erinyes stands about 6 feet tall and weighs about 150 pounds.

Erinyes speak Infernal, Celestial, and Draconic.

Combat

Erinyes prefer to engage in combat from a distance. They use *charm monster* to distract or disorganize their opponents, then rain down fiery arrows from above.

An erinyes's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Entangle (Ex): Each erinyes carries a stout rope some 50 feet long that entangles opponents of any size as an *animate rope* spell (caster level 16th). An erinyes can hurl its rope 30 feet with no range penalty. Typically, an erinyes entangles a foe, lifts it into the air, and drops it from a great height.

Spell-Like Abilities: At will—*greater teleport* (self plus 50 pounds of objects only), *charm monster* (DC 19), *minor image* (DC 17), *unholly blight* (DC 19). Caster level 12th. The save DCs are Charisma-based.

Summon Devil (Sp): Once per day an erinyes can attempt to summon 2d10 lemures or 1d4 bearded devils with a 50% chance of success. This ability is the equivalent of a 3rd-level spell.

True Seeing (Su): Erinyes continuously use true seeing, as the spell (caster level 14th).

HELLCAT (BEZEKIRA)

Large Outsider (Evil, Extraplanar, Lawful)	
Hit Dice:	8d8+24 (60 hp)

Alignment:	Always lawful evil
Advancement:	9–10 HD (Large); 11–24 HD (Huge)

Level Adjustment:

While its appearance suggests it is incorporeal, a hellcat has a corporeal body and can be harmed by physical attacks. Hellcats use a natural telepathy to communicate with one another and those they encounter. A hellcat measures about 9 feet long and weighs about 900 pounds.

Combat

A hellcat can hold its own in combat thanks to sharp claws and wicked fangs. It prefers to leap upon opponents, just as a lion does.

A hellcat's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Improved Grab (Ex): To use this ability, a hellcat must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Pounce (Ex): If a hellcat charges, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +13 melee, damage 1d8+3.

Invisible in Light (Ex): A hellcat is invisible in any area lit well enough for a human to see. In a darkened area, it shows up as a faintly glowing outline visible up to 30 feet away (60 feet if the viewer has low-light vision). Magical darkness smothers the glow and conceals the outline.

Skills: Hellcats have a +4 racial bonus on Listen and Move Silently checks.

A horned devil is 9 feet tall and weighs about 600 pounds.

Combat

Horned devils are bold fighters. They rarely retreat, even against overwhelming odds. They love to fight with their spiked chains, usually singling out the most powerful foes to stun and eliminate quickly.

A horned devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*dispel chaos* (DC 21), *dispel good* (DC 21), *magic circle against good*, *greater teleport* (self plus 50 pounds of objects only); *persistent image* (DC 21) 3/day—*fireball* (DC 19), *lightning bolt* (DC 19). Caster level 15th. The save DCs are Charisma-based.

Fear Aura (Su): A horned devil can radiate a 5-foot-radius fear aura as a free action. A creature in the area must succeed on a DC 23 Will save or be affected as though by a *fear* spell (caster level 15th). A creature that successfully saves cannot be affected again by the same horned devil's aura for 24 hours. Other devils are immune to the aura. The save DC is Charisma-based.

Stun (Su): Whenever a horned devil hits with a spiked chain attack, the opponent must succeed on a DC 27 Fortitude save or be stunned for 1d4 rounds. The save DC is Strength-based. This ability is a function of the horned devil, not of the spiked chain.

Infernal Wound (Su): The damage a horned devil deals with its tail attack causes a persistent wound. An injured creature loses 2 additional hit points each round. The wound does not heal naturally and resists healing spells. The continuing hit point loss can be stopped by a DC 24 Heal check, a *cure* spell, or a *heal* spell. However, a character attempting to cast a *cure* spell or a *heal* spell on a creature damaged by a horned devil's tail must succeed on a DC 24 caster level check, or the spell has no effect on the injured character. A successful Heal check automatically stops the continuing hit point loss as well as restoring hit points. The check DC is Constitution-based.

Summon Devil (Sp): Once per day a horned devil can attempt to summon 2d10 lemures or 1d6 bearded devils with a 50% chance of success, 1d6 barbed devils with a 35% chance of success, or another horned devil with a 20% chance of success. This ability is the equivalent of a 6th-level spell.

Regeneration (Ex): A horned devil takes normal damage from good-aligned silvered weapons, and from spells or effects with the good descriptor.

An ice devil is about 12 feet tall and weighs about 700 pounds.

Combat

An ice devil prefers to fight only when doing so serves its mission, but it never hesitates to attack when it deems a battle necessary—or likely to end in its victory.

An ice devil's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Fear Aura (Su): An ice devil can radiate a 10-foot-radius fear aura as a free action. A creature in the area must succeed on a DC 22 Will save or be affected as though by a *fear* spell (caster level 13th). A creature that successfully saves cannot be affected again by the same ice devil's aura for 24 hours. Other devils are immune to the aura. The save DC is Charisma-based.

Slow (Su): A hit from an ice devil's tail or spear induces numbing cold. The opponent must succeed on a DC 23 Fortitude save or be affected as though by a *slow* spell for 1d6 rounds. The save DC is Constitution-based.

Spell-Like Abilities: At will—*cone of cold* (DC 20), *fly*, *ice storm* (DC 19), *greater teleport* (self plus 50 pounds of objects only), *persistent image* (DC 20), *unholy aura* (DC 23), *wall of ice* (DC 19). Caster level 13th. The save DCs are Charisma-based.

Summon Devil (Sp): Once per day an ice devil can attempt to summon 2d10 lemures or 1d6 bearded devils, 2d4 bone devils with a 50% chance of success, or another ice devil with a 20% chance of success. This ability is the equivalent of a 4th-level spell.

Regeneration (Ex): An ice devil takes normal damage from good-aligned weapons and from spells or effects with the good descriptor.

Level Adjustment:	— (Improved Familiar)

In its natural form, an imp stands almost 2 feet tall and weighs about 8 pounds.

Combat

Imps are craven, but not so timid as to pass up an opportunity for a surprise attack using their *invisibility* and alternate form ability. In its natural form, an imp attacks with the wicked stinger on its tail. It quickly flies out of reach if a foe manages to strike back effectively.

An imp's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Poison (Ex): Injury, Fortitude DC 13, initial damage 1d4 Dex, secondary damage 2d4 Dex. The save DC is Constitution-based and includes a +2 racial bonus.

Spell-Like Abilities: At will—*detect good*, *detect magic*, *invisibility* (self only); 1/day—*suggestion* (DC 15). Caster level 6th. The save DC is Charisma-based.

Once per week an imp can use *commune* to ask six questions. The ability otherwise works as the spell (caster level 12th).

Alternate Form (Su): An imp can assume other forms at will as a standard action. This ability functions as a *polymorph* spell cast on itself (caster level 12th), except that an imp does not regain hit points for changing form, and an individual imp can assume only one or two forms no larger than Medium. Common forms include monstrous spider, raven, rat, and boar.

Level Adjustment: —

A lemure is about 5 feet tall and weighs about 100 pounds.

Lemures are mindless and cannot communicate, but they are sensitive to telepathic messages from other devils, typically obeying a devil's mental commands.

Combat

Lemures surge toward anything they meet and try to claw it apart. Only a telepathic command from other devils or the complete destruction of the lemures can make them stop.

A lemure's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Mindless (Ex): Immunity to mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).

Level Adjustment:	—

A pit fiend often wraps its wings around itself like a grotesque cloak, and appears wreathed in flames.

A pit fiend is 12 feet tall and weighs 800 pounds.

Combat

Pit fiends are wily and resourceful fighters, using *invisibility* to gain the upper hand and biting at foes seemingly able to see

them. They don't hesitate to blanket an area with *fireballs*, and can call down the wrath of an inferno with *meteor swarm*. A pit fiend's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Constrict (Ex): A pit fiend deals 2d8+26 points of damage with a successful grapple check.

Disease (Su): A creature struck by a pit fiend's bite attack must succeed on a DC 27 Fortitude save or be infected with a vile disease known as devil chills (incubation period 1d4 days, damage 1d4 Str). The save DC is Constitution-based.

Fear Aura (Su): A pit fiend can radiate a 20-foot-radius fear aura as a free action. A creature in the area must succeed on a DC 27 Will save or be affected as though by a *fear* spell (caster level 18th). A creature that successfully saves cannot be affected again by the same pit fiend's aura for 24 hours. Other devils are immune to the aura. The save DC is Charisma-based.

Improved Grab (Ex): To use this ability, a pit fiend must hit with its tail slap attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

If it wins the grapple check, it establishes a hold and can constrict.

Poison (Ex): Injury, Fortitude DC 27, initial damage 1d6 Con, secondary damage death. The save DC is Constitution-based.

Spell-Like Abilities: At will—*blasphemy* (DC 25), *create undead*, *fireball* (DC 21), *greater dispel magic*, *greater teleport* (self plus 50 pounds of objects only), *invisibility*, *magic circle against good*, *mass hold monster* (DC 27), *persistent image* (DC 23), *power word stun*, *unholy aura* (DC 26); 1/day—*meteor swarm* (DC 27). Caster level 18th. The save DCs are Charisma-based.

Once per year a pit fiend can use *wish* as the spell (caster level 20th).

Summon Devil (Sp): Twice per day a pit fiend can automatically summon 2 lemures, bone devils, or bearded devils, or 1 erinyes, horned devil, or ice devil. This ability is the equivalent of an 8th-level spell.

Regeneration (Ex): A pit fiend takes normal damage from good-aligned silvered weapons, and from spells or effects with the good descriptor.

Tactics Round-by-Round

A pit fiend typically opens combat by using its spell-like abilities, attempting to neutralize dangerous opponents before entering melee.

Prior to combat: Unholy aura; activate fear aura, summon devil.

Round 1: Quickened *fireball* and *mass hold monster* if facing three or more visible, active opponents; otherwise *power word stun* against unarmored opponent (preferably a spellcaster).

Round 2: *Meteor swarm* against as many foes as possible, approach worst-injured enemy.

Round 3: Full attack against injured enemy.

Round 4: Continue melee against injured enemy, or *power word stun* against annoying spellcaster.

Round 5: Repeat from round 1, or *greater teleport* to safety if endangered.

Devourers lurk on the Ethereal Plane and the Astral Plane, stalking both natives and travelers with equal sadistic glee. A devourer is about 9 feet tall and weighs 500 pounds.

Devourers speak Common.

COMBAT

Even if it had no special abilities, a devourer would be a terrible opponent, for its bony claws can flay enemies alive.

Energy Drain (Su): Living creatures hit by a devourer's claw attack or *spectral hand* ability gain one negative level. The DC is 19 for the Fortitude save to remove a negative level. The save DC is Charisma-based.

Trap Essence (Su): The devourer is named for its ability to consume an enemy's life essence. To do so, it must forgo its normal melee attacks and make a trap essence attack. This requires a normal attack roll but deals no damage. The save DC is Charisma-based. A slain creature's essence is trapped within the devourer's ribs, and the tiny figure takes on that victim's features. The trapped essence cannot be raised or resurrected, but a *limited wish*, *miracle*, or *wish* spell frees it, as does destroying the devourer. A devourer can hold only one essence at a time.

The trapped essence provides a devourer with enough power to use five spell-like abilities for each Hit Die or level of the trapped creature. As this energy is expended, the twisted soul fades away until it evaporates completely. The trapped essence gains one negative level for every five times the devourer uses one of its spell-like abilities. When the essence's number of negative levels equals the creature's total Hit Dice or level, the essence is destroyed. If an essence is freed, the restored creature must succeed on a DC 19 Fortitude save for each negative level or lose that level permanently.

Spell-Like Abilities: At the start of any encounter, the trapped essence within a devourer is assumed to have 3d4+3 levels (enough fuel for thirty to seventy-five uses). Once per round, a devourer can use one of the following abilities: *confusion* (DC 17), *control undead* (DC 20), *ghoul touch* (DC 15), *lesser planar ally*, *ray of enfeeblement* (DC 14), *spectral hand*, *suggestion* (DC 16), *true seeing*. Caster level 18th. The save DCs are Charisma-based.

Spell Deflection (Su): The trapped essence provides a measure of magical protection. If any of the following spells are cast at the devourer and overcome its spell resistance, they affect the imprisoned essence instead: *banishment*, *chaos hammer*, *confusion*, *crushing despair*, *detect thoughts*, *dispel evil*, *dominate person*, *fear*, *geas/quest*, *holy word*, *hypnosis*, *imprisonment*, *magic jar*, *maze*, *suggestion*, *trap the soul*, or any form of charm or compulsion. In many cases, this deflection effectively neutralizes the spell. Some of these effects might eliminate the trapped essence, depriving the devourer of its spell-like abilities until it can consume another victim.

MONSTERS (Di-Do)

DIGESTER

Medium Magical Beast

Hit Dice:	8d10+24 (68 hp)
Initiative:	+6
Speed:	60 ft. (12 squares)
Armor Class:	17 (+2 Dex, +5 natural), touch 12, flat-footed 15
Base Attack/Grapple:	+8/+11
Attack:	Claw +11 melee (1d8+4)
Full Attack:	Claw +11 melee (1d8+4)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Acid spray
Special Qualities:	Darkvision 60 ft., immunity to acid, low-light vision, scent
Saves:	Fort +9, Ref +10, Will +3
Abilities:	Str 17, Dex 15, Con 17, Int 2, Wis 12, Cha 10
Skills:	Hide +9, Listen +6, Jump +21, Spot +6
Feats:	Alertness, Improved Initiative, Lightning Reflexes
Environment:	Warm forests
Organization:	Solitary or pack (3–6)
Challenge Rating:	6
Treasure:	None
Alignment:	Always neutral
Advancement:	9–12 HD (Medium); 13–24 HD (Large)
Level Adjustment:	—

A digester stands about 5 feet tall and is 7 feet long from snout to tail. It weighs about 350 pounds.

COMBAT

A digester is a hunting and eating machine. When it is not hungry (which is rarely), it lies low and avoids most other creatures. When hunting, it looks about for a likely target, then charges forth and delivers a gout of acid. If the initial attack is insufficient to kill the prey, the digester attacks with its hind feet until it can spray acid again.

Acid Spray (Ex): A digester can spray acid in a 20-foot cone, dealing 4d8 points of damage to everything in the area. Once a digester uses this ability, it can't use it again until 1d4 rounds later.

The creature can also produce a concentrated stream of acid that deals 8d8 points of damage to a single target within 5 feet. In either case, a DC 17 Reflex save halves the damage. The save DC is Constitution-based.

Skills: A digester's coloration gives it a +4 racial bonus on Hide checks. It also has a +4 racial bonus on Jump checks.

DINOSAUR

Dinosaurs come in many sizes and shapes. Bigger varieties have drab coloration, while smaller dinosaurs have more colorful markings. Most dinosaurs have a pebbly skin texture.

COMBAT

Dinosaurs take full advantage of their size and speed. The swift carnivores stalk prey, staying hidden in cover until they can get into charge range and rush to the attack. Herbivores frequently overrun and trample their opponents.

DEINONYCHUS

Large Animal

Hit Dice:	4d8+16 (34 hp)
Initiative:	+2
Speed:	60 ft. (12 squares)
Armor Class:	16 (−1 size, +2 Dex, +5 natural), touch 11, flat-footed 14
Base Attack/Grapple:	+3/+11
Attack:	Talons +6 melee (2d6+4)
Full Attack:	Talons +6 melee (2d6+4) and 2 foreclaws +1 melee (1d3+2) and bite +1 melee (2d4+2)

Space/Reach:	10 ft./5 ft.
Special Attacks:	Pounce
Special Qualities:	Low-light vision, scent
Saves:	Fort +8, Ref +6, Will +2
Abilities:	Str 19, Dex 15, Con 19, Int 2, Wis 12, Cha 10
Skills:	Hide +8, Jump +26, Listen +10, Spot +10, Survival +10
Feats:	Run, Track
Environment:	Warm forests
Organization:	Solitary, pair, or pack (3–6)
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	5–8 HD (Large)

Level Adjustment: —

A deinonychus is bright green along its back and flanks, with a much lighter shade of the same color on its underside. The body has darker spots or stripes. Its tail extends straight out behind itself, held aloft by an intricate structure of bony supports, thus allowing its weight to be carried entirely by the back legs. It weighs about 600 pounds.

Combat

A deinonychus uses a combination of speed, grasping forearms, large teeth, and hind legs with ripping talons. It hunts by running at prey, leaping, and ripping with its rear talons as it claws and bites. The talons count as one attack. A deinonychus has a relatively large brain for a dinosaur, and its pack hunts with cunning tactics.

Pounce (Ex): If a deinonychus charges, it can make a full attack.

Skills: A deinonychus has a +8 racial bonus on Hide, Jump, Listen, Spot, and Survival checks.

ELASMOSAURUS

Huge Animal

Hit Dice:	10d8+66 (111 hp)
Initiative:	+2
Speed:	20 ft. (4 squares), swim 50 ft.
Armor Class:	13 (−2 size, +2 Dex, +3 natural), touch 10, flat-footed 11
Base Attack/Grapple:	+7/+23
Attack:	Bite +13 melee (2d8+12)
Full Attack:	Bite +13 melee (2d8+12)
Space/Reach:	15 ft./10 ft.
Special Attacks:	—
Special Qualities:	Low-light vision, scent
Saves:	Fort +15, Ref +9, Will +4
Abilities:	Str 26, Dex 14, Con 22, Int 2, Wis 13, Cha 9
Skills:	Hide −4*, Listen +4, Spot +9, Swim +16
Feats:	Dodge, Great Fortitude, Toughness (2)
Environment:	Warm aquatic
Organization:	Solitary, pair, or herd (5–8)
Challenge Rating:	7
Treasure:	None
Alignment:	Always neutral
Advancement:	11–20 HD (Huge); 21–30 HD (Gargantuan)

Level Adjustment: —

Though it resides primarily in the water, an elasmosaurus only breathes air. An elasmosaurus has a total length of some 30 feet, including a tail half as long as its entire body, and weighs about 5,000 pounds. Observers who see only its head or tail might easily mistake it for a massive snake.

Combat

An elasmosaurus is aggressive and attacks anything it notices. The creature is strong, fast, and highly maneuverable, able to turn quickly and lunge at prey. When hunting, it travels with its head out of the water, snapping down quickly to seize prey.

Skills: *An elasmosaurus has a +8 racial bonus on Hide checks in water.

MEGARAPTOR

	Huge Animal
Hit Dice:	8d8+43 (79 hp)
Initiative:	+2
Speed:	60 ft. (12 squares)
Armor Class:	16 (-2 size, +2 Dex, +6 natural), touch 10, flat-footed 14
Base Attack/Grapple:	+6/+19
Attack:	Talons +9 melee (2d8+5)
Full Attack:	Talons +9 melee (2d8+5) and 2 foreclaws +4 melee (1d4+2) and bite +4 melee (2d6+2)
Space/Reach:	15 ft./10 ft.
Special Attacks:	Pounce
Special Qualities:	Low-light vision, scent
Saves:	Fort +10, Ref +8, Will +4

Skills:	Hide +5, Jump +27, Listen +12, Spot +12, Survival +12
Feats:	Run, Toughness, Track
Environment:	Warm forests
Organization:	Solitary, pair, or pack (3–6)
Challenge Rating:	6
Treasure:	None
Alignment:	Always neutral
Advancement:	9–16 HD (Huge); 17–24 HD (Gargantuan)

Level Adjustment: —

This creature is a larger version of the deinonychus, standing about 12 feet tall with a total length of 24 feet. It has the same appearance, habits, and abilities of the smaller version.

Pounce (Ex): If a megaraptor charges, it can make a full attack.

Skills: A megaraptor has a +8 racial bonus on Hide, Jump, Listen, Spot, and Survival checks.

TRICERATOPS

Organization:	Solitary, pair, or herd (5–8)
Challenge Rating:	9
Treasure:	None
Alignment:	Always neutral
Advancement:	17–32 HD (Huge); 33–48 HD (Gargantuan)

Level Adjustment: —

A triceratops has a body about 25 feet long and weighs about 20,000 pounds.

Combat

These creatures are likely to charge and skewer any creature of at least Large size that infringes on their territory. A triceratops uses its trample attack on smaller opponents.

Powerful Charge (Ex): When a triceratops charges, its gore attack deals 4d8+20 points of damage.

Trample (Ex): Reflex half DC 28. The save DC is Strength-based.

TYRANNOSAURUS

Huge Animal

Hit Dice:	18d8+99 (180 hp)
Initiative:	+1
Speed:	40 ft. (8 squares)
Armor Class:	14 (−2 size, +1 Dex, +5 natural) touch 9, flat-footed 13

Advancement:	19–36 HD (Huge); 37–54 HD (Gargantuan)
Level Adjustment:	—

Despite its enormous size and 6-ton weight, a tyrannosaurus is a swift runner. Its head is nearly 6 feet long, and its teeth are from 3 to 6 inches in length. It is slightly more than 30 feet long from nose to tail.

Combat

A tyrannosaurus pursues and eats just about anything it sees. Its tactics are simple—charge in and bite.

Improved Grab (Ex): To use this ability, a tyrannosaurus must hit an opponent of up to one size smaller with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can try to swallow the foe the following round.

Swallow Whole (Ex): A tyrannosaurus can try to swallow a grabbed opponent of up to two sizes smaller by making a successful grapple check. The swallowed creature takes 2d8+8 points of bludgeoning damage and 8 points of acid damage per round from the tyrannosaurus's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 12). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out.

A Huge tyrannosaurus's gizzard can hold 2 Medium, 8 Small, 32 Tiny, or 128 Diminutive or smaller opponents.

Skills: A tyrannosaurus has a +2 racial bonus on Listen and Spot checks.

DIRE ANIMAL

Dire animals are larger, tougher, meaner versions of ordinary animals. Each kind tends to have a feral, prehistoric, or even demonic appearance.

DIRE APE

Large Animal

Hit Dice:	5d8+13 (35 hp)
Initiative:	+2
Speed:	30 ft. (6 squares), climb 15 ft.
Armor Class:	15 (−1 size, +2 Dex, +4 natural), touch 11, flat-footed 13
Base Attack/Grapple:	+3/+13
Attack:	Claw +8 melee (1d6+6)
Full Attack:	2 claws +8 melee (1d6+6) and bite +3 melee (1d8+3)
Space/Reach:	10 ft./10 ft.

Special Attacks:	Rend 2d6+9
Special Qualities:	Low-light vision, scent
Saves:	Fort +6, Ref +6, Will +5
Abilities:	Str 22, Dex 15, Con 14, Int 2, Wis 12, Cha 7
Skills:	Climb +14, Listen +5, Move Silently +4, Spot +6
Feats:	Alertness, Toughness
Environment:	Warm forests
Organization:	Solitary or company (5–8)
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	6–15 HD (Large)

Level Adjustment: —

A dire ape stands about 9 feet tall and weighs from 800 to 1,200 pounds.

Combat

Dire apes attack anything that enters their territory, even other dire apes. If an opponent's armor foils a dire ape's attacks, the creature will attempt to grapple and pin, then rend the prone opponent.

Rend (Ex): A dire ape that hits with both claw attacks latches onto the opponent's body and tears the flesh. This attack automatically deals an extra 2d6+12 points of damage.

Skills: Dire apes have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

DIRE BADGER

Medium Animal

Hit Dice:	3d8+15 (28 hp)
Initiative:	+3
Speed:	30 ft. (6 squares), burrow 10 ft.
Armor Class:	16 (+3 Dex, +3 natural), touch 13, flat-footed 13
Base Attack/Grapple:	+2/+4
Attack:	Claw +4 melee (1d4+2)
Full Attack:	2 claws +4 melee (1d4+2) and bite –1 melee (1d6+1)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Rage
Special Qualities:	Low-light vision, scent
Saves:	Fort +7, Ref +6, Will +4
Abilities:	Str 14, Dex 17, Con 19, Int 2, Wis 12, Cha 10
Skills:	Listen +6, Spot +6
Feats:	Alertness, Toughness, Track ^B
Environment:	Temperate forests
Organization:	Solitary or cete (2–5)
Challenge Rating:	2
Treasure:	None
Alignment:	Always neutral
Advancement:	4–9 HD (Large)

Level Adjustment: —

These vicious creatures tolerate no intrusions. They cannot burrow into solid rock, but can move through just about any material softer than that. A dire badger usually leaves behind a usable tunnel 5 feet in diameter when burrowing unless the material it's moving through is very loose.

A dire badger is from 5 to 7 feet in length and can weigh up to 500 pounds.

Combat

Dire badgers attack with their sharp claws and teeth.

Rage (Ex): A dire badger that takes damage in combat flies into a berserk rage on its next turn, clawing and biting madly until either it or its opponent is dead. It gains +4 Strength, +4 Constitution, and –2 AC. The creature cannot end its rage voluntarily.

DIRE BAT

Large Animal

Hit Dice:	4d8+12 (30 hp)
Initiative:	+6
Speed:	20 ft. (4 squares), fly 40 ft. (good)
Armor Class:	20 (−1 size, +6 Dex, +5 natural), touch 15, flat-footed 14
Base Attack/Grapple:	+3/+10
Attack:	Bite +5 melee (1d8+4)
Full Attack:	Bite +5 melee (1d8+4)
Space/Reach:	10 ft./5 ft.
Special Attacks:	—
Special Qualities:	Blindsight 40 ft.
Saves:	Fort +7, Ref +10, Will +6
Abilities:	Str 17, Dex 22, Con 17, Int 2, Wis 14, Cha 6
Skills:	Hide +4, Listen +12*, Move Silently +11, Spot +8*
Feats:	Alertness, Stealthy
Environment:	Temperate deserts
Organization:	Solitary or colony (5–8)
Challenge Rating:	2
Treasure:	None
Alignment:	Always neutral
Advancement:	5–12 HD (Large)
Level Adjustment:	—

A dire bat has a wingspan of 15 feet and weighs about 200 pounds.

Combat

Dire bats swoop down upon unsuspecting prey from above.

Blindsight (Ex): A dire bat uses echolocation to pinpoint creatures within 40 feet. Opponents still have total concealment against the bat unless it can actually see them.

Skills: Dire bats have a +4 racial bonus on Spot and Listen checks. These bonuses are lost if its blindsight is negated.

DIRE BEAR

Large Animal

Hit Dice:	12d8+51 (105 hp)
Initiative:	+1
Speed:	40 ft. (8 squares)
Armor Class:	17 (−1 size, +1 Dex, +7 natural), touch 10, flat-footed 16
Base Attack/Grapple:	+9/+23
Attack:	Claw +19 melee (2d4+10)
Full Attack:	2 claws +19 melee (2d4+10) and bite +13 melee (2d8+5)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Improved grab
Special Qualities:	Low-light vision, scent
Saves:	Fort +12, Ref +9, Will +9
Abilities:	Str 31, Dex 13, Con 19, Int 2, Wis 12, Cha 10
Skills:	Listen +10, Spot +10, Swim +13
Feats:	Alertness, Endurance, Run, Toughness, Weapon Focus (claw)
Environment:	Cold forests
Organization:	Solitary or pair
Challenge Rating:	7
Treasure:	None
Alignment:	Always neutral
Advancement:	13–16 HD (Large); 17–36 HD (Huge)
Level Adjustment:	—

The omnivorous dire bear usually does not bother creatures that try to avoid it, but will aggressively defend a kill or other source of food. It will not hesitate to rip apart anything that might contain something edible.

A typical dire bear is 12 feet long and weighs as much as 8,000 pounds.

Combat

A dire bear attacks by tearing at opponents with its claws.

Improved Grab (Ex): To use this ability, a dire bear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

DIRE BOAR

Large Animal

Hit Dice:	7d8+21 (52 hp)
Initiative:	+0
Speed:	40 ft. (8 squares)
Armor Class:	15 (−1 size, +6 natural), touch 9, flat-footed 15

Organization:	Solitary or herd (5–8)
Challenge Rating:	4
Treasure:	None
Alignment:	Always neutral
Advancement:	8–16 HD (Large); 17–21 HD (Huge)

Level Adjustment: —

Dire boars are omnivorous and spend most of their time rooting around, much as ordinary pigs do. They viciously attack anything that approaches them, however.

Dire boars grow up to 12 feet long and weigh as much as 2,000 pounds.

Combat

A dire boar charges its opponent, trying to rip the target open with its tusks.

Ferocity (Ex): A dire boar is such a tenacious combatant that it continues to fight without penalty even while disabled or dying.

DIRE LION

Large Animal

Hit Dice:	8d8+24 (60 hp)
Initiative:	+2
Speed:	40 ft. (8 squares)
Armor Class:	15 (−1 size, +2 Dex, +4 natural), touch 11, flat-footed 13
Base Attack/Grapple:	+6/+17

Challenge Rating:	5

Treasure:	None
Alignment:	Always neutral
Advancement:	9–16 HD (Large); 17–24 HD (Huge)

Level Adjustment: —

Dire lions are patient hunters, just like their smaller cousins, but apt to take on bigger prey.

Dire lions grow to be up to 15 feet long and weigh up to 3,500 pounds.

Combat

A dire lion attacks by running at prey, leaping, and clawing and biting as it rakes with its rear claws. It often jumps onto a creature larger than itself.

Improved Grab (Ex): To use this ability, a dire lion must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Pounce (Ex): If a dire lion charges, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +12 melee, damage 1d6+3.

Skills: Dire lions have a +4 racial bonus on Hide and Move Silently checks.

*In areas of tall grass or heavy undergrowth, the Hide bonus improves to +8.

DIRE RAT

Small Animal

Hit Dice:	1d8+1 (5 hp)
Initiative:	+3
Speed:	40 ft. (8 squares), climb 20 ft.

Level Adjustment: —

Dire rats are omnivorous scavengers, but will attack to defend their nests and territories.

A dire rat can grow to be up to 4 feet long and weigh over 50 pounds.

Combat

Dire rat packs attack fearlessly, biting and chewing with their sharp incisors.

Disease (Ex): Filth fever—bite, Fortitude DC 11, incubation period 1d3 days, damage 1d3 Dex and 1d3 Con. The save DC is Constitution-based.

Skills: Dire rats have a +8 racial bonus on Swim checks. Dire rats have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

Dire rats use their Dexterity modifier for Climb and Swim checks.

DIRE SHARK

Huge Animal (Aquatic)

Hit Dice:	18d8+66 (147 hp)

Challenge Rating:	9
Treasure:	None
Alignment:	Always neutral
Advancement:	19–32 (Huge); 33–54 (Gargantuan)

Level Adjustment: —

Dire sharks attack anything they perceive to be edible, even larger creatures.

This monstrous fish can grow to a length of 25 feet and weigh more than 20,000 pounds.

Combat

Dire sharks bite with their powerful jaws, swallowing smaller creatures in one gulp.

Improved Grab (Ex): To use this ability, a dire shark must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can try to swallow the foe in the following round.

Swallow Whole (Ex): A dire shark can try to swallow a grabbed opponent of up to one size smaller by making a successful grapple check. Once inside, the opponent takes 2d6+6 points of bludgeoning damage plus 1d8+4 points of acid damage per round from the shark's digestive juices. A swallowed creature can cut its way out using a light slashing or piercing weapon by dealing 25 points of damage to the shark's digestive tract (AC 13). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out.

A Huge dire shark's gullet can hold 2 Large, 8 Medium or Small, 32 Tiny, 128 Diminutive, or 512 Fine or smaller opponents.

Keen Scent (Ex): A dire shark can notice creatures by scent in a 180-foot radius and can detect blood in the water at a range of up to 1 mile.

Skills: A dire shark has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered.

It can use the run action while swimming, provided it swims in a straight line.

Dire tigers prey on just about anything that moves. They will patiently stalk a potential meal, striking whenever the creature lets down its guard.

Dire tigers grow to be over 12 feet long and can weigh up to 6,000 pounds.

Combat

A dire tiger attacks by running at prey, leaping, and clawing and biting as it rakes with its rear claws.

Improved Grab (Ex): To use this ability, a dire tiger must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Pounce (Ex): If a dire tiger charges, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +18 melee, damage 2d4+4.

Skills: Dire tigers have a +4 racial bonus on Hide and Move Silently checks. *In areas of tall grass or heavy undergrowth, the Hide bonus improves to +8.

Dire weasels grow to be up to 10 feet long and can reach a weight of 700 pounds.

Combat

Dire weasels stalk their prey in the dark and then leap on it, biting and clawing.

Attach (Ex): A dire weasel that hits with its bite attack latches onto the opponent's body with its powerful jaws. An attached dire weasel loses its Dexterity bonus to AC and thus has an AC of 12. An attached dire weasel can be struck with a weapon or grappled itself. To remove an attached dire weasel through grappling, the opponent must achieve a pin against the creature.

Blood Drain (Ex): A dire weasel drains blood for 1d4 points of Constitution damage each round it remains attached.

Dire wolves are efficient pack hunters that will kill anything they can catch.

Dire wolves are mottled gray or black, about 9 feet long and weighing some 800 pounds.

Combat

Dire wolves prefer to attack in packs, surrounding and flanking a foe when they can.

Trip (Ex): A dire wolf that hits with a bite attack can attempt to trip its opponent (+11 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the dire wolf.

Skills: A dire wolf has a +2 racial bonus on Hide, Listen, Move Silently, and Spot checks.

*It also has a +4 racial bonus on Survival checks when tracking by scent.

Doppelgangers are strange beings that are able to take on the shapes of those they encounter. In its natural form, the creature looks more or less humanoid, but slender and frail, with gangly limbs and half-formed features. The flesh is pale and hairless. Its large, bulging eyes are yellow with slitted pupils. A doppelganger's appearance is deceiving even when it's in its true form. A doppelganger is hardy, with a natural agility not in keeping with its frail appearance.

Doppelgangers make excellent use of their natural mimicry to stage ambushes, bait traps, and infiltrate humanoid society. Although not usually evil, they are interested only in themselves and regard all others as playthings to be manipulated and deceived.

In its natural form a doppelganger is about 5-1/2 feet tall and weighs about 150 pounds.

COMBAT

When in its natural form, a doppelganger strikes with its powerful fists. In the shape of a warrior or some other armed person, it attacks with whatever weapon is appropriate. In such cases, it uses its detect thoughts ability to employ the same tactics and strategies as the person it is impersonating.

Detect Thoughts (Su): A doppelganger can continuously use detect thoughts as the spell (caster level 18th; Will DC 13 negates). It can suppress or resume this ability as a free action. The save DC is Charisma-based.

Change Shape (Su): A doppelganger can assume the shape of any Small or Medium humanoid. In humanoid form, the doppelganger loses its natural attacks. A doppelganger can remain in its humanoid form until it chooses to assume a new one. A change in form cannot be dispelled, but a doppelganger reverts to its natural form when killed. A *true seeing* spell or ability reveals its natural form.

Skills: A doppelganger has a +4 racial bonus on Bluff and Disguise checks.

*When using its change shape ability, a doppelganger gets an additional +10 circumstance bonus on Disguise checks. If it can read an opponent's mind, it gets a further +4 circumstance bonus on Bluff and Disguise checks.

DOPPELGANGERS AS CHARACTERS

Doppelganger characters possess the following racial traits.

— +2 Strength, +2, Dexterity, +2 Constitution, +2 Intelligence, +4 Wisdom, +2 Charisma.

—Medium size.

—A doppelganger's base land speed is 30 feet.

- Darkvision: Doppelgangers can see in the dark up to 60 feet.
- Racial Hit Dice: A doppelganger begins with four levels of monstrous humanoid, which provide 4d8 Hit Dice, a base attack bonus of +4, and base saving throw bonuses of Fort +1, Ref +4, and Will +4.
- Racial Skills: A doppelganger's monstrous humanoid levels give it skill points equal to $7 \times (2 + \text{Int modifier})$. Its class skills are Bluff, Diplomacy, Disguise, Intimidate, Listen, Sense Motive, and Spot.
- Racial Feats: A doppelganger's monstrous humanoid levels give it two feats.
- +4 natural armor bonus.
- +4 racial bonus on Bluff and Disguise checks. When using its change shape ability, a doppelganger gets an additional +10 circumstance bonus on Disguise checks. If it can read an opponent's mind, it gets a further +4 circumstance bonus on Bluff and Disguise checks.
- Special Attacks (see above): Detect thoughts.
- Special Qualities (see above): Change shape, immunity to *sleep* and charm effects.
- Automatic Languages: Common. Bonus Languages: Auran, Dwarven, Elven, Gnome, Halfling, Giant, Terran.
- Favored Class: Rogue.
- Level adjustment +4.

MONSTERS (Dr-Dw)

DRAGON, TRUE

The known varieties of true dragons (as opposed to other creatures that have the dragon type) fall into two broad categories: chromatic and metallic. The chromatic dragons are black, blue, green, red, and white; they are all evil and extremely fierce. The metallic dragons are brass, bronze, copper, gold, and silver; they are all good, usually noble, and highly respected by the wise.

All true dragons gain more abilities and greater power as they age. (Other creatures that have the dragon type do not.) They range in length from several feet upon hatching to more than 100 feet after attaining the status of great wyrm. The size of a particular dragon varies according to age and variety.

A dragon's metabolism operates like a highly efficient furnace and can metabolize even inorganic material. Some dragons have developed a taste for such fare.

Although goals and ideals vary among varieties, all dragons are covetous. They like to hoard wealth, collecting mounds of coins and gathering as many gems, jewels, and magic items as possible. Those with large hoards are loath to leave them for long, venturing out of their lairs only to patrol the immediate area or to get food. For dragons, there is no such thing as enough treasure. It's pleasing to look at, and they bask in its radiance. Dragons like to make beds of their hoards, shaping nooks and mounds to fit their bodies. By the time a dragon matures to the age of great wyrm, hundreds of gems and coins may be imbedded in its hide.

All dragons speak Draconic.

COMBAT

A dragon attacks with its powerful claws and bite, and can also use a breath weapon and special physical attacks, depending on its size. It prefers to fight on the wing, staying out of reach until it has worn down the enemy with ranged attacks. Older, more intelligent dragons are adept at sizing up the opposition and eliminating the most dangerous foes first (or avoiding them while picking off weaker enemies).

The table below provides space and reach statistics for dragons of various sizes, plus the natural weapons a dragon of a certain size can employ and the damage those attacks deal.

Bite: Bite attacks deal the indicated damage plus the dragon's Strength bonus. A dragon also can use its bite to snatch opponents if it has the Snatch feat.

Claw: Claw attacks deal the indicated damage plus 1/2 the dragon's Strength bonus (round down). The dragon also can use its claws to snatch opponents if it has the Snatch feat. Claw attacks are secondary attacks, requiring a -5 penalty on the attack roll. (Many dragons choose the Multiattack feat to lessen this penalty to -2).

Wing: The dragon can slam opponents with its wings, even when flying. Wing attacks deal the indicated damage plus 1/2 the dragon's Strength bonus (round down) and are treated as secondary attacks.

Tail Slap: The dragon can slap one opponent each round with its tail. A tail slap deals the indicated damage plus 1-1/2 times the dragon's Strength bonus (round down) and is treated as a secondary attack.

Crush (Ex): This special attack allows a flying or jumping dragon of at least Huge size to land on opponents as a standard action, using its whole body to crush them. Crush attacks are effective only against opponents three or more size categories smaller than the dragon (though it can attempt normal overrun or grapple attacks against larger opponents).

A crush attack affects as many creatures as can fit under the dragon's body. Creatures in the affected area must succeed on a Reflex save (DC equal to that of the dragon's breath weapon) or be pinned, automatically taking bludgeoning damage during the next round unless the dragon moves off them. If the dragon chooses to maintain the pin, treat it as a normal grapple attack. Pinned opponents take damage from the crush each round if they don't escape.

A crush attack deals the indicated damage plus 1-1/2 times the dragon's Strength bonus (round down).

Tail Sweep (Ex): This special attack allows a dragon of at least Gargantuan size to sweep with its tail as a standard action.

The sweep affects a half-circle with a radius of 30 feet (or 40 feet for a Colossal dragon), extending from an intersection on the edge of the dragon's space in any direction. Creatures within the swept area are affected if they are four or more size categories smaller than the dragon. A tail sweep automatically deals the indicated damage plus 1-1/2 times the dragon's Strength bonus (round down). Affected creatures can attempt Reflex saves to take half damage (DC equal to that of the dragon's breath weapon).

Grappling: Dragons do not favor grapple attacks, though their crush attack (and Snatch feat, if they know it) use normal grapple rules. A dragon can always use its breath weapon while grappling, as well as its spells and spell-like or supernatural abilities, provided it succeeds on Concentration checks.

Breath Weapon (Su): Using a breath weapon is a standard action. Once a dragon breathes, it can't breathe again until 1d4 rounds later. If a dragon has more than one type of breath weapon, it still can breathe only once every 1d4 rounds. A blast from a breath weapon always starts at any intersection adjacent to the dragon and extends in a direction of the dragon's

choice, with an area as noted on the table below. If the breath weapon deals damage, creatures caught in the area can attempt Reflex saves to take half damage; the DC depends on the dragon's age and variety, and is given in each individual entry. Saves against nondamaging breath weapons use the same DC; the kind of saving throw is noted in the variety descriptions. The save DC against a breath weapon is $10 + 1/2$ dragon's HD + dragon's Con modifier.

Breath weapons come in two basic shapes, line and cone, whose areas vary with the dragon's size.

Dragon Breath Weapons

Dragon Size	Line* (Length)	Cone** (Length)
Tiny	30 ft.	15 ft.
Small	40 ft.	20 ft.
Medium	60 ft.	30 ft.
Large	80 ft.	40 ft.
Huge	100 ft.	50 ft.
Gargantuan	120 ft.	60 ft.
Colossal	140 ft.	70 ft.

*A line is always 5 feet high and 5 feet wide.

**A cone is as high and wide as its length.

Frightful Presence (Ex): A young adult or older dragon can unsettle foes with its mere presence. The ability takes effect automatically whenever the dragon attacks, charges, or flies overhead. Creatures within a radius of 30 feet x the dragon's age category are subject to the effect if they have fewer HD than the dragon. A potentially affected creature that succeeds on a Will save (DC $10 + 1/2$ dragon's HD + dragon's Cha modifier) remains immune to that dragon's frightful presence for 24 hours. On a failure, creatures with 4 or less HD become panicked for 4d6 rounds and those with 5 or more HD become shaken for 4d6 rounds. Dragons ignore the frightful presence of other dragons.

Spells: A dragon knows and casts arcane spells as a sorcerer of the level indicated in its variety description, gaining bonus spells for a high Charisma score. Some dragons can also cast spells from the cleric list or cleric domain lists as arcane spells.

Spell-Like Abilities: A dragon's spell-like abilities depend on its age and variety. It gains the abilities indicated for its age plus all previous ones. Its age category or its sorcerer/caster level, whichever is higher, is the caster level for these abilities. The save DC is $10 + \text{dragon's Cha modifier} + \text{spell level}$. All spell-like abilities are usable once per day unless otherwise noted.

Damage Reduction: Young adult and older dragons have damage reduction. Their natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Immunities (Ex): All dragons have immunity to *sleep* and paralysis effects. Each variety of dragon has immunity to one or two additional forms of attack no matter what its age, as given in its description.

Spell Resistance (Ex): As dragons age, they become more resistant to spells and spell-like abilities, as indicated in the variety descriptions.

Blindsight (Ex): Dragons can pinpoint creatures within a distance of 60 feet. Opponents the dragon can't actually see still have total concealment against the dragon.

Keen Senses (Ex): A dragon sees four times as well as a human in shadowy illumination and twice as well in normal light. It also has darkvision out to 120 feet.

Skills: All dragons have skill points equal to $(6 + \text{Int modifier, minimum 1}) \times (\text{Hit Dice} + 3)$. Most dragons purchase the following skills at the maximum ranks possible: Listen, Search, and Spot. The remaining skill points are generally spent on Concentration, Diplomacy, Escape Artist, Intimidate, Knowledge (any), Sense Motive, and Use Magic Device at a cost of 1 skill point per rank. All these skills are considered class skills for dragons. (Each dragon has other class skills as well, as noted in the variety descriptions.)

Feats: All dragons have one feat, plus additional feats based on Hit Dice just like any other creature. Dragons favor Alertness, Blind-Fight, Cleave, Flyby Attack, Hover, Improved Initiative, Improved Sunder, Power Attack, Snatch, Weapon Focus (claw or bite), Wingover, and any metamagic feat that is available and useful to sorcerers.

*A dragon's bite attack has reach as if the creature were one size category larger. All other attacks are made with the standard reach for the dragon's size.

Dragon Overland Movement

Chromatic and metallic dragons are exceedingly strong flyers and can cover vast distances quickly. A dragon's overland flying speed is a function of its tactical fly speed, as shown on the table below.

Dragon Overland Flying Speeds

Dragon's Fly Speed				
	100 feet	150 feet	200 feet	250 feet
One Hour				
Normal	15 miles	20 miles	30 miles	40 miles
Hustle	24 miles	40 miles	60 miles	80 miles
One Day				
Normal	120 miles	160 miles	240 miles	320 miles

Dragons do not tire as quickly as other creatures when moving overland on the ground. If a dragon attempts a hustle or a forced march, check for nonlethal damage once every 2 hours instead of every hour.

DRAGONHIDE

Armorsmiths can work with the hides of dragons to produce armor or shields of masterwork quality.

CHROMATIC DRAGONS

Chromatic dragons form the evil branch of dragonkind. They are aggressive, greedy, vain, and nasty.

Black dragon are sometimes known as skull dragons because of their skeletal faces. Adding to the skeletal impression is the gradual deterioration of the hide around the base of the horn and the cheekbones. This deterioration increases with age and does not harm the dragon. On hatching, a black dragon's scales are thin, small, and glossy. As the dragon ages, they become larger, thicker, and duller, helping it camouflage itself in swamps and marshes.

Black dragons are especially fond of coins. Older dragons sometimes capture and question humanoids about stockpiles of gold, silver, and platinum coins before killing them.

Combat

Black dragons prefer to ambush their targets, using their surroundings as cover. When fighting in heavily forested swamps and marshes, they try to stay in the water or on the ground; trees and leafy canopies limit their aerial maneuverability. When outmatched, a black dragon attempts to fly out of sight, so as not to leave tracks, and hide in a deep pond or bog.

Breath Weapon (Su): A black dragon has one type of breath weapon, a line of acid.

Water Breathing (Ex): A black dragon can breathe underwater indefinitely and can freely use its breath weapon, spells, and other abilities while submerged.

Corrupt Water (Sp): Once per day an adult or older black dragon can stagnate 10 cubic feet of water, making it become still, foul, and unable to support animal life. The ability spoils liquids containing water. Magic items (such as potions) and items in a creature's possession must succeed on a Will save (DC equal to that of the dragon's frightful presence) or become fouled. This ability is the equivalent of a 1st-level spell. Its range is equal to that of the dragon's frightful presence.

Charm Reptiles (Sp): A great wyrm black dragon can use this ability three times per day. It works as a *mass charm* spell that affects only reptilian animals. The dragon can communicate with any charmed reptiles as though casting a *speak with animals* spell. This ability is the equivalent of a 1st-level spell.

Other Spell-Like Abilities: 3/day—*darkness* (juvenile or older; radius 10 feet per age category), *insect plague* (ancient or older); 1/day—*plant growth* (old or older).

Skills: Hide, Move Silently, and Swim are considered class skills for black dragons.

A blue dragon's scales vary in color from an iridescent azure to a deep indigo, polished to a glossy finish by blowing desert sands. The size of its scales increases little as the dragon ages, although they do become thicker and harder. Its hide tends to hum and crackle faintly with built-up static electricity. These effects intensify when the dragon is angry or about to attack, giving off an odor of ozone and sand. Their vibrant color makes blue dragons easy to spot in barren desert surroundings. However, they often burrow into the sand so only part of their heads are exposed.

Blue dragons love to soar in the hot desert air, usually flying in the daytime when temperatures are highest. Some nearly match the color of the desert sky and use this coloration to their advantage.

Blue dragons lair in vast underground caverns, where they also store their treasure. Although they collect anything that looks valuable, they are most fond of gems—especially sapphires.

Combat

Typically, blue dragons attack from above or burrow beneath the sands until opponents come within 100 feet. Older dragons use their special abilities, such as *hallucinatory terrain*, in concert with these tactics to mask the land and improve their chances to surprise the target. Blue dragons run from a fight only if they are severely damaged, since they view retreat as cowardly.

Breath Weapon (Su): A blue dragon has one type of breath weapon, a line of lightning.

Create/Destroy Water (Sp): A blue dragon of any age can use this ability three times per day. It works like the *create water* spell, except that the dragon can decide to destroy water instead of creating it, which automatically spoils unattended liquids containing water. Magic items (such as potions) and items in a creature's possession must succeed on a Will save (DC equal to that of the dragon's frightful presence) or be ruined. This ability is the equivalent of a 1st-level spell.

Sound Imitation (Ex): A juvenile or older blue dragon can mimic any voice or sound it has heard, anytime it likes. Listeners must succeed on a Will save (DC equal to that of the dragon's frightful presence) to detect the ruse.

Other Spell-Like Abilities: 3/day—*ventriloquism* (adult or older); 1/day—*hallucinatory terrain* (old or older), *veil* (ancient or older), *mirage arcana* (great wyrm).

Skills: Bluff, Hide, and Spellcraft are considered class skills for blue dragons.

A wyrmling green dragon's scales are thin, very small, and a deep shade of green that appears nearly black. As the dragon ages, the scales grow larger and lighter, turning shades of forest, emerald, and olive green, which helps it blend in with its wooded surroundings.

Combat

Green dragons initiate fights with little or no provocation, picking on creatures of any size. If the target is intriguing or seems formidable, the dragon stalks the creature to determine the best time to strike and the most appropriate tactics to use. If the target appears weak, the dragon makes its presence known quickly—it enjoys evoking terror. Sometimes the dragon elects to control a humanoid creature through intimidation and *suggestion*. Green dragons especially like to question adventurers to learn more about their society and abilities, what is going on in the countryside, and if there is treasure nearby.

Breath Weapon (Su): A green dragon has one type of breath weapon, a cone of corrosive (acid) gas.

Water Breathing (Ex): A green dragon can breathe underwater indefinitely and can freely use its breath weapon, spells, and

other abilities while submerged.

Spell-Like Abilities: 3/day—*suggestion* (adult or older), *dominate person* (ancient or older); 1/day—*plant growth* (old or older), *command plants* (great wyrmling).

Skills: Bluff, Hide, and Move Silently are considered class skills for green dragons.

The small scales of a wyrmling red dragon are a bright glossy scarlet, making the dragon easily spotted by predators and hunters, so it stays underground and does not venture outside until it is more able to take care of itself. Toward the end of young age, the scales turn a deeper red, and the glossy texture is replaced by a smooth, dull finish. As the dragon grows older, the scales become large, thick, and as strong as metal. The neck frill and wings are an ash blue or purple-gray toward the edges, becoming darker with age. The pupils of a red dragon fade as it ages; the oldest red dragons have eyes that resemble molten lava orbs.

Combat

Because red dragons are so confident, they seldom pause to appraise an adversary. On spotting a target, they make a snap decision whether to attack, using one of many strategies worked out ahead of time. A red dragon lands to attack small, weak creatures with its claws and bite rather than obliterating them with its breath weapon, so as not to destroy any treasure they might be carrying.

Breath Weapon (Su): A red dragon has one type of breath weapon, a cone of fire.

Locate Object (Sp): A juvenile or older red dragon can use this ability as the spell of the same name, once per day per age category.

Other Spell-Like Abilities: 3/day—*suggestion* (old or older); 1/day—*find the path* (ancient or older), *discern location* (great wyrm).

Skills: Appraise, Bluff, and Jump are considered class skills for red dragons.

The scales of a wyrmling white dragon glisten like mirrors. As the dragon ages, the sheen disappears, and by very old age, scales of pale blue and light gray are mixed in with the white.

Combat

White dragons prefer sudden assaults, swooping down from aloft or bursting from beneath water, snow, or ice. They loose their breath weapon, then try to knock out a single opponent with a follow-up attack.

Breath Weapon (Su): A white dragon has one type of breath weapon, a cone of cold.

Icewalking (Ex): This ability works like the *spider climb* spell, but the surfaces the dragon climbs must be icy. It is always in effect.

Freezing Fog (Sp): An old or older white dragon can use this ability three times per day. It is similar to a *solid fog* spell but also causes a rime of slippery ice to form on any surface the fog touches, creating the effect of a *grease* spell. The dragon is immune to the *grease* effect because of its icewalking ability. This ability is the equivalent of a 5th-level spell.

Other Spell-Like Abilities: 3/day—*fog cloud* (juvenile or older), *gust of wind* (adult or older), *wall of ice* (ancient or older); 1/day—*control weather* (great wyrm).

Skills: Hide, Move Silently, and Swim are considered class skills for white dragons.

METALLIC DRAGONS

Metallic dragons make up the good branch of dragonkind, but they are every bit as aggressive as their evil cousins when threatened or challenged. They also tend to be covetous and proud.

At birth, a brass dragon's scales are a dull, mottled brown. As the dragon gets older, the scales become more brassy until they reach a warm, burnished appearance. The grand head-plates of a brass dragon are smooth and metallic, and it sports bladed chin horns that grow sharper with age. Wings and frills are mottled green toward the edges, darkening with age. As the dragon grows older, its pupils fade until the eyes resemble molten metal orbs.

Combat

Brass dragons would rather talk than fight. If an intelligent creature tries to leave without engaging in conversation, the dragon might force compliance in a fit of pique, using *suggestion* or a dose of *sleep* gas. A creature put to sleep may wake to find itself pinned or buried to the neck in the sand until the dragon's thirst for small talk is slaked. When faced with real danger, younger brass dragons fly out of sight, then hide by burrowing into the sand. Older dragons spurn this ploy but still prefer to have the advantage in combat.

Breath Weapon (Su): A brass dragon has two types of breath weapon, a line of fire and a cone of *sleep*. Creatures within the cone must succeed on a Will save or fall asleep, regardless of HD, for 1d6 rounds plus 1 round per age category of the dragon.

Spell-Like Abilities: At will—*speak with animals*; 3/day—*endure elements* (juvenile or older; radius 10 ft. \times dragon's age category); 1/day—*suggestion* (adult or older), *control winds* (old or older), *control weather* (ancient or older).

Summon Djinni (Sp): This ability, usable by a great wyrm brass dragon, works like a *summon monster* spell, except that it summons one djinni. This ability is the equivalent of a 7th-level spell.

Skills: Bluff, Gather Information, and Survival are considered class skills for brass dragons.

A bronze wyrmling's scales are yellow tinged with green, showing only a hint of bronze. As the dragon approaches adulthood, its color deepens slowly to a darker, rich bronze tone. Very old dragons develop a blue-black tint to the edges of their scales. Powerful swimmers, they have webbed feet and smooth, flat scales. The pupils of its eyes fade as a dragon ages, until in the oldest the eyes resemble glowing green orbs.

Combat

Bronze dragons dislike killing animals and would rather bribe them (perhaps with food) or force them away magically. They use *detect thoughts* to learn intelligent creatures' intentions.

When attacking they blind their opponents with *fog cloud* and then charge or, if flying, snatch them up. Against seafaring opponents they conjure up a storm or use their tails to smash the vessels' hulls. If a dragon is inclined to be lenient, ships might be merely becalmed, fogbound, or broken-masted.

Breath Weapon (Su): Bronze dragons have two types of breath weapon, a line of lightning and a cone of *repulsion* gas. Creatures within the cone must succeed on a Will save or be compelled to do nothing but move away from the dragon for 1d6 rounds plus 1 round per age category of the dragon. This is a mind-affecting compulsion enchantment effect.

Water Breathing (Ex): A bronze dragon can breathe underwater indefinitely and can freely use its breath weapon, spells, and other abilities while submerged.

Alternate Form (Su): A young or older bronze dragon can assume any animal or humanoid form of Medium size or smaller as a standard action three times per day. This ability functions as a *polymorph* spell cast on itself at its caster level, except that the dragon does not regain hit points for changing form and can only assume the form of an animal or humanoid. The dragon can remain in its animal or humanoid form until it chooses to assume a new one or return to its natural form.

Spell-Like Abilities: At will—*speak with animals*; 3/day—*create food and water* (adult or older), *fog cloud* (adult or older), *detect thoughts* (old or older), *control water* (ancient or older); 1/day—*control weather* (great wyrm).

Skills: Disguise, Swim, and Survival are considered class skills for bronze dragons.

At birth, a copper dragon's scales have a ruddy brown color with a metallic tint. As the dragon gets older, the scales become finer and more coppery, assuming a soft, warm gloss by young adult age. Very old dragons' scales pick up a green tint. A copper dragon's pupils fade with age, and the eyes of great wyrms resemble glowing turquoise orbs.

Combat

A copper dragon appreciates wit and usually doesn't harm creatures that can relate a joke, humorous story, or riddle the dragon has not heard before. It quickly gets annoyed with anyone who doesn't laugh at its jokes or accept its tricks with good humor. It likes to taunt and annoy opponents into giving up or acting foolishly.

An angry copper dragon prefers to mire foes using *transmute rock to mud*. The dragon pushes trapped opponents into the mud or snatches and carries them aloft. A copper dragon tries to draw airborne enemies into narrow, stony gorges where it can use its spider climb ability and maneuver them into colliding with the walls.

Breath Weapon (Su): A copper dragon has two types of breath weapon, a line of acid and a cone of slow gas. Creatures within the cone must succeed on a Fortitude save or be slowed for 1d6 rounds plus 1 round per age category of the dragon.

Spider Climb (Ex): A copper dragon can climb on stone surfaces as though using the *spider climb* spell.

Spell-Like Abilities: 2/day—*stone shape* (adult or older); 1/day—*transmute rock to mud* or *mud to rock* (old or older), *wall of stone* (ancient or older), *move earth* (great wyrm).

Skills: Bluff, Hide, and Jump are considered class skills for copper dragons.

*Can also cast cleric spells and those from the Law, Luck, and Good domains as arcane spells.

On hatching, a gold dragon's scales are dark yellow with golden metallic flecks.

The flecks get larger as the dragon matures until, at the adult stage, the scales are completely golden. Gold dragons' faces are bewiskered and sagacious; as they age, their pupils fade until the eyes resemble pools of molten gold.

Combat

Gold dragons usually parley before fighting. When conversing with intelligent creatures, they use *Intimidate* and *Sense Motive* to gain the upper hand. In combat, they employ *bless* and their *luck bonus*; older dragons use their *luck bonus* at the start of each day. They make heavy use of spells in combat. Among their favorites are *cloudkill*, *delayed blast fireball*, *fire shield*, *globe of invulnerability*, *maze*, *sleep*, *slow*, and *stinking cloud*.

Breath Weapon (Su): A gold dragon has two types of breath weapon, a cone of fire and a cone of weakening gas. Creatures within a cone of weakening gas must succeed on a Fortitude save or take 1 point of Strength damage per age category of the dragon.

Alternate Form (Su): A gold dragon can assume any animal or humanoid form of Medium size or smaller as a standard action three times per day. This ability functions as a *polymorph* spell cast on itself at its caster level, except that the dragon does not regain hit points for changing form and can only assume the form of an animal or humanoid. The dragon can remain in its animal or humanoid form until it chooses to assume a new one or return to its natural form.

Water Breathing (Ex): A gold dragon can breathe underwater indefinitely and can freely use its breath weapon, spells, and other abilities while submerged (the cone of fire becomes a cone of superheated steam underwater).

Luck Bonus (Sp): Once per day an adult or older gold dragon can touch a gem, usually one embedded in the dragon's hide, and enspell it to bring good luck. As long as the dragon carries the gem, it and every good creature in a 10-foot radius per age category of the dragon receives a +1 luck bonus on all saving throws and similar rolls, as for a *stone of good luck*. If the dragon gives an enspelled gem to another creature, only that bearer gets the bonus. The effect lasts 1d3 hours plus 3 hours per age category of the dragon but ends if the gem is destroyed. This ability is the equivalent of a 2nd-level spell.

Detect Gems (Sp): An old or older gold dragon can use this ability three times per day. This is a divination effect similar to a *detect magic* spell, except that it finds only gems. The dragon can scan a 60-degree arc each round: By concentrating for 1 round it knows if there are any gems within the arc; 2 rounds of concentration reveal the exact number of gems; and 3 rounds reveal their exact location, type, and value. This ability is the equivalent of a 2nd-level spell.

Other Spell-Like Abilities: 3/day—*bless* (juvenile or older); 1/day—*geas/quest* (old or older), *sunburst* (ancient or older), *foresight* (great wyrm).

Skills: Disguise, Heal, and Swim are considered class skills for gold dragons.

*Can also cast cleric spells and those from the Air, Good, Law, and Sun domains as arcane spells.

A silver wyrmling's scales are blue-gray with silver highlights. As the dragon approaches adulthood, its color gradually brightens until the individual scales are scarcely visible.

Combat

Silver dragons are not violent and avoid combat except when faced with highly evil or aggressive foes. If necessary, they use *fog cloud* or *control weather* to blind or confuse opponents before attacking. When angry, they use *reverse gravity* to fling

enemies helplessly into the air, where they can be snatched. Against flying opponents, a silver dragon hides in clouds (creating some with *control weather* on clear days), then jumps to the attack when it has the advantage.

Breath Weapon (Su): A silver dragon has two types of breath weapon, a cone of cold and a cone of paralyzing gas. Creatures within a cone of paralyzing gas must succeed on a Fortitude save or be paralyzed for 1d6 rounds plus 1 round per age category of the dragon.

Alternate Form (Su): A silver dragon can assume any animal or humanoid form of Medium size or smaller as a standard action three times per day. This ability functions as a *polymorph* spell cast on itself at its caster level, except that the dragon does not regain hit points for changing form and can only assume the form of an animal or humanoid. The dragon can remain in its animal or humanoid form until it chooses to assume a new one or return to its natural form.

Cloudwalking (Su): A silver dragon can tread on clouds or fog as though on solid ground. The ability functions continuously but can be negated or resumed at will.

Spell-Like Abilities: 3/day—*fog cloud* (adult or older), *control winds* (old or older); 2/day—*feather fall* (juvenile or older); 1/day—*control weather* (ancient or older), *reverse gravity* (great wyrm).

Skills: Bluff, Disguise, and Jump are considered class skills for silver dragons.

Its rough, deep green shell is much the same color as the deep water the monster favors, and the silver highlights that line the shell resemble light dancing on open water. The turtle's legs, tail, and head are a lighter green, flecked with golden highlights. An adult dragon turtle can measure from 20 to 30 feet from snout to tail, with a shell from 15 to 25 feet in diameter, and can weigh 8,000 to 32,000 pounds.

Dragon turtles speak Aquan, Draconic, and Common.

COMBAT

Dragon turtles are fierce fighters and generally attack any creature that threatens their territory or looks like a potential meal.

Breath Weapon (Su): Cloud of superheated steam 20 feet high, 25 feet wide, and 50 feet long, once every 1d4 rounds, damage 12d6 fire, Reflex DC 21 half; effective both on the surface and underwater. The save DC is Constitution-based.

Capsize (Ex): A submerged dragon turtle that surfaces under a boat or ship less than 20 feet long capsizes the vessel 95% of the time. It has a 50% chance to capsize a vessel from 20 to 60 feet long and a 20% chance to capsize one over 60 feet long.

Skills: A dragon turtle has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered.

It can use the run action while swimming, provided it swims in a straight line.

*Dragon turtles have a +8 racial bonus on Hide checks when submerged.

A dragonne possesses huge claws and fangs, and large eyes, usually the color of its scales. A dragonne is about 12 feet long and weighs about 700 pounds.

Dragonnes speak Draconic.

COMBAT

A dragonne's wings are useful only for short flights, carrying the creature for 10 to 30 minutes at a time. Nevertheless, it uses its wings effectively in battle. If opponents attempt to charge or encircle it, the dragonne simply takes to the air and finds a more defensible position.

Pounce (Ex): If a dragonne charges, it can make a full attack in the same round.

Roar (Su): A dragonne can loose a devastating roar every 1d4 rounds. All creatures except dragonnes within 120 feet must succeed on a DC 15 Will save or become fatigued. Those within 30 feet who fail their saves become exhausted. The save DC is Charisma-based.

Skills: Dragonnes have a +4 racial bonus on Listen and Spot checks.

Carrying Capacity: A light load for a dragonne is up to 348 pounds; a medium load, 349–699 pounds, and a heavy load, 700–1,050 pounds.

Alignment:	Always chaotic evil
Advancement:	By character class
Level Adjustment:	+4

Driders speak Elven, Common, and Undercommon.

COMBAT

Driders seldom pass up an opportunity to attack other creatures, especially from ambush. They usually begin with a spell assault and often levitate out of the enemy's reach.

Poison (Ex): Injury, Fortitude DC 16, initial and secondary damage 1d6 Str. The save DC is Constitution based.

Spell-Like Abilities: 1/day—*dancing lights* (DC 13), *clairaudience/clairvoyance*, *darkness*, *detect good*, *detect law*, *detect magic*, *dispel magic*, *faerie fire*, *levitate*, *suggestion* (DC 16). Caster level 6th. The save DCs are Charisma-based.

Spells: Driders cast spells as 6th-level clerics, wizards, or sorcerers. Driider clerics can choose from the following domains: Chaos, Destruction, Evil, and Trickery. The typical spells prepared shown here are for a driider sorcerer.

Typical Sorcerer Spells Known (6/7/6/4, base save DC 13 + spell level): 0—*daze*, *detect magic*, *ghost sound*, *mage hand*, *ray of frost*, *read magic*, *resistance*; 1st—*mage armor*, *magic missile*, *ray of enfeeblement*, *silent image*; 2nd—*invisibility*, *web*; 3rd—*lightning bolt*.

Skills: A driider has a +4 racial bonus on Hide and Move Silently checks. It has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

A dryad's delicate features are much like a female elf's, though her flesh is like bark or fine wood, and her hair is like a canopy of leaves that changes color with the seasons.

Although they are generally solitary, up to seven dryads have been encountered in one place on rare occasions.

Dryads speak Common, Elven, and Sylvan.

COMBAT

Shy, intelligent, and resolute, dryads are as elusive as they are alluring—they avoid physical combat and are rarely seen unless they wish to be. If threatened, or in need of an ally, a dryad uses *charm person* or *suggestion*, attempting to gain control of the attacker(s) who could help the most against the rest. Any attack on her tree, however, provokes the dryad into a frenzied defense.

Spell-Like Abilities: At will—*entangle* (DC 13), *speak with plants*, *tree shape*; 3/day—*charm person* (DC 13), *deep slumber* (DC 15), *tree stride*; 1/day—*suggestion* (DC 15). Caster level 6th. The save DCs are Wisdom-based.

Tree Dependent (Su): Each dryad is mystically bound to a single, enormous oak tree and must never stray more than 300 yards from it. Any who do become ill and die within 4d6 hours. A dryad's oak does not radiate magic.

Wild Empathy (Ex): This power works like the druid's wild empathy class feature, except that the dryad has a +6 racial bonus on the check.

Dwarves favor earth tones in their clothing and prefer simple and functional garb. The skin can be very dark, but it is always some shade of tan or brown. Hair color can be black, gray, or brown. Dwarves average 4 feet tall and weigh as much as adult humans.

Dwarves speak Dwarven. Most who travel outside dwarven lands (as traders, mercenaries, or adventurers) know the Common tongue, while warriors in the dwarven cities usually learn Goblin to better interrogate and spy on those evil denizens of the deep caves.

Most dwarves encountered outside their home are warriors.

COMBAT

Dwarves are experts in combat, effectively using their environment and executing well-planned group attacks. They rarely use magic in fights, since they have few wizards or sorcerers (but dwarven clerics throw themselves into battle as heartily as their fellow warriors). If they have time to prepare, they may build deadfalls or other traps involving stone. In addition to the dwarven waraxe and thrown hammer, dwarves also use warhammers, picks, shortbows, heavy crossbows, and maces.

Dwarf Traits (Ex): Dwarves possess the following racial traits.

— +2 Constitution, -2 Charisma.

— Medium size.

— A dwarf's base land speed is 20 feet. However, dwarves can move at this speed even when wearing medium or heavy armor or when carrying a medium or heavy load.

— Darkvision out to 60 feet.

— Stonecunning: This ability grants a dwarf a +2 racial bonus on Search checks to notice unusual stonework, such as sliding walls, stonework traps, new construction (even when built to match the old), unsafe stone surfaces, shaky stone ceilings, and the like. Something that isn't stone but that is disguised as stone also counts as unusual stonework. A dwarf who merely comes within 10 feet of unusual stonework can make a Search check as if he were actively searching, and a dwarf can use the Search skill to find stonework traps as a rogue can. A dwarf can also intuit depth, sensing his approximate depth underground as naturally as a human can sense which way is up. Dwarves have a sixth sense about stonework, an innate ability that they get plenty of opportunity to practice and hone in their underground homes.

— Weapon Familiarity: Dwarves treat dwarven waraxes and dwarven urgroshes as martial weapons, rather than exotic weapons.

— Stability: Dwarves are exceptionally stable on their feet. A dwarf has a +4 bonus on ability checks made to resist being bull rushed or tripped when standing on the ground (but not when climbing, flying, riding, or otherwise not standing firmly on the ground).

— +2 racial bonus on saving throws against poison. *Not reflected in the saving throw numbers given here.

— +2 racial bonus on saving throws against spells and spell-like effects. *Not reflected in the saving throw numbers given here.

— +1 racial bonus on attack rolls against orcs (including halforcs) and goblinoids (including goblins, hobgoblins, and bugbears).

— +4 dodge bonus to Armor Class against creatures of the giant type (such as ogres, trolls, and hill giants).

— +2 racial bonus on Appraise checks that are related to stone or metal items.

— +2 racial bonus on Craft checks that are related to stone or metal.

— Automatic Languages: Common, Dwarven. Bonus Languages: Giant, Gnome, Goblin, Orc, Terran, Undercommon.

— Favored Class: Fighter.

The dwarf warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

SUBRACES

The information above is for hill dwarves, the most common variety.

There are three other major dwarven subraces, which differ from hill dwarves as follows.

Deep Dwarf

These dwarves live far underground and tend to be more standoffish with non-dwarves.

Deep dwarves are the same height as other dwarves, but leaner. Their skin sometimes has a reddish tinge, and their large eyes lack the brightness of those of their kindred, being a washed-out blue. Their hair color ranges from bright red to straw blond. They have little contact with surface dwellers, relying on hill dwarves or mountain dwarves to trade goods for them. Deep dwarves speak Dwarven and Goblin, and occasionally Draconic or Undercommon.

Deep Dwarf Traits (Ex): These traits are in addition to the hill dwarf traits, except where noted.

— Racial bonus on saves against spells and spell-like abilities increases to +3.

— Racial bonus on Fortitude saves against poisons increases to +3.

— Darkvision out to 90 feet.

— Light Sensitivity: Deep dwarves are dazzled in bright sunlight or within the radius of a *daylight* spell.

Duergar

Sometimes called gray dwarves, these evil beings dwell in the underground.

Most duergar are bald (even the females), and they dress in drab clothing that is designed to blend into stone. In their lairs they may wear jewelry, but it is always kept dull. They war with other dwarves, even allying with other underground creatures from time to time.

Duergar speak Dwarven and Undercommon.

Duergar Traits (Ex): These traits are in addition to the hill dwarf traits, except where noted.

— -4 Charisma instead of -2.

— Darkvision out to 120 feet.

— Immunity to paralysis, phantasms, and poison. This trait replaces the hill dwarf's +2 racial bonus on saving throws against poison.

— +2 racial bonus on saves against spells and spell-like abilities.

— Spell-Like Abilities: 1/day—*enlarge person* and *invisibility* as a wizard of twice the duergar's class level (minimum caster level 3rd); these abilities affect only the duergar and whatever it carries.

— Light Sensitivity: Duergar are dazzled in bright sunlight or within the radius of a *daylight* spell.

— +4 racial bonus on Move Silently checks.

— +1 racial bonus on Listen and Spot checks.

— Automatic Languages: Common, Dwarven, Undercommon.

Bonus Languages: Draconic, Giant, Goblin, Orc, Terran. This trait replaces the hill dwarf's automatic and bonus languages.

— Favored Class: Fighter.

— Level adjustment +1

— Unlike other dwarves, duergar do not have weapon familiarity with the dwarven waraxe and dwarven urgros.

The duergar warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Challenge Rating: Duergar with levels in NPC classes have a CR equal to their character level. Duergar with levels in PC classes have a CR equal to their character level +1.

Mountain Dwarf

Mountain dwarves live deeper under the mountains than hill dwarves but generally not as far underground as deep dwarves. They average about 4-1/2 feet tall and have lighter skin and hair than hill dwarves, but the same general appearance.

A typical giant eagle stands about 10 feet tall, has a wingspan of up to 20 feet, and resembles its smaller cousins in nearly every way except size. It weighs about 500 pounds.

Giant eagles speak Common and Auran.

COMBAT

A giant eagle typically attacks from a great height, diving earthward at tremendous speed. When it cannot dive, it uses its powerful talons and slashing beak to strike at its target's head and eyes.

A solitary giant eagle is typically hunting or patrolling in the vicinity of its nest and generally ignores creatures that do not appear threatening. A mated pair attacks in concert, making repeated diving attacks to drive away intruders, and fights to the death to defend their nest or hatchlings.

Evasion (Ex): With a successful Reflex save against an attack that allows a Reflex save for half damage, a giant eagle takes no damage.

Skills: Giant eagles have a +4 racial bonus on Spot checks.

TRAINING A GIANT EAGLE

Although intelligent, a giant eagle requires training before it can bear a rider in combat. To be trained, a giant eagle must have a friendly attitude toward the trainer (this can be achieved through a successful Diplomacy check). Training a friendly giant eagle requires six weeks of work and a DC 25 Handle Animal check.

Riding a giant eagle requires an exotic saddle. A giant eagle can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Giant eagle eggs are worth 2,500 gp apiece on the open market, while chicks are worth 4,000 gp each. Professional trainers charge 1,000 gp to rear or train a giant eagle.

Carrying Capacity: A light load for a giant eagle is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

Level

Adjustment:

Air elementals speak Auran, though they rarely choose to do so.

Combat

Their rapid speed makes air elementals useful on vast battlefields or in extended aerial combat.

Air Mastery (Ex): Airborne creatures take a –1 penalty on attack and damage rolls against an air elemental.

Whirlwind (Su): The elemental can transform itself into a whirlwind once every 10 minutes and remain in that form for up to 1 round for every 2 HD it has. In this form, the elemental can move through the air or along a surface at its fly speed.

The whirlwind is 5 feet wide at the base, up to 30 feet wide at the top, and up to 50 feet tall, depending on the elemental's size. The elemental controls the exact height, but it must be at least 10 feet.

The elemental's movement while in whirlwind form does not provoke attacks of opportunity, even if the elemental enters the space another creature occupies. Another creature might be caught in the whirlwind if it touches or enters the whirlwind, or if the elemental moves into or through the creature's space.

Creatures one or more size categories smaller than the elemental might take damage when caught in the whirlwind (see the table below for details) and may be lifted into the air. An affected creature must succeed on a Reflex save when it comes into contact with the whirlwind or take the indicated damage. It must also succeed on a second Reflex save or be picked up bodily and held suspended in the powerful winds, automatically taking the indicated damage each round. A creature that can fly is allowed a Reflex save each round to escape the whirlwind. The creature still takes damage but can leave if the save is successful. The DC for saves against the whirlwind's effects varies with the elemental's size (see the table). The save DC is Strength based.

Creatures trapped in the whirlwind cannot move except to go where the elemental carries them or to escape the whirlwind. Creatures caught in the whirlwind can otherwise act normally, but must succeed on a Concentration check (DC 15 + spell level) to cast a spell. Creatures caught in the whirlwind take a –4 penalty to Dexterity and a –2 penalty on attack rolls. The elemental can have only as many creatures trapped inside the whirlwind at one time as will fit inside the whirlwind's volume. The elemental can eject any carried creatures whenever it wishes, depositing them wherever the whirlwind happens to be. A summoned elemental always ejects trapped creatures before returning to its home plane.

If the whirlwind's base touches the ground, it creates a swirling cloud of debris. This cloud is centered on the elemental and has a diameter equal to half the whirlwind's height. The cloud obscures all vision, including darkvision, beyond 5 feet.

Creatures 5 feet away have concealment, while those farther away have total concealment.

Those caught in the cloud must succeed on a Concentration check (DC 15 + spell level) to cast a spell.

An elemental in whirlwind form cannot make slam attacks and does not threaten the area around it.

Adjustment:

When summoned to the Material Plane, an earth elemental consists of whatever types of dirt, stones, precious metals, and gems it was conjured from.

Earth elementals speak Terran but rarely choose to do so.

Combat

Though an earth elemental moves slowly, it is a relentless opponent. It can travel through solid ground or stone as easily as humans walk on the earth's surface. It cannot swim, however, and must either walk around a body of water or go through the ground under it. An earth elemental can move along the bottom of a body of water but prefers not to.

Earth Mastery (Ex): An earth elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground. If an opponent is airborne or waterborne, the elemental takes a -4 penalty on attack and damage rolls. (These modifiers are not included in the statistics block.)

Push (Ex): An earth elemental can start a bull rush maneuver without provoking an attack of opportunity. The combat modifiers given in Earth Mastery, above, also apply to the elemental's opposed Strength checks.

Earth Glide (Ex): An earth elemental can glide through stone, dirt, or almost any other sort of earth except metal as easily as a fish swims through water. Its burrowing leaves behind no tunnel or hole, nor does it create any ripple or other signs of its presence. A *move earth* spell cast on an area containing a burrowing earth elemental flings the elemental back 30 feet, stunning the creature for 1 round unless it succeeds on a DC 15 Fortitude save.

A fire elemental cannot enter water or any other nonflammable liquid. A body of water is an impassible barrier unless the fire elemental can step or jump over it.

Fire elementals speak Ignan, though they rarely choose to do so.

Combat

A fire elemental is a fierce opponent that attacks its enemies directly and savagely. It takes joy in burning the creatures and objects of the Material Plane to ashes.

Burn (Ex): A fire elemental's slam attack deals bludgeoning damage plus fire damage from the elemental's flaming body. Those hit by a fire elemental's slam attack also must succeed on a Reflex save or catch on fire. The flame burns for 1d4

rounds. The save DC varies with the elemental's size (see the table below). A burning creature can take a move action to put out the flame. The save DC is Constitution-based.

Creatures hitting a fire elemental with natural weapons or unarmed attacks take fire damage as though hit by the elemental's attack, and also catch on fire unless they succeed on a Reflex save.

A water elemental can't venture more than 180 feet from the body of water from which it was conjured.

Water elementals speak Aquan but rarely choose to do so.

Combat

A water elemental prefers to fight in a large body of water where it can disappear beneath the waves and suddenly swell up behind its opponents.

Water Mastery (Ex): A water elemental gains a +1 bonus on attack and damage rolls if both it and its opponent are touching water. If the opponent or the elemental is touching the ground, the elemental takes a –4 penalty on attack and damage rolls. (These modifiers are not included in the statistics block.)

A water elemental can be a serious threat to a ship that crosses its path. An elemental can easily overturn small craft (5 feet of length per Hit Die of the elemental) and stop larger vessels (10 feet long per HD). Even large ships (20 feet long per HD) can be slowed to half speed.

Drench (Ex): The elemental's touch puts out torches, campfires, exposed lanterns, and other open flames of nonmagical origin if these are of Large size or smaller. The creature can dispel magical fire it touches as *dispel magic* (caster level equals elemental's HD).

Vortex (Su): The elemental can transform itself into a whirlpool once every 10 minutes, provided it is underwater, and remain in that form for up to 1 round for every 2 HD it has. In vortex form, the elemental can move through the water or along the bottom at its swim speed. The vortex is 5 feet wide at the base, up to 30 feet wide at the top, and 10 feet or more tall, depending on the elemental's size. The elemental controls the exact height, but it must be at least 10 feet.

The elemental's movement while in vortex form does not provoke attacks of opportunity, even if the elemental enters the space another creature occupies. Another creature might be caught in the vortex if it touches or enters the vortex, or if the elemental moves into or through the creature's space.

Creatures one or more size categories smaller than the elemental might take damage when caught in the vortex (see the table below for details) and may be swept up by it. An affected creature must succeed on a Reflex save when it comes into contact with the vortex or take the indicated damage. It must also succeed on a second Reflex save or be picked up bodily and held suspended in the powerful currents, automatically taking damage each round. An affected creature is allowed a Reflex save each round to escape the vortex. The creature still takes damage, but can leave if the save is successful. The DC for saves against the vortex's effects varies with the elemental's size. The save DC is Strength-based.

Creatures trapped in the vortex cannot move except to go where the elemental carries them or to escape the whirlwind.

Creatures caught in the whirlwind can otherwise act normally, but must make a Concentration check (DC 10 + spell level) to cast a spell. Creatures caught in the whirlwind take a –4 penalty to Dexterity and a –2 penalty on attack rolls. The elemental can have only as many creatures trapped inside the vortex at one time as will fit inside the vortex's volume.

The elemental can eject any carried creatures whenever it wishes, depositing them wherever the vortex happens to be. A summoned elemental always ejects trapped creatures before returning to its home plane.

If the vortex's base touches the bottom, it creates a swirling cloud of debris. This cloud is centered on the elemental and has a diameter equal to half the vortex's height. The cloud obscures all vision, including darkvision, beyond 5 feet. Creatures 5 feet away have concealment, while those farther away have total concealment.

Those caught in the cloud must make a Concentration check (DC 15 + spell level) to cast a spell.

An elemental in vortex form cannot make slam attacks and does not threaten the area around it.

Skills: A water elemental has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Adjustment:

Elves average 5 feet tall and typically weigh just over 100 pounds. They live on fruits and grains, though they occasionally hunt for fresh meat. Elves prefer colorful clothes, usually with a green-and-gray cloak that blends well with the colors of the forest.

Elves speak Elven, and most also know Common and Sylvan.

Most elves encountered outside their homes are warriors; the information presented here is for one of 1st level.

COMBAT

Elves are cautious warriors and take time to analyze their opponents and the location of the fight if at all possible, maximizing their advantage by using ambushes, snipers, and camouflage. They prefer to fire from cover and retreat before they are found, repeating this maneuver until all of their enemies are dead.

They prefer longbows, shortbows, rapiers, and longswords. In melee, elves are graceful and deadly, using complex maneuvers that are beautiful to observe. Their wizards often use *sleep* spells during combat because these won't affect other elves.

Elf Traits (Ex): Elves possess the following racial traits.

- +2 Dexterity, -2 Constitution.

- Medium size.

- An elf's base land speed is 30 feet.

- Immunity to *sleep* spells and effects, and a +2 racial saving throw bonus against enchantment spells or effects. (Not reflected in the saving throw modifiers given here.)

- Low-light vision.

- Weapon Proficiency: Elves are automatically proficient with the longsword, rapier, longbow, composite longbow, shortbow, and composite shortbow.

- +2 racial bonus on Listen, Search, and Spot checks. An elf who merely passes within 5 feet of a secret or concealed door is entitled to a Search check to notice it as if she were actively looking for it.

- Automatic Languages: Common, Elven. Bonus Languages: Draconic, Gnoll, Gnome, Goblin, Orc, Sylvan.

- Favored Class: Wizard.

The elf warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

SUBRACES

The above information describes the high elf, the most common variety. There are five other major subraces of elf, in addition to half-elves, who share enough elven characteristics to be included here.

Half-Elf

Half-elves are not truly an elf subrace, but they are often mistaken for elves. Half-elves usually inherit a good blend of their parents' physical characteristics.

Half-Elf Traits (Ex): Half-elves possess the following racial traits.

- Medium size.

- A half-elf's base land speed is 30 feet.

- Immunity to *sleep* spells and similar magical effects, and a +2 racial bonus on saving throws against enchantment spells or effects.

- Low-light vision.

- +1 racial bonus on Listen, Search, and Spot checks. A half-elf does not have the elf's ability to notice secret doors simply by passing near them.

- +2 racial bonus on Diplomacy and Gather Information checks: Half-elves get along naturally with all people. This bonus may not apply in situations or settings where half-elves are viewed with distrust.

- Elven Blood: For all effects related to race, a half-elf is considered an elf. Half-elves, for example, are just as vulnerable to special effects that affect elves as their elf ancestors are, and they can use magic items that are only usable by elves.

- Automatic Languages: Common, Elven. Bonus Languages: Any (other than secret languages, such as Druidic).

- Favored Class: Any. When determining whether a multiclass half-elf takes an experience point penalty for multiclassing, her highest-level class does not count.

Aquatic Elf

Also called sea elves, these creatures are waterbreathing cousins to land-dwelling elves.

Aquatic elves fight underwater with tridents, spears, and nets.

Aquatic Elf Traits (Ex): These traits are in addition to the high elf traits, except where noted.

- +2 Dexterity, -2 Intelligence. These adjustments replace the high elf's ability score adjustments.

- An aquatic elf has the aquatic subtype.

- An aquatic elf has a swim speed of 40 feet.
- Gills: Aquatic elves can survive out of the water for 1 hour per point of Constitution (after that, refer to the suffocation rules).
- Superior Low-Light Vision: Aquatic elves can see four times as far as a human in starlight, moonlight, torchlight, and similar conditions of low illumination. This trait replaces the high elf's low-light vision.
- Favored Class: Fighter. This trait replaces the high elf's favored class.

Drow

Also known as dark elves, drow are a depraved and evil subterranean offshoot. White is the most common hair color among drow, but almost any pale shade is possible. Drow tend to be smaller and thinner than other sorts of elves, and their eyes are often a vivid red. Drow usually coat their arrows with a potent venom.

Poison (Ex): An opponent hit by a drow's poisoned weapon must succeed on a DC 13 Fortitude save or fall unconscious. After 1 minute, the subject must succeed on another DC 13 Fortitude save or remain unconscious for 2d4 hours. A typical drow carries 1d4–1 doses of drow knockout poison. Drow typically coat arrows and crossbow bolts with this poison, but it can also be applied to a melee weapon. Note that drow have no special ability to apply poison without risking being poisoned themselves. Since this poison is not a magical effect, drow and other elves are susceptible to it.

Drow Traits (Ex): These traits are in addition to the high elf traits, except where noted.

- +2 Intelligence, +2 Charisma.
- Darkvision out to 120 feet. This trait replaces the high elf's low-light vision.
- Spell resistance equal to 11 + class levels.
- +2 racial bonus on Will saves against spells and spell-like abilities.
- Spell-Like Abilities: Drow can use the following spell-like abilities once per day: *dancing lights, darkness, faerie fire*. Caster level equals the drow's class levels.
- Weapon Proficiency: A drow is automatically proficient with the hand crossbow, the rapier, and the short sword. This trait replaces the high elf's weapon proficiency.
- Automatic Languages: Common, Elven, Undercommon. Bonus Languages: Abyssal, Aquan, Draconic, Drow Sign Language, Gnome, Goblin. This trait replaces the high elf's automatic and bonus languages.
- Light Blindness: Abrupt exposure to bright light (such as sunlight or a *daylight* spell) blinds drow for 1 round. On subsequent rounds, they are dazzled as long as they remain in the affected area.
- Favored Class: Wizard (male) or cleric (female). This trait replaces the high elf's favored class.
- Level adjustment +2.

The drow warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Challenge Rating: Drow with levels in NPC classes have a CR equal to their character level. Drow with levels in PC classes have a CR equal to their character level +1.

Gray Elf

Taller and grander in physical appearance than others of their race, gray elves have a reputation for being aloof and arrogant (even by elven standards). They have either silver hair and amber eyes or pale golden hair and violet eyes. They prefer clothing of white, silver, yellow, or gold, with cloaks of deep blue or purple.

Gray Elf Traits (Ex): These traits are in addition to the high elf traits.

- +2 Intelligence, –2 Strength.

Wild Elf

Wild elves are barbaric and tribal. Wild elves' hair color ranges from black to light brown, lightening to silvery white with age. They dress in simple clothing of animal skins and basic plant weaves.

Wild Elf Traits (Ex): These traits are in addition to the high elf traits, except where noted.

- +2 Dexterity, –2 Intelligence. These adjustments replace the high elf's ability score adjustments.
- Favored Class: Sorcerer. This trait replaces the high elf's favored class.

Wood Elf

Their hair color ranges from yellow to a coppery red, and they are more muscular than other elves. Their clothing is in dark shades of green and earth tones to better blend in with their natural surroundings.

Wood Elf Traits (Ex): These traits are in addition to the high elf traits, except where noted.

- +2 Strength, –2 Intelligence.
- Favored Class: Ranger. This trait replaces the high elf's favored class.

ETHEREAL FILCHER

Medium Aberration

Hit Dice:	5d8 (22 hp)
Initiative:	+8
Speed:	40 ft. (8 squares)
Armor Class:	17 (+4 Dex, +3 natural), touch 14, flat-footed 13
Base Attack/Grapple:	+3/+3
Attack:	Bite +3 melee (1d4)
Full Attack:	Bite +3 melee (1d4)
Space/Reach:	5 ft./5 ft.
Special Attacks:	—
Special Qualities:	Darkvision 60 ft., detect magic, ethereal jaunt
Saves:	Fort +1, Ref +5, Will +5
Abilities:	Str 10, Dex 18, Con 11, Int 7, Wis 12, Cha 10
Skills:	Listen +9, Sleight of Hand +12, Spot +9
Feats:	Dodge, Improved Initiative
Environment:	Underground
Organization:	Solitary
Challenge Rating:	3
Treasure:	No coins; standard goods; double items
Alignment:	Usually neutral
Advancement:	6–7 HD (Medium); 8–15 HD (Large)

Level Adjustment:

Ethereal filchers are bizarre-looking creatures with a penchant for snatching trinkets from passersby. Their ability to move quickly between the Ethereal Plane and the Material Plane makes them spectacular pickpockets.

Ethereal filchers do not speak.

COMBAT

An ethereal filcher prowls about, using its ethereal jaunt ability to move about unseen (and often through solid objects). Upon locating a likely mark, it shifts to the Material Plane, attempting to catch its victim unaware. The creature attempts to seize an item, then retreats quickly back to the Ethereal Plane. It is not above delivering a bite to distract its target. Once it secures a trinket, it scurries back to its lair to admire its prize. When badly wounded, a filcher escapes rather than continuing the fight. Any number of simple ruses can blunt a filcher's attack.

Detect Magic (Su): Ethereal filchers can detect magic as the spell (caster level 5th) at will.

Ethereal Jaunt (Su): An ethereal filcher can shift from the Ethereal Plane to the Material Plane as part of any move action, and shift back again as a free action. It can remain on the Ethereal Plane for 1 round before returning to the Material Plane. The ability is otherwise identical with the *ethereal jaunt* spell (caster level 15th).

Skills: Ethereal filchers have a +8 racial bonus on Sleight of Hand checks, and a +4 racial bonus on Listen and Spot checks.

ETHEREAL MARAUDER

Medium Magical Beast (Extraplanar)

Hit Dice:	2d10 (11 hp)
Initiative:	+5
Speed:	40 ft. (8 squares)
Armor Class:	14 (+1 Dex, +3 natural), touch 11, flat-footed 13
Base Attack/Grapple:	+2/+4

Feats:	Improved Initiative
Environment:	Ethereal Plane
Organization:	Solitary
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	3–4 HD (Medium); 5–6 HD (Large)

Level Adjustment:

—

Ethereal marauders live and hunt on the Ethereal Plane. Ethereal marauders' coloration ranges from bright blue to deep violet. An ethereal marauder stands about 4 feet tall, but its overall length is about 7 feet. It weighs about 200 pounds. Ethereal marauders speak no known languages. Survivors of their attacks on the Material Plane claim that they emit an eerie, high whine that varies in pitch depending on the creature's speed and health.

COMBAT

Once a marauder locates prey, it shifts to the Material Plane to attack, attempting to catch its victim flat-footed. The creature bites its victim, then retreats quickly back to the Ethereal Plane. When badly hurt or wounded, a marauder escapes to its home plane rather than continuing the fight.

Ethereal Jaunt (Su): An ethereal marauder can shift from the Ethereal Plane to the Material Plane as a free action, and shift back again as a move action. The ability is otherwise identical with the *ethereal jaunt* spell (caster level 15th).

Skills: Ethereal marauders have a +2 racial bonus on Listen, Move Silently, and Spot checks.

An ettercap is about 6 feet tall and weighs about 200 pounds.

Ettercaps speak Common.

COMBAT

Ettercaps are not brave creatures, but their cunning traps often ensure that the enemy never draws a weapon. When an ettercap does engage its enemies, it attacks with its keen-edged claws and venomous bite. It usually will not come within melee reach of any foe that is still able to move.

Poison (Ex): Injury, Fortitude DC 15, initial damage 1d6 Dex, secondary damage 2d6 Dex. The save DC is Constitution based and includes a +2 racial bonus.

Web (Ex): An ettercap can throw a web eight times per day. This is similar to an attack with a net but has a maximum range of 50 feet, with a range increment of 10 feet, and is effective against targets of up to Medium size. The web anchors the target in place, allowing no movement.

An entangled creature can escape with a DC 13 Escape Artist check or burst the web with a DC 17 Strength check. The check DCs are Constitution-based, and the Strength check DC includes a +4 racial bonus. The web has 6 hit points, hardness 0, and takes double damage from fire.

Ettercaps can also create sheets of sticky webbing from 5 to 60 feet square. They usually position these to snare flying creatures but can also try to trap prey on the ground. Approaching creatures must succeed on a DC 20 Spot check to notice a web, or they stumble into it and become trapped as though by a successful web attack. Attempts to escape or burst the webbing receive a +5 bonus if the trapped creature has something to walk on or grab while pulling free. Each 5-foot-square section has 6 hit points, hardness 0, and takes double damage from fire.

An ettercap can move across its own sheet web at its climb speed and can determine the exact location of any creature touching the web.

Skills: Ettercaps have a +4 racial bonus on Craft (trapmaking), Hide, and Spot checks. They have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

Level Adjustment:	+5

Ettins, or two-headed giants, are vicious and unpredictable hunters that stalk the night.

An ettin never bathes if it can help it, which usually leaves it so grimy and dirty its skin resembles thick, gray hide. Adult ettins are about 13 feet tall and weigh 5,200 pounds. They live about 75 years.

Ettins have no language of their own but speak a pidgin of Orc, Goblin, and Giant. Creatures that can speak any of these languages must succeed on a DC 15 Intelligence check to communicate with an ettin. Check once for each bit of information:

If the other creature speaks two of these languages, the DC is 10, and for someone who speaks all three, the DC is 5.

COMBAT

Though ettins aren't very intelligent, they are cunning fighters.

They prefer to ambush their victims rather than charge into a straight fight, but once the battle has started, an ettin usually fights furiously until all enemies are dead.

Superior Two-Weapon Fighting (Ex): An ettin fights with a morningstar or javelin in each hand. Because each of its two heads controls an arm, the ettin does not take a penalty on attack or damage rolls for attacking with two weapons.

Skills: An ettin's two heads give it a +2 racial bonus on Listen, Spot, and Search checks.

FIENDISH CREATURE

Fiendish creatures dwell on the lower planes, the realms of evil, although they resemble beings found on the Material Plane.

They are more fearsome in appearance than their earthly counterparts.

CREATING A FIENDISH CREATURE

“Fiendish” is an inherited template that can be added to any corporeal aberration, animal, dragon, fey, giant, humanoid, magical beast, monstrous humanoid, ooze, plant, or vermin of nongood alignment (referred to hereafter as the base creature).

A fiendish creature uses all the base creature’s statistics and abilities except as noted here. Do not recalculate the creature’s Hit Dice, base attack bonus, saves, or skill points if its type changes.

Size and Type: Animals or vermin with this template become magical beasts, but otherwise the creature type is unchanged. Size is unchanged. Fiendish creatures encountered on the Material Plane have the extraplanar subtype.

Special Attacks: A fiendish creature retains all the special attacks of the base creature and also gains the following special attack.

Smite Good (Su): Once per day the creature can make a normal melee attack to deal extra damage equal to its HD total (maximum of +20) against a good foe.

Special Qualities: A fiendish creature retains all the special qualities of the base creature and also gains the following.

—Darkvision out to 60 feet.

—Damage reduction (see the table below).

—Resistance to cold and fire (see the table below).

—Spell resistance equal to the creature’s HD + 5 (maximum 25).

If the base creature already has one or more of these special qualities, use the better value.

If a fiendish creature gains damage reduction, its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Abilities: Same as the base creature, but Intelligence is at least 3.

Environment: Any evil-aligned plane.

Challenge Rating: HD 3 or less, as base creature; HD 4 to 7, as base creature +1; HD 8 or more, as base creature +2.

Alignment: Always evil (any).

Level Adjustment: Same as the base creature +2.

A formian resembles a cross between an ant and a centaur. All formians are covered in a brownish-red carapace; size and appearance differs for each variety.

COMBAT

Formians are generally aggressive, seeking to subdue all they encounter. If they perceive even the slightest threat to their hive-city or to their queen, they attack immediately and fight to the death. Any formian also attacks immediately if ordered to do so by a superior.

Hive Mind (Ex): All formians within 50 miles of their queen are in constant communication. If one is aware of a particular danger, they all are. If one in a group is not flatfooted, none of them are. No formian in a group is considered flanked unless all of them are.

WORKER

While workers cannot speak, they can convey simple concepts (such as danger) by body movements. Through the hive mind, however, they can communicate just fine—although their intelligence still limits the concepts that they can grasp.

A worker is about 3 feet long and about 2-1/2 feet high at the front. It weighs about 60 pounds. Its hands are suitable only for manual labor.

Combat

Formian workers fight only to defend their hive-cities, using their mandibled bite.

A formian worker's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Cure Serious Wounds (Sp): Eight workers together can heal a creature's wounds as though using the *cure serious wounds* spell (caster level 7th). This is a full-round action for all eight workers.

Make Whole (Sp): Three workers together can repair an object as though using the *make whole* spell (caster level 7th). This is a fullround action for all three workers.

WARRIOR

Warriors communicate through the hive mind to convey battle plans and make reports to their commanders. They cannot speak otherwise.

A warrior is about is about 5 feet long and about 4-1/2 feet high at the front. It weighs about 180 pounds.

Combat

Warriors are wicked combatants, using claws, bite, and a poisonous sting all at once. Through the hive mind, they attack with coordinated and extremely efficient tactics.

A formian warrior's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Poison (Ex): Injury, Fortitude DC 14, initial and secondary damage 1d6 Str. The save DC is Constitution-based.

TASKMASTER

These formians communicate only telepathically and derive sustenance from the mental energies of those they dominate. A taskmaster is about the same size as a warrior.

Combat

Taskmasters rely on their dominated slaves to fight for them if at all possible. If necessary, though, they can defend themselves with claws and a poison sting.

A formian taskmaster's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Dominate Monster (Su): A taskmaster can use a *dominate monster* ability as the spell from a 10th-level caster (Will DC 17 negates), although the subject may be of any kind and may be up to Large size. Creatures that successfully save cannot be affected by the same taskmaster's dominate monster ability for 24 hours. A single taskmaster can dominate up to four subjects at a time. The save DC is Charisma-based.

Dominated Creature (Ex): A taskmaster is never encountered alone. One dominated nonformian creature always accompanies it (choose or determine randomly any creature of CR 4).

Poison (Ex): Injury, Fortitude DC 15, initial and secondary damage 1d6 Str. The save DC is Constitution-based.

MYRMARCH

Myrmarchs are the elite of formian society. Much more than those beneath them, these creatures are individuals, with goals, desires, and creative thought.

A myrmarch is about 7 feet long and about 5-1/2 feet high at the front. It weighs about 1,500 pounds. Its claws are capable of fine manipulation, like human hands. Each myrmarch wears a bronze helm to signify its position (the more elaborate the helm, the more prestigious the position).

Myrmarchs speak Formian and Common.

Combat

Myrmarchs' claws are like hands and thus serve no combat purpose.

Myrmarchs occasionally employ javelins for ranged attacks, coated with poison from their own stingers.

They fight intelligently, aiding those under them (if any such are present) and commanding them through the hive mind. If chaotic creatures are present, however, a myrmarch is singleminded in its quest to destroy them.

A formian myrmarch's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Poison (Ex): Injury, Fortitude DC 20, initial and secondary damage 2d6 Dex. The save DC is Constitution-based.

Spell-Like Abilities: At will—*charm monster* (DC 17), *clairaudience/clairvoyance*, *detect chaos*, *detect thoughts* (DC 15), *magic circle against chaos*, *greater teleport*; 1/day—*dictum* (DC 20), *order's wrath* (DC 17). Caster level 12th. The save DCs are Charisma-based.

QUEEN

The formian queen cannot move. With her telepathic abilities, though, she can send instructions to and get reports from any formian within her range.

She is about 10 feet long, perhaps 4 feet high, and weighs about 3,500 pounds.

The queen speaks Formian and Common, although she can communicate with any creature telepathically.

Combat

The queen does not fight. She has no ability to move. If necessary, a team of workers and myrmarchs (or dominated slaves) haul her enormous bulk to where she needs to go. This sort of occurrence is very rare, however, and most of the time the queen remains within her well-defended chambers.

Despite her utter lack of physical activity, the queen can cast spells and use spell-like abilities to great effect in her own defense as well as the defense of the hive-city.

Spells: The queen casts arcane spells as a 17th-level sorcerer.

Typical Sorcerer Spells Known (6/8/7/7/7/7/6/6/4, base save DC 15 + spell level): 0—*acid splash*, *arcane mark*, *daze*, *detect magic*, *light*, *mage hand*, *read magic*, *resistance*, *touch of fatigue*; 1st—*comprehend languages*, *identify*, *mage armor*, *magic missile*, *shield*; 2nd—*hypnotic pattern*, *invisibility*, *protection from arrows*, *resist energy*, *scorching ray*; 3rd—*dispel magic*, *heroism*, *nondetection*, *slow*; 4th—*confusion*, *detect scrying*, *black tentacles*, *scrying*; 5th—*cone of cold*, *dismissal*, *teleport*, *wall of force*; 6th—*analyze dweomer*, *geas/quest*, *repulsion*; 7th—*summon monster VII*, *vision*, *waves of exhaustion*; 8th—*prismatic wall*, *temporal stasis*.

A frost worn cannot burrow through stone, but can manage ice and frozen earth. When moving through such hard materials it leaves behind a usable tunnel about 5 feet in diameter.

A frost worm is about 40 feet long, 5 feet in diameter, and weighs about 8,000 pounds.

COMBAT

Frost worms lurk under the snow, waiting for prey to come near.

They begin an attack with a trill and then set upon helpless prey with their bite.

Trill (Su): A frost worm can emit a noise that forces its prey to stand motionless. This sonic mind-affecting compulsion affects all creatures other than frost worms within a 100-foot radius. Creatures must succeed on a DC 17 Will save or be stunned for as long as the worm trills and for 1d4 rounds thereafter, even if they are attacked. However, if attacked or violently shaken (a full-round action), a victim is allowed another saving throw. Once a creature has resisted or broken the effect, it cannot be affected again by that same frost worm's trill for 24 hours. The effect's caster level is 14th. The save DC is Charisma-based.

Cold (Ex): A frost worm's body generates intense cold, causing opponents to take an extra 1d8 points of cold damage every time the creature succeeds on a bite attack. Creatures attacking a frost worm unarmed or with natural weapons take this same cold damage each time one of their attacks hits.

Breath Weapon (Su): 30-foot cone, once per hour, damage 15d6 cold, Reflex DC 22 half. Opponents held motionless by the frost worm's trill get no saving throw. The save DC is Constitution-based.

Death Throes (Ex): When killed, a frost worm turns to ice and shatters in an explosion that deals 12d6 points of cold damage and 8d6 points of piercing damage to everything within 100 feet (Reflex half DC 22). The save DC is Constitution-based.

Skills: *A frost worm, due to its coloration and its affinity for burying itself in the snow, has a +10 racial bonus on Hide checks in its native environment.

COMBAT

Shriekers and violet fungi often work together to attract and kill prey. When the shriekers' hellish racket attracts a curious creature, the violet fungus tries to kill it. Both creatures enjoy the fruits of a successful hunt.

SHRIEKER

A shrieker is a stationary fungus that emits a loud noise to attract prey or when disturbed. Shriekers live in dark, subterranean places, often in the company of violet fungi, whose poison they are immune to.

Shriekers come in shades of purple.

Combat

A shrieker has no means of attack. Instead, it lures prey to its vicinity by emitting a loud noise.

Shriek (Ex): Movement or a light source within 10 feet of a shrieker causes the fungus to emit a piercing sound that lasts for 1d3 rounds. The sound attracts nearby creatures that are disposed to investigate it. Some creatures that live near shriekers come to learn that the fungus's noise means there is food nearby.

VIOLET FUNGUS

Violet fungi resemble shriekers and are often found growing among them.

A violet fungi's coloration ranges from purple overall to dull gray or violet covered with purple spots.

Combat

A violet fungus flails about with its tentacles at living creatures that come within its reach.

Poison (Ex): Injury, Fortitude DC 14, initial and secondary damage 1d4 Str and 1d4 Con. The save DC is Constitution-based.

Level Adjustment:	+5

Gargoyles often appear to be winged stone statues, for they can perch indefinitely without moving and use this disguise to surprise their foes. They require no food, water, or air, but often eat their fallen foes out of fondness for inflicting pain.

Gargoyles speak Common and Terran.

COMBAT

Gargoyles either remain still, then suddenly attack, or dive onto their prey.

A gargoyle's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Freeze (Ex): A gargoyle can hold itself so still it appears to be a statue. An observer must succeed on a DC 20 Spot check to notice the gargoyle is really alive.

Skills: Gargoyles have a +2 racial bonus on Hide, Listen, and Spot checks. *The Hide bonus increases by +8 when a gargoyle is concealed against a background of stone.

KAPOACINTH

These cousins of the gargoyle have the aquatic subtype. They have a base land speed of 40 feet and a swim speed of 60 feet (no fly speed) and are found only in aquatic environments.

GARGOYLES AS CHARACTERS

Gargoyle characters possess the following racial traits.

— +4 Strength, +4 Dexterity, +8 Constitution, -4 Intelligence, -4 Charisma.

— Medium size.

— A gargoyle's base land speed is 40 feet. It also has a fly speed of 60 feet (average).

— Darkvision out to 60 feet.

— Racial Hit Dice: A gargoyle begins with four levels of monstrous humanoid, which provide 4d8 Hit Dice, a base attack bonus of +4, and base saving throw bonuses of Fort +1, Ref +4, and Will +4.

— Racial Skills: A gargoyle's monstrous humanoid levels give it skill points equal to $7 \times (2 + \text{Int modifier})$. Its class skills are Hide, Listen, and Spot. A gargoyle has a +2 racial bonus on Hide, Listen, and Spot checks, and an additional +8 bonus on Hide checks when it is concealed against a background of stone.

— Racial Feats: A gargoyle's monstrous humanoid levels give it two feats.

— +4 natural armor bonus.

— Special Qualities (see above): Damage reduction 10/magic, freeze.

- Automatic Languages: Common. Bonus Languages: Auran, Dwarven, Elven, Gnome, Halfling, Giant, Terran.
- Favored Class: Fighter.
- Level adjustment +5.

GENIE

Genies are humanlike beings who dwell on the elemental planes. They are famous for their strength, guile, and skill with illusion magic.

COMBAT

Genies prefer to outmaneuver and outthink their foes. They are not too proud to flee if it means they'll live to fight another day. If trapped, they bargain, offering treasure or favors in return for their lives and freedom.

Plane Shift (Sp): A genie can enter any of the elemental planes, the Astral Plane, or the Material Plane. This ability transports the genie and up to eight other creatures, provided they all link hands with the genie. It is otherwise similar to the spell of the same name (caster level 13th).

Advancement:	8–10 HD (Large); 11–21 (Huge)
Level Adjustment:	+6

The djinn (singular djinni) are genies from the Elemental Plane of Air.

A djinni is about 10-1/2 feet tall and weighs about 1,000 pounds.

Djinn speak Auran, Celestial, Common, and Ignan.

Combat

Djinn disdain physical combat, preferring to use their magical powers and aerial abilities against foes. A djinni overmatched in combat usually takes flight and becomes a whirlwind to harass those who follow.

Air Mastery (Ex): Airborne creatures take a –1 penalty on attack and damage rolls against a djinni.

Spell-Like Abilities: At will—*invisibility* (self only); 1/day—*create food and water*, *create wine* (as *create water*, but wine instead), *major creation* (created vegetable matter is permanent), *persistent image* (DC 17), *wind walk*. Once per day, a djinni can assume *gaseous form* (as the spell) for up to 1 hour. Caster level 20th. The save DCs are Charisma-based.

Whirlwind (Su): A djinni can transform itself into a whirlwind once every 10 minutes and remain in that form for up to 7 rounds. In this form, it can move through the air or along a surface at its fly speed.

The whirlwind is 5 feet wide at the base, up to 30 feet wide at the top and up to 50 feet tall. The djinni controls the exact height, but it must be at least 10 feet.

A djinni's movement while in whirlwind form does not provoke attacks of opportunity, even if the djinni enters the space another creature occupies. Another creature might be caught in the whirlwind if it touches or enters the whirlwind, or if the djinni moves into or through the creature's space.

Creatures one or more size categories smaller than the djinni might take damage when caught in the whirlwind and be lifted into the air. An affected creature must succeed on a DC 20 Reflex save when it comes into contact with the whirlwind or take 3d6 points of damage. It must also succeed on a second DC 20 Reflex save or be picked up bodily and held suspended in the powerful winds, automatically taking 1d8 points of damage each round. A creature with a fly speed is allowed a DC 20 Reflex save each round to escape the whirlwind. The creature still takes damage but can leave if the save is successful. The save DC is Strength-based and includes a +3 racial adjustment.

Creatures trapped in the whirlwind cannot move except to go where the djinni carries them or to escape the whirlwind.

Creatures caught in the whirlwind can otherwise act normally, but must make a Concentration check (DC 15 + spell level) to cast a spell. Creatures caught in the whirlwind take a -4 penalty to Dexterity and a -2 penalty on attack rolls. The djinni can have only as many trapped inside a whirlwind at one time as will fit inside the whirlwind's volume.

The djinni can eject any carried creatures whenever it wishes, depositing them wherever the whirlwind happens to be.

If the whirlwind's base touches the ground, it creates a swirling cloud of debris. This cloud is centered on the djinni and has a diameter equal to half the whirlwind's height. The cloud obscures all vision, including darkvision, beyond 5 feet. Creatures 5 feet away have concealment, while those farther away have total concealment.

Those caught in the cloud must succeed on a Concentration check (DC 15 + spell level) to cast a spell.

A djinni in whirlwind form cannot make melee attacks and does not threaten the area around it.

Noble Djinn

Some djinn (1% of the total population) are noble. A noble djinni can grant three *wishes* to any being (nongenies only) who captures it. Noble djinn perform no other services and, upon granting the third *wish*, are free of their servitude. Noble djinn are as strong as efreet (see below), with 10 Hit Dice.

Level Adjustment:

The efreet (singular efreeti) are genies from the Elemental Plane of Fire.

An efreeti stands about 12 feet tall and weighs about 2,000 pounds.

Efreet speak Auran, Common, Ignan, and Infernal.

Combat

Efreet love to mislead, befuddle, and confuse their foes. They do so for enjoyment as well as a battle tactic.

Change Size (Sp): Twice per day, an efreeti can magically change a creature's size. This works just like an *enlarge person* or *reduce person* spell (the efreeti chooses when using the ability), except that the ability can work on the efreeti. A DC 13 Fortitude save negates the effect. The save DC is Charisma-based. This is the equivalent of a 2nd-level spell.

Heat (Ex): An efreeti's red-hot body deals 1d6 points of extra fire damage whenever it hits in melee, or in each round it

maintains a hold when grappling.

Spell-Like Abilities: At will—*detect magic, produce flame, pyrotechnics* (DC 14), *scorching ray* (1 ray only); 3/day—*invisibility, wall of fire* (DC 16); 1/day—grant up to three wishes (to nongenies only), *gaseous form, permanent image* (DC 18), *polymorph* (self only). Caster level 12th. The save DCs are Charisma-based.

Advancement:	7–9 HD (Medium); 10–18 HD (Large)
Level Adjustment:	+5

The jann (singular janni) are the weakest of the genies. Jann are formed out of all four elements and must therefore spend most of their time on the Material Plane.

Jann speak Common, one elemental language (Aquan, Auran, Ignan, or Terran) and one alignment language (Abyssal, Celestial, or Infernal).

Combat

Jann are physically strong and courageous, and do not take kindly to insult or injury. If they meet a foe they cannot defeat in a standup fight, they use flight and *invisibility* to regroup and maneuver to a more advantageous position.

Change Size (Sp): Twice per day, a janni can magically change a creature's size. This works just like an *enlarge person* or *reduce person* spell (the janni chooses when using the ability), except that the ability can work on the janni. A DC 13 Fortitude save negates the effect. The save DC is Charisma-based. This is the equivalent of a 2nd-level spell.

Spell-Like Abilities: 3/day—*invisibility* (self only), *speak with animals*. Caster level 12th. Once per day a janni can *create food and water* (caster level 7th) and can use *ethereal jaunt* (caster level 12th) for 1 hour. The save DCs are Charisma-based.

Elemental Endurance (Ex): Jann can survive on the Elemental Planes of Air, Earth, Fire, or Water for up to 48 hours.

Failure to return to the Material Plane before that time expires causes a janni to take 1 point of damage per additional hour spent on the elemental plane, until it dies or returns to the Material Plane.

Jann as Characters

Janni characters possess the following racial traits.

— +6 Strength, +4 Dexterity, +2 Constitution, +4 Intelligence, +4 Wisdom, +2 Charisma.

— Medium size.

— A janni's base land speed is 30 feet. It also has a fly speed of 20 feet (perfect).

— Darkvision out to 60 feet.

— Racial Hit Dice: A janni begins with six levels of outsider, which provide 6d8 Hit Dice, a base attack bonus of +6, and base saving throw bonuses of Fort +5, Ref +5, and Will +5.

- Racial Skills: A janni's outsider levels give it skill points equal to $9 \times (8 + \text{Int modifier})$. Its class skills are Appraise, Concentration, Craft (any), Escape Artist, Listen, Move Silently, Ride, Sense Motive, and Spot.
- Racial Feats: A janni's outsider levels give it three feats. A janni receives Improved Initiative as a bonus feat.
- +1 natural armor bonus.
- Special Attacks (see above): *Change size*, spell-like abilities.
- Special Qualities (see above): Elemental endurance, *plane shift*, resistance to fire 10, telepathy, 100 ft.
- Automatic Languages: Common. Bonus Languages: Abyssal, Aquan, Auran, Celestial, Ignan, Infernal, Terran.
- Favored Class: Rogue.
- Level adjustment +5.

A ghaele can take the form of an incorporeal globe of eldritch colors, 5 feet in diameter. A ghaele is about 6 feet tall and weighs about 170 pounds.

Ghaeles speak Celestial, Infernal, and Draconic, but can communicate with almost any creature, thanks to their *tongues* ability.

Combat

Ghaeles who enter combat prefer direct confrontation and damaging attacks to more subtle or insidious methods. They usually fight in their humanoid form, wielding incandescent +4 *holy greatswords*. If a ghaele desires mobility, it assumes its globe form and blasts the enemy with light rays.

A ghaele's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and good-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*aid*, *charm monster* (DC 17), *color spray* (DC 14), *comprehend languages*, *continual flame*, *cure light wounds* (DC 14), *dancing lights*, *detect evil*, *detect thoughts* (DC 15), *disguise self*, *dispel magic*, *hold monster* (DC 18), *greater invisibility* (self only), *major image* (DC 16), *see invisibility*, *greater teleport* (self plus 50 pounds of objects

only); 1/day—*chain lightning* (DC 19), *prismatic spray* (DC 20), *wall of force*. Caster level 12th. The save DCs are Charisma-based.

Spells: Ghaeles in humanoid form can cast divine spells as 14th-level clerics. A ghæle has access to two of the following domains: Air, Animal, Chaos, Good, or Plant (plus any others from its deity). The save DCs are Wisdom-based.

Typical Cleric Spells Prepared (6/7/7/6/5/4/4/3; save DC 13 + spell level): 0—*cure minor wounds, detect magic, guidance, light, resistance, virtue*; 1st—*bless, calm animals**, *command, divine favor, obscuring mist, sanctuary, shield of faith*; 2nd—*aid, align weapon, bear's endurance, hold animal**, *lesser restoration, remove paralysis, zone of truth*; 3rd—*daylight, gaseous form**, *prayer, remove curse, searing light, water breathing*; 4th—*death ward, dismissal, divine power, restoration, summon nature's ally IV (animal)**; 5th—*control winds*, flame strike, raise dead, true seeing*; 6th—*banishment, blade barrier, chain lightning*, heal*; 7th—*animal shapes*, holy word, summon monster VII*.

*Domain spell. Domains: Air and Animal.

Gaze (Su): In humanoid form—slay evil creatures of 5 or less HD, range 60 feet, Will DC 18 negates. Even if the save succeeds, the creature is affected as though by a *fear* spell for 2d10 rounds. Nonevil creatures, and evil creatures with more than 5 HD, must succeed on a DC 18 Will save or suffer the *fear* effect. The save DCs are Charisma-based.

Light Ray (Ex): A ghæle in globe form can project light rays with a range of 300 feet. This attack overcomes damage reduction of any type.

Alternate Form (Su): A ghæle can shift between its humanoid and globe forms as a standard action. In humanoid form, it cannot fly or use its light rays, but it can use its gaze attack and spell-like abilities, make physical attacks, and cast spells. In globe form, it can fly, use its light rays, and use spell-like abilities, but it cannot cast spells or use its gaze attack. The globe form is incorporeal, and the ghæle has no Strength score while in that form.

A ghæle remains in one form until it chooses to assume a new one. A change in form cannot be dispelled, nor does the ghæle revert to any particular form when killed. A *true seeing* spell or ability, however, reveals both forms simultaneously.

Protective Aura (Su): Against attacks made or effects created by evil creatures, this ability provides a +4 deflection bonus to AC and a +4 resistance bonus on saving throws to anyone within 20 feet of the ghæle. Otherwise, it functions as a *magic circle against evil* effect and a *lesser globe of invulnerability*, both with a radius of 20 feet (caster level equals ghæle's HD). (The defensive benefits from the circle are not included in a ghæle's statistics block.)

Tongues (Su): Ghæles can speak with any creature that has a language, as though using a *tongues* spell (caster level 14th). This ability is always active.

GHOST

Ghosts are the spectral remnants of intelligent beings who, for one reason or another, cannot rest easily in their graves. A ghost greatly resembles its corporeal form in life, but in some cases the spiritual form is somewhat altered.

CREATING A GHOST

"Ghost" is an acquired template that can be added to any aberration, animal, dragon, giant, humanoid, magical beast, monstrous humanoid, or plant. The creature (referred to hereafter as the base creature) must have a Charisma score of at least 6.

A ghost uses all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to undead. Do not recalculate the creature's base attack bonus, saves, or skill points. It gains the incorporeal subtype. Size is unchanged.

Hit Dice: All current and future Hit Dice become d12s.

Speed: Ghosts have a fly speed of 30 feet, unless the base creature has a higher fly speed, with perfect maneuverability.

Armor Class: Natural armor is the same as the base creature's but applies only to ethereal encounters. When the ghost manifests (see below), its natural armor bonus is +0, but it gains a deflection bonus equal to its Charisma modifier or +1, whichever is higher.

Attack: A ghost retains all the attacks of the base creature, although those relying on physical contact do not affect creatures that are not ethereal.

Full Attack: A ghost retains all the attacks of the base creature, although those relying on physical contact do not affect creatures that are not ethereal.

Damage: Against ethereal creatures, a ghost uses the base creature's damage values. Against nonethereal creatures, the ghost usually cannot deal physical damage at all but can use its special attacks, if any, when it manifests (see below).

Special Attacks: A ghost retains all the special attacks of the base creature, although those relying on physical contact do not affect nonethereal creatures. The ghost also gains a manifestation ability plus one to three other special attacks as described below. The save DC against a special attack is equal to $10 + 1/2$ ghost's HD + ghost's Cha modifier unless otherwise noted.

Corrupting Gaze (Su): A ghost can blast living beings with a glance, at a range of up to 30 feet. Creatures that meet the ghost's gaze must succeed on a Fortitude save or take 2d10 points of damage and 1d4 points of Charisma damage.

Corrupting Touch (Su): A ghost that hits a living target with its incorporeal touch attack deals 1d6 points of damage. Against

ethereal opponents, it adds its Strength modifier to attack and damage rolls. Against nonethereal opponents, it adds its Dexterity modifier to attack rolls only.

Draining Touch (Su): A ghost that hits a living target with its incorporeal touch attack drains 1d4 points from any one ability score it selects. On each such successful attack, the ghost heals 5 points of damage to itself. Against ethereal opponents, it adds its Strength modifier to attack rolls only. Against nonethereal opponents, it adds its Dexterity modifier to attack rolls only.

Frightful Moan (Su): A ghost can emit a frightful moan as a standard action. All living creatures within a 30-foot spread must succeed on a Will save or become panicked for 2d4 rounds. This is a sonic necromantic mind-affecting fear effect. A creature that successfully saves against the moan cannot be affected by the same ghost's moan for 24 hours.

Horrific Appearance (Su): Any living creature within 60 feet that views a ghost must succeed on a Fortitude save or immediately take 1d4 points of Strength damage, 1d4 points of Dexterity damage, and 1d4 points of Constitution damage. A creature that successfully saves against this effect cannot be affected by the same ghost's horrific appearance for 24 hours.

Malevolence (Su): Once per round, an ethereal ghost can merge its body with a creature on the Material Plane. This ability is similar to a *magic jar* spell (caster level 10th or the ghost's Hit Dice, whichever is higher), except that it does not require a receptacle. To use this ability, the ghost must be manifested and it must try move into the target's space; moving into the target's space to use the malevolence ability does not provoke attacks of opportunity. The target can resist the attack with a successful Will save (DC 15 + ghost's Cha modifier). A creature that successfully saves is immune to that same ghost's malevolence for 24 hours, and the ghost cannot enter the target's space. If the save fails, the ghost vanishes into the target's body.

Manifestation (Su): Every ghost has this ability. A ghost dwells on the Ethereal Plane and, as an ethereal creature, it cannot affect or be affected by anything in the material world. When a ghost manifests, it partly enters the Material Plane and becomes visible but incorporeal on the Material Plane. A manifested ghost can be harmed only by other incorporeal creatures, magic weapons, or spells, with a 50% chance to ignore any damage from a corporeal source. A manifested ghost can pass through solid objects at will, and its own attacks pass through armor. A manifested ghost always moves silently. A manifested ghost can strike with its touch attack or with a ghost touch weapon (see Ghostly Equipment, below). A manifested ghost remains partially on the Ethereal Plane, where is it not incorporeal. A manifested ghost can be attacked by opponents on either the Material Plane or the Ethereal Plane. The ghost's incorporeality helps protect it from foes on the Material Plane, but not from foes on the Ethereal Plane.

When a spellcasting ghost is not manifested and is on the Ethereal Plane, its spells cannot affect targets on the Material Plane, but they work normally against ethereal targets. When a spellcasting ghost manifests, its spells continue to affect ethereal targets and can affect targets on the Material Plane normally unless the spells rely on touch. A manifested ghost's touch spells don't work on nonethereal targets.

A ghost has two home planes, the Material Plane and the Ethereal Plane. It is not considered extraplanar when on either of these planes.

Telekinesis (Su): A ghost can use *telekinesis* as a standard action (caster level 12th or equal to the ghost's HD, whichever is higher). When a ghost uses this power, it must wait 1d4 rounds before using it again.

Special Qualities: A ghost has all the special qualities of the base creature as well as those described below.

Rejuvenation (Su): In most cases, it's difficult to destroy a ghost through simple combat: The "destroyed" spirit will often restore itself in 2d4 days. Even the most powerful spells are usually only temporary solutions. A ghost that would otherwise be destroyed returns to its old haunts with a successful level check (1d20 + ghost's HD) against DC 16. As a rule, the only way to get rid of a ghost for sure is to determine the reason for its existence and set right whatever prevents it from resting in peace. The exact means varies with each spirit and may require a good deal of research.

Turn Resistance (Ex): A ghost has +4 turn resistance.

Abilities: Same as the base creature, except that the ghost has no Constitution score, and its Charisma score increases by +4.

Skills: Ghosts have a +8 racial bonus on Hide, Listen, Search, and Spot checks. Otherwise same as the base creature.

Environment: Any, often as base creature.

Organization: Solitary, gang (2–4), or mob (7–12).

Challenge Rating: Same as the base creature +2.

Treasure: None.

Alignment: Any.

Level Adjustment: Same as the base creature +5.

Ghostly Equipment

When a ghost forms, all its equipment and carried items usually become ethereal along with it. In addition, the ghost retains 2d4 items that it particularly valued in life (provided they are not in another creature's possession). The equipment works normally on the Ethereal Plane but passes harmlessly through material objects or creatures. A weapon of +1 or better magical enhancement, however, can harm material creatures when the ghost manifests, but any such attack has a 50% chance to fail unless the weapon is a ghost touch weapon (just as magic weapons can fail to harm the ghost).

The original material items remain behind, just as the ghost's physical remains do. If another creature seizes the original, the

ethereal copy fades away. This loss invariably angers the ghost, who stops at nothing to return the item to its original resting place.

Ghouls speak the languages they spoke in life (usually Common).

COMBAT

Ghouls try to attack with surprise whenever possible. They strike from behind tombstones and burst from shallow graves.

Ghoul Fever (Su): Disease—bite, Fortitude DC 12, incubation period 1 day, damage 1d3 Con and 1d3 Dex. The save DC is Charisma-based.

An afflicted humanoid who dies of ghoul fever rises as a ghoul at the next midnight. A humanoid who becomes a ghoul in this way retains none of the abilities it possessed in life. It is not under the control of any other ghouls, but it hungers for the flesh of the living and behaves like a normal ghoul in all respects. A humanoid of 4 Hit Dice or more rises as a ghast, not a ghoul.

Paralysis (Ex): Those hit by a ghoul's bite or claw attack must succeed on a DC 12 Fortitude save or be paralyzed for 1d4+1 rounds. Elves have immunity to this paralysis. The save DC is Charisma-based.

LACEDON

These cousins of the ghoul have the aquatic subtype. They lurk near hidden reefs or other places where ships are likely to meet their end. They have a base land speed of 30 feet and a swim speed of 30 feet and are found only in aquatic environments.

GHAST

Although these creatures look just like their lesser kin, they are far more deadly and cunning.

Combat

Ghoul Fever (Su): Disease—bite, Fortitude DC 15, incubation period 1 day, damage 1d3 Con and 1d3 Dex. The save DC is Charisma-based.

Paralysis (Ex): Those hit by a ghast's bite or claw attack must succeed on a DC 15 Fortitude save or be paralyzed for 1d4+1 rounds. Even elves can be affected by this paralysis. The save DC is Charisma-based.

Stench (Ex): The stink of death and corruption surrounding these creatures is overwhelming. Living creatures

within 10 feet must succeed on a DC 15 Fortitude save or be sickened for 1d6+4 minutes. A creature that successfully saves cannot be affected again by the same ghast's stench for 24 hours. A *delay poison* or *neutralize poison* spell removes the effect from a sickened creature. Creatures with immunity to poison are unaffected, and creatures resistant to poison receive their normal bonus on their saving throws. The save DC is Charisma-based.

GIANT

All giants speak Giant. Those with Intelligence scores of 10 or higher also speak Common.

COMBAT

Giants relish melee combat. They favor massive two-handed weapons and wield them with impressive skill. They have enough cunning to soften up a foe with ranged attacks first, if they can. A giant's favorite ranged weapon is a big rock.

Rock Throwing (Ex): Adult giants are accomplished rock throwers and receive a +1 racial bonus on attack rolls when throwing rocks. A giant of at least Large size can hurl rocks weighing 40 to 50 pounds each (Small objects) up to five range increments. The size of the range increment varies with the giant's variety. A Huge giant can hurl rocks of 60 to 80 pounds (Medium objects).

Rock Catching (Ex): A giant of at least Large size can catch Small, Medium, or Large rocks (or projectiles of similar shape). Once per round, a giant that would normally be hit by a rock can make a Reflex save to catch it as a free action. The DC is 15 for a Small rock, 20 for a Medium one, and 25 for a Large one. (If the projectile provides a magical bonus on attack rolls, the DC increases by that amount.) The giant must be ready for and aware of the attack in order to make a rock catching attempt.

Cloud giants' skin ranges in color from milky white to light sky blue. Their hair is silvery white or brass, and their eyes are iridescent blue. Adult males are about 18 feet tall and weigh about 5,000 pounds. Females are slightly shorter and lighter. Cloud giants can live to be 400 years old.

Cloud giants dress in the finest clothing available and wear jewelry. To many, appearance indicates station: The better the clothes and the finer the jewelry, the more important the wearer. They also appreciate music, and most can play one or more instruments (the harp is a favorite).

COMBAT

Cloud giants fight in well-organized units, using carefully developed battle plans. They prefer to fight from a position above their opponents. A favorite tactic is to circle the enemies, barraging them with rocks while the giants with magical abilities confound them with spells.

Rock Throwing (Ex): The range increment is 140 feet for a cloud giant's thrown rocks.

Oversized Weapon (Ex): A cloud giant wields a great, two-handed morningstar (big enough for Gargantuan creatures) without penalty.

Spell-Like Abilities: 3/day—*levitate* (self plus 2,000 pounds), *obscuring mist*; 1/day—*fog cloud*. Caster level 15th.

CLOUD GIANT CHARACTERS

Most cloud giant groups include a sorcerer or a cleric.

Good-aligned clerics have access to two of the following domains: Good, Healing, Strength, or Sun. Evil-aligned clerics have access to two of the following domains: Death, Evil, or Trickery.

Some fire giants have bright orange hair. An adult male is 12 feet tall, has a chest that measures 9 feet around, and weighs about 7,000 pounds. Females are slightly shorter and lighter. Fire giants can live to be 350 years old. Fire giants wear sturdy cloth or leather garments colored red, orange, yellow, or black. Warriors wear helmets and half-plate armor of blackened steel.

COMBAT

Fire giants heat their rocks in a nearby fire, geyser, or lava pools, so that they deal extra fire damage. They favor magic flaming swords in melee (when they can get them). They are also fond of grabbing smaller opponents and tossing them somewhere very hot.

Rock Throwing (Ex): The range increment is 120 feet for a fire giant's thrown rocks.

Fire Giant Characters

Most groups of fire giants include clerics. A fire giant cleric has access to two of the following domains: Evil, Law, Trickery, or War (most choose Trickery or War, some choose both).

Adjustment:

A frost giant's hair can be light blue or dirty yellow, and its eyes usually match its hair color. Frost giants dress in skins and pelts, along with any jewelry they own. Frost giant warriors add chain shirts and metal helmets decorated with horns or feathers.

An adult male is about 15 feet tall and weighs about 2,800 pounds. Females are slightly shorter and lighter, but otherwise identical with males. Frost giants can live to be 250 years old.

COMBAT

Frost giants usually start combat at a distance, throwing rocks until they run out of ammunition or the opponent closes, then wading in with their enormous battleaxes.

A favorite tactic is to lay an ambush by hiding buried in the snow at the top of an icy or snowy slope, where opponents will have difficulty reaching them.

Rock Throwing (Ex): The range increment is 120 feet for a frost giant's thrown rocks.

FROST GIANT JARL

A frost giant leader is often a barbarian, cleric, fighter, or sorcerer, but some of the most evil and ruthless frost giants become blackguards.

The frost giant jarl described here has all the qualities and abilities of a typical frost giant, as well as other abilities (see the statistics block) from being a blackguard. Details on some of these abilities follow.

Aura of Despair (Su): This jarl radiates a malign aura that causes enemies within 10 feet of him to take a -2 penalty on all saving throws.

Aura of Evil (Ex): This jarl radiates a strong aura of evil (see the *detect evil* spell) as an 8th-level cleric of an evil deity.

Command Undead (Su): This jarl can command and rebuke undead as a 6th-level cleric.

Dark Blessing (Su): This jarl applies his Charisma modifier as a bonus on all saving throws.

Detect Good (Sp): At will, this jarl can use *detect good* as a spell-like ability, duplicating the effect of the *detect good* spell.

Poison Use: Blackguards are skilled in the use of poison and never risk accidentally poisoning themselves when applying poison to a blade.

Smite Good (Su): Twice per day, this jarl may attempt to smite good with one normal melee attack. He adds his +4 Charisma modifier to his attack roll and deals 8 points of extra damage (1 per blackguard level) if the attack hits. If he accidentally smites a creature that is not good, the smite has no effect but it is still used up for that day.

Typical Blackguard Spells Prepared (3/1; save DC 11 + spell level): 1st—*cause fear*, *doom*, *magic weapon*; 2nd—*bull's strength*.

Possessions: +2 frost greataxe, +2 full plate armor, cloak of Charisma +2, ring of minor energy resistance (fire), 2 doses of bloodroot poison. (Benefits of these items are included in the statistics block.)

FROST GIANT CHARACTERS

Many groups of frost giants include clerics. A frost giant cleric has access to two of the following domains: Chaos, Destruction, Evil, or War (most choose Destruction or War, some choose both).

Skin color among hill giants ranges from light tan to deep ruddy brown. Their hair is brown or black, with eyes the same color. Hill giants wear layers of crudely prepared hides with the fur left on. They seldom wash or repair their garments,

preferring to simply add more hides as their old ones wear out.

Adults are about 10-1/2 feet tall and weigh about 1,100 pounds. Hill giants can live to be 200 years old.

COMBAT

Hill giants prefer to fight from high, rocky outcroppings, where they can pelt opponents with rocks and boulders while limiting the risk to themselves.

Hill giants love to make overrun attacks against smaller creatures when they first join battle. Thereafter, they stand fast and swing away with their massive clubs.

Rock Throwing (Ex): The range increment is 120 feet for a hill giant's thrown rocks.

HILL GIANTS AS CHARACTERS

Reckless brutes of incredible strength but little wit, hill giant characters are never truly accepted into society. Yet they do well on its edges and frontiers, forging a strong and profitable existence.

Despite their rugged appearance and great size, their basically humanoid shape makes it easy for them to relate with more civilized folk.

Hill giant characters possess the following racial traits.

— +14 Strength, -2 Dexterity, +8 Constitution, -4 Intelligence, -4 Charisma.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

— A hill giant's base land speed is 40 feet.

— Low-light vision.

— Racial Hit Dice: A hill giant begins with twelve levels of giant, which provide 12d8 Hit Dice, a base attack bonus of +8, and base saving throw bonuses of Fort +8, Ref +4, and Will +4.

— Racial Skills: A hill giant's giant levels give it skill points

equal to 15 x (2 + Int modifier). Its class skills are Climb, Jump, Listen, and Spot.

— Racial Feats: A hill giant's giant levels give it five feats.

— +9 natural armor bonus.

— Special Attacks (see above): Rock throwing.

— Special Qualities (see above): Rock catching.

— Weapon and Armor Proficiency: A hill giant is automatically proficient with simple weapons, martial weapons, light and medium armor, and shields.

— Automatic Languages: Giant. Bonus Languages: Common, Draconic, Elven, Goblin, Orc.

— Favored Class: Barbarian.

— Level adjustment +4.

Stone giants prefer thick leather garments, dyed in shades of brown and gray to match the stone around them. Adults are about 12 feet tall and weigh about 1,500 pounds. Stone giants can live to be 800 years old.

COMBAT

Stone giants fight from a distance whenever possible, but if they can't avoid melee, they use gigantic clubs chiseled out of stone. A favorite tactic of stone giants is to stand nearly motionless, blending in with the background, then move forward to throw rocks and surprise their foes.

Rock Throwing (Ex): The range increment is 180 feet for a stone giant's thrown rocks. It uses both hands when throwing a rock.

Rock Catching (Ex): A stone giant gains a +4 racial bonus on its Reflex save when attempting to catch a thrown rock.

Skills: *A stone giant gains a +8 racial bonus on Hide checks in rocky terrain.

STONE GIANT ELDERS

Some stone giants develop special abilities related to their environment. These giant elders have Charisma scores of at least 15 and spell-like abilities, which they use as 10th-level sorcerers. Once per day they can use *stone shape*, *stone tell*, and either *transmute rock to mud* or *transmute mud to rock* (DC 17). The save DC is Charisma-based. One in ten elders is a sorcerer, usually of 3rd to 6th level.

STONE GIANTS AS CHARACTERS

Strong, silent loners, stone giant characters are a rare sight in human lands.

Stone giant characters possess the following racial traits.

— +16 Strength, +4 Dexterity, +8 Constitution, +2 Wisdom.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

— A stone giant's base land speed is 40 feet.

— Darkvision out to 60 feet and low-light vision.

— Racial Hit Dice: A stone giant begins with fourteen levels of giant, which provide 14d8 Hit Dice, a base attack bonus of +10, and base saving throw bonuses of Fort +9, Ref +4, and Will +4.

— Racial Skills: A stone giant's giant levels give it skill points equal to 17×4 (2 + Int modifier). Its class skills are Climb, Hide, Listen, and Spot. A stone giant has a +8 racial bonus on Hide checks in rocky terrain.

— Racial Feats: A stone giant's giant levels give it five feats.

— +11 natural armor bonus.

— Special Attacks (see above): Rock throwing.

— Special Qualities (see above): Rock catching.

— Automatic Languages: Giant. Bonus Languages: Common, Draconic, Elven, Goblin, Orc.

— Favored Class: Barbarian.

Very rarely, storm giants have violet skin. Violet-skinned storm giants have deep violet or blue-black hair with silvery gray or purple eyes. Adults are about 21 feet tall and weigh about 12,000 pounds. Storm giants can live to be 600 years old. Storm giants' garb is usually a short, loose tunic belted at the waist, sandals or bare feet, and a headband. They wear a few pieces of simple but finely crafted jewelry, anklets (favored by barefoot giants), rings, or circlets being most common. They live quiet, reflective lives and spend their time musing about the world, composing and playing music, and tilling their land or gathering food.

Combat

Storm giants use weapons and spell-like abilities instead of throwing rocks. Their composite longbows have a range increment of 180 feet.

Spell-Like Abilities: 1/day—*call lightning* (DC 15), *chain lightning* (DC 18). Caster level 15th. 2/day—*control weather*, *levitate*. Caster level 20th. The save DCs are Charisma-based.

Freedom of Movement (Su): Storm giants have a continuous freedom of movement ability as the spell (caster level 20th). The effect can be dispelled, but the storm giant can create it again on its next turn as a free action.

Water Breathing (Ex): Storm giants can breathe underwater indefinitely and can freely use their spell-like abilities while submerged.

Skills: A storm giant has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *Storm giants ignore all weight penalties for gear carried when swimming.

Storm Giant Characters

About 20% of adult storm giants are sorcerers or clerics. A storm giant cleric has access to two of the following domains: Chaos, Good, Protection, or War.

A gibbering mouther is a horrible creature seemingly drawn from a lunatic's nightmares. Although not evil, it thirsts after bodily fluids and seems to prefer the blood of intelligent creatures.

A gibbering mouther is about 3 feet across and 3 to 4 feet high. It weighs about 200 pounds.

Gibbering mouthers can speak Common, but seldom say anything other than gibberish.

COMBAT

A gibbering mouther attacks by shooting out strings of protoplasmic flesh, each ending in one or more eyes and a mouth that bites at the enemy. A mouther can send out a total of six such members in any round.

Gibbering (Su): As soon as a mouther spots something edible, it begins a constant gibbering as a free action. All creatures (other than mouthers) within a 60-foot spread must succeed on a DC 13 Will save or be affected as though by a *confusion* spell for 1d2 rounds. This is a sonic mind-affecting compulsion effect. A creature that successfully saves cannot be affected by the same gibbering mouther's gibbering for 24 hours. The save DC is Charisma-based.

Spittle (Ex): As a free action every round, a gibbering mouther fires a stream of spittle at one opponent within 30 feet. The mouther makes a ranged touch attack; if it hits, it deals 1d4 points of acid damage, and the target must succeed on a DC 18 Fortitude save or be blinded for 1d4 rounds. Eyeless creatures are immune to the blinding effect, but are still subject to the acid damage. The save DC is Constitution-based.

Improved Grab (Ex): To use this ability, a gibbering mouther must hit with a bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Blood Drain (Ex): On a successful grapple check after grabbing, that mouth attaches to the opponent. It automatically deals bite damage and drains blood, dealing 1 point of Constitution damage each round. A mouth can be ripped off (dealing 1 point of damage) with a DC 12 Strength check or severed by a successful sunder attempt (the mouth has 2 hit points).

A severed mouth continues to bite and drain blood for 1d4 rounds after such an attack. A creature whose Constitution is reduced to 0 is killed.

Engulf (Ex): A gibbering mouther can try to engulf a Medium or smaller opponent grabbed by three or more mouths. The opponent must succeed on a DC 14 Reflex save or fall and be engulfed. In the next round, the mouther makes twelve bite attacks instead of six (each with a +4 attack bonus). An engulfed creature cannot attack the mouther from within. The previously attached mouths are now free to attack others. The save DC is Strength-based and includes a +2 racial bonus.

Ground Manipulation (Su): At will, as a standard action, a gibbering mouther can cause stone and earth in all adjacent squares to become a morass akin to quicksand. Softening earth, sand, or the like takes 1 round, while stone takes 2 rounds. Anyone other than the mouther in that area must take a move-equivalent action to avoid becoming mired (treat as being pinned).

Amorphous (Ex): A gibbering mouther is not subject to critical hits. It cannot be flanked.

Skills: Thanks to their multiple eyes, gibbering mouthers have a +4 racial bonus on Spot checks.

A gibbering mouther has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It always can choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Girallons are savage, magical cousins of the gorilla. When moving on the ground, a girallon walks on its legs and lower arms. An adult girallon is about 8 feet tall, broad-chested, and covered in thick, pure white fur. It weighs about 800 pounds.

COMBAT

A solitary girallon usually conceals itself in the branches of a tree or under a pile of leaves and brush, with only its nose showing. When it spots or scents prey, it charges to the attack. A girallon picks up prey that is small enough to carry and withdraws, often vanishing into the trees before the victim's companions can do anything to retaliate. Against larger foes, a girallon seeks to tear a single opponent to bits as quickly as it can.

Rend (Ex): A girallon that hits with two or more claw attacks latches onto the opponent's body and tears the flesh. This attack automatically deals an extra 2d4+12 points of damage.

Skills: A girallon has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

Gnolls are hyena-headed, evil humanoids that wander in loose tribes. Most gnolls have dirty yellow or reddish-brown fur. A gnoll is a nocturnal carnivore, preferring intelligent creatures for food because they scream more. A gnoll is about 7-1/2 feet tall and weighs 300 pounds. Gnolls speak Gnoll.

COMBAT

Gnolls like to attack when they have the advantage of numbers, using horde tactics and their physical strength to overwhelm and knock down their opponents. They show little discipline when fighting unless they have a strong leader; at such times, they can maintain ranks and fight as a unit. While they do not usually prepare traps, they do use ambushes and try to attack from a flanking position. Because of its shield, a gnoll's modifier on Hide checks (untrained) is -2, which means gnolls always take special care to seek favorable conditions when laying ambushes (such as darkness, cover, or some other form of advantageous terrain).

GNOLLS AS CHARACTERS

Gnoll characters possess the following racial traits.

- Strength +4, Constitution +2, Intelligence -2, Charisma -2.
- Size Medium.
- A gnoll's base land speed is 30 feet.
- Darkvision out to 60 feet.
- Racial Hit Dice: A gnoll begins with two levels of humanoid, which provide 2d8 Hit Dice, a base attack bonus of +1, and base saving throw bonuses of Fort +3, Ref +0, and Will +0.
- Racial Skills: A gnoll's humanoid levels give it skill points equal to $5 \times^2 (2 + \text{Int modifier})$. Its class skills are Listen and Spot.
- Racial Feats: A gnoll's humanoid levels give it one feat.
- +1 natural armor bonus.
- Automatic Languages: Gnoll. Bonus Languages: Common, Draconic, Elven, Goblin, Orc.

Gnomes stand 3 to 3-1/2 feet tall and weigh 40 to 45 pounds. Their skin color ranges from dark tan to woody brown, their hair is fair, and their eyes can be any shade of blue. Gnome males prefer short, carefully trimmed beards. Gnomes generally wear leather or earth tones, though they decorate their clothes with intricate stitching or fine jewelry. Gnomes reach adulthood at about age 40, and they live about 350 years, though some can live almost 500 years.

Gnomes speak their own language, Gnome. Most gnomes who travel outside gnome lands (as traders, tinkers, or adventurers) know Common, while warriors in gnome settlements usually learn Goblin.

Most gnomes encountered outside their home are warriors; the information in the statistics block is for one of 1st level.

COMBAT

Gnomes prefer misdirection and deception over direct confrontation.

They would rather befuddle or embarrass foes (other than goblinoids or kobolds) than kill them.

Gnomes make heavy use of illusion magic and carefully prepared ambushes and traps whenever they can.

Gnome Traits (Ex): Gnomes possess the following racial traits.

- +2 Constitution, -2 Strength.
- Small size. +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, -4 penalty on grapple checks, lifting and carrying limits 3/4 those of Medium characters.
- A gnome's base land speed is 20 feet.
- Low-light vision.
- Weapon Familiarity: Gnomes may treat gnome hooked hammers as martial weapons rather than exotic weapons.
- +2 racial bonus on saving throws against illusions.
- Add +1 to the Difficulty Class for all saving throws against illusion spells cast by gnomes. This adjustment stacks with those from similar effects, such as the Spell Focus feat.
- +1 racial bonus on attack rolls against kobolds and goblinoids (including goblins, hobgoblins, and bugbears).
- +4 dodge bonus to Armor Class against creatures of the giant type (such as ogres, trolls, and hill giants).
- +2 racial bonus on Listen checks.
- +2 racial bonus on Craft (alchemy) checks.
- Automatic Languages: Common, Gnome. Bonus Languages: Draconic, Dwarven, Elven, Giant, Goblin, Orc.
- Spell-Like Abilities: 1/day—*speak with animals* (burrowing mammal only, duration 1 minute). A gnome with a Charisma score of at least 10 also has the following spell-like abilities: 1/day—*dancing lights, ghost sound, prestidigitation*. Caster level 1st; save DC 10 + gnome's Cha modifier + spell level.

—Favored Class: Bard.

The gnome warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

SUBRACES

The information above is for rock gnomes, the most common variety.

There are two other major gnome subraces, which differ from rock gnomes as follows.

Svirfneblin

Also called deep gnomes, svirfneblin are said to dwell in great cities deep underground.

A svirfneblin has wiry, rock-colored skin usually medium brown to brownish gray. Only males are bald; females have stringy gray hair. The average svirfneblin lifespan is 250 years.

Svirfneblin speak Gnome, Common, and Undercommon.

Svirfneblin Traits (Ex): These traits are in addition to the rock gnome traits, except where noted.

- -2 Strength, +2 Dexterity, +2 Wisdom, -4 Charisma. These adjustments replace the rock gnome's ability score adjustments.

—Stonecunning: This ability grants deep gnomes a +2 racial bonus on Search checks to notice unusual stonework. A deep gnome who merely comes within 10 feet of unusual stonework can make a Search check as though actively searching, and can use the Search skill to find stonework traps as a rogue can. A svirfneblin can also intuit depth, sensing the approximate distance underground as naturally as a human can sense which way is up.

—Darkvision out to 120 feet and low-light vision.

—Spell resistance equal to 11 + class levels.

— +2 racial bonus on all saving throws (figured into the statistics for the character presented here). This trait replaces the rock gnome's racial bonus on saving throws against illusions.

—Add +1 to the Difficulty Class for all saving throws against illusion spells cast by svirfneblin. This adjustment stacks with those from similar effects, such as the Spell Focus feat.

— +1 racial bonus on attack rolls against kobolds and goblinoids.

- +4 dodge bonus to Armor Class against all creatures (figured into the statistics for the character presented here). This trait replaces the rock gnome's dodge bonus against giants.
- Automatic Languages: Undercommon, Gnome, Common. Bonus Languages: Dwarven, Elven, Giant, Goblin, Orc, Terran. This trait replaces the rock gnome's automatic and bonus languages.
- Spell-Like Abilities: 1/day—*blindness/deafness* (typical save DC 13), *blur*, *disguise self*. Caster level equals the svirfneblin's class levels. The save DC is Charisma-based and include a +4 racial modifier. This trait replaces the rock gnome's spell-like abilities.
- Nondetection (Su): A svirfneblin has a continuous nondetection ability as the spell (caster level equal to class levels).
- +2 racial bonus on Craft (alchemy) and Listen checks.
- +2 racial bonus on Hide checks, which improves to +4 underground.
- Favored Class: Rogue.
- Level adjustment +3.

The svirfneblin warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Challenge Rating: Svirfneblin with levels in NPC classes have a CR equal to their character level. Svirfneblin with levels in PC classes have a CR equal to their character level +1.

Forest Gnome

They are the smallest of all the gnomes, averaging 2 to 2-1/2 feet in height, but look just like regular gnomes except with bark-colored or gray-green skin, and eyes that can be brown or green as well as blue. A very long-lived people, forest gnomes have an average life expectancy of 500 years.

Forest Gnome Traits (Ex): These traits are in addition to the rock gnome traits, except where noted.

- *Pass without Trace* (Su): A forest gnome has the innate ability to use *pass without trace* (self only, as a free action) as the spell cast by a druid of the forest gnome's class levels.
- +1 racial bonus on attack rolls against kobolds, goblinoids, orcs, and reptilian humanoids.
- Automatic Languages: Gnome, Elven, Sylvan, and a simple language that enables them to communicate on a very basic level with forest animals (this replaces the rock gnome's *speak with animals* ability). Bonus Languages: Common, Draconic, Dwarven, Giant, Goblin, Orc. This trait replaces the rock gnome's automatic and bonus languages.
- +4 racial bonus on Hide checks, which improves to +8 in a wooded area.

A goblin stands 3 to 3-1/2 feet tall and weigh 40 to 45 pounds. Its eyes are usually dull and glazed, varying in color from red to yellow. A goblin's skin color ranges from yellow through any shade of orange to a deep red; usually all members of a single tribe are about the same color. Goblins wear clothing of dark leather, tending toward drab, soiled-looking colors. Goblins speak Goblin; those with Intelligence scores of 12 or higher also speak Common.

Most goblins encountered outside their homes are warriors; the information in the statistics block is for one of 1st level.

COMBAT

Being bullied by bigger, stronger creatures has taught goblins to exploit what few advantages they have: sheer numbers and malicious ingenuity. The concept of a fair fight is meaningless in their society. They favor ambushes, overwhelming odds, dirty tricks, and any other edge they can devise.

Goblins have a poor grasp of strategy and are cowardly by nature, tending to flee the field if a battle turns against them. With proper supervision, though, they can implement reasonably complex plans, and in such circumstances their numbers can be a deadly advantage.

Skills: Goblins have a +4 racial bonus on Move Silently and Ride checks. Goblin cavalry (mounted on worgs) usually select the Mounted Combat feat in place of the Alertness feat, which reduces their Spot and Listen check modifiers from +3 to +1.

Challenge Rating: Goblins with levels in NPC classes have a CR equal to their character level -2.

GOBLINS AS CHARACTERS

Goblin characters possess the following racial traits.

— -2 Strength, +2 Dexterity, -2 Charisma.

— Small size: +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, -4 penalty on grapple checks, lifting and carrying limits 3/4 those of Medium characters.

— A goblin's base land speed is 30 feet.

The goblin warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

GOLEM

Golems are magically created automatons of great power. Constructing one involves the employment of mighty magic and elemental forces.

The animating force for a golem is a spirit from the Elemental Plane of Earth. The process of creating the golem binds the unwilling spirit to the artificial body and subjects it to the will of the golem's creator.

COMBAT

Golems are tenacious in combat and prodigiously strong as well. Being mindless, they do nothing without orders from their creators. They follow instructions explicitly and are incapable of any strategy or tactics. They are emotionless in combat and cannot be provoked.

A golem's creator can command it if the golem is within 60 feet and can see and hear its creator. If uncommanded, a golem usually follows its last instruction to the best of its ability, though if attacked it returns the attack. The creator can give the golem a simple command to govern its actions in his or her absence. The golem's creator can order the golem to obey the commands of another person (who might in turn place the golem under someone else's control, and so on), but the golem's creator can always resume control over his creation by commanding the golem to obey him alone.

Immunity to Magic (Ex): Golems have immunity to most magical and supernatural effects, except when otherwise noted.

CONSTRUCTION

The cost to create given for each golem includes the cost of the physical body and all the materials and spell components that are consumed or become a permanent part of the golem. Creating a golem is essentially similar to creating any sort of magic item. However, a golem's body includes costly material components that may require some extra preparation. The golem's creator can assemble the body or hire someone else to do the job. The builder must have the appropriate skill, which varies with the golem variety.

Completing the golem's creation drains the appropriate XP from the creator and requires casting any spells on the final day. The creator must cast the spells personally, but they can come from outside sources, such as scrolls.

The characteristics of a golem that come from its nature as a magic item (caster level, prerequisite feats and spells, market price, cost to create) are given in summary form at the end of each golem's description.

Note: The market price of an advanced golem (a golem with more Hit Dice than the typical golem described in each entry) is increased by 5,000 gp for each additional Hit Die, and increased by an additional 50,000 gp if the golem's size increases. The

XP cost for creating an advanced golem is equal to 1/25 the advanced golem's market price minus the cost of the special materials required.

This golem has a humanoid body made from clay. A clay golem wears no clothing except for a metal or stiff leather garment around its hips.

A clay golem cannot speak or make any vocal noise. It walks and moves with a slow, clumsy gait. It weighs around 600 pounds.

Combat

Berserk (Ex): When a clay golem enters combat, there is a cumulative 1% chance each round that its elemental spirit breaks free and the golem goes berserk. The uncontrolled golem goes on a rampage, attacking the nearest living creature or smashing some object smaller than itself if no creature is within reach, then moving on to spread more destruction. Once a clay golem goes berserk, no known method can reestablish control.

Cursed Wound (Ex): The damage a clay golem deals doesn't heal naturally and resists healing spells. A character attempting to cast a conjuration (healing) spell on a creature damaged by a clay golem must succeed on a DC 26 caster level check, or the spell has no effect on the injured character.

Immunity to Magic (Ex): A clay golem is immune to any spell or spell-like ability that allows spell resistance. In addition, certain spells and effects function differently against the creature, as noted below.

A *move earth* spell drives the golem back 120 feet and deals 3d12 points of damage to it.

A *disintegrate* spell slows the golem (as the *slow* spell) for 1d6 rounds and deals 1d12 points of damage.

An *earthquake* spell cast directly at a clay golem stops it from moving on its next turn and deals 5d10 points of damage. The golem gets no saving throw against any of these effects.

Any magical attack against a clay golem that deals acid damage heals 1 point of damage for every 3 points of damage it would otherwise deal. If the amount of healing would cause the golem to exceed its full normal hit points, it gains any excess as temporary hit points. For example, a clay golem hit by the breath weapon of a black dragon heals 7 points of damage if the attack would have dealt 22 points of damage. A clay golem gets no saving throw against magical attacks that deal acid damage.

Haste (Su): After it has engaged in at least 1 round of combat, a clay golem can haste itself once per day as a free action. The effect lasts 3 rounds and is otherwise the same as the spell.

Construction

A clay golem's body must be sculpted from a single block of clay weighing at least 1,000 pounds, treated with rare oils and powders worth 1,500 gp. Creating the body requires a DC 15 Craft (sculpting) check or a DC 15 Craft (pottery) check.

CL 11th; Craft Construct, *animate objects*, *commune*, *resurrection*, caster must be at least 11th level; Price 40,000 gp; Cost 21,500 gp + 1,540 XP.

A flesh golem is a ghoulish collection of stolen humanoid body parts, stitched together into a single composite form. No natural animal willingly tracks a flesh golem. The golem wears whatever clothing its creator desires, usually just a ragged pair of trousers. It has no possessions and no weapons. It stands 8 feet tall and weighs almost 500 pounds.

A flesh golem cannot speak, although it can emit a hoarse roar of sorts. It walks and moves with a stiff-jointed gait, as if not in complete control of its body.

Combat

Berserk (Ex): When a flesh golem enters combat, there is a cumulative 1% chance each round that its elemental spirit breaks free and the golem goes berserk. The uncontrolled golem goes on a rampage, attacking the nearest living creature or smashing some object smaller than itself if no creature is within reach, then moving on to spread more destruction. The golem's creator, if within 60 feet, can try to regain control by speaking firmly and persuasively to the golem, which requires a DC 19 Charisma check. It takes 1 minute of inactivity by the golem to reset the golem's berserk chance to 0%.

Immunity to Magic (Ex): A flesh golem is immune to any spell or spell-like ability that allows spell resistance. In addition, certain spells and effects function differently against the creature, as noted below.

A magical attack that deals cold or fire damage slows a flesh golem (as the *slow* spell) for 2d6 rounds, with no saving throw. A magical attack that deals electricity damage breaks any *slow* effect on the golem and heals 1 point of damage for every 3 points of damage the attack would otherwise deal. If the amount of healing would cause the golem to exceed its full normal hit points, it gains any excess as temporary hit points. For example, a flesh golem hit by a *lightning bolt* heals 3 points of damage if the attack would have dealt 11 points of damage. A flesh golem gets no saving throw against attacks that deal electricity damage.

Construction

The pieces of a flesh golem must come from normal human corpses that have not decayed significantly. Assembly requires a minimum of six different bodies—one for each limb, the torso (including head), and the brain. In some cases, more bodies may be necessary. Special unguents and bindings worth 500 gp are also required. Note that creating a flesh golem requires casting a spell with the evil descriptor.

Assembling the body requires a DC 13 Craft (leatherworking) check or a DC 13 Heal check.

Level Adjustment:

This golem has a humanoid body made from iron. An iron golem can be fashioned in any manner, just like a stone golem (see below), although it almost always displays armor of some sort. Its features are much smoother than those of a stone golem. Iron golems sometimes carry a short sword in one hand. An iron golem is 12 feet tall and weighs about 5,000 pounds. An iron golem cannot speak or make any vocal noise, nor does it have any distinguishable odor. It moves with a ponderous but smooth gait. Each step causes the floor to tremble unless it is on a thick, solid foundation.

Combat

Breath Weapon (Su): 10-foot cube, cloud of poisonous gas lasting 1 round, free action once every 1d4+1 rounds; initial damage 1d4 Con, secondary damage 3d4 Con, Fortitude DC 19 negates. The save DC is Constitution-based.

Immunity to Magic (Ex): An iron golem is immune to any spell or spell-like ability that allows spell resistance. In addition, certain spells and effects function differently against the creature, as noted below.

A magical attack that deals electricity damage slows an iron golem (as the *slow* spell) for 3 rounds, with no saving throw.

A magical attack that deals fire damage breaks any *slow* effect on the golem and heals 1 point of damage for each 3 points of damage the attack would otherwise deal. If the amount of healing would cause the golem to exceed its full normal hit points, it gains any excess as temporary hit points. For example, an iron golem hit by a *fireball* gains back 6 hit points if the damage total is 18 points. An iron golem gets no saving throw against fire effects.

An iron golem is affected normally by rust attacks, such as that of a rust monster or a *rusting grasp* spell.

Construction

An iron golem's body is sculpted from 5,000 pounds of pure iron, smelted with rare tinctures and admixtures costing at least 10,000 gp. Assembling the body requires a DC 20 Craft (armorsmithing) check or a DC 20 Craft (weaponsmithing) check. CL 16th; Craft Construct, *cloudkill*, *geas/quest*, *limited wish*, *polymorph any object*, caster must be at least 16th level; Price 150,000 gp; Cost 80,000 gp + 5,600 XP.

Level

Adjustment:

This golem has a humanoid body made from stone. A stone golem is 9 feet tall and weighs around 2,000 pounds. Its body is frequently stylized to suit its creator. For example, it might look like it is wearing armor, with a particular symbol carved on the breastplate, or have designs worked into the stone of its limbs.

COMBAT

Stone golems are formidable opponents, being physically powerful and difficult to harm.

Slow (Su): A stone golem can use a slow effect, as the spell, as a free action once every 2 rounds. The effect has a range of 10 feet and a duration of 7 rounds, requiring a DC 17 Will save to negate. The save DC is Constitution-based.

Immunity to Magic (Ex): A stone golem is immune to any spell or spell-like ability that allows spell resistance. In addition, certain spells and effects function differently against the creature, as noted below.

A *transmute rock to mud* spell slows a stone golem (as the *slow* spell) for 2d6 rounds, with no saving throw, while *transmute mud to rock* heals all of its lost hit points.

A *stone to flesh* spell does not actually change the golem's structure but negates its damage reduction and immunity to magic for 1 full round.

CONSTRUCTION

A stone golem's body is chiseled from a single block of hard stone, such as granite, weighing at least 3,000 pounds. The stone must be of exceptional quality, and costs 5,000 gp. Assembling the body requires a DC 17 Craft (sculpting) check or a DC 17 Craft (stonemasonry) check.

CL 14th; Craft Construct, *antimagic field*, *geas/quest*, *symbol of stunning*, caster must be at least 14th level; Price 90,000 gp; Cost 50,000 gp + 3,400 XP.

GREATER STONE GOLEM

A greater stone golem is 18 feet tall and weighs around 32,000 pounds. It resembles a typical stone golem in all respects, except that the Will save DC is 31 against its slow ability. CL 14th; Craft Construct, *antimagic field*, *geas/quest*, *symbol of stunning*, caster must be at least 14th level; Price 196,000 gp; Cost 105,000 gp + 7,640 XP.

Level Adjustment: —

A typical gorgon stands over 6 feet tall at the shoulder and measures 8 feet from snout to tail. It weighs about 4,000 pounds. Gorgons are nothing if not aggressive. They attack intruders on sight, attempting to trample, gore, or petrify them. There is no way to calm these furious creatures, and they are impossible to domesticate.

COMBAT

Whenever possible, a gorgon begins an encounter by charging at its opponents.

Breath Weapon (Su): 60-foot cone, once every 1d4 rounds (but no more than five times per day), turn to stone permanently, Fortitude DC 19 negates. The save DC is Constitution-based.

Trample (Ex): Reflex DC 19 half. The save DC is Strength-based.

Level Adjustment: +5 (cohort)

A gray render stands about 9 feet tall in spite of its hunched posture and is about 4 feet wide. It weighs about 4,000 pounds. Gray renders are never found in groups. Each of these asexual creatures produces one offspring and carries it for a time in a pouch, but thereafter the young render must fend for itself.

A unique quality of the gray render is its tendency to bond with, protect, and provide for another creature (or group of creatures) native to its surroundings. Whether accepted or not, the render always attempts to remain fairly close, watching over its adopted charge(s) and daily bringing an offering of meat. It never willingly harms adopted creatures and retreats if they attack it.

COMBAT

A gray render attacks to kill, whether to bring down prey or to protect itself or those it has adopted. When hunting, it sometimes attempts to hide and wait for prey to wander close.

Improved Grab (Ex): To use this ability, a gray render must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Rend (Ex): A gray render that wins a grapple check after a successful bite attack establishes a hold, latching onto the opponent's body and tearing the flesh. This attack automatically deals 2d6+9 points of damage.

Skills: Gray renders have a +4 racial bonus on Spot checks due to their six keen eyes.

Level Adjustment: —

An adult grick is about 8 feet long from the tips of its tentacles to the end of its body and weighs some 200 pounds. Its body coloration is uniformly dark, with a pale underbelly.

COMBAT

Gricks attack when hungry or threatened. They hunt by holing up near high-traffic areas, using their natural coloration to blend into convenient shadows. When prey (virtually anything that moves) ventures near, they lash out with their tentacles. A grick's rubbery body seems to shed blows of any kind. Its jaws are relatively small and weak compared to its body mass, so rather than consume its kill immediately, a grick normally drags its victim back to its lair to be eaten at its leisure.

A grick's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Multiple gricks do not fight in concert. Each attacks the prey closest to it, and breaks off the fight as soon as it can drag dead or unconscious prey away.

Skills: A grick has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

*Their coloration affords gricks a +8 racial bonus on Hide checks when in natural rocky areas.

Griphons are powerful, majestic creatures with the characteristics of both lions and eagles. From nose to tail, an adult griffon can measure as much as 8 feet. Neither males nor females are endowed with a mane. A pair of broad, golden wings emerge from the creature's back and span 25 feet or more. A griffon weighs about 500 pounds.

A griffon cannot speak, but understands Common.

COMBAT

Griphons prefer to pounce on their prey, either diving to the attack or leaping from above.

Pounce (Ex): If a griffon dives upon or charges a foe, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +8 melee, damage 1d6+2.

Skills: Griffons have a +4 racial bonus on Jump and Spot checks.

TRAINING A GRIFFON

Although intelligent, a griffon requires training before it can bear a rider in combat. To be trained, a griffon must have a friendly attitude toward the trainer (this can be achieved through a successful Diplomacy check). Training a friendly griffon requires six weeks of work and a DC 25 Handle Animal check. Riding a griffon requires an exotic saddle. A griffon can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Griphon eggs are worth 3,500 gp apiece on the open market, while young are worth 7,000 gp each. Professional trainers charge 1,500 gp to rear or train a griffon.

Carrying Capacity: A light load for a griffon is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

Alignment:	Often neutral evil
Advancement:	By character class

Level Adjustment: +2

COMBAT

Grimlocks are blind, but their exceptional senses of smell and hearing allow them to notice foes nearby. As a result, they

usually shun ranged weapons and rush to the attack, brandishing their stone battleaxes.

Blindsight (Ex): Grimlocks can sense all foes within 40 feet as a sighted creature would. Beyond that range, they treat all targets as having total concealment.

Grimlocks are susceptible to sound- and scent-based attacks, however, and are affected normally by loud noises and sonic spells (such as *ghost sound* or *silence*) and overpowering odors (such as *stinking cloud* or incense-heavy air). Negating a grimlock's sense of smell or hearing reduces this ability to normal Blind-Fight (as the feat). If both these senses are negated, a grimlock is effectively blinded.

Immunities: Grimlocks are immune to gaze attacks, visual effects, illusions, and other attack forms that rely on sight.

Skills: *A grimlock's dull gray skin helps it hide in its native terrain, conferring a +10 racial bonus on Hide checks when in mountains or underground.

GRIMLOCKS AS CHARACTERS

Grimlock characters possess the following racial traits.

— +4 Strength, +2 Dexterity, +2 Constitution, -2 Wisdom, -4 Charisma.

— Medium size.

— A grimlock's base land speed is 30 feet.

— Racial Hit Dice: A grimlock begins with two levels of monstrous humanoid, which provide 2d8 Hit Dice, a base attack bonus of +2, and base saving throw bonuses of Fort +0, Ref +3, and Will +3.

— Racial Skills: A grimlock's monstrous humanoid levels give it skill points equal to $5 \times (2 + \text{Int modifier, minimum 1})$. Its class skills are Climb, Hide, Listen, and Spot. Grimlocks gain a +10 racial bonus on Hide checks in mountain or underground settings.

— Racial Feats: A grimlock's monstrous humanoid levels give it one feat.

— Weapon Proficiency: A grimlock is automatically proficient with the battleaxe.

— +4 natural armor bonus.

— Special Qualities (see above): Blindsight 40 ft., immunities, scent.

— Automatic Languages: Common, Grimlock. Bonus Languages: Draconic, Dwarven, Gnome, Terran, Undercommon.

— Favored Class: Barbarian.

— Level adjustment +2.

MONSTERS (H-I)

HAG

Although different hags are unique in appearance and mannerism, they have many aspects in common. All take the form of crones whose bent shapes belie their fierce power and swiftness.

Hags speak Giant and Common.

COMBAT

Hags are tremendously strong. They are naturally resistant to spells and can cast magic of their own. Hags often gather to form coveys. A covey, usually containing one hag of each type, can use powers beyond those of the individual members.

ANNIS

Large Monstrous Humanoid

Advancement:	By character class
Level Adjustment:	—

An annis commonly uses its *disguise self* ability to take the form of an exceptionally tall human, a fair giant, or an ogre. An annis stands some 8 feet tall and weighs about 325 pounds.

Combat

Though physically powerful, these hags do not favor simple assaults but try to divide and confuse their foes before combat. They love to pose as commoners or gentlefolk to lull their victims into a sense of false security before they attack.

Improved Grab (Ex): To use this ability, an annis must hit a Large or smaller opponent with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Rake (Ex): Attack bonus +13 melee, damage 1d6+7. An annis can attack a grappled foe with both claws at no penalty.

Rend (Ex): An annis that hits with both claw attacks latches onto the opponent's body and tears the flesh. This attack automatically deals an extra 2d6+10 points of damage.

Spell-Like Abilities: 3/day—*disguise self*, *fog cloud*. Caster level 8th.

Green hags are found in desolate swamps and dark forests.

A green hag is about the same height and weight as a female human.

Combat

Green hags prefer to attack from hiding, usually after distracting foes. They often use darkvision to their advantage by attacking during moonless nights.

Spell-Like Abilities: At will—*dancing lights*, *disguise self*, *ghost sound* (DC 12), *invisibility*, *pass without trace*, *tongues*, *water breathing*. Caster level 9th. The save DC is Charisma-based.

Weakness (Su): A green hag can weaken a foe by making a special touch attack. The opponent must succeed on a DC 16 Fortitude save or take 2d4 points of Strength damage. The save DC is Charisma-based.

Mimicry (Ex): A green hag can imitate the sounds of almost any animal found near its lair.

Skills: A green hag has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

SEA HAG

Medium Monstrous Humanoid (Aquatic)

Hit Dice:	3d8+6 (19 hp)
Initiative:	+1
Speed:	30 ft. (6 squares), swim 40 ft.
Armor Class:	14 (+1 Dex, +3 natural), touch 11, flat-footed 13
Base Attack/Grapple:	+3/+7
Attack:	Claw +7 melee (1d4+4)
Full Attack:	2 claws +7 melee (1d4+4)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Horrific appearance, evil eye
Special Qualities:	Amphibious, spell resistance 14
Saves:	Fort +2, Ref +4, Will +4
Abilities:	Str 19, Dex 12, Con 12, Int 10, Wis 13, Cha 14
Skills:	Craft or Knowledge (any one) +3, Hide +4, Listen +6, Spot +6, Swim +12
Feats:	Alertness, Toughness
Environment:	Temperate aquatic
Organization:	Solitary or covey (3 hags of any kind plus 1–8 ogres and 1–4 evil giants)
Challenge Rating:	4
Treasure:	Standard
Alignment:	Usually chaotic evil
Advancement:	By character class

Level Adjustment: —

The sea hag is found in the water of seas or overgrown lakes.

A sea hag is about the same height and weight as a female human.

Combat

Sea hags are not subtle and prefer a direct approach to combat.

They usually remain in hiding until they can affect as many foes as possible with their horrific appearance.

Horrific Appearance (Su): The sight of a sea hag is so revolting that anyone (other than another hag) who sets eyes upon one must succeed on a DC 13 Fortitude save or instantly be weakened, taking 2d6 points of Strength damage. This damage cannot reduce a victim's Strength score below 0, but anyone reduced to Strength 0 is helpless. Creatures that are affected by this power or that successfully save against it cannot be affected again by the same hag's horrific appearance for 24 hours. The save DC is Charisma-based.

Evil Eye (Su): Three times per day, a sea hag can cast its dire gaze upon any single creature within 30 feet. The target must succeed on a DC 13 Will save or be dazed for three days, although *remove curse* or *dispel evil* can restore sanity sooner. In addition, an affected creature must succeed on a DC 13 Fortitude save or die from fright. Creatures with immunity to fear effects are not affected by the sea hag's evil eye. The save DCs are Charisma-based.

Amphibious (Ex): Although sea hags are aquatic, they can survive indefinitely on land.

Skills: A sea hag has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

HAG COVEY

From time to time, a trio of hags gathers as a covey. Usually this foul triune includes one hag of each type, but this is not always the case.

Combat

Hags in a covey rely on deception and their boosted magical abilities in combat.

A covey of hags is 80% likely to be guarded by 1d8 ogres and 1d4 evil giants who do their bidding. These minions are often disguised with a *veil* spell to appear less threatening and sent forth as spies. Such minions often (60%) carry magic stones known as *hag eyes* (see below).

Spell-Like Abilities: 3/day—*animate dead*, *bestow curse* (DC 17), *control weather*, *dream*, *forcecage*, *mind blank*, *mirage arcana* (DC 18), *polymorph*, *veil* (DC 19), *vision*. Caster level 9th. The save DCs are based on a Charisma score of 16. To use one of these abilities (which requires a full-round action), all three hags must be within 10 feet of one another, and all must participate.

Once per month, a covey that does not have a *hag eye* can create one from a gem worth at least 20 gp (see below).

Hag Eye

A *hag eye* is a magic gem created by a covey. It appears to be nothing more than a semiprecious stone, but a *gem of seeing* or other such effect reveals it as a disembodied eye. Often, a *hag eye* is worn as a ring, brooch, or other adornment. Any of the three hags who created the *hag eye* can see through it whenever they wish, so long as it is on the same plane of existence as the hag. A *hag eye* has hardness 5 and 10 hit points. Destroying a *hag eye* deals 1d10 points of damage to each member of the covey and causes the one who sustained the greatest damage to be blinded for 24 hours.

HALF-CELESTIAL

No matter the form, half-celestials are always comely and delightful to the senses, having golden skin, sparkling eyes, angelic wings, or some other sign of their higher nature.

CREATING A HALF-CELESTIAL

"Half-celestial" is an inherited template that can be added to any living, corporeal creature with an Intelligence score of 4 or higher and nonevil alignment (referred to hereafter as the base creature).

A half-celestial uses all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to outsider. Do not recalculate the creature's Hit Dice, base attack bonus, or saves. Size is unchanged. Half-celestials are normally native outsiders.

Speed: A half-celestial has feathered wings and can fly at twice the base creature's base land speed (good maneuverability). If the base creature has a fly speed, use that instead.

Armor Class: Natural armor improves by +1 (this stacks with any natural armor bonus the base creature has).

Special Attacks: A half-celestial retains all the special attacks of the base creature and also gains the following special abilities.

Daylight (Su): Half-celestials can use a *daylight* effect (as the spell) at will.

Smite Evil (Su): Once per day a half-celestial can make a normal melee attack to deal extra damage equal to its HD

(maximum of +20) against an evil foe.

Spell-Like Abilities: A half-celestial with an Intelligence or Wisdom score of 8 or higher has two or more spell-like abilities, depending on its Hit Dice, as indicated on the table below. The abilities are cumulative.

Unless otherwise noted, an ability is usable once per day. Caster level equals the creature's HD, and the save DC is Charisma-based.

HD	Abilities
1–2	<i>Protection from evil</i> 3/day, <i>bless</i>
3–4	<i>Aid</i> , <i>detect evil</i>
5–6	<i>Cure serious wounds</i> , <i>neutralize poison</i>
7–8	<i>Holy smite</i> , <i>remove disease</i>
9–10	<i>Dispel evil</i>
11–12	<i>Holy word</i>
13–	<i>Holy aura</i> 3/day, <i>hallow</i>
14	
15–	<i>Mass charm monster</i>
16	
17–	<i>Summon monster IX</i> (celestials only)
18	
19–	<i>Resurrection</i>
20	

Special Qualities: A half-celestial has all the special qualities of the base creature, plus the following special qualities.

—Darkvision out to 60 feet.

—Immunity to disease.

—Resistance to acid 10, cold 10, and electricity 10.

—Damage reduction: 5/magic (if HD 11 or less) or 10/magic (if HD 12 or more).

—A half-celestial's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

—Spell resistance equal to creature's HD + 10 (maximum 35).

—+4 racial bonus on Fortitude saves against poison.

Abilities: Increase from the base creature as follows: Str +4, Dex +2, Con +4, Int +2, Wis +4, Cha +4.

Skills: A half-celestial gains skill points as an outsider and has skill points equal to $(8 + \text{Int modifier}) \times 4$ (HD +3). Do not include Hit Dice from class levels in this calculation—the half-celestial gains outsider skill points only for its racial Hit Dice, and gains the normal amount of skill points for its class levels. Treat skills from the base creature's list as class skills, and other skills as cross-class.

Challenge Rating: HD 5 or less, as base creature +1; HD 6 to 10, as base creature +2; HD 11 or more, as base creature +3.

Alignment: Always good (any).

Level Adjustment: Same as base creature +4.

HALF-DRAGON

Half-dragon creatures are always more formidable than others of their kind that do not have dragon blood, and their appearance betrays their nature—scales, elongated features, reptilian eyes, and exaggerated teeth and claws. Sometimes they have wings.

CREATING A HALF-DRAGON

“Half-dragon” is an inherited template that can be added to any living, corporeal creature (referred to hereafter as the base creature).

A half-dragon uses all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to dragon. Size is unchanged. Do not recalculate base attack bonus or saves.

Hit Dice: Increase base creature's racial HD by one die size, to a maximum of d12. Do not increase class HD.

Speed: A half-dragon that is Large or larger has wings and can fly at twice its base land speed (maximum 120 ft.) with average maneuverability. A half-dragon that is Medium or smaller does not have wings.

Armor Class: Natural armor improves by +4.

Attack: A half-dragon has two claw attacks and a bite attack, and the claws are the primary natural weapon. If the base creature can use weapons, the half-dragon retains this ability. A half-dragon fighting without weapons uses a claw when making an attack action. When it has a weapon, it usually uses the weapon instead.

Full Attack: A half-dragon fighting without weapons uses both claws and its bite when making a full attack. If armed with a weapon, it usually uses the weapon as its primary attack and its bite as a natural secondary attack. If it has a hand free, it uses a claw as an additional natural secondary attack.

Damage: Half-dragons have bite and claw attacks. If the base creature does not have these attack forms, use the damage values in the table below. Otherwise, use the values below or the base creature's damage values, whichever are greater.

Size	Bite Damage	Claw Damage
Fine	1	—
Diminutive	1d2	1
Tiny	1d3	1d2
Small	1d4	1d3
Medium	1d6	1d4
Large	1d8	1d6
Huge	2d6	1d8
Gargantuan	3d6	2d6
Colossal	4d6	3d6

Special Attacks: A half-dragon retains all the special attacks of the base creature and gains a breath weapon based on the dragon variety (see the table below), usable once per day. A half-dragon's breath weapon deals 6d8 points of damage. A successful Reflex save (DC 10 + 1/2 half-dragon's racial HD + half-dragon's Con modifier) reduces damage by half.

Dragon Variety	Breath Weapon
Black	60-foot line of acid
Blue	60-foot line of lightning
Green	30-foot cone of corrosive (acid) gas
Red	30-foot cone of fire
White	30-foot cone of cold
Brass	60-foot line of fire
Bronze	60-foot line of lightning
Copper	60-foot line of acid
Gold	30-foot cone of fire
Silver	30-foot cone of cold

Special Qualities: A half-dragon has all the special qualities of the base creature, plus darkvision out to 60 feet and low-light vision. A half-dragon has immunity to *sleep* and paralysis effects, and an additional immunity based on its dragon variety.

Dragon Variety	Immunity	Dragon Variety	Immunity
Black	Acid	Brass	Fire
Blue	Electricity	Bronze	Electricity
Green	Acid	Copper	Acid
Red	Fire	Gold	Fire
White	Cold	Silver	Cold

Abilities: Increase from the base creature as follows: Str +8, Con +2, Int +2, Cha +2.

Skills: A half-dragon gains skill points as a dragon and has skill points equal to $(6 + \text{Int modifier}) \times 3$ (HD + 3). Do not include Hit Dice from class levels in this calculation—the half-dragon gains dragon skill points only for its racial Hit Dice, and gains the normal amount of skill points for its class levels. Treat skills from the base creature's list as class skills, and other skills as cross-class.

Environment: Same as either the base creature or the dragon variety.

Challenge Rating: Same as the base creature + 2 (minimum 3).

Alignment: Same as the dragon variety.

Level Adjustment: Same as base creature +3.

HALF-FIEND

No matter its form, a half-fiend is always hideous to behold, having dark scales, horns, glowing red eyes, bat wings, a fetid odor, or some other obvious sign that it is tainted with evil.

CREATING A HALF-FIEND

"Half-fiend" is an inherited template that can be added to any living, corporeal creature with an Intelligence score of 4 or more and nongood alignment (referred to hereafter as the base creature).

A half-fiend uses all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to outsider. Do not recalculate Hit Dice, base attack bonus, or saves. Size is unchanged. Half-fiends are normally native outsiders.

Speed: A half-fiend has bat wings. Unless the base creature has a better fly speed, the creature can fly at the base creature's base land speed (average maneuverability).

Armor Class: Natural armor improves by +1 (this stacks with any natural armor bonus the base creature has).

Attack: A half-fiend has two claw attacks and a bite attack, and the claws are the primary natural weapon. If the base creature can use weapons, the half-fiend retains this ability. A half-fiend fighting without weapons uses a claw when making an attack action. When it has a weapon, it usually uses the weapon instead.

Full Attack: A half-fiend fighting without weapons uses both claws and its bite when making a full attack. If armed with a weapon, it usually uses the weapon as its primary attack and its bite as a natural secondary attack. If it has a hand free, it uses a claw as an additional natural secondary attack.

Damage: Half-fiends have bite and claw attacks. If the base creature does not have these attack forms, use the damage values in the table below. Otherwise, use the values below or the base creature's damage values, whichever are greater.

Size	Bite Damage	Claw Damage
Fine	1	—
Diminutive	1d2	1
Tiny	1d3	1d2
Small	1d4	1d3
Medium	1d6	1d4
Large	1d8	1d6
Huge	2d6	1d8
Gargantuan	3d6	2d6
Colossal	4d6	3d6

Special Attacks: A half-fiend retains all the special attacks of the base creature and gains the following special attack.

Smite Good (Su): Once per day the creature can make a normal melee attack to deal extra damage equal to its HD (maximum of +20) against a good foe.

Spell-Like Abilities: A half-fiend with an Intelligence or Wisdom score of 8 or higher has spell-like abilities depending on its Hit Dice, as indicated on the table below. The abilities are cumulative. Unless otherwise noted, an ability is usable once per day. Caster level equals the creature's HD, and the save DC is Charisma-based.

HD	Abilities
1–2	<i>Darkness</i> 3/day

Special Qualities: A half-fiend has all the special qualities of the base creature, plus the following special qualities.

—Darkvision out to 60 feet.

—Immunity to poison.

—Resistance to acid 10, cold 10, electricity 10, and fire 10.

—Damage reduction: 5/magic (if HD 11 or less) or 10/magic (if HD 12 or more).

—A half-fiend's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

—Spell resistance equal to creature's HD + 10 (maximum 35).

Abilities: Increase from the base creature as follows: Str +4, Dex +4, Con +2, Int +4, Cha +2.

Skills: A half-fiend gains skill points as an outsider and has skill points equal to $(8 + \text{Int modifier}) \times \frac{\text{HD}}{3}$. Do not include Hit Dice from class levels in this calculation—the half-fiend gains outsider skill points only for its racial Hit Dice, and gains the normal amount of skill points for its class levels. Treat skills from the base creature's list as class skills, and other skills as cross-class.

Halflings stand about 3 feet tall and usually weigh between 30 and 35 pounds. They have brown or black eyes. Halfling men often have long sideburns, but beards are rare among them and mustaches almost unseen. Halflings prefer simple, comfortable, and practical clothes. Unlike members of most races, they prefer actual comfort to shows of wealth. Halflings reach adulthood in their early twenties and generally live into the middle of their second century. Halflings speak Halfling and Common.	
Most halflings encountered outside their home are warriors; the information in the statistics block is for one of 1st level.	
COMBAT	
Halflings prefer to fight defensively, usually hiding and launching ranged attacks as the foe approaches. Their tactics are very much like those of elves but place more emphasis on cover and concealment and less on mobility.	
Halfling Traits (Ex): Halflings possess the following racial traits.	
— +2 Dexterity, –2 Strength.	
— Small size. +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, –4 penalty on grapple checks, lifting and carrying limits 3/4 those of Medium characters.	
— A halfling's base land speed is 20 feet.	
— +2 racial bonus on Climb, Jump, and Move Silently checks.	
— +1 racial bonus on all saving throws.	
— +2 morale bonus on saving throws against fear. This bonus stacks with the halfling's +1 bonus on saving throws in general.	
— +1 racial bonus on attack rolls with thrown weapons and slings.	
— +2 racial bonus on Listen checks.	
— Automatic Languages: Common, Halfling. Bonus Languages: Dwarven, Elven, Gnome, Goblin, Orc.	
— Favored Class: Rogue.	
The halfling warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.	

SUBRACES

The information above is for the lightfoot halfling, the most common halfling variety. There are two other major halfling subraces, which differ from lightfoot halflings as follows.

Tallfellow

Tallfellows are somewhat rare among halfling folk. Tallfellows are 4 feet tall or more and weigh between 30 and 35 pounds. They generally speak Elven in addition to Common and Halfling.

Tallfellow Traits (Ex): These traits are in addition to the lightfoot halfling traits, except where noted.

— +2 racial bonus on Search, Spot, and Listen checks. Like an elf, a tallfellow who merely passes within 5 feet of a secret or concealed door is entitled to a Search check as though actively looking for it. This trait replaces the lightfoot's +2 bonus on Listen checks.

—Tallfellows are less athletic than lightfoot halflings and do not have a racial bonus on Climb, Jump, and Move Silently checks.

Deep Halfling

These halflings are shorter and stockier than the more common lightfeet.

Deep halflings are about 2-1/2 tall and weigh between 30 and 35 pounds. Deep halflings speak Dwarven fluently.

Deep Halfling Traits (Ex): These traits are in addition to the lightfoot halfling traits, except where noted.

—Darkvision out to 60 feet.

—Stonecunning: Like dwarves, deep halflings have a +2 racial bonus on checks to notice unusual stonework. Something that isn't stone but that is disguised as stone also counts as unusual stonework. A deep halfling who merely comes within 10 feet of unusual stonework can make a check as though actively searching and can use the Search skill to find stonework traps as a rogue can. A deep halfling can also intuit depth, sensing the approximate distance underground as naturally as a human can sense which way is up.

— +2 racial bonus on Appraise checks and Craft checks that are related to stone or metal.

—Deep halflings are less athletic than lightfoot halflings and do not have a racial bonus on Climb, Jump, and Move Silently checks.

Harpies like to entrance hapless travelers with their magical songs and lead them to unspeakable torments. Only when a harpy has finished playing with its new “toys” will it release them from suffering by killing and consuming them.

COMBAT

When a harpy engages in battle, it prefers to use Flyby Attack and strike with a melee weapon.

Captivating Song (Su): The most insidious ability of the harpy is its song. When a harpy sings, all creatures (other than harpies) within a 300-foot spread must succeed on a DC 16 Will save or become captivated. This is a sonic mind-affecting charm effect. A creature that successfully saves cannot be affected again by the same harpy’s song for 24 hours. The save DC is Charisma-based.

A captivated victim walks toward the harpy, taking the most direct route available. If the path leads into a dangerous area (through flame, off a cliff, or the like), that creature gets a second saving throw. Captivated creatures can take no actions other than to defend themselves. (Thus, a fighter cannot run away or attack but takes no defensive penalties.) A victim within 5 feet of the harpy stands there and offers no resistance to the monster’s attacks. The effect continues for as long as the harpy sings and for 1 round thereafter. A bard’s countersong ability allows the captivated creature to attempt a new Will save.

Skills: Harpies have a +4 racial bonus on Bluff and Listen checks.

HARPY ARCHER

A cruel hunter and roaming brigand, the harpy archer has trained as a fighter specializing in ranged combat. Harpy archers often become mercenaries, selling their services to the highest bidder. When not employed, they make ends meet as highway robbers, forcing merchant caravans to pay protection money.

COMBAT

Captivating Song (Su): Will DC 17 negates.

Possessions: +3 studded leather, +1 frost composite longbow (+1 Str bonus), 10 cold iron arrows, 10 silvered arrows, 5 +2 arrows, lesser bracers of archery, potion of cure moderate wounds, potion of cat’s grace, cloak of resistance +2, ring of protection +1. (Different harpy archers may have different possessions.)

A typical hell hound stands 4-1/2 feet high at the shoulder and weighs 120 pounds.

Hell hounds do not speak but understand Infernal.

COMBAT

Hell hounds are efficient hunters. A favorite pack tactic is to surround prey quietly, then attack with one or two hounds, driving it toward the rest with their fiery breath. If the prey doesn't run, the pack closes in. Hell hounds track fleeing prey relentlessly.

A hell hound's natural weapons, as well as any weapons it wields, are treated as evil-aligned and lawful-aligned for the purpose of overcoming damage reduction.

Breath Weapon (Su): 10-foot cone, once every 2d4 rounds, damage 2d6 fire, Reflex DC 13 half. The save DC is Constitution-based.

Fiery Bite (Su): A hell hound deals an extra 1d6 points of fire damage every time it bites an opponent, as if its bite were a flaming weapon.

Skills: Hell hounds have a +5 racial bonus on Hide and Move Silently checks.

*They also receive a +8 racial bonus on Survival checks when tracking by scent, due to their keen sense of smell.

NESSIAN WARHOUND

Nessian warhounds are coalblack mastiffs the size of draft horses, often fitted with shirts of infernal chainmail. Nessian warhounds resemble hell hounds, except as otherwise noted.

Breath Weapon (Su): 10-foot cone, once every 2d4 rounds, damage 3d6 fire, Reflex DC 21 half. The save DC is Constitution-based.

Fiery Bite (Su): A Nessian warhound deals an extra 1d8 points of fire damage every time it bites an opponent, as if its bite were a flaming weapon.

Level Adjustment:	—

Hippogriffs are aggressive flying creatures that combine features of horses and giant eagles. Voracious omnivores, hippogriffs will hunt humanoids as readily as any other meal. A typical hippogriff is 9 feet long, has a wingspan of 20 feet, and weighs 1,000 pounds.

COMBAT

Hippogriffs dive at their prey and strike with their clawed forelegs. When they cannot dive, they slash with claws and beak. Mated pairs and flights of these creatures attack in concert, diving repeatedly to drive away or kill intruders. Hippogriffs fight to the death to defend their nests and their hatchlings, which are prized as aerial mounts and fetch a handsome price in many civilized areas.

Skills: Hippogriffs have a +4 racial bonus on Spot checks.

TRAINING A HIPPOGRIFF

A hippogriff requires training before it can bear a rider in combat.

Training a hippogriff requires six weeks of work and a DC 25 Handle Animal check. Riding a hippogriff requires an exotic saddle. A hippogriff can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Hippogriff eggs are worth 2,000 gp apiece on the open market, while young are worth 3,000 gp each. Professional trainers charge 1,000 gp to rear or train a hippogriff.

Carrying Capacity: A light load for a hippogriff is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

Hobgoblins are larger cousins of goblins. Hobgoblins' hair color ranges from dark reddish-brown to dark gray. They have dark orange or red-orange skin. Large males have blue or red noses. Hobgoblins' eyes are yellowish or dark brown, while their teeth are yellow. Their garments tend to be brightly colored, often blood red with black-tinted leather. Their weaponry is kept polished and in good repair. Hobgoblins speak Goblin and Common. Most hobgoblins encountered outside their homes are warriors; the information in the statistics block is for one of 1st level.

COMBAT

These creatures have a strong grasp of strategy and tactics and are capable of carrying out sophisticated battle plans. Under the leadership of a skilled strategist or tactician, their discipline can prove a deciding factor. Hobgoblins hate elves and attack them first, in preference to other opponents.

Skills: Hobgoblins have a +4 racial bonus on Move Silently checks.

The hobgoblin warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

HOBGOBLIN CHARACTERS

Hobgoblin characters possess the following racial traits.

- +2 Dexterity, +2 Constitution.
- A hobgoblin's base land speed is 30 feet.
- Darkvision out to 60 feet.
- +4 racial bonus on Move Silently checks.
- Automatic Languages: Common, Goblin. Bonus Languages: Draconic, Dwarven, Infernal, Giant, Orc.
- Favored Class: Fighter.
- Level adjustment +1.

Special Qualities:	Construct traits, darkvision 60 ft., low-light vision
Saves:	Fort +0, Ref +4, Will +1
Abilities:	Str 8, Dex 15, Con —, Int 10, Wis 12, Cha 7
Skills:	Hide +14, Listen +4, Spot +4
Feats:	Lightning Reflexes
Environment:	Any
Organization:	Solitary
Challenge Rating:	1
Treasure:	None
Alignment:	Any (same as creator)
Advancement:	3-6 HD (Tiny)
Level Adjustment:	—

A homunculus is a miniature servant created by a wizard. These creatures are weak combatants but make effective spies, messengers, and scouts. A homunculus's creator determines its precise features. Homunculi are little more than tools designed to carry out assigned tasks. They are extensions of their creators, sharing the same alignment and basic nature. A homunculus cannot speak, but the process of creating one links it telepathically with its creator.

It knows what its master knows and can convey to him or her everything it sees and hears, out to a distance of 1,500 feet. A homunculus never travels beyond this range willingly, though it can be removed forcibly. If this occurs, the creature does everything in its power to regain contact with its master. An attack that destroys a homunculus deals 2d10 points of damage to its master.

If the creature's master is slain, the homunculus also dies, and its body swiftly melts away into a pool of ichor.

COMBAT

Homunculi land on their victims and bite with their venomous fangs.

Poison (Ex): Injury, Fortitude DC 13, initial damage sleep for 1 minute, secondary damage sleep for another 5d6 minutes.

The save DC is Constitution-based and includes a +2 racial bonus.

CONSTRUCTION

A homunculus is shaped from a mixture of clay, ashes, mandrake root, spring water, and one pint of the creator's own blood. The materials cost 50 gp. The creature's master may assemble the body or hire someone else to do the job. Creating the body requires a DC 12 Craft (sculpting) check or a DC 12 Craft (pottery) check.

After the body is sculpted, it is animated through an extended magical ritual that requires a specially prepared laboratory or workroom, similar to an alchemist's laboratory and costing 500 gp to establish. If the creator is personally constructing the creature's body, the building and ritual can be performed together.

A homunculus with more than 2 Hit Dice can be created, but each additional Hit Die adds +2,000 gp to the cost to create. Craft Construct, *arcane eye*, *mirror image*, *mending*, caster must be at least 4th level; Price — (never sold); Cost 1,050 gp + 78 XP.

HOWLER

Large Outsider (Chaotic, Evil, Extraplanar)

Hit Dice:	6d8+12 (39 hp)
Initiative:	+7
Speed:	60 ft. (12 squares)
Armor Class:	17 (−1 size, +3 Dex, +5 natural), touch 12, flat-footed 14
Base Attack/Grapple:	+6/+15
Attack:	Bite +10 melee (2d8+5)
Full Attack:	Bite +10 melee (2d8+5) and 1d4 quills +5 melee (1d6+2)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Quills, howl
Special Qualities:	Darkvision 60 ft.
Saves:	Fort +7, Ref +8, Will +7
Abilities:	Str 21, Dex 17, Con 15, Int 6, Wis 14, Cha 8
Skills:	Climb +14, Hide +8, Listen +13, Move Silently +12, Search +7, Spot +13, Survival +2 (+4 following tracks)
Feats:	Alertness, Combat Reflexes, Improved Initiative
Environment:	A chaotic-aligned plane
Organization:	Solitary, gang (2–4), or pack (6–10)
Challenge Rating:	3
Treasure:	None
Alignment:	Always chaotic evil
Advancement:	7–9 HD (Large); 11–18 HD (Huge)
Level Adjustment:	+3 (cohort)

Howlers live on planes where chaos and evil hold sway. A howler is about 8 feet long and weighs about 2,000 pounds. Although they are surprisingly intelligent, howlers do not speak—they only howl. If there is a language within the howls, as some have suggested, even spells cannot decipher it. Howlers understand Abyssal.

COMBAT

Howlers attack in groups, for they are cowardly and cruel. They prefer to charge into combat, race out, and then charge in again. A howler's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and evil-aligned for the purpose of overcoming damage reduction.

Quills (Ex): A howler's neck bristles with long quills. While biting, the creature thrashes about, striking with 1d4 of them. An opponent hit by a howler's quill attack must succeed on a DC 16 Reflex save or have the quill break off in his or her flesh. Lodged quills impose a −1 penalty on attacks, saves, and checks per quill. The save DC is Dexterity-based.

A quill can be removed safely with a DC 20 Heal check; otherwise, removing a quill deals an extra 1d6 points of damage.

Howl (Ex): All beings other than outsiders that hear the creature's howling for an hour or longer are subject to its effect, though it does not help the howler in combat. Anyone within hearing range of a howler for a full hour must succeed on a DC 12 Will save or take 1 point of Wisdom damage. The save DC is Charisma-based. The save must be repeated for each hour of exposure. This is a sonic mind-affecting effect.

TRAINING A HOWLER

Although intelligent, a howler requires training before it can bear a rider in combat. To be trained, a howler must have a friendly attitude toward the trainer (this can be achieved through a successful Diplomacy check). Training a friendly howler requires six weeks of work and a DC 25 Handle Animal check. Riding a howler requires an exotic saddle. A howler can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Carrying Capacity: A light load for a howler is up to 460 pounds; a medium load, 461–920 pounds; and a heavy load, 921–1,380 pounds. A howler can drag 6,900 pounds.

Hydras are reptile-like monsters with multiple heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds. Hydras do not speak.

COMBAT

Hydras can attack with all their heads at no penalty, even if they move or charge during the round.

A hydra can be killed either by severing all its heads or by slaying its body. To sever a head, an opponent must make a successful sunder attempt with a slashing weapon. (The player should declare where the attack is aimed before making the attack roll.) Making a sunder attempt provokes an attack of opportunity unless the foe has the Improved Sunder feat. An opponent can strike at a hydra's heads from any position in which he could strike at the hydra itself, because the hydra's head writhe and whip about in combat. An opponent can ready an action to attempt to sunder a hydra's head when the creature bites at him. Each of a hydra's heads has hit points equal to the creature's full normal hit point total, divided by its original number of heads. Losing a head deals damage to the body equal to half the head's full normal hit points. A natural reflex seals the neck shut to prevent further blood loss. A hydra can no longer attack with a severed head but takes no other penalties. Each time a head is severed, two new heads spring from the stump in 1d4 rounds. A hydra can never have more than twice its original number of heads at any one time, and any extra heads it gains beyond its original number wither and die within a day. To prevent a severed head from growing back into two heads, at least 5 points of fire or acid damage must be dealt to the stump (a touch attack to hit) before the new heads appear. A flaming weapon (or similar effect) deals its energy damage to the stump in the same blow in which a head is severed. Fire or acid damage from an area effect may burn multiple stumps in

addition to dealing damage to the hydra's body. A hydra does not die from losing its heads until all its heads have been cut off and the stumps seared by fire or acid.

A hydra's body can be slain just like any other creature's, but hydras possess fast healing (see below) and are difficult to defeat in this fashion. Any attack that is not (or cannot be) an attempt to sunder a head affects the body.

Targeted magical effects cannot sever a hydra's heads (and thus must be directed at the body) unless they deal slashing damage and could be used to make sunder attempts.

Fast Healing (Ex): Each round, a hydra heals damage equal to $10 + \text{the number of its original heads}$.

Skills: Hydras have a +2 racial bonus on Listen and Spot checks, thanks to their multiple heads.

A hydra has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Feats: A hydra's Combat Reflexes feat allows it to use all its heads for attacks of opportunity.

PYROHYDRA

Huge Magical Beast (Fire)

These reddish hydras can breathe jets of fire 10 feet high, 10 feet wide, and 20 feet long. All heads breathe once every 1d4 rounds. Each jet deals $3d6$ points of fire damage per head. A successful Reflex save halves the damage. The save DC is $10 + 1/2$ hydra's original number of heads + hydra's Con modifier.

Fire attacks cannot prevent a pyrohydra's stump from growing new heads (since a pyrohydra has immunity to fire), but 5 points of cold damage does.

CRYOHYDRA

Huge Magical Beast (Cold)

These purplish hydras can breathe jets of frost 10 feet high, 10 feet wide, and 20 feet long. All heads breathe once every 1d4 rounds. Each jet deals $3d6$ points of cold damage per head. A successful Reflex save halves the damage. The save DC is $10 + 1/2$ hydra's original number of heads + hydra's Con modifier.

Cold attacks cannot prevent a cryohydra's stump from growing new heads (since a cryohydra has immunity to cold), but 5 points of fire damage does.

INEVITABLE

Inevitables are constructs whose sole aim is to enforce the natural laws of the universe.

Each type of inevitable is designed to find and punish a particular kind of transgression, hunting down a person or group that has violated a fundamental principle. When an inevitable is created, it receives its first mission, then finds the transgressors and metes out appropriate punishment. The sentence is usually death, although some inevitables insist on compensation to the wronged party instead, using *geas* and *mark of justice* to ensure compliance. From its first step, an inevitable focuses totally on its target. It continues its efforts no matter how cold the trail or hopeless the task. Inevitables are single-minded in pursuit of their quarry, but they are under orders to leave innocents alone. Accomplices to their prey are fair game, however, which sometimes creates conflicts within their programming.

Inevitables gladly sacrifice themselves to complete a mission, but they aren't suicidal. Faced with impending defeat, they are likely to withdraw and seek a way to even the odds. They are determined but patient foes. They ally with others if that helps accomplish their mission, but they have a hard time keeping allies for long.

Inevitables tend to stick out in a crowd while they're in observation mode, but they seem oblivious to the attention. Their forms vary, but all inevitables are gold-and-silver clockwork creatures, with gears and pistons where muscles would be on flesh-and-blood creatures. Their eyes glow with a golden radiance.

Note that unlike most constructs, inevitables have an Intelligence score and can think, learn, and remember.

Inevitables speak Abyssal, Celestial, Infernal, and the native language of their first target.

COMBAT

Unless their very existence is threatened, inevitables focus completely on the transgressor they've been assigned to, ignoring other combatants completely. An inevitable might attack anyone who hinders its progress, but it won't tarry beyond the point where it can reengage its quarry. Inevitables take self-defense very seriously; anyone who attacks an inevitable with what the creature perceives as deadly force is met with deadly force in return.

An inevitable's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Fast Healing (Ex): An inevitable heals a certain amount of damage each round (specified in each variety's description) as long as it has at least 1 hit point. However, damage dealt by chaotic weapons heals at the normal rate.

Kolyaruts mete out punishment to those who break bargains and oaths.

Before beginning a mission against a deal-breaker, a kolyarut learns as much about the contract or oath as possible. It's not interested in those who break deals accidentally or against their will—only those who willingly break contracts violate the principle that kolyaruts are created to uphold. If a written contract was broken, the kolyarut typically carries a copy of the contract with it.

Kolyaruts are the most talkative of the inevitables, making credible attempts at social niceties such as proper greetings before getting down to the matter at hand. They can use *disguise self* to appear as almost any kind of humanoid—useful if they need to go undercover to catch their quarry.

Combat

Like all inevitables, a kolyarut is patient enough to study a target before striking. It has a good idea of the deal-breaker's abilities and defenses before it enters battle. When it fights, it tries to get the conflict over as soon as possible, minimizing excess bloodshed and mayhem. It doesn't let concern for innocents delay or endanger its mission, however.

A kolyarut's favorite tactic is to use *invisibility* or *disguise self* to sneak close, then eliminate the quarry with its vampiric touch ability before it can react. A kolyarut has no compunctions about using its vampiric touch ability on allies to increase its own power, if doing so helps it complete its mission.

A kolyarut's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Enervation Ray (Su): A kolyarut can fire a black enervation ray at targets within 200 feet. The effect is identical with the *enervation* spell (caster level 13th).

Spell-Like Abilities: At will—*discern lies* (DC 17), *disguise self*, *fear* (DC 17), *hold person* (DC 16), *invisibility*, *locate creature*, *suggestion* (DC 16); 1/day—*hold monster* (DC 17), *mark of justice*; 1/week—*geas/quest*. Caster level 13th. The save DCs are Charisma-based.

Vampiric Touch (Su): As a melee touch attack, a kolyarut can steal life force from its foe, as the *vampiric touch* spell (caster level 13th).

Skills: A kolyarut has a +4 racial bonus on Disguise, Gather Information, and Sense Motive checks.

Level Adjustment:

Maruts confront those who would try to deny the grave itself.

Any who use unnatural means to extend their life span could be targeted by a marut. Those who take extraordinary measures to cheat death in some other way might be labeled transgressors as well. Those who use magic to reverse death aren't worthy of a marut's attention unless they do so repeatedly or on a massive scale.

When a marut has identified its target, it walks surely and implacably toward the foe, never resting.

Combat

Once it has found its target, a marut brings it the death it has been trying to avoid. Those who defile death through necromancy may instead receive a *geas* and/or *mark of justice* to enforce proper respect. It typically uses *wall of force* to shut off any escape routes, then opens up with *chain lightning* while it closes to melee range. Once there, it strikes with its massive fists, using *circle of death* if beset by numbers of defenders. It hits spellcasting opponents with repeated uses of *greater dispel magic*, and it uses *dimension door* and *locate creature* to track down foes who flee.

A marut's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Fists of Thunder and Lightning (Su): A marut's left fist delivers a loud thunderclap whenever it hits something, dealing an extra 3d6 points of sonic damage and causing the target to be deafened for 2d6 rounds (Fortitude DC 31 negates the deafness). Its right fist delivers a shock for an extra 3d6 points of electricity damage, and the flash of lightning causes the target to be blinded for 2d6 rounds (Fortitude DC 31 negates the blindness). The save DCs are Strength-based and include the marut's Ability Focus feat.

Spell-Like Abilities: At will—*air walk*, *dimension door*, *fear* (DC 18), *greater command* (DC 19), *greater dispel magic*, *mass inflict light wounds* (DC 19), *locate creature*, *true seeing*; 1/day—*chain lightning* (DC 20), *circle of death* (DC 20), *mark of justice*, *wall of force*; 1/week—*earthquake* (DC 22), *geas/quest*, *plane shift* (DC 21). Caster level 14th. The save DCs are Charisma-based.

Skills: A marut has a +4 racial bonus on Concentration, Listen, and Spot checks.

Zelekhuts are charged with hunting down those who would deny justice—especially those who flee to escape punishment. Expert trackers, they use a combination of natural skill and magic to find fugitives wherever they may hide.

A zelekhut may initially appear rather non-threatening—but when it is about to enter combat, it can cause two spiked chains to spring forth from its forearms as a free action. In similar fashion, it can cause a pair of golden metallic wings to emerge from its back. Retracting the chains or the wings is also a free action.

Combat

Once it has found its fugitive, a zelekhut uses its speed and its spell-like abilities to cover the most likely escape routes. Then it immobilizes any defenders while attempting to protect any innocent bystanders. Finally, it apprehends the fugitive with its spiked chains, tripping or disarming the foe as needed.

A zelekhut's natural weapons, as well as any weapons it wields, are treated as lawful-aligned for the purpose of overcoming damage reduction.

Spell-Like Abilities: At will—*clairaudience/clairvoyance, dimensional anchor, dispel magic, fear* (DC 16), *hold person* (DC 15), *locate creature, true seeing*; 3/day—*hold monster* (DC 17), *mark of justice*; 1/week—*lesser geas* (DC 16). Caster level 8th. The save DCs are Charisma-based.

Skills: A zelekhut has a +4 racial bonus on Search and Sense Motive checks.

Feats: Due to its centaur-like construction, a zelekhut qualifies for feats as if it had the Mounted Combat feat.

Invisible stalkers are creatures native to the Elemental Plane of Air. They sometimes serve wizards and sorcerers, who summon them to perform specific tasks.

A summoned invisible stalker undertakes whatever task the summoner commands, even if the task sends it hundreds or thousands of miles away. The creature follows a command until the task is completed and obeys only the summoner. However, it resents protracted missions or complex tasks and seeks to pervert its instructions accordingly.

Invisible stalkers have an amorphous form. A *see invisibility* spell shows only a dim outline of a cloud, while a *true seeing* spell reveals a roiling cloud of vapor.

These creatures speak only Auran but can understand Common.

COMBAT

An invisible stalker attacks by using the air itself as a weapon. It creates a sudden, intense blast of wind that pounds a single target on the same plane as the creature.

An invisible stalker can be killed only when it is on the Elemental Plane of Air. When performing a task elsewhere, it automatically returns to its home plane when it takes damage sufficient to destroy it.

Natural Invisibility (Su): This ability is constant, allowing a stalker to remain invisible even when attacking. This ability is inherent and not subject to the *invisibility purge* spell.

Improved Tracking (Ex): An invisible stalker is a consummate tracker and makes Spot checks instead of the usual Survival checks to trace a creature's passage.

Challenge Rating:	1/4
Treasure:	Standard
Alignment:	Usually lawful evil
Advancement:	By character class
Level Adjustment:	+0

Kobolds are short, reptilian humanoids with cowardly and sadistic tendencies.

A kobold's scaly skin ranges from dark rusty brown to a rusty black color. It has glowing red eyes. Its tail is nonprehensile. Kobolds wear ragged clothing, favoring red and orange. A kobold is 2 to 2-1/2 feet tall and weighs 35 to 45 pounds. Kobolds speak Draconic with a voice that sounds like that of a yapping dog.

COMBAT

Kobolds like to attack with overwhelming odds—at least two to one—or trickery; should the odds fall below this threshold, they usually flee. However, they attack gnomes on sight if their numbers are equal.

They begin a fight by slinging bullets, closing only when they can see that their foes have been weakened. Whenever they can, kobolds set up ambushes near trapped areas.

Light Sensitivity (Ex): Kobolds are dazzled in bright sunlight or within the radius of a *daylight* spell.

Skills: Kobolds have a +2 racial bonus on Craft (trapmaking), Profession (miner), and Search checks.

The kobold warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Challenge Rating: Kobolds with levels in NPC classes have a CR equal to their character level –3.

KOBOLD CHARACTERS

Kobold characters possess the following racial traits.

—4 Strength, +2 Dexterity, –2 Constitution.

—Small size: +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, –4 penalty on grapple checks, lifting and carrying limits 3/4 those of Medium characters.

—A kobold's base land speed is 30 feet.

—Darkvision out to 60 feet.

—Racial Skills: A kobold character has a +2 racial bonus on Craft (trapmaking), Profession (miner), and Search checks.

—Racial Feats: A kobold character gains feats according to its character class.

- +1 natural armor bonus.
- Special Qualities (see above): Light sensitivity.
- Automatic Languages: Draconic. Bonus Languages: Common, Undercommon.
- Favored Class: Sorcerer.
- Level adjustment +0.

Advancement:	21–32 HD (Gargantuan); 33–60 HD (Colossal)
Level Adjustment:	—

Six of the beast's tentacles are shorter arms about 30 feet long; the remaining two are nearly 60 feet long and covered with barbs. Its beaklike mouth is located where the tentacles meet the lower portion of its body.

Krakens speak Common and Aquan.

COMBAT

Krakens strike their opponents with their barbed tentacles, then grab and crush with their arms or drag victims into their huge jaws. An opponent can make sunder attempts against a kraken's tentacles or arms as if they were weapons. A kraken's tentacles have 20 hit points, and its arms have 10 hit points. If a kraken is currently grappling a target with one tentacle or arm, it usually uses another limb to make its attack of opportunity against the sunder attempt. Severing a kraken's tentacle or arm deals damage to the kraken equal to half the limb's full normal hit points. A kraken usually withdraws from combat if it loses both tentacles or three of its arms. A kraken regrows severed limbs in 1d10+10 days.

Improved Grab (Ex): To use this ability, the kraken must hit with an arm or tentacle attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Constrict (Ex): A kraken deals automatic arm or tentacle damage with a successful grapple check.

Jet (Ex): A kraken can jet backward once per round as a full-round action, at a speed of 280 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Ink Cloud (Ex): A kraken can emit a cloud of jet-black ink in an 80-foot spread once per minute as a free action. The cloud provides total concealment, which the kraken normally uses to escape a fight that is going badly. Creatures within the cloud are considered to be in darkness.

Spell-Like Abilities: 1/day—*control weather, control winds, dominate animal* (DC 18), *resist energy*. Caster level 9th. The save DC is Charisma-based.

Skills: A kraken has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it

swims in a straight line.

KRENSHAR

Medium Magical Beast

Hit Dice:	2d10 (11 hp)

Alignment:	Usually neutral
Advancement:	3–4 HD (Medium); 5–8 HD (Large)
Level Adjustment:	+2

The krenshar is a strange, catlike carnivore with extremely flexible skin on its head. A typical krenshar measures 4 or 5 feet in length with a long, narrow head. It weighs about 175 pounds.

COMBAT

Krenshars use solitary scouts to drive prey into the waiting clutches of the pride. The scout appears from hiding, uses its scare ability, then chases the fleeing target to join the attack.

Scare (Ex or Su): As a standard action, a krenshar can pull the skin back from its head, revealing the musculature and bony structures of its skull. This alone is usually sufficient to scare away foes (treat as a Bluff check with a +3 bonus).

Combining this scare ability with a loud screech produces an unsettling effect that works like a *scare* spell from a 3rd-level caster (Will DC 13 partial). A creature that successfully saves cannot be affected again by the same krenshar's scare ability for 24 hours. The shriek does not affect other krenshars. This is a supernatural, sonic mind-affecting fear effect. The save DC is Charisma-based.

Skills: Krenshars have a +4 racial bonus on Jump and Move Silently checks.

LAMIA

Large Magical Beast

Hit Dice:	9d10+9 (58 hp)
Initiative:	+2
Speed:	60 ft. (12 squares)
Armor Class:	18 (-1 size, +2 Dex, +7 natural), touch 11, flat-footed 16

Feats:	Dodge, Iron Will, Mobility, Spring Attack
Environment:	Temperate deserts
Organization:	Solitary, pair, or gang (3–4)
Challenge Rating:	6
Treasure:	Standard
Alignment:	Usually chaotic evil
Advancement:	10–13 HD (Large); 14–27 HD (Huge)

Level Adjustment: +4

A typical lamia is about 8 feet long and weighs about 700 pounds.

COMBAT

Though a lamia is powerful and dangerous in close combat, it has no stomach for a fair fight. It uses its illusion abilities to lure heroes into perilous situations, and then uses its Spring Attack feat to bound out of the shadows and drain Wisdom from its opponents. When it has sapped the will of its victim, it uses its enchantment abilities to beguile and ensnare the unfortunate soul. A lamia forced into physical combat attacks with a dagger in one of its human hands and a pair of lion-like claws.

Spell-Like Abilities: At will—*disguise self, ventriloquism*; 3/day—*charm monster* (DC 15), *major image* (DC 14), *mirror image, suggestion* (DC 14); 1/day—*deep slumber* (DC 14). Caster level 9th. The save DCs are Charisma-based.

Wisdom Drain (Su): A lamia drains 1d4 points of Wisdom each time it hits with its melee touch attack. (Unlike with other kinds of ability drain attacks, a lamia does not heal any damage when it uses its Wisdom drain.) Lamias try to use this power early in an encounter to make foes more susceptible to *charm monster* and *suggestion*.

Skills: Lamias have a +4 racial bonus on Bluff and Hide checks.

Adjustment:

A typical lammasu is about 8 feet long and weighs about 500 pounds. Lammasus speak Common, Draconic, and Celestial.

COMBAT

A lammasu attacks with spells or its razor-sharp claws. It almost always enters combat if it observes a good creature being threatened by evil.

Spells: A lammasu casts spells as a 7th-level cleric, and can choose spells from the cleric spell list, plus any two of the following domains: Good, Healing, Knowledge, or Law.

Typical Cleric Spells Prepared (6/6/5/4/2; save DC 13 + spell level): 0—detect magic, guidance (2), light, read magic, resistance; 1st—bless (2), detect evil, divine favor, entropic shield, protection from evil; 2nd—aid*, bear's endurance, bull's strength, lesser restoration, resist energy; 3rd—daylight, dispel magic, magic circle against evil*, remove curse; 4th—holy smite*, neutralize poison.*

*Domain spell. Domains: Good and Healing.

Magic Circle against Evil (Su): A lammasu radiates a continuous magic circle against evil that affects a 20-foot radius.

Spell-Like Abilities: 2/day—greater invisibility (self only); 1/day—dimension door. Caster level 7th.

Pounce (Ex): If a lammasu charges a foe, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +12 melee, damage 1d6+3.

Skills: Lammasus have a +2 racial bonus on Spot checks.

GOLDEN PROTECTOR

(CELESTIAL HALF-DRAGON LAMMASU)

Child of a celestial lammasu and a gold dragon, the golden protector has migrated to the Material Plane to more actively combat evil.

COMBAT

The golden protector's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Breath Weapon (Su): 30-foot cone, 1/day, damage 6d8 fire, Reflex DC 21 half.

Smite Evil (Su): Once per day a golden protector can make a normal melee attack to deal an extra 10 points of damage against an evil opponent.

Typical Cleric Spells Prepared (6/7/5/4/3; save DC 15 + spell level): 0—detect magic, guidance (2), light, read magic, resistance; 1st—bless (2), detect evil, divine favor (2), entropic shield, protection from evil; 2nd—aid*, bear's endurance, bull's strength, lesser restoration, resist energy; 3rd—daylight, dispel magic, magic circle against evil*, remove curse; 4th—dismissal, holy smite*, neutralize poison.*

*Domain spell. Domains: Good and Healing.

Rake (Ex): Attack bonus +19 melee, damage 1d6+4.

Possessions: Bracers of armor +2, ring of protection +1. (Different golden protectors may have different possessions.)

Combat

Leonals like their battles as straightforward as can be. They begin with a roar to put their foes off balance, then follow up with a frenzy of claw and bite attacks. They closely coordinate with others in their pride, watching one another's flanks and setting up devastating attacks.

A leonal's natural weapons, as well as any weapons it wields, are treated as good-aligned for the purpose of overcoming damage reduction.

Roar (Su): A leonal can roar up to three times per day. Each roar releases a blast in a 60-foot cone that duplicates the effects of a *holy word* spell and deals an extra 2d6 points of sonic damage (Fortitude DC 20 negates). The save DC is Charisma-based.

Pounce (Ex): If a leonal charges a foe, it can make a full attack, including two rake attacks.

Improved Grab (Ex): To use this ability, a leonal must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Rake (Ex): Attack bonus +20 melee, damage 1d6+8.

Spell-Like Abilities: At will—*detect thoughts*, *fireball* (DC 15), *hold monster* (DC 17), *polymorph*, *wall of force*; 3/day—*cure critical wounds* (DC 16), *neutralize poison*, *remove disease*; 1/day—*heal* (DC 18). Caster level 10th. The save DCs are Charisma-based.

Lay on Hands (Su): As the paladin class feature, except that each day, a leonal can heal an amount of damage equal to its full normal hit points.

Protective Aura (Su): Against attacks made or effects created by evil creatures, this ability provides a +4 deflection bonus to AC and a +4 resistance bonus on saving throws to anyone within 20 feet of the leonal. Otherwise, it functions as a *magic circle against evil* effect and a *lesser globe of invulnerability*, both with a radius of 20 feet (caster level equals leonal's HD). (The defensive benefits from the circle are not included in a leonal's statistics block.)

Speak with Animals (Su): This ability works like *speak with animals* (caster level 8th) but is a free action and does not require sound.

Skills: Leonals have a +4 racial bonus on Balance, Hide, and Move Silently checks.

LICH

A lich is an undead spellcaster, usually a wizard or sorcerer but sometimes a cleric or other spellcaster, who has used its magical powers to unnaturally extend its life.

A lich is a gaunt and skeletal humanoid with withered flesh stretched tight across horribly visible bones. Its eyes have long ago been lost to decay, but bright pinpoints of crimson light burn on in the empty sockets.

Liches speak Common plus any other languages they knew in life.

CREATING A LICH

“Lich” is an acquired template that can be added to any humanoid creature (referred to hereafter as the base creature), provided it can create the required phylactery; see *The Lich’s Phylactery*, below.

A lich has all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to undead. Do not recalculate base attack bonus, saves, or skill points. Size is unchanged.

Hit Dice: Increase all current and future Hit Dice to d12s.

Armor Class: A lich has a +5 natural armor bonus or the base creature's natural armor bonus, whichever is better.

Attack: A lich has a touch attack that it can use once per round. If the base creature can use weapons, the lich retains this ability. A creature with natural weapons retains those natural weapons. A lich fighting without weapons uses either its touch attack or its primary natural weapon (if it has any). A lich armed with a weapon uses its touch or a weapon, as it desires.

Full Attack: A lich fighting without weapons uses either its touch attack (see above) or its natural weapons (if it has any). If armed with a weapon, it usually uses the weapon as its primary attack along with a touch as a natural secondary attack, provided it has a way to make that attack (either a free hand or a natural weapon that it can use as a secondary attack).

Damage: A lich without natural weapons has a touch attack that uses negative energy to deal $1d8+5$ points of damage to living creatures; a Will save ($DC\ 10 + 1/2\ lich's\ HD + lich's\ Cha\ modifier$) halves the damage. A lich with natural weapons can use its touch attack or its natural weaponry, as it prefers. If it chooses the latter, it deals $1d8+5$ points of extra damage on one natural weapon attack.

Special Attacks: A lich retains all the base creature's special attacks and gains those described below. Save DCs are equal to $10 + 1/2\ lich's\ HD + lich's\ Cha\ modifier$ unless otherwise noted.

Fear Aura (Su): Liches are shrouded in a dreadful aura of death and evil. Creatures of less than 5 HD in a 60-foot radius that look at the lich must succeed on a Will save or be affected as though by a *fear* spell from a sorcerer of the lich's level. A creature that successfully saves cannot be affected again by the same lich's aura for 24 hours.

Paralyzing Touch (Su): Any living creature a lich hits with its touch attack must succeed on a Fortitude save or be permanently paralyzed. *Remove paralysis* or any spell that can remove a curse can free the victim (see the *bestow curse* spell description).

The effect cannot be dispelled. Anyone paralyzed by a lich seems dead, though a DC 20 Spot check or a DC 15 Heal check reveals that the victim is still alive..

Spells: A lich can cast any spells it could cast while alive.

Special Qualities: A lich retains all the base creature's special qualities and gains those described below.

Turn Resistance (Ex): A lich has +4 turn resistance.

Damage Reduction (Su): A lich's undead body is tough, giving the creature damage reduction 15/bludgeoning and magic. Its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Immunities (Ex): Liches have immunity to cold, electricity, polymorph (though they can use polymorph effects on themselves), and mind-affecting attacks.

Abilities: Increase from the base creature as follows: Int +2, Wis +2, Cha +2. Being undead, a lich has no Constitution score.

Skills: Liches have a +8 racial bonus on Hide, Listen, Move Silently, Search, Sense Motive, and Spot checks. Otherwise same as the base creature.

Organization: Solitary or troupe (1 lich, plus 2–4 vampires and 5–8 vampire spawn).

Challenge Rating: Same as the base creature + 2.

Treasure: Standard coins; double goods; double items.

Alignment: Any evil.

Advancement: By character class.

Level Adjustment: Same as the base creature +4.

LICH CHARACTERS

The process of becoming a lich is unspeakably evil and can be undertaken only by a willing character. A lich retains all class abilities it had in life.

THE LICH'S PHYLACTERY

An integral part of becoming a lich is creating a magic phylactery in which the character stores its life force. As a rule, the only way to get rid of a lich for sure is to destroy its phylactery. Unless its phylactery is located and destroyed, a lich reappears $1d10$ days after its apparent death.

Each lich must make its own phylactery, which requires the Craft Wondrous Item feat. The character must be able to cast spells and have a caster level of 11th or higher. The phylactery costs 120,000 gp and 4,800 XP to create and has a caster level equal to that of its creator at the time of creation.

The most common form of phylactery is a sealed metal box containing strips of parchment on which magical phrases have been transcribed. The box is Tiny and has 40 hit points, hardness 20, and a break DC of 40.

Other forms of phylacteries can exist, such as rings, amulets, or similar items.

A typical lillend's coils are 20 feet long. The creature weighs about 3,800 pounds. A few lillends have male torsos.

Lillends speak Celestial, Infernal, Abyssal, and Common.

COMBAT

Lillends are generally peaceful unless they intend vengeance against someone they believe guilty of harming, or even threatening, a favored art form, artwork, or artist. Then they become implacable foes. They use their spells and spell-like abilities to confuse and weaken opponents before entering combat. A covey of lillends usually discusses strategy before a battle.

A lillend's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned and good-aligned for the purpose of overcoming damage reduction.

Constrict (Ex): A lillend deals 2d6+5 points of damage with a successful grapple check. Constricting uses the entire lower portion of its body, so it cannot take any move actions when constricting, though it can still attack with its sword.

Improved Grab (Ex): To use this ability, a lillend must hit with its tail slap attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Spells: A lillend casts arcane spells as a 6th-level bard.

Typical Bard Spells Known (3/4/3; save DC 14 + spell level): 0—*dancing lights, daze, detect magic, lullaby, mage hand, read magic*; 1st—*charm person, cure light wounds, identify, sleep*; 2nd—*hold person, invisibility, sound burst*.

Spell-Like Abilities: 3/day—*darkness, hallucinatory terrain* (DC 18), *knock, light*; 1/day—*charm person* (DC 15), *speak with animals, speak with plants*. Caster level 10th. The save DCs are Charisma-based.

A lillend also has the bardic music ability as a 6th-level bard.

Skills: Lillends have a +4 racial bonus on Survival checks.

A lizardfolk is usually 6 to 7 feet tall with green, gray, or brown scales. Its tail is used for balance and is 3 to 4 feet long. A lizardfolk can weigh from 200 to 250 pounds.

Lizardfolk speak Draconic.

COMBAT

Lizardfolk fight as unorganized individuals. They prefer frontal assaults and massed rushes, sometimes trying to force foes into the water, where the lizardfolk have an advantage. If outnumbered or if their territory is being invaded, they set snares, plan ambushes, and make raids to hinder enemy supplies. Advanced tribes use more sophisticated tactics and have better traps and ambushes.

Hold Breath: A lizardfolk can hold its breath for a number of rounds equal to four times its Constitution score before it risks drowning.

Skills: Because of their tails, lizardfolk have a +4 racial bonus on Jump, Swim, and Balance checks. The skill modifiers given in the statistics block include a –2 armor check penalty (–4 on Swim checks) for carrying a heavy shield.

LIZARDFOLK AS CHARACTERS

Lizardfolk characters possess the following racial traits.

— +2 Strength, +2 Constitution, –2 Intelligence.

— Medium size.

— A lizardfolk's base land speed is 30 feet.

— Racial Hit Dice: A lizardfolk begins with two levels of humanoid, which provide 2d8 Hit Dice, a base attack bonus of +1, and base saving throw bonuses of Fort +0, Ref +3, and Will +0.

— Racial Skills: A lizardfolk's humanoid levels give it skill points equal to $5 \times \text{level}$ (2 + Int modifier, minimum 1). Its class skills are Balance, Jump, and Swim. Lizardfolk have a +4 racial bonus on Balance, Jump, and Swim checks.

— Racial Feats: A lizardfolk's humanoid levels give it one feat.

— Weapon and Armor Proficiency: A lizardfolk is automatically proficient with simple weapons and shields.

— +5 natural armor bonus.

— Natural Weapons: 2 claws (1d4) and bite (1d4).

— Special Qualities (see above): Hold breath.

— Automatic Languages: Common, Draconic. Bonus Languages: Aquan, Goblin, Gnoll, Orc.

— Favored Class: Druid.

— Level adjustment +1.

Although humanoid in shape, locathahs are clearly more fish than human. The average locathah stands 5 feet tall and weighs 175 pounds. Females and males look very much alike, although the former can be recognized by the two ochre stripes marking their egg sacs.

Locathahs speak Aquan.

COMBAT

Any battle with locathahs usually begins with the creatures loosing volleys of bolts from their crossbows; underwater, their crossbows have a range increment of 20 feet. If they have managed to set up an ambush or other trap, they continue to employ crossbows for as long as possible. Otherwise, they close to bring their longspears into play. Although primarily used for fishing, these spears make formidable weapons.

Locathahs lack teeth, claws, and other natural weapons, so they are not especially dangerous if unarmed. A weaponless locathah will generally turn and flee.

Skills: A locathah has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered.

It can use the run action while swimming, provided it swims in a straight line.

LYCANTHROPE

Lycanthropes are humanoids or giants who can transform themselves into animals. In its natural form, a lycanthrope looks like any other members of its kind, though natural lycanthropes and those who have been afflicted for a long time tend to have or acquire features reminiscent of their animal forms. In animal form, a lycanthrope resembles a powerful version of the normal animal, but on close inspection, its eyes (which often glow red in the dark) show a faint spark of unnatural intelligence.

Lycanthropy can be spread like a disease. Sometimes a lycanthrope begins life as a normal humanoid or giant who subsequently contracts lycanthropy after being wounded by a lycanthrope. Such a creature is called an afflicted lycanthrope. Other lycanthropes are born as lycanthropes, and are known as natural lycanthropes.

Combat

A lycanthrope in its humanoid (or giant) form uses whatever tactics and weapons are favored by others of its kind, though it tends to be slightly more aggressive. A lycanthrope possesses the senses of its animal form, including scent and low-light vision, and it has a deep empathy for (and ability to communicate with) animals of its animal form. An afflicted lycanthrope damaged in combat may be overwhelmed by rage, causing it to change to its animal form involuntarily.

A lycanthrope in animal form fights like the animal it resembles, although its bite carries the disease of lycanthropy. It is preternaturally cunning and strong, and possesses damage reduction that is overcome only by silvered weapons.

Finally, a natural lycanthrope (or an afflicted lycanthrope that has become aware of its affliction) can assume a hybrid form that is a mix of its humanoid and animal forms. A hybrid has hands and can use weapons, but it can also attack with its teeth and claws. A hybrid can spread lycanthropy with its bite, and it has the same damage reduction that its animal form possesses.

Werebears in humanoid form tend to be stout, well-muscled, and hairy. Their brown hair is thick, and males usually wear beards. They may have reddish, blond, ivory, or black hair, matching the color of the ursine form. They dress in simple cloth and leather garments that are easy to remove, repair, or replace.

Combat

Werebears fight just as brown bears do in animal form. In humanoid or hybrid form, they favor large, heavy weapons such as greataxes or greatswords. The werebear's greataxe is a Medium weapon, so it can wield the axe in one hand in hybrid form.

Alternate Form (Su): A werebear can assume the form of a brown bear or a bear-humanoid hybrid.

Bear Empathy (Ex): Communicate with bears and dire bears, and +4 racial bonus on Charisma-based checks against bears and dire bears.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a werebear's bite attack in animal or hybrid form must succeed

on a DC 15 Fortitude save or contract lycanthropy.

Improved Grab (Ex): To use this ability, a werebear must be in bear form and must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Skills: Werebears have a +4 racial bonus on Swim checks in any bear form.

The werebear presented here is a 1st-level human warrior and natural lycanthrope, using the following base ability scores: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

A wereboar in humanoid form tends to be a stocky, muscular individual of average height. It dresses in simple garments that are easy to remove, repair, or replace.

Combat

In any form, wereboars are as ferocious as normal boars. When in hybrid form, they fight with a weapon and their dangerous gore attack.

Alternate Form (Su): A wereboar can assume the form of a boar or a boar-humanoid hybrid.

Boar Empathy (Ex): Communicate with boars and dire boars, and +4 racial bonus on Charisma-based checks against boars and dire boars.

Curse of Lycanthropy (Su): Any humanoid or giant hit by the wereboar's gore attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy.

Ferocity (Ex): A wereboar is such a tenacious combatant that it continues to fight without penalty even while disabled or dying.

A wererat in humanoid form tends to be a thin, wiry individual of shorter than average height. The eyes constantly dart around, and the nose and mouth may twitch if he or she is excited. Males often have thin, ragged mustaches.

Combat

In animal form, wererats avoid combat, preferring to use their dire rat shape for skulking and spying. In hybrid form, a

wererat fights with a rapier and light crossbow.

Alternate Form (Su): A wererat can assume a bipedal hybrid form or the form of a dire rat.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a wererat's bite attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy.

Disease (Ex): Filth fever; bite, Fortitude DC 12, incubation period 1d3 days, damage 1d3 Dex and 1d3 Con. The save DC is Constitution-based.

Rat Empathy (Ex): Communicate with rats and dire rats, and +4 racial bonus on Charisma-based checks against rats and dire rats.

Skills: A wererat in rat or hybrid form uses its Dexterity modifier for Climb or Swim checks. It has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

Wererats have a +8 racial bonus on Swim checks from their dire rat form.

Feats: Wererats gain Weapon Finesse as a bonus feat.

The wererat presented here is based on a 1st-level human warrior who is a natural lycanthrope, using the following base ability scores: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Weretigers in humanoid form tend to be sleekly muscular, taller than average, and very agile.

Combat

Weretigers can assume a hybrid form as well as an animal form. In tiger form, they can pounce and grab just as normal tigers do. In hybrid form, they rely on their deadly claws.

Alternate Form (Su): A weretiger can assume a bipedal hybrid form or the form of a tiger.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a weretiger's bite attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy.

Improved Grab (Ex): To use this ability, a weretiger in tiger form must hit with a claw or bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Pounce (Ex): If a weretiger in tiger form charges an opponent, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +9 melee, damage 1d8+3.

Tiger Empathy (Ex): Communicate with tigers and dire tigers, and +4 racial bonus on Charisma-based checks against tigers and dire tigers.

Skills: In any form, weretigers have a +4 bonus on Balance, Hide, and Move Silently checks. *In areas of tall grass or heavy undergrowth, the Hide bonus improves to +8 in the tiger form.

The weretiger presented here is a 1st-level human warrior and natural lycanthrope, using the following base ability scores: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Werewolves in humanoid form have no distinguishing traits.

COMBAT

In wolf form, a werewolf can trip just as a normal wolf does. A werewolf in hybrid form usually dispenses with weapon attacks, though it can wield a weapon and use its bite as a secondary natural attack.

Alternate Form (Su): A werewolf can assume a bipedal hybrid form or the form of a wolf.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a werewolf's bite attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy.

Trip (Ex): A werewolf in animal form that hits with a bite attack can attempt to trip the opponent (+2 check modifier) as a free action without making a touch attack or provoking an attack of opportunity.

If the attempt fails, the opponent cannot react to trip the werewolf.

Wolf Empathy (Ex): Communicate with wolves and dire wolves, and +4 racial bonus on Charisma-based checks against wolves and dire wolves.

Skills: *A werewolf in hybrid or wolf form gains a +4 racial bonus on Survival checks when tracking by scent.

The werewolf presented here is based on a 1st-level human warrior and natural lycanthrope, using the following base ability scores: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Dire wereboars in giant form look much like normal hill giants, though slightly stockier, and with coarser, stiffer hair and stiff. The dire wereboar described here is based on a hill giant and natural lycanthrope with normal ability scores for a hill giant.

COMBAT

Dire wereboars anger quickly. They usually begin a battle in giant form, then switch to hybrid form to take advantage of their immense strength in that shape. They like to use their Improved Bull Rush and Improved Sunder feats to shove opponents around and smash their weapons and shields.

Alternate Form (Su): A dire wereboar can assume a bipedal hybrid form or the form of a dire boar.

Boar Empathy (Ex): Communicate with boars and dire boars, and +4 racial bonus on Charisma-based checks against boars and dire boars.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a dire wereboar's bite attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy.

Ferocity (Ex): A dire wereboar is such a tenacious combatant that it continues to fight without penalty even while disabled or dying.

CREATING A LYCANTHROPE

“Lycanthrope” is a template that can be added to any humanoid or giant (referred to hereafter as the base creature). The lycanthrope template can be inherited (for natural lycanthropes) or acquired (for afflicted lycanthropes). Becoming a lycanthrope is very much like multiclassing as an animal and gaining the appropriate Hit Dice.

Size and Type: The base creature’s type does not change, but the creature gains the shapeshifter subtype. The lycanthrope takes on the characteristics of some type of carnivorous or omnivorous creature of the animal type (referred to hereafter as the base animal).

This animal can be any predator, scavenger, or omnivore whose size is within one size category of the base creature’s size (Small, Medium, or Large for a Medium base creature). Lycanthropes can also adopt a hybrid shape that combines features of the base creature and the base animal. A lycanthrope’s hybrid form is the same size as the base animal or the base creature, whichever is larger.

A lycanthrope uses either the base creature’s or the base animal’s statistics and special abilities in addition to those described here.

Hit Dice and Hit Points: Same as the base creature plus those of the base animal. To calculate total hit points, apply Constitution modifiers according to the score the lycanthrope has in each form.

Speed: Same as the base creature or base animal, depending on which form the lycanthrope is using. Hybrids use the base creature’s speed.

Armor Class: The base creature’s natural armor bonus increases by +2 in all forms. In hybrid form, the lycanthrope’s natural armor bonus is equal to the natural armor bonus of the base animal or the base creature, whichever is better.

Base Attack/Grapple: Add the base attack bonus for the base animal to the base attack bonus for the base creature. The lycanthrope’s grapple bonus uses its attack bonus and modifiers for Strength and size depending on the lycanthrope’s form.

Attacks: Same as the base creature or base animal, depending on which form the lycanthrope is using. A lycanthrope in hybrid form gains two claw attacks and a bite attack as natural weapons.

These weapons deal damage based on the hybrid form’s size. A hybrid may attack with a weapon and a bite, or may attack with its natural weapons. The bite attack of a hybrid is a secondary attack.

Hybrid	Claw	Bite
Size		
Small	1d3	1d4
Medium	1d4	1d6
Large	1d6	1d8
Huge	2d4	2d6

Damage: Same as the base creature or base animal, depending on which form the lycanthrope is in.

Special Attacks: A lycanthrope retains the special attacks of the base creature or base animal, depending on which form it is using, and also gains the special attacks described below.

A lycanthrope’s hybrid form does not gain any special attacks of the base animal. A lycanthrope spellcaster cannot cast spells with verbal, somatic, or material components while in animal form, or spells with verbal components while in hybrid form.

Curse of Lycanthropy (Su): Any humanoid or giant hit by a natural lycanthrope’s bite attack in animal or hybrid form must succeed on a DC 15 Fortitude save or contract lycanthropy. If the victim’s size is not within one size category of the lycanthrope the victim cannot contract lycanthropy from that lycanthrope. Afflicted lycanthropes cannot pass on the curse of lycanthropy.

Special Qualities: A lycanthrope retains all the special qualities of the base creature and the base animal, and also gains those described below.

Alternate Form (Su): A lycanthrope can shift into animal form as though using the *polymorph* spell on itself, though its gear is not affected, it does not regain hit points for changing form, and only the specific animal form indicated for the lycanthrope can be assumed. It does not assume the ability scores of the animal, but instead adds the animal’s physical ability score modifiers to its own ability scores. A lycanthrope also can assume a bipedal hybrid form with prehensile hands and animalistic features.

Changing to or from animal or hybrid form is a standard action.

A slain lycanthrope reverts to its humanoid form, although it remains dead. Separated body parts retain their animal form, however.

Afflicted lycanthropes find this ability difficult to control (see Lycanthropy as an Affliction, below), but natural lycanthropes have full control over this power.

Damage Reduction (Ex): An afflicted lycanthrope in animal or hybrid form has damage reduction 5/silver. A natural lycanthrope in animal or hybrid form has damage reduction 10/silver.

Lycanthropic Empathy (Ex): In any form, lycanthropes can communicate and empathize with normal or dire animals of their animal form. This gives them a +4 racial bonus on checks when influencing the animal’s attitude and allows the communication of simple concepts and (if the animal is friendly) commands, such as “friend,” “foe,” “flee,” and “attack.”

Low-Light Vision (Ex): A lycanthrope has low-light vision in any form.

Scent (Ex): A lycanthrope has the scent ability in any form.

Base Save Bonuses: Add the base save bonuses of the base animal to the base save bonuses of the base creature.

Abilities: All lycanthropes gain +2 to Wisdom. In addition, when in animal form, a lycanthrope's physical ability scores improve according to its kind, as set out in the table below. These adjustments are equal to the animal's normal ability scores –10 or –11. A lycanthrope in hybrid form modifies its physical ability scores by the same amount.

In addition, a lycanthrope may also gain an additional ability score increase by virtue of its extra Hit Dice.

Skills: A lycanthrope gains skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die of its animal form, as if it had multiclassed into the animal type. (Animal is never its first Hit Die, though, and it does not gain quadruple skill points for any animal Hit Die.) Any skill given in the animal's description is a class skill for the lycanthrope's animal levels. In any form, a lycanthrope also has any racial skill bonuses of the base creature and of the base animal, although conditional skill bonuses only apply in the associated form.

Feats: Add the base animal's feats to the base creature's. If this results in a lycanthrope having the same feat twice, the lycanthrope gains no additional benefit unless the feat normally can be taken more once, in which case the duplicated feat works as noted in the feat description. This process may give the lycanthrope more feats than a character of its total Hit Dice would normally be entitled to; if this occurs, any "extra" feats are denoted as bonus feats.

It's possible that a lycanthrope cannot meet the prerequisites for all its feats when in humanoid form. If this occurs, the lycanthrope still has the feats, but cannot use them when in humanoid form. A lycanthrope receives Iron Will as a bonus feat.

Environment: Same as either the base creature or base animal.

Organization: Solitary or pair, sometimes family (3–4), pack (6–10), or troupe (family plus related animals)

Challenge Rating: By class level or base creature, modified according to the HD of the base animal: 1 HD or 2 HD, +2; 3 HD to 5 HD, +3; 6 HD to 10 HD, +4; 11 HD to 20 HD, +5; 21 or more HD, +6.

Treasure: Standard.

Alignment: Any. Noble creatures such as bears, eagles, and lions tend to produce good-aligned lycanthropes. Sinister creatures such as rats, snakes, and wolves tend to produce evil-aligned lycanthropes. This is a reflection of how these animals are perceived, not any innate quality of the animal itself, so the alignment of the animal form can be arbitrarily assigned.

Advancement: By character class.

Level Adjustment: Same as the base creature +2 (afflicted) or +3 (natural). In addition, a lycanthrope's character level is increased by the number of racial Hit Dice the base animal has.

Common Lycanthropes

Name	Animal Form	Animal or Hybrid Form Ability Modifiers	Preferred Alignment
Werebear	Brown bear	Str +16, Dex +2, Con +8	Lawful good
Wereboar	Boar	Str +4, Con +6	Neutral
Wererat	Dire rat	Dex +6, Con +2	Chaotic evil
Weretiger	Tiger	Str +12, Dex +4, Con +6	Neutral
Werewolf	Wolf	Str +2, Dex +4, Con +4	Chaotic evil
Dire wereboar	Dire boar	Str +16, Con +6	Neutral

LYCANTHROPY AS AN AFFLICION

When a character contracts lycanthropy through a lycanthrope's bite (see above), no symptoms appear until the first night of the next full moon. On that night, the afflicted character involuntarily assumes animal form and forgets his or her own identity, temporarily becoming an NPC. The character remains in animal form, assuming the appropriate alignment, until the next dawn.

The character's actions during this first episode are dictated by the alignment of its animal form. The character remembers nothing about the entire episode (or subsequent episodes) unless he succeeds on a DC 15 Wisdom check, in which case he becomes aware of his lycanthropic condition.

Thereafter, the character is subject to involuntary transformation under the full moon and whenever damaged in combat. He or she feels an overwhelming rage building up and must succeed on a Control Shape check (see below) to resist changing into animal form. Any player character not yet aware of his or her lycanthropic condition temporarily becomes an NPC during an involuntary change, and acts according to the alignment of his or her animal form.

A character with awareness of his condition retains his identity and does not lose control of his actions if he changes.

However, each time he changes to his animal form, he must make a Will save (DC 15 + number of times he has been in animal form) or permanently assume the alignment of his animal form in all shapes.

Once a character becomes aware of his affliction, he can now voluntarily attempt to change to animal or hybrid form, using the appropriate Control Shape check DC. An attempt is a standard action and can be made each round. Any voluntary change to animal or hybrid form immediately and permanently changes the character's alignment to that of the appropriate lycanthrope.

Changing Form

Changing form is a standard action. If the change is involuntary, the character performs the change on his next turn following the triggering event. Changing to animal or hybrid form ruins the character's armor and clothing (including any items worn)

if the new form is larger than the character's natural form; carried items are simply dropped. Characters can hastily doff clothing while changing, but not armor. Magic armor survives the change if it succeeds on a DC 15 Fortitude save. An afflicted character who is not aware of his condition remains in animal form until the next dawn. An afflicted character who is aware of his or her condition (see above) can try to resume humanoid form following a change (voluntary or involuntary) with a Control Shape check, but if he fails his check, he remains in animal (or hybrid) form until the following dawn.

Curing Lycanthropy

An afflicted character who eats a sprig of belladonna (also called wolfsbane) within 1 hour of a lycanthrope's attack can attempt a DC 20 Fortitude save to shake off the affliction. If a healer administers the herb, use the character's save bonus or the healer's Heal modifier, whichever is higher. The character gets only one chance, no matter how much belladonna is consumed. The belladonna must be reasonably fresh (picked within the last week).

However, fresh or not, belladonna is toxic. The character must succeed on a DC 13 Fortitude save or take 1d6 points of Strength damage. One minute later, the character must succeed on a second DC 13 save or take an additional 2d6 points of Strength damage.

A *remove disease* or *heal* spell cast by a cleric of 12th level or higher also cures the affliction, provided the character receives the spell within three days of the lycanthrope's attack.

The only other way to remove the affliction is to cast *remove curse* or *break enchantment* on the character during one of the three days of the full moon. After receiving the spell, the character must succeed on a DC 20 Will save to break the curse (the caster knows if the spell works). If the save fails, the process must be repeated.

Characters undergoing this cure are often kept bound or confined in cages until the cure takes effect.

Only afflicted lycanthropes can be cured of lycanthropy.

LYCANTHROPIES AS CHARACTERS

Becoming a lycanthrope does not change a character's favored class but usually changes alignment (see above). This alignment change may cause characters of certain classes to lose some of their class features.

Lycanthrope characters possess the following racial traits.

— +2 Wisdom. Physical abilities are increased by the animal form's ability modifiers when a lycanthrope changes to its hybrid or animal forms.

— Size same as the base creature or the base animal form.

— Low-light vision in any form.

— Scent in any form.

— Racial Hit Dice: A lycanthrope adds the Hit Dice of its animal form to its base Hit Dice for race, level, and class. These additional Hit Dice modify the lycanthrope's base attack bonus and base saving throw bonuses accordingly.

— Racial Skills: A lycanthrope adds skill points for its animal Hit Dice much as if it had multiclassed into the animal type. It gains skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die of the animal form. Any skills that appear in the animal's description are treated as class skills for the lycanthrope's animal levels. The lycanthrope's maximum skill ranks are equal to its animal form Hit Dice + its racial Hit Dice (if any) + its class levels + 3. Any racial skill adjustments of the lycanthrope's base race and its animal form (but not conditional adjustments) are added to its skill modifiers in any form.

— Racial Feats: Add the animal's Hit Dice to the base character's own Hit Dice to determine how many feats the character has. All lycanthropes gain Iron Will as a bonus feat.

— +2 natural armor bonus in any form.

— Special Qualities (see above): Alternate form, lycanthropic empathy, curse of lycanthropy (in animal or hybrid form only).

— Afflicted lycanthrope: damage reduction 5/silver (in animal or hybrid form only).

— Natural lycanthrope: damage reduction 10/silver (in animal or hybrid form only).

— Automatic Languages: As base creature.

— Favored Class: Same as the base creature.

— Level adjustment: Same as the base creature +2 (afflicted) or +3 (natural).

CONTROL SHAPE (WIS)

Any character who has contracted lycanthropy and is aware of his condition can learn Control Shape as a class skill. (An afflicted lycanthrope not yet aware of his condition can attempt Control Shape checks untrained.) This skill determines whether an afflicted lycanthrope can control his shape. A natural lycanthrope does not need this skill, since it has full control over its shape.

Check (Involuntary Change): An afflicted character must make a check at moonrise each night of the full moon to resist involuntarily assuming animal form. An injured character must also check for an involuntary change after accumulating enough damage to reduce his hit points by one-quarter and again after each additional one-quarter lost.

Involuntary Change Control Shape DC

Resist involuntary change

25

On a failed check, the character must remain in animal form until the next dawn, when he automatically returns to his base

form. A character aware of his condition may make one attempt to return to humanoid form (see below), but if he fails, he remains in animal form until the next dawn.

Retry (Involuntary Change): Check to resist an involuntary change once each time a triggering event occurs.

Check (Voluntary Change): In addition, an afflicted lycanthrope aware of his condition may attempt to use this skill voluntarily in order to change to animal form, assume hybrid form, or return to humanoid form, regardless of the state of the moon or whether he has been injured.

Involuntary Change	<i>Control Shape</i>
	<i>DC</i>
Return to humanoid form (full moon*)	25
Return to humanoid form (not full moon)	20
Assume hybrid form	15
Voluntary change to animal form (full moon)	15
Voluntary change to animal form (not full moon)	20

* For game purposes, the full moon lasts three days every month.

Retry (Voluntary Change): A character can retry voluntary changes to animal form or hybrid form as often as he likes. Each attempt is a standard action. However, on a failed check to return to humanoid form, the character must remain in animal or hybrid form until the next dawn, when he automatically returns to humanoid form.

Special: An afflicted lycanthrope cannot attempt a voluntary change until it becomes aware of its condition (see Lycanthropy as an Affliction).

MONSTERS (M-N)

MAGMIN

Small Elemental (Fire, Extraplanar)

Hit Dice:	2d8+2 (11 hp)
Initiative:	+0
Speed:	30 ft. (6 squares)
Armor Class:	17 (+1 size, +6 natural), touch 11, flat-footed 17
Base Attack/Grapple:	+1/-1
Attack:	Burning touch +4 melee touch (1d8 fire plus combustion) or slam +4 melee (1d3+3 plus combustion)
Full Attack:	Burning touch +4 melee touch (1d8 fire plus combustion) or slam +4 melee (1d3+3 plus combustion)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Combustion, fiery aura
Special Qualities:	Damage reduction 5/magic, darkvision 60 ft., elemental traits, immunity to fire, melt weapons, vulnerability to cold
Saves:	Fort +3, Ref +3, Will +0
Abilities:	Str 15, Dex 11, Con 13, Int 8, Wis 10, Cha 10
Skills:	Climb +4, Spot +3
Feats:	Great Fortitude
Environment:	Elemental Plane of Fire
Organization:	Solitary, gang (2–4), or squad (6–10)
Challenge Rating:	3
Treasure:	Standard coins; standard goods (nonflammables only); standard items (nonflammables only)
Alignment:	Always chaotic neutral
Advancement:	3–4 HD (Small); 5–6 HD (Medium)
Level Adjustment:	—

Magmins are small, human-shaped beings from the Elemental Plane of Fire that radiate intense heat and are wreathed in an aura of searing flames. A typical magmin is 4 feet tall and weighs 400 pounds.

Magmins speak Ignan.

COMBAT

Although small, magmins are dangerous opponents. Their touch is effective against those who lack protection or immunity from heat and flames, but if faced with opponents who have immunity to fire, magmins rely on their slam attack. In any case, magmins are not valiant fighters. They usually flee if injured, although often only far enough to set up a fiery ambush for their enemies.

A magmin's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Combustion (Ex): Anyone a magmin touches must succeed on a DC 12 Reflex save or take an extra 1d8 points of fire damage as clothes ignite or armor becomes searing hot. The damage continues for another 1d4+2 rounds after the magmin's last successful attack. Magmins can also ignite flammable materials with a touch. The save DC is Constitution-based.

Fiery Aura (Ex): Anyone within 20 feet of a magmin must succeed on a DC 12 Fortitude save or take 1d6 points of heat damage per round from the intense heat. The save DC is Constitution-based.

Melt Weapons (Ex): Any metal weapon that strikes a magmin must succeed on a DC 12 Fortitude save or melt away into slag. The save DC is Constitution-based.

MANTICORE

Large Magical Beast

Hit Dice:	6d10+24 (57 hp)
Initiative:	+2

Speed:	30 ft. (6 squares), fly 50 ft. (clumsy)
Armor Class:	17 (-1 size, +2 Dex, +6 natural), touch 11, flat-footed 15
Base Attack/Grapple:	+6/+15
Attack:	Claw +10 melee (2d4+5) or 6 spikes +8 ranged (1d8+2/19–20)
Full Attack:	2 claws +10 melee (2d4+5) and bite +8 melee (1d8+2); or 6 spikes +8 ranged (1d8+2/19–20)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Spikes
Special Qualities:	Darkvision 60 ft., low-light vision, scent
Saves:	Fort +9, Ref +7, Will +3
Abilities:	Str 20, Dex 15, Con 19, Int 7, Wis 12, Cha 9
Skills:	Listen +5, Spot +9, Survival +1
Feats:	Flyby Attack, Multiattack, Track ^B , Weapon Focus (spikes)
Environment:	Warm marshes
Organization:	Solitary, pair, or pride (3–6)
Challenge Rating:	5
Treasure:	Standard
Alignment:	Usually lawful evil
Advancement:	7–16 HD (Large); 17–18 HD (Huge)
Level Adjustment:	+3 (cohort)

A typical manticore is about 10 feet long and weighs about 1,000 pounds. Manticores speak Common.

COMBAT

A manticore begins most attacks with a volley of spikes, then closes. In the outdoors, it often uses its powerful wings to stay aloft during battle.

Spikes (Ex): With a snap of its tail, a manticore can loose a volley of six spikes as a standard action (make an attack roll for each spike). This attack has a range of 180 feet with no range increment. All targets must be within 30 feet of each other. The creature can launch only twenty-four spikes in any 24-hour period.

Skills: *Manticores have a +4 racial bonus on Spot checks.

MEDUSA

Medium Monstrous Humanoid

Hit Dice:	6d8+6 (33 hp)
Initiative:	+2
Speed:	30 ft. (6 squares)
Armor Class:	15 (+2 Dex, +3 natural), touch 12, flat-footed 13
Base Attack/Grapple:	+6/+6
Attack:	Shortbow +8 ranged (1d6/x3) or dagger +8 melee (1d4/19–20) or snakes +8 melee (1d4 plus poison)
Full Attack:	Shortbow +8/+3 ranged (1d6/x3); or dagger +8/+3 melee (1d4/19–20) and snakes +3 melee (1d4 plus poison)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Petrifying gaze, poison
Special Qualities:	Darkvision 60 ft.
Saves:	Fort +3, Ref +7, Will +6
Abilities:	Str 10, Dex 15, Con 12, Int 12, Wis 13, Cha 15
Skills:	Bluff +9, Diplomacy +4, Disguise +9 (+11 acting), Intimidate +4, Move Silently +8, Spot +8
Feats:	Point Blank Shot, Precise Shot, Weapon Finesse
Environment:	Temperate marshes
Organization:	Solitary or covey (2–4)
Challenge Rating:	7
Treasure:	Double standard
Alignment:	Usually lawful evil
Advancement:	By character class
Level Adjustment:	—

A medusa is indistinguishable from a normal human at distances greater than 30 feet (or closer, if its face is concealed). The creature often wears garments that enhance its body while hiding its face behind a hood or veil.

A typical medusa is 5 to 6 feet tall and about the same weight as a human.

Medusas speak Common.

COMBAT

A medusa tries to disguise its true nature until the intended victim is within range of its petrifying gaze, using subterfuge and bluffing games to convince the target that there is no danger. It uses normal weapons to attack those who avert their eyes or survive its gaze, while its poisonous snakes strike at adjacent opponents.

Petrifying Gaze (Su): Turn to stone permanently, 30 feet, Fortitude DC 15 negates. The save DC is Charisma-based.

Poison (Ex): Injury, Fortitude DC 14, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

MEPHIT

Mephits are minor creatures from the elemental planes.

All mephits appear as small, winged creatures with more or less humanoid features. While they are often described as impish, their elemental origins are apparent at first glance.

COMBAT

All mephits fight by biting and clawing or by using a breath weapon, the nature and effects of which vary from creature to creature.

A mephit's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Breath Weapon (Su): A mephit can use its breath weapon once every 1d4 rounds as a standard action. See the individual descriptions for details.

Spell-Like Abilities: All mephits have one or more spell-like abilities (save DC 12 + spell level). See the individual descriptions for details.

Summon Mephit (Sp): Once per day, a mephit can attempt to summon another mephit of the same variety, much as though casting a *summon monster* spell, but with only a 25% chance of success. Roll d%: On a failure, no creature answers the summons that day. A mephit that has just been summoned cannot use its own summon ability for 1 hour. This ability is the equivalent of a 2nd-level spell.

Fast Healing (Ex): Mephits heal 2 points of damage each round, provided they are still alive and certain other conditions are met. See the individual descriptions for details.

AIR MEPHIT

Small Outsider (Air, Extraplanar)

Hit Dice:	3d8 (13 hp)
Initiative:	+7
Speed:	30 ft. (6 squares), fly 60 ft. (perfect)
Armor Class:	17 (+1 size, +3 Dex, +3 natural), touch 14, flat-footed 14
Base Attack/Grapple:	+3/-1
Attack:	Claw +4 melee (1d3)
Full Attack:	2 claws +4 melee (1d3)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Breath weapon, spell-like abilities, <i>summon mephit</i>
Special Qualities:	Damage reduction 5/magic, darkvision 60 ft., fast healing 2
Saves:	Fort +3, Ref +6, Will +3
Abilities:	Str 10, Dex 17, Con 10, Int 6, Wis 11, Cha 15
Skills:	Bluff +8, Escape Artist +9, Hide +13, Diplomacy +4, Disguise +2 (+4 acting), Intimidate +4, Listen +6, Move Silently +9, Spot +6, Use Rope +3 (+5 with bindings)
Feats:	Dodge, Improved Initiative
Environment:	Elemental Plane of Air
Organization:	Solitary (1), gang (2–4 mephits of mixed types), or mob (5–12 mephits of mixed types)
Challenge Rating:	3
Treasure:	Standard
Alignment:	Usually neutral
Advancement:	4–6 HD (Small); 7–9 HD (Medium)

Level Adjustment:	+3 (cohort)
Air mephits come from the Elemental Plane of Air. An air mephit is about 4 feet tall and weighs about 1 pound.	
Air mephits speak Common and Auran.	
Combat	
Breath Weapon (Su):	15-foot cone of dust and grit, damage 1d8, Reflex DC 12 half. The save DC is Constitution-based and includes a +1 racial bonus.
Spell-Like Abilities:	Once per hour an air mephit can surround itself with vapor, duplicating the effect of a <i>blur</i> spell (caster level 3rd). Once per day it can use <i>gust of wind</i> (DC 14, caster level 6th). The save DC is Charisma-based.
Fast Healing (Ex):	An air mephit heals only if exposed to moving air, be it a breeze, a draft, a spell effect, or even the mephit fanning itself.

DUST MEPHIT

Small Outsider (Air, Extraplanar)

Hit Dice:	3d8 (13 hp)
Initiative:	+7
Speed:	30 ft. (6 squares), fly 50 ft. (perfect)
Armor Class:	17 (+1 size, +3 Dex, +3 natural), touch 14, flat-footed 14
Base Attack/Grapple:	+3/-1
Attack:	Claw +4 melee (1d3)
Full Attack:	2 claws +4 melee (1d3)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Breath weapon, spell-like abilities, <i>summon mephit</i>
Special Qualities:	Damage reduction 5/magic, darkvision 60 ft., fast healing 2
Saves:	Fort +3, Ref +6, Will +3
Abilities:	Str 10, Dex 17, Con 10, Int 6, Wis 11, Cha 15
Skills:	Bluff +8, Escape Artist +9, Hide +13, Diplomacy +4, Disguise +2 (+4 acting), Intimidate +4, Listen +6, Move Silently +9, Spot +6, Use Rope +3 (+5 with bindings)
Feats:	Dodge, Improved Initiative
Environment:	Elemental Plane of Air
Organization:	Solitary (1), gang (2–4 mephits of mixed types), or mob (5–12 mephits of mixed types)
Challenge Rating:	3
Treasure:	Standard
Alignment:	Usually neutral
Advancement:	4–6 HD (Small); 7–9 HD (Medium)
Level Adjustment:	+3 (cohort)

Dust mephits come from the Elemental Plane of Air.

A dust mephit is about 4 feet tall and weighs about 2 pounds.

Dust mephits speak Common and Auran.

Combat

Breath Weapon (Su): 10-foot cone of irritating particles, damage 1d4, Reflex DC 12 half. Living creatures that fail their saves are tormented by itching skin and burning eyes. This effect imposes a –4 penalty to AC and a –2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour, a dust mephit can surround itself with a plume of dust, duplicating the effect of a *blur* spell (caster level 3rd). Once per day it can create a mass of roiling dust that duplicates the effect of *wind wall* (DC 15, caster level 6th). The save DC is Charisma-based.

Fast Healing (Ex): A dust mephit heals only if in an arid, dusty environment.

EARTH MEPHIT

Small Outsider (Earth, Extraplanar)

Hit Dice:	3d8+6 (19 hp)
Initiative:	-1
Speed:	30 ft. (6 squares), fly 40 ft. (average)
Armor Class:	16 (+1 size, -1 Dex, +6 natural), touch 10, flat-footed 16
Base Attack/Grapple:	+3/+2

Attack:	Claw +7 melee (1d3+3)
Full Attack:	2 claws +7 melee (1d3+3)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Breath weapon, spell-like abilities, <i>summon mephit</i>
Special Qualities:	Change size, damage reduction 5/magic, darkvision 60 ft., fast healing 2

Level Adjustment: +3 (cohort)

Earth mephits come from the Elemental Plane of Earth.

An earth mephit is about 4 feet tall and weighs about 80 pounds.

Earth mephits speak Common and Terran.

Combat

Breath Weapon (Su): 15-foot cone of rock shards and pebbles, damage 1d8, Reflex DC 13 half. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: 1/day—*soften earth and stone*. Caster level 6th.

Change Size (Sp): Once per hour, an earth mephit can magically change its size. This works just like an *enlarge person* spell, except that the power works only on the earth mephit. This is the equivalent of a 2nd-level spell.

Fast Healing (Ex): An earth mephit heals only if it is underground or buried up to its waist in earth.

FIRE MEPHIT

Small Outsider (Extraplanar, Fire)

Hit Dice:	3d8 (13 hp)
Initiative:	+5
Speed:	30 ft. (6 squares), fly 50 ft. (average)
Armor Class:	16 (+1 size, +1 Dex, +4 natural), touch 12, flat-footed 15

Ice mephits come from the Elemental Plane of Air.

Ice mephits have a cold, aloof demeanor. Each one is about 4 feet tall and weighs about 30 pounds.

Ice mephits speak Common and Auran.

Combat

Breath Weapon (Su): 10-foot cone of ice shards, damage 1d4 cold, Reflex DC 12 half. Living creatures that fail their saves are tormented by frostbitten skin and frozen eyes unless they have immunity to cold or are otherwise protected. This effect imposes a -4 penalty to AC and a -2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: 1/hour—*magic missile* (caster level 3rd); 1/day—*chill metal* (DC 14, caster level 6th). The save DC is Charisma-based.

Fast Healing (Ex): An ice mephit heals only if it is touching a piece of ice of at least Tiny size or if the ambient temperature is 32°F. or below.

MAGMA MEPHIT

Magma mephits come from the Elemental Plane of Fire. Magma mephits are slow-witted and brutish. Each one is about 4 feet tall and weighs about 60 pounds.

Magma mephits speak Common and Ignan.

Combat

Breath Weapon (Su): 10-foot cone of magma, damage 1d4 fire, Reflex DC 12 half. Living creatures that fail their saves are tormented by burned skin and seared eyes unless they have immunity to fire or are otherwise protected. This effect imposes a –4 penalty to AC and a –2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour, a magma mephit can use *shapechange* to take the form of a pool of lava 3 feet in diameter and 6 inches deep. The mephit's damage reduction improves to 20/magic when in this form. The mephit can't attack while in lava form but can use other spell-like abilities. It can move at a speed of 10 feet, but it can't run. In this form the mephit can pass through small holes or narrow openings, even mere cracks. The pool's touch ignites flammable materials such as paper, straw, or dry wood.

Once per day a magma mephit can use *pyrotechnics* (DC 14). It can use itself as the fire source without harm. Caster level 6th. The save DC is Charisma-based.

Fast Healing (Ex): A magma mephit heals only if it is touching magma, lava, or a flame at least as large as a torch.

Ooze mephits come from the Elemental Plane of Water. An ooze mephit is about 4 feet tall and weighs about 30 pounds. Ooze mephits speak Common and Aquan.

Combat

Breath Weapon (Su): 10-foot cone of caustic liquid, damage 1d4 acid, Reflex DC 13 half. Living creatures that fail their saves are tormented by itching skin and burning eyes unless they have immunity to acid or are otherwise protected. This effect imposes a –4 penalty to AC and a –2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour an ooze mephit can hurl an acidic blob that functions like *acid arrow* (caster level 3rd). Once per day it can create a mass of smelly fog that duplicates the effect of *stinking cloud* (DC 15, caster level 6th). The save DC is Charisma-based.

Fast Healing (Ex): An ooze mephit heals only if in a wet or muddy environment.

Skills: An ooze mephit has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Salt mephits come from the Elemental Plane of Earth.

Salt mephits are sarcastic creatures who loathe water and moisture of any kind. Each one is about 4 feet tall and weighs about 80 pounds.

Salt mephits speak Common and Terran.

Combat

Breath Weapon (Su): 10-foot cone of salt crystals, damage 1d4, Reflex DC 13 half. Living creatures that fail their saves are tormented by itching skin and burning eyes. This effect imposes a –4 penalty to AC and a –2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour a salt mephit can use *glitterdust* (DC 14, caster level 3rd).

Once per day it can draw the moisture from an area in a 20-foot radius centered on itself. Living creatures within range take 2d8 points of damage (Fortitude DC 14 half; caster level 6th). This effect is especially devastating to plant creatures and aquatic creatures, which take a -2 penalty on their saving throws. This ability is the equivalent of a 2nd-level spell. The save DCs are Charisma-based.

Fast Healing (Ex): A salt mephit heals only if in an arid environment.

Steam mephits come from the Elemental Plane of Fire.

Steam mephits are bossy creatures who consider themselves the lords of all their kind. Each one is about 4 feet tall and weighs about 2 pounds.

Steam mephits speak Common and Ignan.

Combat

Unlike other mephits, steam mephits rush into combat eagerly, driven by an oversized ego.

Breath Weapon (Su): 10-foot cone of steam, damage 1d4 fire, Reflex DC 12 half. Living creatures that fail their saves are tormented by burned skin and seared eyes unless they have immunity to fire or are otherwise protected. This effect imposes a -4 penalty to AC and a -2 penalty on attack rolls for 3 rounds. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour a steam mephit can surround itself with a plume of vapor, duplicating the effect of a *blur* spell (caster level 3rd). Once per day it can create a rainstorm of boiling water that affects a 20-foot-square area. Living creatures caught in the storm take 2d6 points of fire damage (Reflex DC 14 half; caster level 6th). This ability is the equivalent of a 2nd-level spell. The save DCs are Charisma-based.

Fast Healing (Ex): A steam mephit heals only if it is touching boiling water or is in a hot, humid area.

Water mephits come from the Elemental Plane of Water.

Water mephits are jaunty creatures with an unflagging sense of humor who quickly get on the nerves of everyone around them. Each one is about 4 feet tall and weighs about 30 pounds.

Water mephits speak Common and Aquan.

Combat

Breath Weapon (Su): 15-foot cone of caustic liquid, damage 1d8 acid, Reflex DC 13 half. The save DC is Constitution-based and includes a +1 racial bonus.

Spell-Like Abilities: Once per hour a water mephit can hurl an acidic blob that functions like *acid arrow* (caster level 3rd). Once per day it can create a mass of smelly fog that duplicates the effect of a *stinking cloud* spell (DC 15, caster level 6th). The save DC is Charisma-based.

Fast Healing (Ex): A water mephit heals only if it is exposed to rain or submerged up to its waist in water.

Skills: A water mephit has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered.

It can use the run action while swimming, provided it swims in a straight line.

Alignment: Usually neutral
Advancement: By character class
Level Adjustment: +1

A merfolk is about 8 feet long from the top of the head to the end of the tail, and weighs about 400 pounds.

Merfolk speak Common and Aquan.

Most merfolk encountered outside their home are warriors; the information in the statistics block is for one of 1st level.

COMBAT

Merfolk favor heavy crossbows of shell and coral that fire bolts fashioned from blowfish spines, with an underwater range increment of 30 feet. Merfolk often barrage their enemies before closing, when they resort to tridents.

Amphibious (Ex): Merfolk can breathe both air and water, although they rarely travel more than a few feet from the water's edge.

Skills: A merfolk has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

The merfolk warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

MERFOLK CHARACTERS

A merfolk's favored class is bard.

MIMIC

Alignment:	Usually neutral
Advancement:	8–10 HD (Large); 11–21 HD (Huge)

Level Adjustment: —

A mimic can have almost any dimensions, but usually is not more than 10 feet long. A typical mimic has a volume of 150 cubic feet (5 feet by 5 feet by 6 feet) and weighs about 4,500 pounds.

Mimics speak Common.

COMBAT

A mimic often surprises an unsuspecting adventurer, lashing out with a heavy pseudopod. The creature does not necessarily fight to the death if it can succeed in extorting treasure or food from a party.

Adhesive (Ex): A mimic exudes a thick slime that acts as a powerful adhesive, holding fast any creatures or items that touch it. An adhesive-covered mimic automatically grapples any creature it hits with its slam attack. Opponents so grappled cannot get free while the mimic is alive without removing the adhesive first.

A weapon that strikes an adhesive-coated mimic is stuck fast unless the wielder succeeds on a DC 16 Reflex save. A successful DC 16 Strength check is needed to pry it off.

Strong alcohol dissolves the adhesive, but the mimic still can grapple normally. A mimic can dissolve its adhesive at will, and the substance breaks down 5 rounds after the creature dies.

Crush (Ex): A mimic deals 1d8+4 points of damage with a successful grapple check.

Mimic Shape (Ex): A mimic can assume the general shape of any object that fills roughly 150 cubic feet (5 feet by 5 feet by 6 feet), such as a massive chest, a stout bed, or a wide door frame. The creature cannot substantially alter its size, though. A mimic's body is hard and has a rough texture, no matter what appearance it might present. Anyone who examines the mimic can detect the ruse with a successful Spot check opposed by the mimic's Disguise check. Of course, by this time it is generally far too late.

Skills: A mimic has a +8 racial bonus on Disguise checks.

MINOTAUR

Large Monstrous Humanoid

Hit Dice:	6d8+12 (39 hp)

Feats:	Great Fortitude, Power Attack, Track
Environment:	Underground
Organization:	Solitary, pair, or gang (3–4)
Challenge Rating:	4
Treasure:	Standard
Alignment:	Usually chaotic Evil
Advancement:	By character class
Level Adjustment:	+2

A minotaur stands more than 7 feet tall and weighs about 700 pounds.

Minotaurs speak Giant.

COMBAT

Minotaurs prefer melee combat, where their great strength serves them well.

Powerful Charge (Ex): A minotaur typically begins a battle by charging at an opponent, lowering its head to bring its mighty horns into play. In addition to the normal benefits and hazards of a charge, this allows the beast to make a single gore attack with a +9 attack bonus that deals 4d6+6 points of damage.

Natural Cunning (Ex): Although minotaurs are not especially intelligent, they possess innate cunning and logical ability. This gives them immunity to *maze* spells, prevents them from ever becoming lost, and enables them to track enemies. Further, they are never caught flat-footed.

Skills: Minotaurs have a +4 racial bonus on Search, Spot, and Listen checks.

MINOTAURS AS CHARACTERS

Minotaur characters possess the following racial traits.

— +8 Strength, +4 Constitution, −4 Intelligence (minimum 3), −2 Charisma.

— Large size. −1 penalty to Armor Class, −1 penalty on attack rolls, −4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

- A minotaur's base land speed is 30 feet.
- Darkvision out to 60 feet.
- Racial Hit Dice: A minotaur begins with six levels of monstrous humanoid, which provide 6d8 Hit Dice, a base attack bonus of +6, and base saving throw bonuses of Fort +2, Ref +5, and Will +5.
- Racial Skills: A minotaur's monstrous humanoid levels give it skill points equal to $9 \times e$ (2 + Int modifier, minimum 1). Its class skills are Intimidate, Jump, Listen, Search, and Spot. Minotaurs have a +4 racial bonus on Search, Spot, and Listen checks.
- Racial Feats: A minotaur's monstrous humanoid levels give it three feats.
- Weapon Proficiency: A minotaur is proficient with the greataxe and all simple weapons.
- +5 natural armor bonus.
- Natural Weapons: Gore (1d8).
- Special Attacks (see above): Powerful charge.
- Special Qualities (see above): Natural cunning, scent.
- Automatic Languages: Common, Giant. Bonus Languages: Orc, Goblin, Terran.
- Favored Class: Barbarian.
- Level adjustment +2.

Level Adjustment:	—

Mohrgs are the animated corpses of mass murderers or similar villains who died without atoning for their crimes. Most mohrgs are 5 to 6 feet tall and weigh about 120 pounds.

COMBAT

Like zombies, mohrgs attack by slamming enemies with their fists. They often catch opponents flat-footed, for they move much faster than zombies.

Improved Grab (Ex): To use this ability, a mohrg must hit a creature of its size or smaller with its slam attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Paralyzing Touch (Su): A mohrg lashes out with its tongue in combat. An opponent the tongue touches must succeed on a DC 17 Fortitude save or become paralyzed for 1d4 minutes. The save DC is Charisma-based. **Create Spawn (Su):** Creatures killed by a mohrg rise after 1d4 days as zombies under the mohrg's control. They do not possess any of the abilities they had in life.

Mummies are preserved corpses animated through the auspices of dark desert gods best forgotten.

Most mummies are 5 to 6 feet tall and weigh about 120 pounds.

Mummies can speak Common, but seldom bother to do so.

COMBAT

Despair (Su): At the mere sight of a mummy, the viewer must succeed on a DC 16 Will save or be paralyzed with fear for 1d4 rounds. Whether or not the save is successful, that creature cannot be affected again by the same mummy's despair ability for 24 hours. The save DC is Charisma-based.

Mummy Rot (Su): Supernatural disease—slam, Fortitude DC 16, incubation period 1 minute; damage 1d6 Con and 1d6 Cha. The save DC is Charisma-based.

Unlike normal diseases, mummy rot continues until the victim reaches Constitution 0 (and dies) or is cured as described below.

Mummy rot is a powerful curse, not a natural disease. A character attempting to cast any conjuration (healing) spell on a creature afflicted with mummy rot must succeed on a DC 20 caster level check, or the spell has no effect on the afflicted character.

To eliminate mummy rot, the curse must first be broken with *break enchantment* or *remove curse* (requiring a DC 20 caster level check for either spell), after which a caster level check is no longer necessary to cast healing spells on the victim, and the mummy rot can be magically cured as any normal disease.

An afflicted creature who dies of mummy rot shrivels away into sand and dust that blow away into nothing at the first wind.

MUMMY LORD

Unusually powerful or evil individuals preserved as mummies sometimes rise as greater mummies after death. A mummy lord resembles its lesser fellows, but often wears or carries equipment it used in life.

Mummy lords are often potent spellcasters. They are found as guardians of the tombs of high lords, priests, and mages. Most are sworn to defend for eternity the resting place of those whom they served in life, but in some cases a mummy lord's unliving state is the result of a terrible curse or rite designed to punish treason, infidelity, or crimes of an even more abhorrent nature. A mummy lord of this sort is usually imprisoned in a tomb that is never meant to be opened again.

Despair (Su): The save DC against this mummy lord's despair is 17.

Mummy Rot (Su): The save DC against this mummy lord's mummy rot is 17.

Typical Cleric Spells Prepared (6/7/6/5/4; save DC 15 + spell level): 0—detect magic (2), guidance, read magic, resistance, virtue; 1st—bane, command, deathwatch, divine favor, doom, sanctuary, shield of faith; 2nd—bull's strength, death knell*, hold person, resist energy, silence, spiritual weapon; 3rd—animate dead*, deeper darkness, dispel magic, invisibility purge, searing light; 4th—air walk, dismissal, divine power, giant vermin, spell immunity*; 5th—insect plague, slay living*, spell resistance, symbol of pain.*

*Domain Spell. Domains: Death and Protection.

Possessions: +2 half-plate armor, cloak of resistance +2, ring of minor elemental resistance (fire), brooch of shielding. (Different mummy lords may have different possessions.)

NAGA

All nagas have long, snakelike bodies covered with glistening scales, and more or less human faces. They range in length from 10 to 20 feet and weigh from 200 to 500 pounds. The eyes of a naga are bright and intelligent, burning with an almost hypnotic inner light.

COMBAT

Nagas favor spells over other forms of combat. Because they are almost always found in the lairs they guard and know well, they can arrange most encounters to suit their wishes.

Dark nagas speak Common and Infernal.

Combat

Dark nagas prefer to fight from an elevated position where they get a good view of the battlefield while also staying out of reach.

Poison (Ex): Injury, Fortitude DC 16 or lapse into a nightmare-haunted sleep for 2d4 minutes. The save DC is Constitution-based.

Spells: Dark nagas cast spells as 7th-level sorcerers.

Typical Sorcerer Spells Known (6/7/7/5; save DC 13 + spell level): 0—daze, detect magic, light, mage hand, open/close, ray of frost, read magic; 1st—expeditious retreat, magic missile, ray of enfeeblement, shield, silent image; 2nd—cat's grace, invisibility, scorching ray; 3rd—displacement, lightning bolt.

Resistance to Charm: Dark nagas have a +2 racial bonus on saving throws against all *charm* effects (not included in the statistics block).

Detect Thoughts (Su): A dark naga can continuously use detect thoughts as the spell (caster level 9th; Will DC 15 negates). This ability is always active. The save DC is Charisma-based.

Guarded Thoughts (Ex): Dark nagas are immune to any form of mind reading.

Guardian nagas speak Celestial and Common.

Combat

Guardian nagas usually warn off intruders before attacking. If the warning is ignored, they may begin a spell assault or spit poison.

Poison (Ex): Injury or contact, Fortitude DC 19, initial and secondary damage 1d10 Con. The save DC is Constitution-based.

Spit (Ex): A guardian naga can spit its venom up to 30 feet as a standard action. This is a ranged touch attack with no range increment. Opponents hit by this attack must make successful saves (see above) to avoid the effect.

Spells: Guardian nagas cast spells as 9th-level sorcerers, and can also cast spells from the cleric list and from the Good and Law domains. The cleric spells and domain spells are considered arcane spells for a guardian naga, meaning that the creature does not need a divine focus to cast them.

Typical Spells Known (6/7/7/5; save DC 14 + spell level): 0—cure minor wounds, daze, detect magic, light, mage hand, open/close, ray of frost, read magic; 1st—cure light wounds, divine favor, expeditious retreat, mage armor, magic missile; 2nd—detect thoughts, lesser restoration, see invisibility, scorching ray; 3rd—cure serious wounds, dispel magic, lightning bolt; 4th—divine power, greater invisibility.

A night hag is about the same height and weight as a female human.

Night hags speak Abyssal, Celestial, Common, and Infernal.

COMBAT

Night hags attack good creatures on sight if the odds of success seem favorable.

These creatures rip through armor and flesh with their deadly teeth. They love to use *sleep* and then strangle those who are overcome by it.

A night hag's natural weapons, as well as any weapons it wields, are treated as evil-aligned for the purpose of overcoming damage reduction. Its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Disease (Ex): Demon fever—bite, Fortitude DC 18, incubation period 1 day, damage 1d6 Con. Each day after the first, on a failed save, an afflicted creature must immediately succeed on another DC 18 Fortitude save or take 1 point of Constitution drain. The save DC is Constitution based.

Spell-Like Abilities: At will—*detect chaos, detect evil, detect good, detect law, detect magic, magic missile, polymorph* (self only), *ray of enfeeblement* (DC 12), *sleep* (DC 12). Caster level 8th. A night hag can use *ethereallness* at will (caster level 16th) so long as it possesses its *heartstone* (see below). The save DCs are Charisma-based.

Dream Haunting (Su): Night hags can visit the dreams of chaotic or evil individuals by using a special periapt known as a *heartstone* to become ethereal, then hovering over the creature. Once a hag invades someone's dreams, it rides on the victim's back until dawn. The sleeper suffers from tormenting dreams and takes 1 point of Constitution drain upon awakening. Only another ethereal being can stop these nocturnal intrusions, by confronting and defeating the night hag.

HEARTSTONE

All night hags carry a periapt known as a *heartstone*, which instantly cures any disease contracted by the holder. In addition, a *heartstone* provides a +2 resistance bonus on all saving throws (this bonus is included in the statistics block). A night hag that loses this charm can no longer use *etherealness* until it can manufacture another (which takes one month). Creatures other than the hag can benefit from the *heartstone*'s powers, but the periapt shatters after ten uses (any disease cured or saving throw affected

counts as a use) and it does not bestow *etherealness* to a bearer that is not a night hag. If sold, an intact *heartstone* brings 1,800 gp.

A nightmare is about the size of a light war horse.

COMBAT

A nightmare can fight while carrying a rider, but the rider cannot also fight unless he or she succeeds on a Ride check. A nightmare's natural weapons, as well as any weapons it wields, are treated as evil-aligned for the purpose of overcoming damage reduction.

Flaming Hooves (Su): A blow from a nightmare's hooves sets combustible materials alight.

Smoke (Su): During the excitement of battle, a nightmare snorts and neighs with rage. This snorting fills a 15-foot cone with a hot, sulfurous smoke that chokes and blinds opponents. Anyone in the cone must succeed on a DC 16 Fortitude save or take a -2 penalty on all attack and damage rolls until 1d6 minutes after leaving the cone. The cone lasts 1 round, and the nightmare uses it once as a free action during its turn each round. The save DC is Constitution-based.

Because of the smoke it gives off, a nightmare has concealment against creatures 5 feet away and total concealment against

creatures 10 feet or farther away. The smoke does not obscure the nightmare's vision at all.

Astral Projection and Etherealness (Su): These abilities function just like the spells of the same names (caster level 20th); a nightmare can use either at will.

Carrying Capacity: A light load for a nightmare is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

CAUCHEMAR

The cauchemar is a horrible, especially malevolent version of a nightmare. The sight of one of these great horrors bearing down is enough to shake the heart of the boldest champion.

COMBAT

The save DC for the cauchemar's smoke attack (DC 24) is adjusted for its greater number of Hit Dice and higher Constitution score.

Carrying Capacity: A light load for a cauchemar is up to 612 pounds; a medium load, 613–1,224 pounds; and a heavy load, 1,225–1,840 pounds.

NIGHTSHADE

Nightshades are powerful undead composed of equal parts darkness and absolute evil.

Nightshades can read and understand all forms of communication; however, they communicate with others by telepathy.

COMBAT

Each of the three known varieties of nightshade is a terrible creature with unique powers and abilities. Their tactics vary according to their abilities, but they all make liberal use of *haste*.

Nightshade Abilities

All nightshades have the following special abilities.

Aversion to Daylight (Ex): If exposed to natural daylight (not merely a *daylight* spell), nightshades take a –4 penalty on all attack rolls, saving throws, and skill checks.

Desecrating Aura (Su): All nightshades give off a 20-foot radius emanation of utter desecration, imbuing their surroundings with negative energy. This ability works much like a *desecrate* spell, except that the nightshade's evil is so great that it is treated as the shrine of an evil power. All undead within 20 feet of the nightshade (including the creature itself) gain a +2 profane bonus on attack rolls, damage rolls, and saving throws, and +2 hit points per HD. (The nightshade Hit Dice, attack, and save entries given here include these profane bonuses.) Charisma checks made to turn undead within this area take a –6 penalty.

A nightshade's desecrating aura cannot be dispelled except by a *dispel evil* spell or similar effect. If the effect is dispelled, the nightshade can resume it as a free action on its next turn. Its desecrating aura is suppressed if a nightshade enters a *consecrated* or *hallowed* area, but the nightshade's presence also suppresses the *consecrated* or *hallowed* effect for as long as it remains in the area.

A nightcrawler is a massive behemoth similar to a purple worm, though utterly black in color.

A nightcrawler measures about 7 feet in diameter and is 100 feet long from its toothy maw to the tip of its stinging tail. It weighs about 55,000 pounds.

Combat

A nightcrawler attacks by burrowing through the ground and emerging to strike.

A nightcrawler's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Energy Drain (Su): Living creatures inside a nightcrawler's gizzard gain one negative level each round. The DC is 26 for the Fortitude save to remove a negative level. The save DC is Charisma-based.

For each such negative level bestowed, the nightcrawler gains 5 temporary hit points.

Improved Grab (Ex): To use this ability, a nightcrawler must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can try to swallow the opponent in the following round.

Poison (Ex): Injury, Fortitude DC 22, initial and secondary damage 2d6 Str. The save DC is Constitution-based.

Spell-Like Abilities: At will—*contagion* (DC 18), *deeper darkness*, *detect magic*, *greater dispel magic*, *haste*, *invisibility*, *see invisibility*, *unholy blight* (DC 18); 3/day—*cone of cold* (DC 19), *confusion* (DC 18), *hold monster* (DC 19); 1/day—*finger of death* (DC 21), *mass hold monster* (DC 23), *plane shift* (DC 21). Caster level 25th. The save DCs are Charisma-based.

Summon Undead (Su): A nightcrawler can summon undead creatures once per night: 9–16 shadows, 3–6 greater shadows, or 2–4 dread wraiths. The undead arrive in 1d10 rounds and serve for 1 hour or until released.

Swallow Whole (Ex): A nightcrawler can try to swallow a grabbed opponent of Huge or smaller size by making a successful grapple check. Once inside, the opponent takes 2d8+12 points of bludgeoning damage plus 12 points of acid damage per round from the nightcrawler's gizzard and is subject to the creature's energy drain. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 35 points of damage to the gizzard (AC 21). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out. A nightcrawler's interior can hold 2 Huge, 8 Large, 32 Medium, 128 Small, 512 Tiny or smaller opponents.

Nightwalkers are human-shaped horrors that haunt the darkness.
A nightwalker is about 20 feet tall and weighs about 12,000 pounds.

Combat

Nightwalkers lurk in dark areas where they can almost always surprise the unwary.

A nightwalker's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Crush Item (Su): A nightwalker can destroy any weapon or item of Large size or smaller (even magic ones, but not artifacts) by picking it up and crushing it between its hands. The nightwalker must make a successful disarm attempt to grab an item held by an opponent. The item is entitled to a DC 34 Fortitude save to resist destruction. The save DC is Strength-based.

Evil Gaze (Su): Fear, 30 feet. A creature that meets the nightwalker's gaze must succeed on a DC 24 Will save or be paralyzed with fear for 1d8 rounds. Whether or not the save is successful, that creature cannot be affected again by the same nightshade's gaze for 24 hours. This is a mind-affecting fear effect. The save DC is Charisma-based.

Spell-Like Abilities: At will—*contagion* (DC 18), *deeper darkness*, *detect magic*, *greater dispel magic*, *haste*, *see invisibility*, and *unholy blight* (DC 18); 3/day—*confusion* (DC 18), *hold monster* (DC 19), *invisibility*; 1/day—*cone of cold* (DC 19), *finger of death* (DC 21), *plane shift* (DC 21). Caster level 21st. The save DCs are Charisma-based.

Summon Undead (Su): A nightwalker can summon undead creatures once per night: 7–12 shadows, 2–5 greater shadows, or 1–2 dread wraiths. The undead arrive in 1d10 rounds and serve for 1 hour or until released.

Skills: *When hiding in a dark area, a nightwalker gains a +8 racial bonus on Hide checks.

Tactics Round-by-Round

The nightwalker is an exceedingly intelligent foe that makes the best use of all its abilities. It favors using its spell-like abilities to divide and disable its enemies, then closing to melee with opponents it has isolated from their allies.

Prior to combat: The nightwalker keeps its *see invisibility* power active most of the time. It uses *haste* and *invisibility* to prepare for battle.

Round 1: Move to within 30 feet to make use of gaze attack and strike with *confusion* or *hold monster*, coupled with a quickened *unholy blight*.

Round 2: Hit a spellcaster with *finger of death* and another quickened *unholy blight*.

Round 3: Move up to engage the enemy and attempt to disarm an enemy fighter.

Round 4: Crush the disarmed weapon (or use gaze attack if disarm attempt failed).

Round 5: Full attack against the unarmed foe (or on a nearby spellcaster).

Nightwings are batlike flyers that hunt on the wing.

A nightwing has a wingspan of about 40 feet and weighs about 4,000 pounds.

Combat

Nightwings prowl the night sky and dive onto their victims. They are all but invisible, detectable only because of the stars they obscure in their passing.

A nightwing's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Magic Drain (Su): A nightwing can weaken magic armor, weapons, and shields by making a successful touch attack. The targeted item must succeed on a DC 22 Fortitude save or lose 1 point of its enhancement bonus. The save DC is Charisma-based. An item that loses its entire enhancement bonus becomes merely a masterwork item and loses any special abilities (such as flaming) as well. Casting *dispel evil* upon the item reverses the effect of the magic drain, provided this occurs within a number of days after the attack equal to the caster's level and the caster succeeds on a DC 29 caster level check.

Spell-Like Abilities: At will—*contagion* (DC 18), *deeper darkness*, *detect magic*, *haste*, *see invisibility*, *unholy blight* (DC 18); 3/day—*confusion* (DC 18), *greater dispel magic*, *hold monster* (DC 19), *invisibility*; 1/day—*cone of cold* (DC 19), *finger of death* (DC 21), *plane shift* (DC 21). Caster level 17th. The save DCs are Charisma-based.

Summon Undead (Su): A nightwing can summon undead creatures once per night: 5–12 shadows, 2–4 greater shadows, or 1 dread wraith. The undead arrive in 1d10 rounds and serve for 1 hour or until released.

Skills: *When hiding in a dark area or flying in a dark sky, a nightwing gains a +8 racial bonus on Hide checks.

A nymph is about the height and weight of a female elf.

Nymphs speak Sylvan and Common.

COMBAT

Blinding Beauty (Su): This ability affects all humanoids within 30 feet of a nymph. Those who look directly at a nymph must succeed on a DC 17 Fortitude save or be blinded permanently as though by the *blindness* spell. A nymph can suppress or resume this ability as a free action.

The save DC is Charisma-based.

Spell-Like Abilities: 1/day—*dimension door*. Caster level 7th.

Spells: A nymph casts divine spells as a 7th-level druid.

Typical Druid Spells Prepared (6/5/4/3/1, save DC 13 + spell level): 0—*cure minor wounds, detect magic, flare, guidance, light, resistance*; 1st—*calm animal, cure light wounds, entangle, longstrider, speak with animals*; 2nd—*barkskin, heat metal, lesser restoration, tree shape*; 3rd—*call lightning, cure moderate wounds, protection from energy*; 4th—*rusting grasp*.

Stunning Glance (Su): As a standard action, a wrathful nymph can stun a creature within 30 feet with a look. The target creature must succeed on a DC 17 Fortitude save or be stunned for 2d4 rounds. The save DC is Charisma-based.

Unearthly Grace (Su): A nymph adds her Charisma modifier as a bonus on all her saving throws, and as a deflection bonus to her Armor Class. (The statistics block already reflects these bonuses).

Wild Empathy (Ex): This power works like the druid's wild empathy class feature, except that a nymph has a +6 racial bonus on the check.

Skills: A nymph has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. She can always choose to take 10 on a Swim check, even if distracted or endangered. She can use the run action while swimming, provided she swims in a straight line.

Adult ogres stand 9 to 10 feet tall and weigh 600 to 650 pounds. Their skin color ranges from dull yellow to dull brown. Their clothing consists of poorly cured furs and hides, which add to their naturally repellent odor.

Ogres speak Giant, and those specimens who boast Intelligence scores of at least 10 also speak Common.

COMBAT

Ogres favor overwhelming odds, sneak attacks, and ambushes over a fair fight. They are intelligent enough to fire ranged weapons first to soften up their foes before closing, but ogre gangs and bands fight as unorganized individuals.

OGRE BARBARIAN

Their inherent bent toward chaos combines with their size and strength to make ogres natural barbarians. Indeed, their leaders are almost always barbarians of low to middle level, monstrous brutes whose fury in battle is truly fearsome. A raging ogre barbarian is an inspiration to other ogres.

COMBAT

Marginally more intelligent than his brutish fellows, an ogre barbarian is slightly more likely to enter a fair fight, but in general prefers the brutish tactics common to all its kind.

Rage (Ex): Twice per day, an ogre barbarian can enter a state of fierce rage that last for 9 rounds. The following changes are in effect as long as he rages: AC 17 (touch 8, flat-footed 17); hp 95; Atk +18/+13 melee (2d6+16, +1 *greatclub*); SV Fort +14, Will +4; Str 30, Con 22; Climb +15, Jump +16. At the end of his rage, the ogre barbarian is fatigued for the duration of the encounter.

Trap Sense (Ex): An ogre barbarian has a +1 bonus on Reflex saves made to avoid traps. He also has a +1 bonus to his AC against attacks by traps.

Uncanny Dodge (Ex): An ogre barbarian retains his Dex bonus to AC regardless of being caught flat-footed or attacked by an invisible opponent. His Dex bonus to AC is +0, but this means that he is not subject to a rogue's sneak attack in these circumstances.

MERROW

These cousins of the ogre have the aquatic subtype.

They dwell in freshwater lakes and rivers. They have a base land speed of 30 feet and a swim speed of 40 feet and are found only in aquatic environments.

Instead of the typical ogre's greatclub, they prefer to use longspears in melee (attack +8 melee, damage 1d8+7).

OGRES AS CHARACTERS

Ogre characters possess the following racial traits.

— +10 Strength, -2 Dexterity, +4 Constitution, -4 Intelligence, -4 Charisma.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

— An ogre's base land speed is 40 feet.

— Darkvision out to 60 feet.

— Racial Hit Dice: An ogre begins with four levels of giant, which provide 4d8 Hit Dice, a base attack bonus of +3, and base saving throw bonuses of Fort +4, Ref +1, and Will +1.

— Racial Skills: An ogre's giant levels give it skill points equal to $7 \times (2 + \text{Int modifier, minimum 1})$. Its class skills are Climb, Listen, and Spot.

— Racial Feats: An ogre's giant levels give it two feats.

— Weapon and Armor Proficiency: An ogre is automatically proficient with simple weapons, martial weapons, light and medium armor, and shields.

— +5 natural armor bonus.

— Automatic Languages: Common, Giant. Bonus Languages: Dwarven, Orc, Goblin, Terran.

— Favored Class: Barbarian.

The ogre mage is a more intelligent and dangerous variety of its mundane cousin.

An ogre mage stands about 10 feet tall and weighs up to 700 pounds. Its skin varies in color from light green to light blue, and its hair is black or very dark brown. Ogre mages favor loose, comfortable clothing and lightweight armor. Ogre mages speak Giant and Common.

Combat

Ogre mages rely on their spell-like abilities, resorting to physical combat only when necessary. When faced with obviously superior forces, they prefer to retreat using *gaseous form* rather than fight a losing battle.

Spell-Like Abilities: At will—*darkness, invisibility*; 1/day—*charm person* (DC 14), *cone of cold* (DC 18), *gaseous form*, *polymorph*, *sleep* (DC 14). Caster level 9th. The save DCs are Charisma-based.

Flight (Su): An ogre mage can cease or resume flight as a free action. While using *gaseous form* it can fly at its normal speed and has perfect maneuverability.

Regeneration (Ex): Fire and acid deal normal damage to an ogre mage.

An ogre mage that loses a limb or body part can reattach it by holding the severed member to the stump. Reattachment takes 1 minute. If the head or some other vital organ is severed, it must be reattached within 10 minutes or the creature dies. An ogre mage cannot regrow lost body parts.

OGRE MAGES AS CHARACTERS

Ogre mage characters possess the following racial traits.

— +10 Strength, +6 Constitution, +4 Intelligence, +4 Wisdom, +6 Charisma.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

— An ogre mage's base land speed is 40 feet. It also has a fly speed of 40 feet (good).

— Darkvision: Ogre mages can see in the dark up to 60 feet.

— Racial Hit Dice: An ogre mage begins with five levels of giant, which provide 5d8 Hit Dice, a base attack bonus of +3, and base saving throw bonuses of Fort +4, Ref +1, and Will +1.

— Racial Skills: An ogre mage's giant levels give it skill points equal to $8 \times^2 (2 + \text{Int modifier} [\text{minimum } 1])$. Its class skills are Concentration, Listen, Spellcraft, and Spot.

— Racial Feats: An ogre mage's giant levels give it two feats.

— +5 natural armor bonus.

— Special Attacks (see above): Spell-like abilities.

— Special Qualities (see above): Regeneration 5, spell resistance 19.

— Automatic Languages: Common, Giant. Bonus Languages: Dwarven, Goblin, Infernal, Orc.

— Favored Class: Sorcerer.

— Level adjustment +7.

OOZE

Oozes are amorphous creatures that live only to eat. They inhabit underground areas throughout the world, scouring caverns, ruins, and dungeons in search of organic matter—living or dead.

COMBAT

Oozes attack any creatures they encounter. They lash out with pseudopods or simply engulf opponents with their bodies, which secrete acids that help them catch or digest their prey.

Blindsight (Ex): An ooze's entire body is a primitive sensory organ that can ascertain prey by scent and vibration within 60 feet.

The typical black pudding measures 15 feet across and 2 feet thick. It weighs about 18,000 pounds.

Combat

A black pudding attacks by grabbing and squeezing their prey.

Acid (Ex): The creature secretes a digestive acid that dissolves organic material and metal quickly, but does not affect stone. Any melee hit or constrict attack deals acid damage, and the opponent's armor and clothing dissolve and become useless immediately unless they succeed on DC 21 Reflex saves. A metal or wooden weapon that strikes a black pudding also dissolves immediately unless it succeeds on a DC 21 Reflex save. The save DCs are Constitution-based.

The pudding's acidic touch deals 21 points of damage per round to wooden or metal objects, but the ooze must remain in contact with the object for 1 full round to deal this damage.

Constrict (Ex): A black pudding deals automatic slam and acid damage with a successful grapple check. The opponent's clothing and armor take a -4 penalty on Reflex saves against the acid.

Improved Grab (Ex): To use this ability, a black pudding must hit with its slam attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Split (Ex): Slashing and piercing weapons deal no damage to a black pudding. Instead the creature splits into two identical puddings, each with half of the original's current hit points (round down). A pudding with 10 hit points or less cannot be further split and dies if reduced to 0 hit points.

Skills: A black pudding has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

ELDER BLACK PUDDING

The most ancient black puddings are vast pools of inky death.

COMBAT

The save DC for the elder black pudding's acid attack (DC 29) is adjusted for its additional Hit Dice and higher Constitution score.

The nearly transparent gelatinous cube travels slowly along dungeon corridors and cave floors, absorbing carrion, creatures, and trash. Inorganic material remains trapped and visible inside the cube's body.

A typical gelatinous cube is 15 feet on a side and weighs about 50,000 pounds, though much larger specimens are not unknown.

Combat

A gelatinous cube attacks by slamming its body into its prey. It is capable of lashing out with a pseudopod, but usually engulfs foes.

Acid (Ex): A gelatinous cube's acid does not harm metal or stone.

Engulf (Ex): Although it moves slowly, a gelatinous cube can simply mow down Large or smaller creatures as a standard action. It cannot make a slam attack during a round in which it engulfs. The gelatinous cube merely has to move over the opponents, affecting as many as it can cover. Opponents can make opportunity attacks against the cube, but if they do so they are not entitled to a saving throw. Those who do not attempt attacks of opportunity must succeed on a DC 13 Reflex save or be engulfed; on a success, they are pushed back or aside (opponent's choice) as the cube moves forward. Engulfed creatures are subject to the cube's paralysis and acid, and are considered to be grappled and trapped within its body. The save DC is Strength-based and includes a +1 racial bonus.

Paralysis (Ex): A gelatinous cube secretes an anesthetizing slime. A target hit by a cube's melee or engulf attack must succeed on a DC 20 Fortitude save or be paralyzed for 3d6 rounds. The cube can automatically engulf a paralyzed opponent. The save DC is Constitution-based.

Transparent (Ex): Gelatinous cubes are hard to see, even under ideal conditions, and it takes a DC 15 Spot check to notice one. Creatures who fail to notice a cube and walk into it are automatically engulfed.

A gray ooze can grow to a diameter of up to 10 feet and a thickness of about 6 inches. A typical specimen weighs about 700 pounds.

Combat

A gray ooze strikes like a snake, slamming opponents with its body.

Acid (Ex): A gray ooze secretes a digestive acid that quickly dissolves organic material and metal, but not stone. Any melee

hit or constrict attack deals acid damage. Armor or clothing dissolves and becomes useless immediately unless it succeeds on a DC 16 Reflex save. A metal or wooden weapon that strikes a gray ooze also dissolves immediately unless it succeeds on a DC 16 Reflex save. The save DCs are Constitution-based.

The ooze's acidic touch deals 16 points of damage per round to wooden or metal objects, but the ooze must remain in contact with the object for 1 full round to deal this damage.

Constrict (Ex): A gray ooze deals automatic slam and acid damage with a successful grapple check. The opponent's clothing and armor take a -4 penalty on Reflex saves against the acid.

Improved Grab (Ex): To use this ability, a gray ooze must hit with its slam attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Transparent (Ex): A gray ooze is hard to identify, even under ideal conditions, and it takes a DC 15 Spot check to notice one. Creatures who fail to notice a gray ooze and walk into it are automatically hit with a melee attack for slam and acid damage.

An ochre jelly can grow to a diameter of about 15 feet and a thickness of about 6 inches, but can compress its body to fit into cracks as small as 1 inch wide. A typical specimen weighs about 5,600 pounds.

Combat

An ochre jelly attempts to envelop and squeeze its prey.

Acid (Ex): An ochre jelly secretes a digestive acid that dissolves only flesh. Any melee hit or constrict attack deals acid damage.

Constrict (Ex): An ochre jelly deals automatic slam and acid damage with a successful grapple check.

Improved Grab (Ex): To use this ability, an ochre jelly must hit with its slam attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

An orc's hair usually is black. It has lupine ears and reddish eyes. Orcs prefer wearing vivid colors that many humans would consider unpleasant, such as blood red, mustard yellow, yellow-green, and deep purple. Their equipment is dirty and unkempt. An adult male orc is a little over 6 feet tall and weighs about 210 pounds.

Females are slightly smaller.

The language an orc speaks varies slightly from tribe to tribe, but any orc is understandable by someone else who speaks Orc. Some orcs know Goblin or Giant as well.

Most orcs encountered away from their homes are warriors; the information in the statistics block is for one of 1st level.

COMBAT

Orcs are proficient with all simple weapons, preferring those that cause the most damage in the least time. Many orcs who take up the warrior or fighter class also gain proficiency with the falchion or the greataxe as a martial weapon. They enjoy attacking from concealment and setting ambushes, and they obey the rules of war (such as honoring a truce) only as long as it is convenient for them.

Light Sensitivity (Ex): Orcs are dazzled in bright sunlight or within the radius of a *daylight* spell.

ORCS AS CHARACTERS

Orc Traits (Ex): Orcs possess the following racial traits.

— +4 Strength, –2 Intelligence, –2 Wisdom, –2 Charisma.

— An orc's base land speed is 30 feet.

— Darkvision out to 60 feet.

— Light Sensitivity: Orcs are dazzled in bright sunlight or within the radius of a *daylight* spell.

— Automatic Languages: Common, Orc. Bonus Languages: Dwarven, Giant, Gnoll, Goblin, Undercommon.

— Favored Class: Barbarian.

The orc warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

HALF-ORCS

These orc–human crossbreeds can be found in either orc or human society (where their status varies according to local sentiments), or in communities of their own. Half-orcs usually inherit a good blend of the physical characteristics of their parents. They are as tall as humans and a little heavier, thanks to their muscle. They have greenish pigmentation, sloping foreheads, jutting jaws, prominent teeth, and coarse body hair. Half-orcs who have lived among or near orcs have scars, in keeping with orcish tradition.

Half-Orc Traits (Ex): Half-orcs possess the following racial traits.

— +2 Strength, –2 Intelligence, –2 Charisma.

— Medium size.

- A half-orc's base land speed is 30 feet.
- Darkvision: Half-orcs can see in the dark up to 60 feet.
- Orc Blood: For all effects related to race, a half-orc is considered an orc.
- Automatic Languages: Common, Orc. Bonus Languages: Draconic, Giant, Gnoll, Goblin, Abyssal.
- Favored Class: Barbarian.

A typical otyugh has a body 8 feet in diameter and weighs about 500 pounds.

Otyughs speak Common.

COMBAT

An otyugh attacks living creatures if it feels threatened or if it is hungry; otherwise it is content to remain hidden. Otyughs slash and squeeze opponents with their tentacles, which they also use to drag prey into their mouths.

Constrict (Ex): An otyugh deals automatic tentacle damage with a successful grapple check.

Disease (Ex): Filth fever—bite, Fortitude DC 14, incubation period 1d3 days; damage 1d3 Dex and 1d3 Con. The save DC is Constitution-based.

Improved Grab (Ex): To use this ability, an otyugh must hit with a tentacle attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Skills: *An otyugh has a +8 racial bonus on Hide checks when in its lair, due to its natural coloration.

Level Adjustment:	+2 (cohort)

Giant owls are nocturnal birds of prey, feared for their ability to hunt and attack in near silence. They are intelligent, and though naturally suspicious, sometimes associate with good creatures. A typical giant owl stands about 9 feet tall, has a wingspan of up to 20 feet, and resembles its smaller cousins in nearly every way except size.

Giant owls speak Common and Sylvan.

COMBAT

A giant owl attacks by gliding silently just a few feet above its prey and plunging to strike when directly overhead.

Superior Low-Light Vision (Ex): A giant owl can see five times as far as a human can in dim light.

Skills: Giant owls have a +8 racial bonus on Listen checks and a +4 racial bonus on Spot checks.

*When in flight, giant owls gain a +8 bonus on Move Silently checks.

TRAINING A GIANT OWL

Although intelligent, a giant owl requires training before it can bear a rider in combat. To be trained, a giant owl must have a friendly attitude toward the trainer (this can be achieved through a successful Diplomacy check). Training a friendly giant owl requires six weeks of work and a DC 25 Handle Animal check. Riding a giant owl requires an exotic saddle. A giant owl can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Giant owl eggs are worth 2,500 gp apiece on the open market, while chicks are worth 4,000 gp each. Professional trainers charge 1,000 gp to rear or train a giant owl.

Carrying Capacity: A light load for a giant owl is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

OWLBEAR

Alignment:	Always neutral
Advancement:	6–8 HD (Large); 9–15 HD (Huge)
Level Adjustment:	—

An owlbear's coat ranges in color from brown-black to yellowish brown; its beak is a dull ivory color. A full-grown male can stand as tall as 8 feet and weigh up to 1,500 pounds. Adventurers who have survived encounters with the creature often speak

of the bestial madness they glimpsed in its red-rimmed eyes.

COMBAT

Owlbears attack prey—any creature bigger than a mouse—on sight, always fighting to the death. They slash with claws and beak, trying to grab their prey and rip it apart.

Improved Grab (Ex): To use this ability, an owlbear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

PEGASUS

Large Magical Beast

Hit Dice:	4d10+12 (34 hp)

Saves:	Fort +7, Ref +6, Will +4
Abilities:	Str 18, Dex 15, Con 16, Int 10, Wis 13, Cha 13
Skills:	Diplomacy +3, Listen +8, Sense Motive +9, Spot +8
Feats:	Flyby Attack, Iron Will
Environment:	Temperate forests
Organization:	Solitary, pair, or herd (6–10)
Challenge Rating:	3
Treasure:	None
Alignment:	Usually chaotic good
Advancement:	5–8 HD (Large)
Level Adjustment:	+2 (cohort)

The pegasus is a magnificent winged horse that sometimes serves the cause of good. Though highly prized as aerial steeds, pegasi are wild and shy creatures not easily tamed.

A typical pegasus stands 6 feet high at the shoulder, weighs 1,500 pounds, and has a wingspan of 20 feet. Pegasi cannot speak, but they understand Common.

COMBAT

Spell-Like Abilities: At will—*detect good* and *detect evil* within a 60-foot radius. Caster level 5th.

Skills: Pegasi have a +4 racial bonus on Listen and Spot checks.

TRAINING A PEGASUS

Although intelligent, a pegasus requires training before it can bear a rider in combat. To be trained, a pegasus must have a friendly attitude toward the trainer (this can be achieved through a successful Diplomacy check). Training a friendly pegasus requires six weeks of work and a DC 25 Handle Animal check. Riding a pegasus requires an exotic saddle. A pegasus can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Pegasus eggs are worth 2,000 gp each on the open market, while young are worth 3,000 gp per head. Pegasi mature at the same rate as horses. Professional trainers charge 1,000 gp to rear or train a pegasus, which serves a good or neutral master with absolute faithfulness for life.

Carrying Capacity: A light load for a pegasus is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds.

PHANTOM FUNGUS

Medium Plant

Hit Dice:	2d8+6 (15 hp)
Initiative:	+0
Speed:	20 ft. (4 squares)
Armor Class:	14 (+4 natural), touch 10, flat-footed 14

Base Attack/Grapple:	+1/+3
Attack:	Bite +3 melee (1d6+3)
Full Attack:	Bite +3 melee (1d6+3)
Space/Reach:	5 ft./5 ft.
Special Attacks:	—
Special Qualities:	Low-light vision, plant traits, greater invisibility

Skills:	Listen +4, Move Silently +6, Spot +4
Feats:	Alertness
Environment:	Underground
Organization:	Solitary
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	3–4 HD (Medium); 5–6 HD (Large)

Level Adjustment: —

This creature looks like a brown and greenish-brown mass with a cluster of nodules atop the main mass, though it is visible only when dead. A cluster of nodules atop the main mass serve as sensory organs. The creature feeds and attacks with a gaping maw lined with rows of teeth. Four stumpy legs support the creature and allow it to move about. This ambulatory fungus is naturally invisible, making it a feared predator among subterranean inhabitants.

COMBAT

A phantom fungus usually roams quietly, hunting for prey. It attacks lone individuals almost anywhere, but when tackling groups it prefers an open space where it has a better chance.

Greater Invisibility (Su): This ability is constant, allowing a phantom fungus to remain invisible even when attacking. It works like *greater invisibility* (caster level 12th) and lasts as long as the phantom fungus is alive. This ability is not subject to the *invisibility purge* spell. A phantom fungus becomes visible 1 minute after it is killed.

Skills: A phantom fungus has a +5 racial bonus on Move Silently checks.

PHASE SPIDER

Large Magical Beast

Hit Dice:	5d10+15 (42 hp)
Initiative:	+7
Speed:	40 ft. (8 squares), climb 20 ft.
Armor Class:	15 (−1 size, +3 Dex, +3 natural), touch 12, flat-footed 12
Base Attack/Grapple:	+5/+12
Attack:	Bite +7 melee (1d6+4 plus poison)
Full Attack:	Bite +7 melee (1d6+4 plus poison)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Poison
Special Qualities:	Darkvision 60 ft., ethereal jaunt, low-light vision
Saves:	Fort +7, Ref +7, Will +2
Abilities:	Str 17, Dex 17, Con 16, Int 7, Wis 13, Cha 10
Skills:	Climb +11, Move Silently +11, Spot +4
Feats:	Ability Focus (poison), Improved Initiative
Environment:	Warm hills
Organization:	Solitary or cluster (2–5)
Challenge Rating:	5
Treasure:	None
Alignment:	Always neutral
Advancement:	6–8 HD (Large); 9–15 HD (Huge)

Level Adjustment: —

Phase spiders are aggressive predators that can move quickly from the Ethereal Plane to attack opponents on the Material Plane.

A typical phase spider's body is 8 feet long. It weighs about 700 pounds.

Phase spiders cannot speak.

COMBAT

Phase spiders dwell and hunt on the Material Plane. Once a spider locates prey, however, it shifts to the Ethereal Plane to attack, attempting to catch its victim flat-footed. The spider shifts in, bites its victim, and retreats quickly back to the Ethereal Plane.

Ethereal Jaunt (Su): A phase spider can shift from the Ethereal Plane to the Material Plane as a free action, and shift back again as a move action (or during a move action). The ability is otherwise identical with *ethereal jaunt* (caster level 15th).

Poison (Ex): Injury, Fortitude DC 17, initial and secondary damage 1d8 Con. The save DC is Constitution-based.

Skills: A phase spider has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

PHASM

Medium Aberration (Shapechanger)

Hit Dice:	15d8+30 (97 hp)
Initiative:	+6
Speed:	30 ft. (6 squares)
Armor Class:	17 (+2 Dex, +5 natural), touch 12, flat-footed 15
Base Attack/Grapple:	+11/+12
Attack:	Slam +12 melee (1d3+1)
Full Attack:	Slam +12 melee (1d3+1)
Space/Reach:	5 ft./5 ft.
Special Attacks:	—
Special Qualities:	Alternate form, amorphous, resilient, scent, telepathy 100 ft., tremorsense 60 ft.
Saves:	Fort +11, Ref +11, Will +11
Abilities:	Str 12, Dex 15, Con 15, Int 16, Wis 15, Cha 14
Skills:	Bluff +20, Climb +7, Craft (any one) +12, Diplomacy +12, Disguise +20 (+22 acting)*, Intimidate +4, Knowledge (any one) +18, Listen +12, Spot +12, Survival +8
Feats:	Alertness, Blind-Fight, Combat Reflexes, Dodge, Improved Initiative, Mobility
Environment:	Underground
Organization:	Solitary
Challenge Rating:	7
Treasure:	Standard
Alignment:	Usually chaotic neutral
Advancement:	15–21 HD (Huge); 22–45 HD (Gargantuan)
Level Adjustment:	—

A phasm is an amorphous creature that can assume the guise of almost any other creature or object. A phasm in its natural form is about 5 feet in diameter and 2 feet high at the center. Swirls of color indicate sensory organs. In this form, a phasm slithers about like an ooze and can attack with a pseudopod. It weighs about 400 pounds.

Phasms can speak Common but prefer telepathic communication.

COMBAT

When faced with potential danger, a phasm is equally likely to retreat, parley, or attack, as its fancy strikes.

If pursued or harassed, a phasm transforms into the most fearsome creature it knows and attacks. When seriously hurt, it changes to some fast or agile form and tries to escape.

Amorphous (Ex): A phasm in its natural form has immunity to poison, *sleep*, paralysis, polymorph, and stunning effects. It is not subject to critical hits and, having no clear front or back, cannot be flanked.

Resilient (Ex): A phasm has a +4 racial bonus on Fortitude and Reflex saves (included in the statistics block).

Alternate Form (Su): A phasm can assume any form of Large size or smaller as a standard action. This ability functions as a *polymorph* spell cast on itself (caster level 15th), except that the phasm does not regain hit points for changing form. A phasm can remain in its alternate form until it chooses to assume a new one or return to its natural form.

Tremorsense (Ex): A phasm can automatically sense the location of anything within 60 feet that is in contact with the ground, so long as it is touching the ground itself.

Skills: *When using shapechange, a phasm gains a +10 circumstance bonus on Disguise checks.

PLANETOUCHEDE

Planetouched is a general word to describe someone who can trace his or her bloodline back to an outsider, usually a fiend or celestial.

The effects of having a supernatural being in one's heritage last for many generations. Although not as dramatically altered as a half-celestial or a half-fiend, planetouched still retain some special qualities.

The two planetouched varieties described here are the most common. Aasimars are humans with some trace of celestial blood in their veins, and tieflings have some fiendishness in their family tree.

AASIMAR

Aasimar, 1st-Level Warrior

Alignment:	Usually good (any)
Advancement:	By character class
Level Adjustment:	+1

Aasimars are usually tall, good-looking, and generally pleasant. Some have a minor physical trait suggesting their heritage, such as silver hair, golden eyes, or an unnaturally intense stare.

Most aasimars are decidedly good-aligned. They fight against evil causes and attempt to sway others to do the right thing.

Occasionally they take on the vengeful, judgmental aspect of their celestial ancestor, but this is rare. Combat

Aasimars usually like a fair, straightforward contest. Against a particularly evil foe, however, they fight with utter conviction and to the death.

Daylight (Sp): An aasimar can use *daylight* once per day as a 1st-level caster or a caster of his class levels, whichever is higher.

Skills: An aasimar has a +2 racial bonus on Spot and Listen checks.

The aasimar warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Aasimar as Characters

Aasimar characters possess the following racial traits.

— +2 Wisdom, +2 Charisma.

— Medium size.

— An aasimar's base land speed is 30 feet.

— Darkvision: Aasimars can see in the dark up to 60 feet.

— Racial Skills: Aasimars have a +2 racial bonus on Spot and Listen checks.

— Racial Feats: An aasimar gains feats according to its class levels.

— Special Attacks (see above): *Daylight*.

— Special Qualities (see above): Resistance to acid 5, cold 5, and electricity 5.

— Automatic Languages: Common, Celestial. Bonus Languages: Draconic, Dwarven, Elven, Gnome, Halfling,

Many tieflings are indistinguishable from humans. Others have small horns, pointed teeth, red eyes, a whiff of brimstone about them, or even cloven feet. No two tieflings are the same.

Combat

Tieflings are sneaky, subtle, and generally conniving. They prefer to strike from ambush and usually avoid a fair fight if they can.

Darkness (Sp): A tiefling can use *darkness* once per day (caster level equal to class levels).

Skills: A tiefling has a +2 racial bonus on Bluff and Hide checks.

The tiefling warrior presented here had the following ability scores before racial adjustments: Str 13, Dex 11, Con 12, Int 10, Wis 9, Cha 8.

Tieflings as Characters

Tiefling characters possess the following racial traits.

— +2 Dexterity, +2 Intelligence, –2 Charisma.

— Medium size.

— A tiefling's base land speed is 30 feet.

— Darkvision out to 60 feet.

— Racial Skills: Tieflings have a +2 racial bonus on Bluff and Hide checks.

Level Adjustment:	+3

A pseudodragon has a body about 1 foot long, with a 2-foot tail. It weights about 7 pounds.

A pseudodragon can communicate telepathically and can also vocalize animal noises.

COMBAT

A pseudodragon can deliver a vicious bite, but its principal weapon is its sting-equipped tail.

Poison (Ex): Injury, Fortitude DC 14, initial damage sleep for 1 minute, secondary damage sleep for 1d3 hours. The save DC is Constitution-based and includes a +2 racial bonus.

Blindsight (Ex): A pseudodragon can locate creatures within 60 feet by nonvisual means (mostly hearing and scent, but also by noticing vibration and other environmental clues). Opponents the pseudodragon can't actually see still have total concealment against the pseudodragon.

Telepathy (Su): Pseudodragons can communicate telepathically with creatures that speak Common or Sylvan, provided they are within 60 feet.

Skills: Pseudodragons have a chameleonlike ability that grants them a +4 racial bonus on Hide checks. *In forests or overgrown areas, this bonus improves to +8.

PURPLE WORM

Gargantuan Magical Beast

Hit Dice:	16d10+112 (200 hp)

Environment:	Underground

Organization:	Solitary
Challenge Rating:	12
Treasure:	No coins, 50% goods (stone only), no items
Alignment:	Always neutral
Advancement:	16–32 HD (Gargantuan); 33–48 HD (Colossal)
Level Adjustment:	—

The body of a mature purple worm is 5 feet in diameter and 80 feet long, weighing about 40,000 pounds. The creature has a poisonous stinger in its tail.

COMBAT

In battle, a purple worm forms into a coil 20 feet in diameter, biting and stinging anything within reach.

Improved Grab (Ex): To use this ability, a purple worm must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can attempt to swallow the foe the following round.

Poison (Ex): Injury, Fortitude DC 25, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

Swallow Whole (Ex): A purple worm can try to swallow a grabbed opponent of a smaller size than itself by making a successful grapple check. Once inside, the opponent takes 2d8+12 points of crushing damage plus 8 points of acid damage per round from the worm's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 17). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out. A Gargantuan worm's interior can hold 2 Large, 8 Medium, 32 Small, 128 Tiny, or 512 Diminutive or smaller opponents.

Skills: A purple worm has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

RAKSHASA

Medium Outsider (Native)	
Hit Dice:	7d8+21 (52 hp)

Feats:	Alertness, Combat Casting, Dodge
Environment:	Warm marshes
Organization:	Solitary
Challenge Rating:	10
Treasure:	Standard coins; double goods; standard items
Alignment:	Always lawful evil
Advancement:	By character class
Level Adjustment:	+7

A closer look at a rakshasa reveals that the palms of its hands are where the backs of the hands would be on a human.

A rakshasa is about the same height and weight as a human.

Rakshasas speak Common, Infernal, and Undercommon.

COMBAT

In close combat, which a rakshasa despises as ignoble, it employs its sharp claws and powerful bite. Whenever possible, it

uses its other abilities to make such encounters unnecessary.

Detect Thoughts (Su): A rakshasa can continuously use detect thoughts as the spell (caster level 18th; Will DC 15 negates). It can suppress or resume this ability as a free action. The save DC is Charisma-based.

Spells: A rakshasa casts spells as a 7th-level sorcerer.

Typical Sorcerer Spells Known (6/7/7/5; save DC 13 + spell level): 0—detect magic, light, mage hand, message, read magic, resistance, touch of fatigue; 1st—charm person, mage armor, magic missile, shield, silent image; 2nd—bear's endurance, invisibility, acid arrow; 3rd—haste, suggestion.

Change Shape (Su): A rakshasa can assume any humanoid form, or revert to its own form, as a standard action. In humanoid form, a rakshasa loses its claw and bite attacks (although it often equips itself with weapons and armor instead). A rakshasa remains in one form until it chooses to assume a new one. A change in form cannot be dispelled, but the rakshasa reverts to its natural form when killed. A *true seeing* spell reveals its natural form.

Skills: A rakshasa has a +4 racial bonus on Bluff and Disguise checks. *When using change shape, a rakshasa gains an additional +10 circumstance bonus on Disguise checks. If reading an opponent's mind, its circumstance bonus on Bluff and Disguise checks increases by a further +4.

RAKSHASAS AS CHARACTERS

Rakshasa characters possess the following racial traits.

— +2 Strength, +4 Dexterity, +6 Constitution, +2 Intelligence, +2 Wisdom, +6 Charisma.

—Medium size.

—A rakshasa's base land speed is 40 feet.

—Darkvision out to 60 feet.

—Racial Hit Dice: A rakshasa begins with seven levels of outsider, which provide 7d8 Hit Dice, a base attack bonus of +7, and base saving throw bonuses of Fort +5, Ref +5, and Will +5.

—Racial Skills: A rakshasa's outsider levels give it skill points equal to $10 \times (8 + \text{Int modifier})$. Its class skills are Bluff, Disguise, Listen, Move Silently, Perform, Sense Motive, and Spot. A rakshasa has a +4 racial bonus on Bluff and Disguise checks, and it can gain further bonuses by using change shape (+10 on Disguise checks) and detect thoughts (+4 on Bluff and Disguise checks).

—Racial Feats: A rakshasa's outsider levels give it three feats.

— +9 natural armor bonus.

—Natural Weapons: Bite (1d6) and 2 claws (1d4).

—Detect Thoughts (Su): The save DC is 13 + the character's Cha modifier.

—Spells: A rakshasa character casts spells as a 7th-level sorcerer. If the character takes additional levels of sorcerer, these levels stack with the rakshasa's base spellcasting ability for spells known, spells per day, and other effects dependent on caster level. A rakshasa character likewise uses the sum of its racial spellcasting levels and class levels to determine the abilities of its familiar.

—Special Qualities (see above): Change shape, damage reduction 15/good and piercing, spell resistance equal to 27 + class levels.

—Automatic Languages: Common, Infernal. Bonus Languages: Sylvan, Undercommon.

—Favored Class: Sorcerer.

—Level adjustment +7.

A rast has anywhere from ten to fifteen claws, though it can only use four at once.

A rast has a body about the size of a large dog's, with a head almost as large as the body. It weighs about 200 pounds.

COMBAT

Rasts paralyze as many of their foes as possible, then attack any that are still moving. A rast can claw or bite, but cannot do both during the same round.

Paralyzing Gaze (Su): Paralysis for 1d6 rounds, 30 feet, Fortitude DC 13 negates. The save DC is Charisma-based.

Improved Grab (Ex): To use this ability, a rast must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Blood Drain (Ex): A rast drains blood from a grabbed opponent, dealing 1 point of Constitution damage each round it maintains the hold.

Flight (Su): A rast can cease or resume flight as a free action. A rast that loses this ability falls and can perform only a single action (either a move action or an attack action) each round.

RAVID

Medium Outsider (Extraplanar)	
Hit Dice:	3d8+3 (16 hp)
Initiative:	+4
Speed:	20 ft. (4 squares), fly 60 ft. (perfect)
Armor Class:	25 (+15 natural), touch 10, flat-footed 25

Feats:	Improved Initiative, Multiattack
Environment:	Positive Energy Plane
Organization:	Solitary (1 plus at least 1 animated object)
Challenge Rating:	5
Treasure:	None
Alignment:	Always neutral
Advancement:	4 HD (Medium); 5–9 HD (Large)

Level Adjustment: —

Ravids are creatures from the Positive Energy Plane. These bizarre entities imbue creatures with energy by their touch and animate lifeless objects around them. Ravids that make their way to the Material Plane wander about aimlessly, followed by the objects to which they have given life.

A ravid is about 7 feet long and weighs about 75 pounds.

COMBAT

Ravids fight only in self-defense. A ravid itself is not very powerful but is always accompanied by at least one animated object that defends it.

Positive Energy Lash (Su): A ravid can make a touch attack or hit with a claw or tail slap attack to infuse a target with positive energy. The energy produces an unpleasant tingle in living creatures, and against undead foes (even incorporeal ones) it deals 2d10 points of damage.

Animate Objects (Su): Once per round, a random object within 20 feet of a ravid animates as though by the spell *animate objects* (caster level 20th). These objects defend the ravid to the best of their ability, but the ravid isn't intelligent enough to employ elaborate tactics with them.

Flight (Su): A ravid can cease or resume flight as a free action. A ravid that loses this ability falls and can perform only a single action (either a move action or an attack action) each round.

Feats: A ravid has the Multiattack feat even though it does not have the requisite three natural weapons.

REMORHAZ

Huge Magical Beast

Hit Dice:	7d10+35 (73 hp)
Initiative:	+1
Speed:	30 ft. (6 squares), burrow 20 ft.
Armor Class:	20 (-2 size, +1 Dex, +11 natural), touch 9, flat-footed 19

Advancement:	8–14 HD (Huge); 15–21 HD (Gargantuan)
Level Adjustment:	—

A remorhaz is whitish-blue in color but pulses with a reddish glow from the heat its body produces. The creature is a little more than 20 feet long, with a body about 5 feet wide. It weighs about 10,000 pounds.

Remorhazes cannot speak.

COMBAT

Remorhazes hide under the snow and ice until they hear movement above them, then attack from below and surprise prey.

Improved Grab (Ex): To use this ability, a remorhaz must hit an opponent least one size category smaller than itself with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can attempt to swallow the opponent the following round.

Swallow Whole (Ex): When a remorhaz begins its turn with a grappled opponent in its mouth, it can swallow that opponent with a successful grapple check. Once inside, the opponent takes 2d8+12 points of bludgeoning damage plus 8d6 points of fire damage per round from the remorhaz's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 15). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out. A Huge remorhaz's interior can hold 2 Large, 4 Medium, 8 Small, 32 Tiny, 128 Diminutive, or 512 Fine or smaller opponents.

Heat (Ex): An enraged remorhaz generates heat so intense that anything touching its body takes 8d6 points of fire damage. Creatures striking a remorhaz with natural attacks or unarmed attacks are subject to this damage, but creatures striking with melee weapons do not take damage from the remorhaz's heat. This heat can melt or char weapons; any weapon that strikes a remorhaz is allowed a DC 18 Fortitude save to avoid destruction. The save DC is Constitution-based. Skills: Remorhazes have a +4 racial bonus on Listen checks.

Level Adjustment:	—

A roc's plumage is either dark brown or golden from head to tail. These enormous creatures are 30 feet long from the beak to the base of the tail, with wingspans as wide as 80 feet. A roc weighs about 8,000 pounds.

COMBAT

A roc attacks from the air, swooping earthward to snatch prey in its powerful talons and carry it off for itself and its young to devour. A solitary roc is typically hunting and will attack any Medium or larger creature that appears edible. A mated pair of rocs attack in concert, fighting to the death to defend their nests or hatchlings.

Skills: Rocs have a +4 racial bonus on Spot checks.

ROPER

Large Magical Beast

Hit Dice:	10d10+30 (85 hp)
Initiative:	+5
Speed:	10 ft. (2 squares)
Armor Class:	24 (-1 size, +1 Dex, +14 natural), touch 10, flat-footed 23

Environment:	Underground
Organization:	Solitary, pair, or cluster (3–6)
Challenge Rating:	12
Treasure:	No coins; 50% goods (stone only); no items

Alignment:	Usually chaotic evil
Advancement:	11–15 HD (Large); 16–30 HD (Huge)

Level Adjustment: —

A roper stands some 9 feet tall and tapers from 3 or 4 feet in diameter at the base to 1 foot across at the top. It weighs 2,200 pounds. A roper's coloration and temperature change to match the features of the surrounding cave.

Ropers speak Terran and Undercommon.

COMBAT

A roper hunts by standing very still and imitating a bit of rock. This tactic often allows it to attack with surprise. When prey comes within reach, it lashes out with its strands. In melee, it bites adjacent opponents with its powerful maw.

Drag (Ex): If a roper hits with a strand attack, the strand latches onto the opponent's body. This deals no damage but drags the stuck opponent 10 feet closer each subsequent round (provoking no attack of opportunity) unless that creature breaks free, which requires a DC 23 Escape Artist check or a DC 19 Strength check. The check DCs are Strength-based, and the Escape Artist DC includes a +4 racial bonus. A roper can draw in a creature within 10 feet of itself and bite with a +4 attack bonus in the same round. A strand has 10 hit points and can be attacked by making a successful sunder attempt. However, attacking a roper's strand does not provoke an attack of opportunity. If the strand is currently attached to a target, the roper takes a -4 penalty on its opposed attack roll to resist the sunder attempt. Severing a strand deals no damage to a roper.

Strands (Ex): Most encounters with a roper begin when it fires strong, sticky strands. The creature can have up to six strands at once, and they can strike up to 50 feet away (no range increment). If a strand is severed, the roper can extrude a new one on its next turn as a free action.

Weakness (Ex): A roper's strands can sap an opponent's strength. Anyone grabbed by a strand must succeed on a DC 18 Fortitude save or take 2d8 points of Strength damage. The save DC is Constitution-based.

Skills: *Ropers have a +8 racial bonus on Hide checks in stony or icy areas.

RUST MONSTER

Medium Aberration

Hit Dice:	5d8+5 (27 hp)
Initiative:	+3
Speed:	40 ft. (8 squares)
Armor Class:	18 (+3 Dex, +5 natural), touch 13, flat-footed 15
Base Attack/Grapple:	+3/+3
Attack:	Antennae touch +3 melee (rust)
Full Attack:	Antennae touch +3 melee (rust) and bite -2 melee (1d3)

Abilities:	Str 10, Dex 17, Con 13, Int 2, Wis 13, Cha 8
Skills:	Listen +7, Spot +7
Feats:	Alertness, Track
Environment:	Underground
Organization:	Solitary or pair
Challenge Rating:	3
Treasure:	None
Alignment:	Always neutral
Advancement:	6–8 HD (Medium); 9–15 HD (Large)

Level Adjustment: —

The hide of these creatures varies in color from a yellowish tan underside to a rust-red upper back. A rust monster's prehensile antennae can rust metals on contact.

The typical rust monster measures 5 feet long and 3 feet high, weighing 200 pounds.

COMBAT

A rust monster can scent a metal object from up to 90 feet away. When it detects one, it dashes toward the source and attempts to strike it with its antennae. The creature is relentless, chasing characters over long distances if they still possess intact metal objects but usually ceasing its attacks to devour a freshly rusted meal.

The creature targets the largest metal object available, striking first at armor, then at shields and smaller items. It prefers ferrous metals (steel or iron) over precious metals (such as gold or silver) but will devour the latter if given the opportunity.

Rust (Ex): A rust monster that makes a successful touch attack with its antennae causes the target metal to corrode, falling to

pieces and becoming useless immediately. The touch can destroy up to a 10-foot cube of metal instantly. Magic armor and weapons, and other magic items made of metal, must succeed on a DC 17 Reflex save or be dissolved. The save DC is Constitution-based and includes a +4 racial bonus.

A metal weapon that deals damage to a rust monster corrodes immediately. Wooden, stone, and other nonmetallic weapons are unaffected.

Level Adjustment:	+2 (+3 if four-armed)

Most sahuagin feature green coloration, darker along the back and lighter on the belly. Many have dark stripes, bands, or spots, but these tend to fade with age. An adult male sahuagin stands roughly 6 feet tall and weighs about 200 pounds.

Sahuagin are the natural enemy of aquatic elves. The two cannot coexist peacefully: Wars between them are prolonged, bloody affairs that sometimes interfere with shipping and maritime trade. Sahuagin have an only slightly less vehement hatred for tritons.

Sahuagin speak their own language, Sahuagin. Thanks to their high Intelligence scores, most sahuagin also speak two bonus languages, usually Common and Aquan.

COMBAT

Sahuagin are savage fighters, asking for and giving no quarter. When swimming, a sahuagin tears with its feet as it strikes with its talons or a weapon. About half of any group of sahuagin are also armed with nets.

Blindsight (Ex): A sahuagin can locate creatures underwater within a 30-foot radius. This ability works only when the

sahuagin is underwater.

Blood Frenzy: Once per day a sahuagin that takes damage in combat can fly into a frenzy in the following round, clawing and biting madly until either it or its opponent is dead. It gains +2 Constitution and +2 Strength, and takes a -2 penalty to Armor Class. A sahuagin cannot end its frenzy voluntarily.

Rake (Ex): Attack bonus +2 melee, damage 1d4+1. A sahuagin also gains two rake attacks when it attacks while swimming.

Freshwater Sensitivity (Ex): A sahuagin fully immersed in fresh water must succeed on a DC 15 Fortitude save or become fatigued. Even on a success, it must repeat the save attempt every 10 minutes it remains immersed.

Light Blindness (Ex): Abrupt exposure to bright light (such as sunlight or a *daylight* spell) blinds sahuagin for round. On subsequent rounds, they are dazzled while operating in bright light.

Speak with Sharks (Ex): Sahuagin can communicate telepathically with sharks up to 150 feet away. The communication is limited to fairly simple concepts such as "food," "danger," and "enemy." Sahuagin can use the Handle Animal skill to befriend and train sharks.

Water Dependent (Ex): Sahuagin can survive out of the water for 1 hour per 2 points of Constitution (after that, refer to the drowning rules on page 304 of the *Dungeon Master's Guide*).

Skills: A sahuagin has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

*Underwater, a sahuagin has a +4 racial bonus on Hide, Listen, and Spot checks.

*A sahuagin has a +4 racial bonus on Survival and Profession (hunter) checks within 50 miles of its home.

*A sahuagin has a +4 racial bonus on Handle Animal checks when working with sharks.

SAHUAGIN MUTANTS

About one in two hundred sahuagin has four arms. Such creatures can make four claw attacks or use extra weapons, in addition to the claw and bite attacks.

If a community of aquatic elves is located within 100 miles of a sahuagin community, about one in one hundred sahuagin looks just like an aquatic elf. These creatures, called malenti, have a swim speed of 40 feet, can remain out of water for 1 hour per point of Constitution, and have freshwater sensitivity and light sensitivity (dazzled in bright light). Malenti have no natural attacks. They are otherwise identical with sahuagin.

Salamanders speak Ignan. Some average salamanders and all nobles also speak Common.

COMBAT

If a salamander has damage reduction, its natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Constrict (Ex): A salamander deals automatic tail slap damage (including fire damage) with a successful grapple check. A noble salamander can constrict multiple creatures simultaneously, provided they are all at least two sizes smaller than it.

Heat (Ex): A salamander generates so much heat that its mere touch deals additional fire damage. Salamanders' metallic weapons also conduct this heat.

Improved Grab (Ex): To use this ability, a salamander must hit a creature of up to one size larger than itself with its tail slap attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Spell-Like Abilities: (Noble salamanders only) 3/day—*burning hands* (DC 13), *fireball* (DC 15), *flaming sphere* (DC 14), *wall of fire* (DC 16); 1/day—*dispel magic*, *summon monster VII* (Huge fire elemental). Caster level 15th. The save DCs are Charisma-based.

Skills: Salamanders have a +4 racial bonus on Craft (blacksmithing) checks.

Feats: Salamanders have the Multiattack feat even though they do not have the requisite three natural weapons.

A satyr's hair is red or chestnut brown, while its hooves and horns are jet black. A satyr is about as tall and heavy as a half-elf.

Satyrs speak Sylvan, and most also speak Common.

COMBAT

The keen senses of a satyr make it almost impossible to surprise one in the wild. Conversely, with their own natural grace and agility, satyrs can sneak up on travelers who are not carefully watching the surrounding wilderness. Once engaged in battle, an unarmed satyr attacks with a powerful head butt. A satyr expecting trouble is likely to be armed with a bow and a dagger and typically looses arrows from hiding, weakening an enemy before closing.

Pipes (Su): Satyrs can play a variety of magical tunes on their pan pipes. Usually, only one satyr in a group carries pipes.

When it plays, all creatures within a 60-foot spread (except satyrs) must succeed on a DC 13 Will save or be affected by *charm person*, *sleep*, or *fear* (caster level 10th; the satyr chooses the tune and its effect).

In the hands of other beings, these pipes have no special powers. A creature that successfully saves against any of the pipe's effects cannot be affected by the same set of pipes for 24 hours. The save DC is Charisma-based.

Skills: Satyrs have a +4 racial bonus on Hide, Listen, Move Silently, Perform, and Spot checks.

SATYRS AS CHARACTERS

Satyr characters possess the following racial traits.

— +2 Dexterity, +2 Constitution, +2 Intelligence, +2 Wisdom, +2 Charisma.

— Medium size.

— A satyr's base land speed is 40 feet.

— Low-light vision.

— Racial Hit Dice: A satyr begins with five levels of fey, which provide 5d8 Hit Dice, a base attack bonus of +2, and base saving throw bonuses of Fort +1, Ref +4, and Will +4.

— Racial Skills: A satyr's fey levels give it skill points equal to 8×2 (6 + Int modifier). Its class skills are Bluff, Hide, Knowledge (nature), Listen, Move Silently, Perform, and Spot. Satyrs have a +4 racial bonus on Hide, Listen, Move Silently, Perform, and Spot checks.

— Racial Feats: A satyr's fey levels give it two feats. A satyr receives Alertness as a bonus feat.

— +4 natural armor bonus.

— Natural Weapons: Head butt (1d6).

— Special Attacks (see above): Pipes.

— Special Qualities (see above): Damage reduction 5/cold iron.

— Automatic Languages: Sylvan. Bonus Languages: Common, Elven, Gnome.

— Favored Class: Bard.

— Level adjustment +2.

A typical sea cat is 12 feet long and weighs 800 pounds.

COMBAT

Sea cats attack on sight, either for food or to defend their territory, and use both claws and teeth to grab and rend their prey. They display tremendous courage, always fighting to the death, even against creatures many times their size. Pairs and prides of sea cats attack in concert, trying to wear the opponent down until one beast can dispatch it.

Hold Breath (Ex): A sea cat can hold its breath for a number of rounds equal to $6 - \frac{1}{2}$ its Constitution score before it risks drowning.

Rend (Ex): A sea cat that hits with both claw attacks latches onto the opponent's body and tears the flesh. This automatically deals an extra 2d6+6 points of damage.

Skills: A sea cat has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

A shadow can be difficult to see in dark or gloomy areas but stands out starkly in brightly illuminated places. A shadow is 5 to 6 feet tall and is weightless. Shadows cannot speak intelligibly.

COMBAT

Shadows lurk in dark places, waiting for living prey to happen by.

Strength Damage (Su): The touch of a shadow deals 1d6 points of Strength damage to a living foe. A creature reduced to Strength 0 by a shadow dies. This is a negative energy effect.

Create Spawn (Su): Any humanoid reduced to Strength 0 by a shadow becomes a shadow under the control of its killer within 1d4 rounds.

Skills: Shadows have a +2 racial bonus on Listen and Spot checks and a +4 racial bonus on Search checks. *A shadow gains a +4 racial bonus on Hide checks in areas of shadowy illumination. In brightly lit areas, it takes a -4 penalty on Hide checks.

GREATER SHADOW

Although no more intelligent than an average shadow, a greater shadow is more fearsome because of its increased damage and its hit-and-run tactics.

COMBAT

Strength Damage (Su): The touch of a greater shadow deals 1d8 points of Strength damage to a living foe.

This creature has the body of a large dog, with a smooth black coat and a mouth full of sharp teeth.

A shadow mastiff is slightly more than 2 feet high at the shoulder and weighs about 200 pounds.

Shadow mastiffs cannot speak, but they understand Common.

COMBAT

Shadow mastiffs prefer fighting in shadows or dark conditions, which gives them a great advantage.

If a magical light source negates the shadows around them, shadow mastiffs are cunning enough to either move out of the light or back off and break up the opposition with their baying. They have been known to seize and carry off items ensorcelled with *daylight* spells.

Bay (Su): When a shadow mastiff howls or barks, all creatures except evil outsiders within a 300-foot spread must succeed on a DC 13 Will save or become panicked for 2d4 rounds. This is a sonic mind-affecting fear effect. Whether or not the save is successful, an affected creature is immune to the same mastiff's bay for 24 hours. The save DC is Charisma-based.

Trip (Ex): A shadow mastiff that hits with its bite attack can attempt to trip the opponent as a free action (+3 check modifier) without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the shadow mastiff.

Shadow Blend (Su): In any condition of illumination other than full daylight, a shadow mastiff can disappear into the shadows, giving it total concealment. Artificial illumination, even a *light* or *continual flame* spell, does not negate this ability. A *daylight* spell, however, will.

Skills: *A shadow mastiff has a +4 racial bonus on Survival checks when tracking by scent.

Shambling mounds, also called shamblers, appear to be heaps of rotting vegetation. They are actually intelligent, carnivorous plants.

A shambler's brain and sensory organs are located in its upper body.

A shambler's body has an 8-foot girth and is about 6 feet tall when the creature stands erect. It weighs about 3,800 pounds.

COMBAT

A shambling mound batters or constricts its opponents with two huge, armlike appendages.

Improved Grab (Ex): To use this ability, a shambler must hit with both slam attacks. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Constrict (Ex): A shambler deals 2d6+7 points of damage with a successful grapple check.

Immunity to Electricity (Ex): Shamblers take no damage from electricity. Instead, any electricity attack used against a shambler temporarily grants it 1d4 points of Constitution. The shambler loses these points at the rate of 1 per hour.

Skills: Shamblers have a +4 racial bonus on Hide, Listen, and Move Silently checks. *They have a +12 racial bonus on Hide checks when in a swampy or forested area.

Created by spellcasters to be bodyguards, shield guardians are constructs that protect their masters with spells and stamina. When it is fashioned, a shield guardian is keyed to a particular magical amulet. Henceforth, it regards the wearer of that amulet to be its master, protecting and following that individual everywhere (unless specifically commanded not to do so). A shield guardian obeys its master's verbal commands to the best of its ability, although it is not good for much beyond combat and possibly simple manual labor. It can also be keyed to perform specific tasks at specific times or when certain conditions are met. The wearer of the amulet can call the shield guardian from any distance, and it will come as long as it is on the same plane.

A shield guardian is some 9 feet tall and weighs more than 1,200 pounds.

Shield guardians cannot speak, but they understand commands given in any language.

COMBAT

Shield guardians are straightforward in battle, bashing with their heavy stone fists. They are made for defense and are not particularly impressive on offense.

Find Master (Su): As long as a shield guardian and its amulet are on the same plane, the shield guardian can find the amulet wearer (or just the amulet, if it is removed after the guardian is called).

Guard (Ex): If ordered to do so, a shield guardian moves swiftly to defend the wearer of its amulet, blocking blows and disrupting foes. All attacks against the amulet wearer take a –2 penalty when the shield guardian is adjacent to its master.

Shield Other (Sp): The wearer of a shield guardian's amulet can activate this defensive ability if within 100 feet of the shield guardian. Just as the spell of the same name, this ability transfers to the shield guardian half the damage that would be dealt to the amulet wearer (this ability does not provide the spell's AC or save bonuses).

Spell Storing (Sp): A shield guardian can store one spell of 4th level or lower that is cast into it by another creature. It "casts" this spell when commanded to do so or when a predefined situation arises. Once this spell is used, the shield guardian can store another spell (or the same spell again).

CONSTRUCTION

A shield guardian is built from wood, bronze, stone, and steel. The materials cost 5,000 gp.

The creature's master may assemble the body or hire someone else to do the job. Creating the body requires a DC 16 Craft (blacksmithing) or Craft (carpentry) check. The keyed amulet is fashioned at the same time, and its cost (20,000 gp) is included in the cost of the guardian. After the body is sculpted, the shield guardian is animated through an extended magical ritual that requires a specially prepared laboratory or workroom, similar to an alchemist's laboratory and costing 500 gp to establish. If the creator is personally constructing the creature's body, the building and the ritual can be performed together. A shield guardian with more than 15 Hit Dice can be created, but each additional Hit Die adds +5,000 gp to the market price, and the price increases by +20,000 gp if the creature's size increases to Huge, modifying the cost to create accordingly.

CL 15th; Craft Construct, *limited wish*, *discern location*, *shield*, *shield other*, caster must be at least 15th level; Price 120,000 gp; Cost 65,000 gp + 4,600 XP.

AMULET

If a shield guardian's amulet is destroyed, the guardian ceases to function until a new one is created. If the wearer dies but the amulet is intact, the shield guardian carries out the last command it was given.

A shocker lizard has a pale gray or blue underside, shading to a darker hue on its back. It has blue-black markings along its back and tail. A shocker lizard is about 1 foot tall at the shoulder and weighs about 25 pounds.

COMBAT

A shocker lizard relies on its electricity abilities in combat. A lizard tends to bite only after its shock has rendered an opponent unconscious or when the shock seems to have no effect at all. A solitary lizard flees once it delivers its shocks, but if other shocker lizards are nearby, they all home in on their comrade's discharges and attempt to administer their shocks to the foe.

Stunning Shock (Su): Once per round, a shocker lizard can deliver an electrical shock to a single opponent within 5 feet. This attack deals 2d8 points of nonlethal damage to living opponents (Reflex DC 12 half). The save DC is Constitution-based.

Lethal Shock (Su): Whenever two or more shocker lizards are within 20 feet of each other, they can work together to create a lethal shock. This effect has a radius of 20 feet, centered on any one contributing lizard. The shock deals 2d8 points of electricity damage for each lizard contributing to it, to a maximum of 12d8. A Reflex save (DC 10 + number of lizards contributing) reduces the damage by half.

Electricity Sense (Ex): Shocker lizards automatically detect any electrical discharges within 100 feet.

Skills: Shocker lizards have a +4 racial bonus on Hide checks due to their coloration. Shocker lizards have a +2 racial bonus on Listen and Spot checks.

Shocker lizards use their Dexterity modifier instead of their Strength modifier for Climb and Jump checks.

A shocker lizard has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

A shocker lizard has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

SKELETON

Skeletons are the animated bones of the dead, mindless automatons that obey the orders of their evil masters.

A skeleton is seldom garbed in anything more than the rotting remnants of any clothing or armor it was wearing when slain. A skeleton does only what it is ordered to do. It can draw no conclusions of its own and takes no initiative. Because of this limitation, its instructions must always be simple. A skeleton attacks until destroyed.

CREATING A SKELETON

"Skeleton" is an acquired template that can be added to any corporeal creature (other than an undead) that has a skeletal system (referred to hereafter as the base creature).

Size and Type: The creature's type changes to undead. It retains any subtype except for alignment subtypes (such as good) and subtypes that indicate kind. It does not gain the augmented subtype. It uses all the base creature's statistics and special abilities except as noted here.

Hit Dice: Drop any Hit Dice gained from class levels (to a minimum of 1) and raise remaining Hit Dice to d12s. If the creature has more than 20 Hit Dice, it can't be made into a skeleton by the *animate dead* spell.

Speed: Winged skeletons can't use their wings to fly. If the base creature flew magically, so can the skeleton.

Armor Class: Natural armor bonus changes to a number based on the skeleton's size:

Tiny or smaller	+0
Small	+1

Medium or Large	+2
Huge	+3
Gargantuan	+6
Colossal	+10

Attacks: A skeleton retains all the natural weapons, manufactured weapon attacks, and weapon proficiencies of the base creature, except for attacks that can't work without flesh. A creature with hands gains one claw attack per hand; the skeleton can strike with each of its claw attacks at its full attack bonus. A skeleton's base attack bonus is equal to 1/2 its Hit Dice.

Damage: Natural and manufactured weapons deal damage normally. A claw attack deals damage depending on the skeleton's size. (If the base creature already had claw attacks with its hands, use the skeleton claw damage only if it's better.)

Diminutive or Fine 1

Tiny	1d2
Small	1d3
Medium	1d4
Large	1d6
Huge	1d8
Gargantuan	2d6
Colossal	2d8

Special Attacks: A skeleton retains none of the base creature's special attacks.

Special Qualities: A skeleton loses most special qualities of the base creature. It retains any extraordinary special qualities that improve its melee or ranged attacks. A skeleton gains the following special qualities.

Immunity to Cold (Ex): Skeletons are not affected by cold.

Damage Reduction 5/Bludgeoning: Skeletons lack flesh or internal organs.

Saves: Base save bonuses are Fort +1/3 HD, Ref +1/3 HD, and Will +1/2 HD + 2.

Abilities: A skeleton's Dexterity increases by +2, it has no Constitution or Intelligence score, its Wisdom changes to 10, and its Charisma changes to 1.

Skills: A skeleton has no skills.

Feats: A skeleton loses all feats of the base creature and gains Improved Initiative.

Environment: Any, usually same as base creature.

Organization: Any.

Challenge Rating: Depends on Hit Dice, as follows:

A spectre looks much as it did in life and can be easily recognized by those who knew the individual or have seen the individual's face in a painting or a drawing. In many cases, the evidence of a violent death is visible on its body. A spectre is roughly human-sized and is weightless.

COMBAT

In close combat a spectre attacks with its numbing, life-draining touch. It makes full use of its incorporeal nature, moving through walls, ceilings, and floors as it attacks.

Energy Drain (Su): Living creatures hit by a spectre's incorporeal touch attack gain two negative levels. The DC is 15 for the Fortitude save to remove a negative level. The save DC is Charisma-based. For each such negative level bestowed, the spectre gains 5 temporary hit points.

Create Spawn (Su): Any humanoid slain by a spectre becomes a spectre in 1d4 rounds. Spawns are under the command of

the spectre that created them and remain enslaved until its death. They do not possess any of the abilities they had in life.

Unnatural Aura (Su): Animals, whether wild or domesticated, can sense the unnatural presence of a spectre at a distance of 30 feet. They do not willingly approach nearer than that and panic if forced to do so; they remain panicked as long as they are within that range.

Sunlight Powerlessness (Ex): Spectres are powerless in natural sunlight (not merely a *daylight* spell) and flee from it. A spectre caught in sunlight cannot attack and can take only a single move or attack action in a round.

SPHINX

Sphinxes are enigmatic creatures with great, feathery wings and leonine bodies. All sphinxes are territorial, but the more intelligent ones can differentiate between deliberate intrusion and temporary or inadvertent trespass.

A typical sphinx is about 10 feet long and weighs about 800 pounds.

Sphinxes speak Sphinx, Common, and Draconic.

Combat

Most sphinxes fight on the ground, using their wings to help them pounce much as lions do. If outnumbered by earthbound creatures, a sphinx takes wing and attacks on the fly.

Pounce (Ex): If a sphinx charges a foe, it can make a full attack, including two rake attacks.

Rake (Ex): A sphinx that pounces onto a creature can make two rake attacks with its hind legs. Each sphinx's description provides its attack bonus and damage.

These sphinxes are always male. Androsphinxes are clever and generally good-natured, but they can be savage opponents.

Combat

In battle, an androsphinx rips apart enemies with its razor-sharp claws. It relies on its natural weapons in a fight, employing its spells for defense or healing.

Rake (Ex): Attack bonus +18 melee, damage 2d4+3.

Roar (Su): Three times per day an androsphinx can loose a mighty roar. The first time it does this, all creatures within 500 feet must succeed on a DC 19 Will save or be affected as though by a *fear* spell for 2d6 rounds.

If the sphinx roars a second time during the same encounter, all creatures within 250 feet must succeed on a DC 19 Fortitude save or be paralyzed for 1d4 rounds, and all those within 90 feet are deafened for 2d6 rounds (no save). If it roars a third time during the same encounter, all those within 250 feet must succeed on a DC 19 Fortitude save or take 2d4 points of Strength damage for 2d4 rounds. In addition, any Medium or smaller creature within 90 feet must succeed on a DC 19 Fortitude save or be thrown to the ground and take 2d8 points of damage. The force of this roar is so great that it deals 50 points of damage

to any stone or crystalline object within 90 feet. Magic items and held or carried items can avoid damage with a DC 19 Reflex save. Other androsphinxes are immune to these effects. The save DCs are Charisma-based.

Spells: An androsphinx casts divine spells as a 6th-level cleric from the cleric spell list and from the Good, Healing, and Protection domains.

Typical Cleric Spells Prepared (5/5/5/4; save DC 13 + spell level): 0—cure minor wounds, detect magic, guidance, light, resistance; 1st—divine favor, protection from evil, shield of faith, remove fear, summon monster I; 2nd—bull's strength, remove paralysis, resist energy, shield other*, summon monster II; 3rd—cure serious wounds*, daylight, invisibility purge, searing light.*

*Domain spell. Domains: Good and Healing.

Advancement:	5–12 HD (Huge)

Level Adjustment:

A spider eater is about 10 feet long and 4 feet high, and has a wingspan of about 20 feet. It weighs about 4,000 pounds.

COMBAT

A spider eater attacks with its venomous sting and powerful mandibles. Its usual tactic is to deliver a sting, then back off, hovering out of reach until the venom takes effect.

Implant (Ex): Female spider eaters lay their eggs inside paralyzed creatures of Large or larger size. The young emerge about six weeks later, literally devouring the host from inside.

Poison (Ex): Injury, Fortitude DC 17, initial damage none, secondary damage paralysis for 1d8+5 weeks. The save DC is Constitution-based.

Freedom of Movement (Su): Spider eaters have a continuous freedom of movement ability as the spell (caster level 12th).

When the spider eater serves as a mount, this effect does not extend to its rider.

Skills: Spider eaters have a +4 racial bonus on Listen and Spot checks.

TRAINING A SPIDER EATER

A spider eater requires training before it can bear a rider in combat.

Training a spider eater requires six weeks of work and a DC 25 Handle Animal check. Riding a spider eater requires an exotic saddle. A spider eater can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Spider eater eggs are worth 2,000 gp apiece on the open market, while young are worth 3,000 gp each. Professional trainers charge 3,000 gp to rear or train a spider eater.

Carrying Capacity: A light load for a spider eater is up to 306 pounds; a medium load, 307–612 pounds; and a heavy load, 613–920 pounds.

SPRITE

Sprites are reclusive fey. They go out of their way to fight evil and ugliness and to protect their homelands. Combat Sprites fight their opponents with spell-like abilities and pint-sized weaponry. They prefer ambushes and other trickery over direct confrontation.

Skills: All sprites have a +2 racial bonus on Search, Spot, and Listen checks.

Grigs can leap great distances. They have light blue skin, forest-green hair, and brown hairy legs, and usually wear tunics or brightly colored vests with buttons made from tiny gems. A grig stands 1-1/2 feet tall and weighs about 1 pound.

Grigs speak Sylvan. Some also speak Common.

Combat

Grigs are fierce by sprite standards, attacking opponents fearlessly with bow and dagger.

Spell-Like Abilities: 3/day—*disguise self*, *entangle* (DC 13), *invisibility* (self only), *pyrotechnics* (DC 14), *ventriloquism* (DC 13). Caster level 9th. The save DCs are Charisma-based.

Fiddle (Su): One grig in each band carries a tiny, grig-sized fiddle. When the fiddler plays, any nonsprite within 30 feet of the instrument must succeed on a DC 12 Will save or be affected as though by *irresistible dance* for as long as the playing continues. The save DC is Charisma-based.

Skills: Grigs have a +8 racial bonus on Jump checks. *They also have a +5 racial bonus on Move Silently checks in a forest setting.

Most nixies are slim and comely, with lightly scaled, pale green skin and dark green hair. Females often twine shells and pearl strings in their hair and dress in wraps woven from colorful seaweed. Males wear loincloths of the same materials. Nixies prefer not to leave their lakes.

A nixie stands about 4 feet tall and weighs about 45 pounds.

Nixies speak Aquan and Sylvan. Some also speak Common.

Combat

Nixies rely on their *charm person* ability to deter enemies, entering combat only to protect themselves and their territory.

Charm Person (Sp): A nixie can use *charm person* three times per day as the spell (caster level 4th). Those affected must succeed on a DC 15 Will save or be *charmed* for 24 hours. Most *charmed* creatures are used to perform heavy labor, guard duty, and other onerous tasks for the nixie community. Shortly before the effect wears off, the nixie escorts the *charmed* creature away and orders it to keep walking. The save DC is Charisma-based.

Amphibious (Ex): Although nixies are aquatic, they can survive indefinitely on land.

Water Breathing (Sp): Once per day a nixie can use *water breathing* as the spell (caster level 12th). Nixies usually bestow this effect on those they have *charmed*.

Wild Empathy (Ex): This ability works like the druid's wild empathy class feature, except that a nixie has a +6 racial bonus on the check.

Skills: A nixie has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *Nixies have a +5 racial bonus on Hide checks when in the water.

Pixies wear bright clothing, often including a cap and shoes with curled and pointed toes.

A pixie stands about 2-1/2 feet tall and weighs about 30 pounds.

Pixies speak Sylvan and Common, and may know other languages as well.

Combat

The normally carefree pixies ferociously attack evil creatures and unwanted intruders. They take full advantage of their invisibility and other abilities to harass and drive away opponents.

Greater Invisibility (Su): A pixie remains invisible even when it attacks. This ability is constant, but the pixie can suppress

or resume it as a free action.

Spell-Like Abilities: 1/day—*lesser confusion* (DC 14), *dancing lights*, *detect chaos*, *detect good*, *detect evil*, *detect law*, *detect thoughts* (DC 15), *dispel magic*, *entangle* (DC 14), *permanent image* (DC 19; visual and auditory elements only), *polymorph* (self only). Caster level 8th. The save DCs are Charisma-based.

One pixie in ten can use *irresistible dance* (caster level 8th) once per day.

Special Arrows (Ex): Pixies sometimes employ arrows that deal no damage but can erase memory or put a creature to sleep.

Memory Loss: An opponent struck by this arrow must succeed on a DC 15 Will save or lose all memory. The save DC is Charisma-based and includes a +2 racial bonus. The subject retains skills, languages, and class abilities but forgets everything else until he or she receives a *heal* spell or memory restoration with *limited wish*, *wish*, or *miracle*.

Sleep: Any opponent struck by this arrow, regardless of Hit Dice, must succeed on a DC 15 Fortitude save or be affected as though by a *sleep* spell. The save DC is Charisma-based and includes a +2 racial bonus.

Pixies as Characters

A pixie character exchanges its 1 HD of fey for its first class level.

Pixie characters possess the following racial traits.

— -4 Strength, +8 Dexterity, +6 Intelligence, +4 Wisdom, +6 Charisma.

— Small size. +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, -4 penalty on grapple checks, lifting and carrying limits 3/4 those of Medium characters.

— A pixie's base land speed is 20 feet. It also has a fly speed of 60 feet (good).

— Low-light vision.

— Skills: Pixies have a +2 racial bonus on Listen, Search, and Spot checks.

— Racial Feats: A pixie receives Dodge as a bonus feat.

— +1 natural armor bonus.

— Special Attacks (see above): Spell-like abilities.

— Special Qualities (see above): Damage reduction 10/cold iron, greater invisibility, spell resistance equal to 15 + class levels.

— Automatic Languages: Common, Sylvan. Bonus Languages: Elven, Gnome, Halfling.

— Favored Class: Sorcerer.

— Level adjustment +4 (+6 if the pixie can use *irresistible dance*).

A stirge's coloration ranges from rust-red to reddish-brown, with a dirty yellow underside. The proboscis is pink at the tip, fading to gray at its base.

A stirge's body is about 1 foot long, with a wingspan of about 2 feet. It weighs about 1 pound.

COMBAT

A stirge attacks by landing on a victim, finding a vulnerable spot, and plunging its proboscis into the flesh. This is a touch attack and can target only Small or larger creatures.

Attach (Ex): If a stirge hits with a touch attack, it uses its eight pincers to latch onto the opponent's body. An attached stirge is effectively grappling its prey. The stirge loses its Dexterity bonus to AC and has an AC of 12, but holds on with great tenacity. Stirges have a +12 racial bonus on grapple checks (already figured into the Base Attack/Grapple entry above). An attached stirge can be struck with a weapon or grappled itself. To remove an attached stirge through grappling, the opponent must achieve a pin against the stirge.

Blood Drain (Ex): A stirge drains blood, dealing 1d4 points of Constitution damage in any round when it begins its turn attached to a victim. Once it has dealt 4 points of Constitution damage, it detaches and flies off to digest the meal. If its victim dies before the stirge's appetite has been sated, the stirge detaches and seeks a new target.

SWARM

Swarms are dense masses of Fine, Diminutive, or Tiny creatures that would not be particularly dangerous in small groups, but can be terrible foes when gathered in sufficient numbers. For game purposes a swarm is defined as a single creature with a space of 10 feet—gigantic hordes are actually composed of dozens of swarms in close proximity. A swarm has a single pool of Hit Dice and hit points, a single initiative modifier, a single speed, and a single Armor Class. It makes saving throws as a single creature.

Many different creatures can mass as swarms; bat swarms, centipede swarms, hellwasp swarms, locust swarms, rat swarms, and spider swarms are described here. The swarm's type varies with the nature of the component creature (most are animals or vermin), but all swarms have the swarm subtype.

A swarm of Tiny creatures consists of 300 nonflying creatures or 1,000 flying creatures. A swarm of Diminutive creatures consists of 1,500 nonflying creatures or 5,000 flying creatures. A swarm of Fine creatures consists of 10,000 creatures, whether they are flying or not. Swarms of nonflying creatures include many more creatures than could normally fit in a 10-foot square based on their normal space, because creatures in a swarm are packed tightly together and generally crawl over each other and their prey when moving or attacking. Larger swarms are represented by multiples of single swarms. A large swarm is completely shapeable, though it usually remains contiguous.

COMBAT

In order to attack, a single swarm moves into opponents' spaces, which provokes an attack of opportunity. It can occupy the same space as a creature of any size, since it crawls all over its prey, but remains a creature with a 10-foot space. Swarms never make attacks of opportunity, but they can provoke attacks of opportunity.

Unlike other creatures with a 10-foot space, a swarm is shapeable. It can occupy any four contiguous squares, and it can squeeze through any space large enough to contain one of its component creatures.

Vulnerabilities of Swarms

Swarms are extremely difficult to fight with physical attacks. However, they have a few special vulnerabilities, as follows:

A lit torch swung as an improvised weapon deals 1d3 points of fire damage per hit.

A weapon with a special ability such as flaming or frost deals its full energy damage with each hit, even if the weapon's normal damage can't affect the swarm.

A lit lantern can be used as a thrown weapon, dealing 1d4 points of fire damage to all creatures in squares adjacent to where it breaks.

A bat swarm is nocturnal, and is never found aboveground in daylight.

Combat

A bat swarm seeks to surround and attack any warm-blooded prey it encounters. The swarm deals 1d6 points of damage to any creature whose space it occupies at the end of its move.

Distraction (Ex): Any living creature that begins its turn with a swarm in its space must succeed on a DC 11 Fortitude save or be nauseated for 1 round. The save DC is Constitution-based.

Wounding (Ex): Any living creature damaged by a bat swarm continues to bleed, losing 1 hit point per round thereafter. Multiple wounds do not result in cumulative bleeding loss. The bleeding can be stopped by a DC 10 Heal check or the application of a *cure* spell or some other healing magic.

Blindsight (Ex): A bat swarm notices and locates creatures within 20 feet. Opponents still have total concealment against the bat swarm (but swarm attacks ignore concealment).

Skills: A bat swarm has a +4 racial bonus on Listen and Spot checks. These bonuses are lost if its blindsight is negated.

CENTIPEDE SWARM

Diminutive Vermin (Swarm)

Combat

A centipede swarm seeks to surround and attack any living prey it encounters. A swarm deals 2d6 points of damage to any creature whose space it occupies at the end of its move.

Distraction (Ex): Any living creature that begins its turn with a centipede swarm in its space must succeed on a DC 13 Fortitude save or be nauseated for 1 round. The save DC is Constitution-based.

Poison (Ex): Injury, Fortitude DC 13, initial and secondary damage 1d4 Dex. The save DC is Constitution-based.

Skills: A centipede swarm has a +4 racial bonus on Spot checks and a +8 racial bonus on Climb checks, and uses its Dexterity modifier instead of its Strength modifier for Climb checks. A centipede swarm has a +8 racial bonus on Climb checks and can always choose to take 10 on a Climb check, even if rushed or threatened.

A single hellwasp resembles a thumb-sized normal wasp, except its carapace is gleaming black with ruby-red stripes, and its compound eyes are an iridescent green. In swarms, hellwasps form a collective hive mind intelligence with infernal cunning and bloodlust.

Combat

Like any swarm, a hellwasp swarm seeks to surround and attack any living prey it encounters. A swarm deals 3d6 points of damage to any creature whose space it occupies at the end of its move. The swarm can take over the bodies of its prey and infest both the living and the dead, using them as horrible living (or unliving) puppets to accomplish acts of wickedness that a swarm of insects could never attempt.

A hellwasp swarm's attack is treated as an evil-aligned weapon and a magic weapon for the purpose of overcoming damage reduction.

Distraction (Ex): Any living creature that begins its turn with a hellwasp swarm in its space must succeed on a DC 18 Fortitude save or be nauseated for 1 round. The save DC is Constitution-based.

Inhabit (Ex): A hellwasp swarm can enter the body of a helpless or dead creature by crawling into its mouth and other orifices. Inhabiting requires 1 minute, and the victim must be Small, Medium, or Large (although four swarms working together can inhabit a Huge creature). The swarm can abandon the body at any time, although doing this takes 1 full round. Any attack against the host deals half damage to the hellwasp swarm as well, although the swarm's resistances and immunities may negate some or all of this damage.

If a hellwasp swarm inhabits a dead body, it can restore animation to the creature and control its movements, effectively transforming it into a zombie of the appropriate size for as long as the swarm remains inside. If a hellwasp swarm inhabits a living victim, it can neutralize the effects of its own poison and control the victim's movement and actions as if using *dominate monster* on the victim. The hellwasps quickly consume a living victim, dealing 2d4 points of Constitution damage per hour they inhabit a body. A body reduced to Constitution 0 is dead.

A hellwasp-inhabited creature is relatively easy to spot, since its skin crawls with the forms of insects inside. The swarm is intelligent enough to attempt to hide beneath loose clothing or a large cloak to keep its presence from being detected. The swarm can attempt a Disguise check to conceal its inhabitation of a host, with a -4 penalty if currently inhabiting a Small host.

A *remove disease* or *heal* spell cast on an inhabited victim forces the hellwasp swarm to abandon its host.

Poison (Ex): Injury, Fortitude DC 18, initial and secondary damage 1d6 Dex. The save DC is Constitution-based.

Hive Mind (Ex): Any hellwasp swarm with at least 1 hit point per Hit Die (or 12 hit points, for a standard hellwasp swarm) forms a hive mind, giving it an Intelligence of 6. When a hellwasp swarm is reduced below this hit point threshold, it

becomes mindless.

A rat swarm seeks to surround and attack any warm-blooded prey it encounters. A swarm deals 1d6 points of damage to any creature whose space it occupies at the end of its move.

Disease (Ex): Filth fever—swarm attack, Fortitude DC 12, incubation period 1d3 days, damage 1d3 Dex and 1d3 Con. The save DC is Constitution-based.

Distraction (Ex): Any living creature that begins its turn with a swarm in its square must succeed on a DC 12 Fortitude save or be nauseated for 1 round. The save DC is Constitution-based.

Skills: A rat swarm has a +4 racial bonus on Hide and Move Silently checks, and a +8 racial bonus on Balance, Climb, and Swim checks. A rat swarm can always choose to take 10 on all Climb checks, even if rushed or threatened. A rat swarm uses its Dexterity modifier instead of its Strength modifier for Climb and Swim checks. A rat swarm has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

The tarrasque is 70 feet long and 50 feet tall, and it weighs about 130 tons.

The tarrasque cannot speak.

COMBAT

The tarrasque attacks with its claws, teeth, horns, and tail.

The tarrasque's natural weapons are treated as epic weapons for the purpose of overcoming damage reduction.

Augmented Critical (Ex): The tarrasque's bite threatens a critical hit on a natural attack roll of 18–20, dealing triple damage on a successful critical hit.

Frightful Presence (Su): The tarrasque can inspire terror by charging or attacking. Affected creatures must succeed on a DC 36 Will save or become shaken, remaining in that condition as long as they remain within 60 feet of the tarrasque. The save DC is Charisma-based.

Improved Grab (Ex): To use this ability, the tarrasque must hit a Huge or smaller opponent with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can try to swallow the foe the following round.

Rush (Ex): Once per minute, the normally slow-moving tarrasque can move at a speed of 150 feet.

Swallow Whole (Ex): The tarrasque can try to swallow a grabbed opponent of Huge or smaller size by making a successful grapple check. Once inside, the opponent takes 2d8+8 points of crushing damage plus 2d8+6 points of acid damage per round from the tarrasque's digestive juices. A swallowed creature can cut its way out by dealing 50 points of damage to the tarrasque's digestive tract (AC 25). Once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out. The tarrasque's gullet can hold 2 Huge, 8 Large, 32 Medium, 128 Small, or 512 Tiny or smaller creatures.

Carapace (Ex): The tarrasque's armorlike carapace is exceptionally tough and highly reflective, deflecting all rays, lines,

cones, and even *magic missile* spells. There is a 30% chance of reflecting any such effect back at the caster; otherwise, it is merely negated. Check for reflection before rolling to overcome the creature's spell resistance.

Regeneration (Ex): No form of attack deals lethal damage to the tarrasque. The tarrasque regenerates even if it fails a saving throw against a *disintegrate* spell or a death effect. If the tarrasque fails its save against a spell or effect that would kill it instantly (such as those mentioned above), the spell or effect instead deals nonlethal damage equal to the creature's full normal hit points +10 (or 868 hp). The tarrasque is immune to effects that produce incurable or bleeding wounds, such as mummy rot, a sword with the wounding special ability, or a clay golem's cursed wound ability.

The tarrasque can be slain only by raising its nonlethal damage total to its full normal hit points +10 (or 868 hit points) and using a *wish* or *miracle* spell to keep it dead.

If the tarrasque loses a limb or body part, the lost portion regrows in 1d6 minutes (the detached piece dies and decays normally). The creature can reattach the severed member instantly by holding it to the stump.

Skills: The tarrasque has a +8 racial bonus on Listen and Spot checks.

TENDRICULOS

Huge Plant

Hit Dice:	9d8+54 (94 hp)
Initiative:	-1
Speed:	20 ft. (4 squares)
Armor Class:	16 (-2 size, -1 Dex, +9 natural), touch 7, flat-footed 16
Base Attack/Grapple:	+6/+23

Full Attack:	Bite +13 melee (2d8+9) and 2 tendrils +8 melee (1d6+4)
Space/Reach:	15 ft./15 ft.
Special Attacks:	Improved grab, paralysis, swallow whole
Special Qualities:	Low-light vision, plant traits, regeneration 10
Saves:	Fort +12, Ref +2, Will +4
Abilities:	Str 28, Dex 9, Con 22, Int 3, Wis 8, Cha 3
Skills:	Hide +9, Listen +1, Move Silently +1, Spot +1
Feats:	Alertness, Iron Will, Power Attack, Stealthy
Environment:	Temperate forests
Organization:	Solitary
Challenge Rating:	6
Treasure:	1/10th coins; 50% goods; 50% items
Alignment:	Always neutral
Advancement:	10–16 HD (Huge); 17–27 HD (Gargantuan)
Level Adjustment:	—

A tendriculos can rear up to a height of 15 feet. It weighs about 3,500 pounds.

Animals and other plant creatures are unnerved by the presence of a tendriculos; they avoid it and any place it has been within the last 24 hours.

COMBAT

Prowling deep forests or waiting in vegetated areas (looking like nothing more than a small hillock), a tendriculos attacks savagely, showing no fear. It attempts to swallow as much flesh as it can, as quickly as it can.

Improved Grab (Ex): To use this ability, a tendriculos must hit a creature at least one size smaller than itself with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can try to swallow the opponent in the following round. A tendriculos can also use its improved grab ability on a tendril attack. If it wins the grapple check, it establishes a hold, picks up the opponent, and transfers it to the mouth as a free action, automatically dealing bite damage.

Swallow Whole/Paralysis (Ex): A tendriculos can try to swallow a grabbed opponent by making a successful grapple check. Once inside the plant's mass, the opponent must succeed on a DC 20 Fortitude save or be paralyzed for 3d6 rounds by the tendriculos's digestive juices, taking 2d6 points of acid damage per round. A new save is required each round inside the plant. The save DC is Constitution-based. A swallowed creature that avoids paralysis can climb out of the mass with a successful grapple check. This returns it to the plant's maw, where another successful grapple check is needed to get free. A swallowed creature can also cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the tendriculos's interior (AC 14). Once the creature exits, the plant's regenerative capacity closes the hole; another swallowed opponent must cut its own way out. A Huge tendriculos's interior can hold 2 Large, 8 Medium, 32 Small, 128 Tiny, or 512 Diminutive or smaller opponents.

Regeneration (Ex): Bludgeoning weapons and acid deal normal damage to a tendriculos. A tendriculos that loses part of its body mass can regrow it in 1d6 minutes. Holding the severed portion against the mass enables it to reattach instantly.

A thoqua is about 1 foot in diameter and 4 to 5 feet long. It weighs about 200 pounds.

COMBAT

When a thoqua is disturbed, its first instinct is to attack. Its favored tactic is to spring directly at a foe, either by bursting out of the rock or by coiling up its body and launching itself like a spring. (Treat this as a charge, even though the thoqua does not need to move 10 feet before attacking.)

Heat (Ex): Merely touching or being touched by a thoqua automatically deals 2d6 fire damage.

Burn (Ex): When a thoqua hits with its slam attack, the opponent must succeed on a DC 12 Reflex save or catch fire. The save DC is Constitution-based. The flame burns for 1d4 rounds if not extinguished sooner. A burning creature can use a full-round action to put out the flame.

A titan is about 25 feet tall and weighs about 14,000 pounds.

Titans speak Abyssal, Common, Celestial, Draconic, and Giant.

COMBAT

A titan's natural weapons, as well as any weapons it wields, are treated as chaotic-aligned for the purpose of overcoming damage reduction.

Oversized Weapon (Ex): A titan wields a great, two-handed warhammer (big enough for Gargantuan creatures) without penalty.

Spell-Like Abilities: At will—*chain lightning* (DC 23), *charm monster* (DC 21), *cure critical wounds* (DC 21), *fire storm* (DC 24), *greater dispel magic*, *hold monster* (DC 22), *invisibility*, *invisibility purge*, *levitate*, *persistent image* (DC 22), *polymorph* (humanoid forms only, duration 1 hour); 3/day—*etherealness*, *word of chaos* (DC 22), *summon nature's ally IX*; 1/day—*gate*, *maze*, *meteor swarm* (DC 26). Caster level 20th. The save DCs are Charisma-based.

In addition, titans of good or neutral alignment can use the following additional spell-like abilities: At will—*daylight*, *holy smite* (DC 21), *remove curse* (DC 21); 1/day—*greater restoration*. Caster level 20th. The save DCs are Charisma-based.

Titans of evil alignment can use the following additional spell-like abilities: At will—*bestow curse* (DC 21), *deeper darkness*, *unholy blight* (DC 21); 1/day—*crushing hand* (DC 26). Caster level 20th. The save DCs are Charisma-based.

TACTICS ROUND-BY-ROUND

Titans enjoy combat and usually close with their foes. If that proves ineffective, they swiftly back off and pelt the foe with spell-like abilities and magical effects. Because of a titan's Quicken Spell-Like Ability feat, it can use *chain lightning* as a free action, and frequently attacks in melee while lashing out with this ability at the same time.

Prior to combat: Invisibility purge or invisibility.

Round 1: Charge and attempt to sunder the weapon of the most dangerous foe. Hurl *chain lightning* at opponents standing away from the fight.

Round 2: Full attack against the disarmed opponent, and hurl *chain lightning* at other opponents.

Round 3: Back away from first opponent and use *maze* or *meteor swarm* on any spellcaster causing trouble.

Round 4: Sunder the weapon of the next most effective combatant, or use *greater dispel magic* on all nearby opponents.

Round 5: Full attack against any nearby opponent, or use *fire storm*.

Use another quickened *chain lightning* if foes seem really dangerous.

A titan usually reserves its *gate* and *etherealness* abilities to escape a fight that is not going well.

Adjustment:

A tojanida's shell is blue-green in color. Inside the shell is a fleshy body from which extend seven stalks. Four of these stalks have paddles for locomotion, two are tipped with claws, and one bears the creature's head. Eight vents in the shell, four at each end, allow the tojanida to thrust its stalks out in whatever configuration it finds convenient.

A juvenile tojanida is up to 25 years old. It has a shell about 3 feet long, and it weighs about 60 pounds. An adult is aged 26 to 80. Its shell is about 6 feet long, and it weighs about 220 pounds. An elder can reach 150 years of age. It has a shell about 9 feet long, and it weighs about 500 pounds.

Tojanidas speak Aquan and can be loquacious, but usually only on the subject of food.

COMBAT

Improved Grab (Ex): To use this ability, a tojanida must hit with a bite or claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. Underwater, a tojanida can tow a grabbed victim of its own size or smaller at its swim speed (but it cannot run). A favorite tactic is to grab a single opponent, then withdraw, hauling the opponent away from its allies.

Ink Cloud (Ex): A tojanida can emit a spherical cloud of jet-black ink with a radius of 30 feet once per minute as a free action. The effect is otherwise similar to *fog cloud* cast by an individual of a level equal to the tojanida's Hit Dice. Out of water, the ink emerges in a stream up to 30 feet long, which a tojanida can squirt into an opponent's eyes. The affected creature must succeed on a Reflex save or be blinded for 1 round. The save DC is 13 against a juvenile, 15 against an adult, and 21 against an elder. The save DCs are Constitution based.

All-Around Vision (Ex): The multiple apertures in a tojanida's shell allow it to look in any direction, bestowing a +4 racial bonus on Spot and Search checks. Opponents gain no flanking bonuses when attacking a tojanida.

Skills: A tojanida has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

TREANT

Organization:	Solitary or grove (4–7)
Challenge Rating:	8
Treasure:	Standard
Alignment:	Usually neutral good
Advancement:	8–16 HD (Huge); 17–21 HD (Gargantuan)
Level Adjustment:	+5

A treant's leaves are deep green in the spring and summer. In the fall and winter the leaves change to yellow, orange, or red, but they rarely fall out. A treant's legs fit together when closed to look like the trunk of a tree, and a motionless treant is nearly indistinguishable from a tree.

A treant is about 30 feet tall, with a "trunk" about 2 feet in diameter. It weighs about 4,500 pounds.

Treants speak their own language, plus Common and Sylvan. Most also can manage a smattering of just about all other humanoid tongues—at least enough to say "Get away from my trees!"

COMBAT

Treants prefer to watch potential foes carefully before attacking. They often charge suddenly from cover to trample the despoilers of forests. If sorely pressed, they animate trees as reinforcements.

Animate Trees (Sp): A treant can animate trees within 180 feet at will, controlling up to two trees at a time. It takes 1 full round for a normal tree to uproot itself. Thereafter it moves at a speed of 10 feet and fights as a treant in all respects.

Animated trees lose their ability to move if the treant that animated them is incapacitated or moves out of range. The ability is otherwise similar to *liveoak* (caster level 12th). Animated trees have the same vulnerability to fire that a treant has.

Double Damage against Objects (Ex): A treant or animated tree that makes a full attack against an object or structure deals double damage.

Trample (Ex): Reflex DC 22 half. The save DC is Strength-based. Skills: *Treants have a +16 racial bonus on Hide checks made in forested areas.

A triton has silvery skin that fades into silver-blue scales on the lower half of its body. A triton's hair is deep blue or blue-green.

A triton is about the same size and weight as a human. Tritons speak Common and Aquan.

COMBAT

The reclusive tritons prefer to avoid combat, but they fiercely defend their homes. They attack with either melee or ranged weapons as the circumstances warrant. When encountered outside their lair, they are 90% likely to be mounted on friendly sea creatures such as porpoises.

Spell-Like Abilities: 1/day—*summon nature's ally* IV. Caster level 7th. Tritons often choose water elementals for their companions.

Skills: A triton has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

TROGLODYTE

Alignment:	Usually chaotic evil
Advancement:	By character class
Level Adjustment:	+2

A troglodyte stands about 5 feet tall and weighs about 150 pounds.

Troglodytes speak Draconic.

COMBAT

Half of a group of troglodytes are armed only with claws and teeth; the rest carry one or two javelins and clubs. They normally conceal themselves, launch a volley of javelins, then close to attack. If the battle goes against them, they retreat and attempt to hide.

Stench (Ex): When a troglodyte is angry or frightened, it secretes an oily, musk-like chemical that nearly every form of animal life finds offensive. All living creatures (except troglodytes) within 30 feet of a troglodyte must succeed on a DC 13 Fortitude save or be sickened for 10 rounds. The save DC is Constitution-based. Creatures that successfully save cannot be affected by the same troglodyte's stench for 24 hours. A *delay poison* or *neutralize poison* spell removes the effect from the sickened creature. Creatures with immunity to poison are unaffected, and creatures resistant to poison receive their normal bonus on their saving throws.

Skills: The skin of a troglodyte changes color somewhat, allowing it to blend in with its surroundings like a chameleon and providing a +4 racial bonus on Hide checks. *In rocky or underground settings, this bonus improves to +8.

TROGLODYTE CHARACTERS

Troglodyte characters possess the following racial traits.

—2 Dexterity, +4 Constitution, -2 Intelligence.

—Medium size.

—A troglodyte's base land speed is 30 feet.

—Darkvision out to 90 feet.

—Racial Hit Dice: A troglodyte begins with two levels of humanoid, which provide 2d8 Hit Dice, a base attack bonus of +1, and base saving throw bonuses of Fort +3, Ref +0, and Will +0.

—Racial Skills: A troglodyte's humanoid levels give it skill points equal to $5 \times e$ (2 + Int modifier, minimum 1). Its class skills are Hide and Listen. Troglodytes have a +4 racial bonus on Hide checks (+8 in rocky or underground surroundings).

—Racial Feats: A troglodyte's humanoid levels give it one feat. A troglodyte receives Multiattack as a bonus feat.

—+6 natural armor bonus.

—Natural Weapons: 2 claws (1d4) and bite (1d4).

—Special Attacks (see above): Stench.

—Automatic Languages: Draconic. Bonus Languages: Common, Giant, Goblin, Orc.

—Favored Class: Cleric.

—Level adjustment +2.

Adjustment:

Trolls walk upright but hunched forward with sagging shoulders. Their gait is uneven, and when they run, their arms dangle and drag along the ground. For all this seeming awkwardness, trolls are very agile.

A typical adult troll stands 9 feet tall and weighs 500 pounds. Females are slightly larger than males. A troll's rubbery hide is moss green, mottled green and gray, or putrid gray. The hair is usually greenish black or iron gray.

Trolls speak Giant.

COMBAT

Trolls have no fear of death: They launch themselves into combat without hesitation, flailing wildly at the closest opponent. Even when confronted with fire, they try to get around the flames and attack.

Rend (Ex): If a troll hits with both claw attacks, it latches onto the opponent's body and tears the flesh. This attack automatically deals an additional 2d6+9 points of damage.

Regeneration (Ex): Fire and acid deal normal damage to a troll. If a troll loses a limb or body part, the lost portion regrows in 3d6 minutes. The creature can reattach the severed member instantly by holding it to the stump.

SCRAG

These cousins of the troll have the aquatic subtype. They dwell in any body of water in any climate. They have a base land speed of 20 feet and a swim speed of 40 feet and are found only in aquatic environments. They regenerate only if mostly immersed in water.

TROLL HUNTER

Some trolls, more cunning than most, are not satisfied with merely eating civilized beings but train to hunt them relentlessly. These troll hunters are fearsome rangers who focus on slaying and devouring humanoid prey.

COMBAT

A troll hunter makes full use of its scent ability to track its favored enemies and generally prefers to hunt in darkness. The troll hunter uses its limited repertoire of spells to protect itself from damaging forms of energy and to immobilize enemies.

Typical Ranger Spells Prepared (2; save DC 12 + spell level): 1st—entangle, resist energy.

TROLLS AS CHARACTERS

Troll characters possess the following racial traits.

— +12 Strength, +4 Dexterity, +12 Constitution, -4 Intelligence (minimum 3), -2 Wisdom, -4 Charisma.

— Large size. -1 penalty to Armor Class, -1 penalty on attack rolls, -4 penalty on Hide checks, +4 bonus on grapple checks, lifting and carrying limits double those of Medium characters.

— Space/Reach: 10 feet/10 feet.

— A troll's base land speed is 30 feet.

— Darkvision out to 60 feet and low-light vision.

— Racial Hit Dice: A troll begins with six levels of giant, which provide 6d8 Hit Dice, a base attack bonus of +4, and base saving throw bonuses of Fort +5, Ref +2, and Will +2.

— Racial Skills: A troll's giant levels give it skill points equal to $9 \times (2 + \text{Int modifier, minimum 1})$. Its class skills are Listen and Spot.

— Racial Feats: A troll's giant levels give it three feats.

— +5 natural armor bonus.

— Natural Weapons: Claw (1d6) and bite (1d6).

- Special Attacks (see above): Rend, damage $2d6 + 1\text{-}1/2$ times Str modifier.
- Special Qualities: Regeneration 5, scent.
- Automatic Languages: Giant. Bonus Languages: Common, Orc.
- Favored Class: Fighter.
- Level adjustment +5.

Adjustment:

A unicorn has deep sea-blue, violet, brown, or fiery gold eyes. Males sport a white beard.

A typical adult unicorn grows to 8 feet in length, stands 5 feet high at the shoulder, and weighs 1,200 pounds. Females are slightly smaller and slimmer than males.

Unicorns speak Sylvan and Common.

COMBAT

Unicorns normally attack only when defending themselves or their forests. They either charge, impaling foes with their horns like lances, or strike with their hooves. The horn is a +3 magic weapon, though its power fades if removed from the unicorn.

Magic Circle against Evil (Su): This ability continuously duplicates the effect of the spell. A unicorn cannot suppress this ability.

Spell-Like Abilities: Unicorns can use *detect evil* at will as a free action.

Once per day a unicorn can use *greater teleport* to move anywhere within its home. It cannot teleport beyond the forest boundaries nor back from outside.

A unicorn can use *cure light wounds* three times per day and *cure moderate wounds* once per day (caster level 5th) by touching a wounded creature with its horn. Once per day it can use *neutralize poison* (DC 21, caster level 8th) with a touch of its horn. The save DC is Charisma-based.

Wild Empathy (Ex): This power works like the druid's wild empathy class feature, except that a unicorn has a +6 racial bonus on the check.

Skills: Unicorns have a +4 racial bonus on Move Silently checks. *Unicorns have a +3 competence bonus on Survival checks within the boundaries of their forest.

CELESTIAL CHARGER

The celestial charger described here is an 8 HD celestial unicorn with seven levels of cleric.

COMBAT

The save DC for this celestial charger's *neutralize poison* ability (DC 20) is adjusted for its greater Hit Dice and altered Charisma score.

A celestial charger's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Smite Evil (Su): Once per day a celestial charger can make a normal melee attack to deal 15 points of extra damage against an evil foe.

Cleric Spells Prepared (6/7/6/5/4; save DC 18 + spell level): 0—*detect magic, detect poison* (2), *light, virtue* (2); 1st—*bless* (2), *calm animals**, *obscuring mist, remove fear, sanctuary, shield of faith*; 2nd—*aid** (2), *animal messenger, lesser restoration, remove paralysis, shield other*; 3rd—*prayer, protection from energy, remove curse, searing light* (2); 4th—*air walk, divine power, holy smite*, restoration*.

*Domain spell. Domains: Animal and Good.

VAMPIRE

Vampires appear just as they did in life, although their features are often hardened and feral, with the predatory look of wolves.

Like liches, they often embrace finery and decadence and may assume the guise of nobility. Despite their human appearance, vampires can be easily recognized, for they cast no shadows and throw no reflections in mirrors.

Vampires speak any languages they knew in life.

CREATING A VAMPIRE

"Vampire" is an acquired template that can be added to any humanoid or monstrous humanoid creature (referred to hereafter as the base creature).

A vampire uses all the base creature's statistics and special abilities except as noted here.

Size and Type: The creature's type changes to undead (augmented humanoid or monstrous humanoid). Do not recalculate base attack bonus, saves, or skill points. Size is unchanged.

Hit Dice: Increase all current and future Hit Dice to d12s.

Speed: Same as the base creature. If the base creature has a swim speed, the vampire retains the ability to swim and is not vulnerable to immersion in running water (see below).

Armor Class: The base creature's natural armor bonus improves by +6.

Attack: A vampire retains all the attacks of the base creature and also gains a slam attack if it didn't already have one. If the base creature can use weapons, the vampire retains this ability. A creature with natural weapons retains those natural weapons. A vampire fighting without weapons uses either its slam attack or its primary natural weapon (if it has any). A vampire armed with a weapon uses its slam or a weapon, as it desires.

Full Attack: A vampire fighting without weapons uses either its slam attack (see above) or its natural weapons (if it has any). If armed with a weapon, it usually uses the weapon as its primary attack along with a slam or other natural weapon as a natural secondary attack.

Damage: Vampires have slam attacks. If the base creature does not have this attack form, use the appropriate damage value from the table below according to the vampire's size. Creatures that have other kinds of natural weapons retain their old damage values or use the appropriate value from the table below, whichever is better.

Size	Damage
Fine	1
Diminutive	1d2
Tiny	1d3
Small	1d4
Medium	1d6
Large	1d8
Huge	2d6

Gargantuan	2d8
Colossal	4d6

Special Attacks: A vampire retains all the special attacks of the base creature and gains those described below. Saves have a DC of $10 + 1/2$ vampire's HD + vampire's Cha modifier unless noted otherwise.

Blood Drain (Ex): A vampire can suck blood from a living victim with its fangs by making a successful grapple check. If it pins the foe, it drains blood, dealing 1d4 points of Constitution drain each round the pin is maintained. On each such successful attack, the vampire gains 5 temporary hit points.

Children of the Night (Su): Vampires command the lesser creatures of the world and once per day can call forth 1d6+1 rat swarms, 1d4+1 bat swarms, or a pack of 3d6 wolves as a standard action. (If the base creature is not terrestrial, this power might summon other creatures of similar power.) These creatures arrive in 2d6 rounds and serve the vampire for up to 1 hour.

Dominate (Su): A vampire can crush an opponent's will just by looking onto his or her eyes. This is similar to a gaze attack, except that the vampire must use a standard action, and those merely looking at it are not affected. Anyone the vampire targets must succeed on a Will save or fall instantly under the vampire's influence as though by a *dominate person* spell (caster level 12th). The ability has a range of 30 feet.

Create Spawn (Su): A humanoid or monstrous humanoid slain by a vampire's energy drain rises as a vampire spawn (see the Vampire Spawn entry) 1d4 days after burial.

If the vampire instead drains the victim's Constitution to 0 or lower, the victim returns as a spawn if it had 4 or less HD and as a vampire if it had 5 or more HD. In either case, the new vampire or spawn is under the command of the vampire that created it and remains enslaved until its master's destruction. At any given time a vampire may have enslaved spawn totaling no more than twice its own Hit Dice; any spawn it creates that would exceed this limit are created as free-willed vampires or vampire spawn. A vampire that is enslaved may create and enslave spawn of its own, so a master vampire can control a number of lesser vampires in this fashion. A vampire may voluntarily free an enslaved spawn in order to enslave a new spawn, but once freed, a vampire or vampire spawn cannot be enslaved again.

Energy Drain (Su): Living creatures hit by a vampire's slam attack (or any other natural weapon the vampire might possess) gain two negative levels. For each negative level bestowed, the vampire gains 5 temporary hit points. A vampire can use its energy drain ability once per round.

Special Qualities: A vampire retains all the special qualities of the base creature and gains those described below.

Alternate Form (Su): A vampire can assume the shape of a bat, dire bat, wolf, or dire wolf as a standard action. This ability is similar to a *polymorph* spell cast by a 12th-level character, except that the vampire does not regain hit points for changing form and must choose from among the forms mentioned here. While in its alternate form, the vampire loses its natural slam attack and dominate ability, but it gains the natural weapons and extraordinary special attacks of its new form. It can remain in that form until it assumes another or until the next sunrise. (If the base creature is not terrestrial, this power might allow other forms.)

Damage Reduction (Su): A vampire has damage reduction 10/silver and magic. A vampire's natural weapons are treated as magic weapons for the purpose of overcoming damage reduction.

Fast Healing (Ex): A vampire heals 5 points of damage each round so long as it has at least 1 hit point. If reduced to 0 hit points in combat, it automatically assumes gaseous form and attempts to escape. It must reach its coffin home within 2 hours or be utterly destroyed. (It can travel up to nine miles in 2 hours.) Any additional damage dealt to a vampire forced into gaseous form has no effect. Once at rest in its coffin, a vampire is helpless. It regains 1 hit point after 1 hour, then is no longer helpless and resumes healing at the rate of 5 hit points per round.

Gaseous Form (Su): As a standard action, a vampire can assume gaseous form at will as the spell (caster level 5th), but it can remain gaseous indefinitely and has a fly speed of 20 feet with perfect maneuverability.

Resistances (Ex): A vampire has resistance to cold 10 and electricity 10.

Spider Climb (Ex): A vampire can climb sheer surfaces as though with a *spider climb* spell.

Turn Resistance (Ex): A vampire has +4 turn resistance.

Abilities: Increase from the base creature as follows: Str +6, Dex +4, Int +2, Wis +2, Cha +4. As an undead creature, a vampire has no Constitution score.

Skills: Vampires have a +8 racial bonus on Bluff, Hide, Listen, Move Silently, Search, Sense Motive, and Spot checks. Otherwise same as the base creature.

Feats: Vampires gain Alertness, Combat Reflexes, Dodge, Improved Initiative, and Lightning Reflexes, assuming the base creature meets the prerequisites and doesn't already have these feats.

Environment: Any, usually same as base creature.

Organization: Solitary, pair, gang (3–5), or troupe (1–2 plus 2–5 vampire spawn)

Challenge Rating: Same as the base creature +2.

Treasure: Double standard.

Alignment: Always evil (any).

Advancement: By character class.

Level Adjustment: Same as the base creature +8.

Vampire Weaknesses

For all their power, vampires have a number of weaknesses.

Repelling a Vampire: Vampires cannot tolerate the strong odor of garlic and will not enter an area laced with it. Similarly, they recoil from a mirror or a strongly presented holy symbol. These things don't harm the vampire—they merely keep it at bay. A recoiling vampire must stay at least 5 feet away from a creature holding the mirror or holy symbol and cannot touch or make melee attacks against the creature holding the item for the rest of the encounter. Holding a vampire at bay takes a standard action.

Vampires are also unable to cross running water, although they can be carried over it while resting in their coffins or aboard a ship.

They are utterly unable to enter a home or other building unless invited in by someone with the authority to do so. They may freely enter public places, since these are by definition open to all.

Slaying a Vampire: Reducing a vampire's hit points to 0 or lower incapacitates it but doesn't always destroy it (see the note on fast healing). However, certain attacks can slay vampires. Exposing any vampire to direct sunlight disorients it: It can take only a single move action or attack action and is destroyed utterly in the next round if it cannot escape. Similarly, immersing a vampire in running water robs it of one-third of its hit points each round until it is destroyed at the end of the third round of immersion. Driving a wooden stake through a vampire's heart instantly slays the monster. However, it returns to life if the stake is removed, unless the body is destroyed. A popular tactic is to cut off the creature's head and fill its mouth with holy wafers (or their equivalent).

Vampire Characters

Vampires are always evil, which causes characters of certain classes to lose some class abilities. In addition, certain classes take additional penalties.

Clerics: Vampire clerics lose their ability to turn undead but gain the ability to rebuke undead. This ability does not affect the vampire's controller or any other vampires that a master controls. A vampire cleric has access to two of the following domains: Chaos, Destruction, Evil, or Trickery.

Sorcerers and Wizards: Vampire sorcerers and wizards retain their class abilities, but if a character has a familiar other than a rat or bat, the link between them is broken, and the familiar shuns its former companion. The character can summon another familiar, but it must be a rat or bat.

Vampire spawn are undead creatures that come into being when vampires slay mortals. Like their creators, spawn remain bound to their coffins and to the soil of their graves. Vampire spawn appear much as they did in life, although their features are often hardened, with a predatory look.

Vampire spawn speak Common.

COMBAT

Vampire spawn use their inhuman strength when engaging mortals, hammering their foes with powerful blows and dashing them against rocks or walls. They also use their gaseous form and flight abilities to strike where opponents are most vulnerable.

Blood Drain (Ex): A vampire spawn can suck blood from a living victim with its fangs by making a successful grapple check. If it pins the foe, it drains blood, dealing 1d4 points of Constitution drain each round. On each such successful drain attack, the vampire spawn gains 5 temporary hit points.

Domination (Su): A vampire spawn can crush an opponent's will just by looking onto his or her eyes. This is similar to a gaze attack, except that the vampire must take a standard action, and those merely looking at it are not affected. Anyone the vampire targets must succeed on a DC 14 Will save or fall instantly under the vampire's influence as though by a *dominate person* spell from a 5thlevel caster. The ability has a range of 30 feet. The save DC is Charisma-based.

Energy Drain (Su): Living creatures hit by a vampire spawn's slam attack gain one negative level. The DC is 14 for the Fortitude save to remove a negative level. The save DC is Charisma-based. For each such negative level bestowed, the vampire spawn gains 5 temporary hit points.

Fast Healing (Ex): A vampire spawn heals 2 points of damage each round so long as it has at least 1 hit point. If reduced to 0 hit points in combat, it automatically assumes gaseous form and attempts to escape. It must reach its coffin home within 2 hours or be utterly destroyed. (It can travel up to nine miles in 2 hours.) Once at rest in its coffin, it is helpless. It regains 1 hit point after 1 hour, then is no longer helpless and resumes healing at the rate of 2 hit points per round.

Gaseous Form (Su): As a standard action, a vampire spawn can assume *gaseous form* at will as the spell (caster level 6th), but it can remain gaseous indefinitely and has a fly speed of 20 feet with perfect maneuverability.

Spider Climb (Ex): A vampire spawn can climb sheer surfaces as though with a *spider climb* spell.

Skills: Vampire spawn have a +4 racial bonus on Bluff, Hide, Listen, Move Silently, Search, Sense Motive, and Spot checks.

VAMPIRE SPAWN WEAKNESSES

Vampire spawn are vulnerable to all attacks and effects that repel or slay vampires. For details, see the Vampire entry.

VARGOUILLE

Small Outsider (Evil, Extraplanar)

Hit Dice:	1d8+1 (5 hp)
Initiative:	+1
Speed:	Fly 30 ft. (good) (6 squares)
Armor Class:	12 (+1 size, +1 Dex), touch 11, flat-footed 11
Base Attack/Grapple:	+1/-3
Attack:	Bite +3 melee (1d4 plus poison)
Full Attack:	Bite +3 melee (1d4 plus poison)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Shriek, kiss, poison
Special Qualities:	Darkvision 60 ft.
Saves:	Fort +3, Ref +3, Will +3
Abilities:	Str 10, Dex 13, Con 12, Int 5, Wis 12, Cha 8
Skills:	Hide +9, Intimidate +3, Listen +5, Move Silently +5, Spot +5
Feats:	Weapon Finesse
Environment:	An evil-aligned plane
Organization:	Cluster (2–5) or mob (6–11)
Challenge Rating:	2
Treasure:	None
Alignment:	Always neutral evil
Advancement:	2–3 HD (Small)

Level Adjustment: —

A vargouille is slightly larger than a human head, about 18 inches high, with a wingspan of 4 feet. It weighs about 10 pounds. Vargouilles speak Infernal.

COMBAT

Vargouilles attack by biting with their jagged teeth. Their special attacks make them even more dangerous. A vargouille's natural weapons, as well as any weapons it wields, are treated as evil-aligned for the purpose of overcoming damage reduction.

Shriek (Su): Instead of biting, a vargouille can open its distended mouth and let out a terrible shriek. Those within 60 feet (except other vargouilles) who hear the shriek and can clearly see the creature must succeed on a DC 12 Fortitude save or be paralyzed with fear for 2d4 rounds or until the monster attacks them, goes out of range, or leaves their sight. A paralyzed creature is susceptible to the vargouille's kiss (see below). A creature that successfully saves cannot be affected again by the same vargouille's shriek for 24 hours. The shriek is a mind-affecting fear effect. The save DC is Constitution-based and includes a +1 racial bonus.

Kiss (Su): A vargouille can kiss a paralyzed target with a successful melee touch attack. An affected opponent must succeed on a DC 15 Fortitude save or begin a terrible transformation that turns the creature into a vargouille within 24 hours (and often much sooner; roll 1d6 separately for each phase of the transformation).

First, over a period of 1d6 hours, all the victim's hair falls out. Within another 1d6 hours thereafter, the ears grow into leathery wings, tentacles sprout on the chin and scalp, and the teeth become long, pointed fangs. During the next 1d6 hours, the victim takes Intelligence drain and Charisma drain equal to 1 point per hour (to a minimum of 3). The transformation is complete 1d6 hours later, when the head breaks free of the body (which promptly dies) and becomes a vargouille. This transformation is interrupted by sunlight, and even a *daylight* spell can delay death, but to reverse the transformation requires *remove disease*. The save DC is Constitution-based and includes a +4 racial bonus.

Poison (Ex): Injury, Fortitude DC 12 or be unable to heal the vargouille's bite damage naturally or magically. A *neutralize poison* or *heal* spell removes the effect, while *delay poison* allows magical healing. The save DC is Constitution-based and includes a +1 racial bonus.

Challenge Rating:	3
Treasure:	None
Alignment:	Always lawful evil
Advancement:	5–8 HD (Medium)

Level Adjustment: —

A wight's appearance is a weird and twisted reflection of the form it had in life. A wight is about the height and weight of a human.

Wights speak Common.

COMBAT

Wights attack by hammering with their fists.

Create Spawn (Su): Any humanoid slain by a wight becomes a wight in 1d4 rounds. Spawns are under the command of the

wight that created them and remain enslaved until its death. They do not possess any of the abilities they had in life. **Energy Drain (Su):** Living creatures hit by a wight's slam attack gain one negative level. The DC is 14 for the Fortitude save to remove a negative level. The save DC is Charisma-based. For each such negative level bestowed, the wight gains 5 temporary hit points.

Skills: Wights have a +8 racial bonus on Move Silently checks.

Environment:	Temperate marshes
Organization:	Solitary, pair, or string (3–4)
Challenge Rating:	6
Treasure:	1/10 coins; 50% goods; 50% items
Alignment:	Usually chaotic evil
Advancement:	10–18 HD (Small)

Level Adjustment: —

Will-o'-wisps can be yellow, white, green, or blue. They are easily mistaken for lanterns, especially in the foggy marshes and swamps where they reside. A will-o'-wisp's body is a globe of spongy material about 1 foot across and weighing about 3 pounds, and its glowing body sheds as much light as a torch.

Will-o'-wisps speak Common and Auran. They have no vocal apparatus but can vibrate to create a voice with a ghostly sound.

COMBAT

Will-o'-wisps usually avoid combat. They prefer to confuse and bewilder adventurers, luring them into morasses or other hazardous places. When they are forced to fight, they loose small electrical shocks, which act as melee touch attacks.

Immunity to Magic (Ex): A will-o'-wisp is immune to most spells or spell-like abilities that allow spell resistance, except *magic missile* and *maze*.

Natural Invisibility (Ex): A startled or frightened will-o'-wisp can extinguish its glow, effectively becoming invisible as the spell.

WINTER WOLF

Large Magical Beast (Cold)

Hit Dice:	6d10+18 (51 hp)
Initiative:	+5
Speed:	50 ft. (10 squares)
Armor Class:	15 (-1 size, +1 Dex, +5 natural), touch 10, flat-footed 14
Base Attack/Grapple:	+6/+14
Attack:	Bite +9 melee (1d8+6 plus 1d6 cold)
Full Attack:	Bite +9 melee (1d8+6 plus 1d6 cold)
Space/Reach:	10 ft./5 ft.

Special Attacks:	Breath weapon, freezing bite, trip
Special Qualities:	Darkvision 60 ft., immunity to cold, low-light vision, scent, vulnerability to fire
Saves:	Fort +8, Ref +6, Will +3
Abilities:	Str 18, Dex 13, Con 16, Int 9, Wis 13, Cha 10
Skills:	Hide -1*, Listen +6, Move Silently +7, Spot +6, Survival +1*
Feats:	Alertness, Improved Initiative, Track
Environment:	Cold forests
Organization:	Solitary, pair, or pack (3–5)
Challenge Rating:	5
Treasure:	1/10 coins; 50% goods; 50% items
Alignment:	Usually neutral evil
Advancement:	7–9 HD (Large); 10–18 HD (Huge)
Level Adjustment:	+3 (cohort)

A winter wolf grows about 8 feet long and stands about 4-1/2 feet at the shoulder. It weighs about 450 pounds.

Winter wolves can speak Giant and Common.

COMBAT

Winter wolves typically hunt in packs. Their size, cunning, and formidable breath weapon allow them to hunt and kill creatures much larger than themselves. A pack usually circles an opponent, each wolf attacking in turn to exhaust it. If they're in a hurry, white wolves try to pin their foes.

Breath Weapon (Su): 15-foot cone, once every 1d4 rounds, damage 4d6 cold, Reflex DC 16 half. The save DC is Constitution-based.

Freezing Bite (Su): A winter wolf deals an extra 1d6 points of cold damage every time it bites an opponent, as if its bite were a frost weapon.

Trip (Ex): A winter wolf that hits with a bite attack can attempt to trip the opponent (+8 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the winter wolf.

Skills: Winter wolves have a +1 racial bonus on Listen, Move Silently, and Spot checks. Winter wolves have a +2 racial bonus on Hide checks. *Their natural coloration grants them a +7 racial bonus on Hide checks in areas of snow and ice. A winter wolf has a +4 racial bonus on Survival checks when tracking by scent.

Level Adjustment:	+1 (cohort)

A typical worg has gray or black fur, grows to 5 feet long and stands 3 feet tall at the shoulder. It weighs 300 pounds.

More intelligent than their smaller cousins, worgs speak their own language. Some can also speak Common and Goblin.

COMBAT

Mated pairs or packs work together to bring down large game, while lone worgs usually chase down creatures smaller than themselves. Both often use hit-and-run tactics to exhaust their quarry. A pack usually circles a larger opponent: Each wolf attacks in turn, biting and retreating, until the creature is exhausted, at which point the pack moves in for the kill. If they get impatient or heavily outnumber the opponent, worgs attempt to pin it.

Trip (Ex): A worg that hits with a bite attack can attempt to trip the opponent (+3 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the worg.

Skills: A worg has a +1 racial bonus on Listen, Move Silently, and Spot checks, and a +2 racial bonus on Hide checks. *A worg has a +4 racial bonus on Survival checks when tracking by scent.

Wraiths are incorporeal creatures born of evil and darkness. In some cases, the grim silhouette of a wraith might appear armored or outfitted with weapons. This appearance does not affect the creature's AC or combat abilities but only reflects the shape it had in life.

A wraith is about as tall as a human, while a dread wraith is roughly the size of an ogre. Since both are incorporeal, they are weightless.

Wraiths speak Common and Infernal.

COMBAT

Both the wraith and the dread wraith share the following abilities.

Unnatural Aura (Su): Animals, whether wild or domesticated, can sense the unnatural presence of a wraith at a distance of 30 feet. They will not willingly approach nearer than that and panic if forced to do so; they remain panicked as long as they are within that range.

Daylight Powerlessness (Ex): Wraiths are utterly powerless in natural sunlight (not merely a *daylight* spell) and flee from it.

WRAITH

Constitution Drain (Su): Living creatures hit by a wraith's incorporeal touch attack must succeed on a DC 14 Fortitude save or take 1d6 points of Constitution drain. The save DC is Charisma-based. On each such successful attack, the wraith gains 5 temporary hit points.

Create Spawn (Su): Any humanoid slain by a wraith becomes a wraith in 1d4 rounds. Its body remains intact and inanimate, but its spirit is torn free from its corpse and transformed. Spawn are under the command of the wraith that created them and remain enslaved until its death. They do not possess any of the abilities they had in life.

DREAD WRAITH

The oldest and most malevolent wraiths lurk in the depths of forgotten temples and other forsaken places. They can sense the approach of living creatures, and hunger for them. Despite its size, the dread wraith possesses unearthly quickness, and makes use of its Spring Attack feat and natural reach to strike with deadly effect and melt back into the shadows—or the walls.

Lifesense (Su): A dread wraith notices and locates living creatures within 60 feet, just as if it possessed the blindsight ability. It also senses the strength of their life force automatically, as if it had cast *deathwatch*.

Constitution Drain (Su): Living creatures hit by a dread wraith's incorporeal touch attack must succeed on a DC 25 Fortitude save or take 1d8 points of Constitution drain. The save DC is Charisma-based. On each such successful attack, the dread wraith gains 5 temporary hit points.

Create Spawn (Su): Any humanoid slain by a dread wraith becomes a wraith in 1d4 rounds. Its body remains intact and inanimate, but its spirit is torn free from its corpse and transformed. Spawn are under the command of the wraith that created them and remain enslaved until its death. They do not possess any of the abilities they had in life.

A distant cousin to the true dragons, the wyvern is a huge flying lizard with a poisonous stinger in its tail.

A wyvern's body is 15 feet long, and dark brown to gray; half that length is tail. Its wingspan is about 20 feet. A wyvern weighs about one ton.

Wyverns speak Draconic, but usually don't bother with anything more elaborate than a loud hiss or a deep-throated growl much like that of a bull alligator.

COMBAT

Wyverns are rather stupid but always aggressive: They attack nearly anything that isn't obviously more powerful than themselves. A wyvern dives from the air, snatching the opponent with its talons and stinging it to death. A wyvern can slash with its talons only when making a flyby attack.

Improved Grab (Ex): To use this ability, a wyvern must hit with its talons. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and stings.

Poison (Ex): Injury, Fortitude DC 17, initial and secondary damage 2d6 Con. The save DC is Constitution-based.

Skills: Wyverns have a +3 racial bonus on Spot checks.

A xill stands 4 to 5 feet tall and weighs about 100 pounds. Xills speak Infernal.

COMBAT

Xills are dangerous opponents, attacking with all four limbs. More civilized ones use weapons, usually fighting with two at a time so as to leave two claws free for grab attacks. Xills typically lie in wait on the Ethereal Plane for suitable prey to happen by, then ambush it using their planewalk ability. They make full use of their Tumble skill in combat: Usually, one or two distract physically powerful enemies by attacking, then assuming a defensive stance while their fellows maneuver to advantage.

Implant (Ex): As a standard action, a xill can lay eggs inside a paralyzed creature. The young emerge about 90 days later, literally devouring the host from inside. A *remove disease* spell rids a victim of the egg, as does a DC 25 Heal check. If the check fails, the healer can try again, but each attempt (successful or not) deals 1d4 points of damage to the patient.

Improved Grab (Ex): To use this ability, a xill must hit with one or more claw attacks. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. It receives a +2 bonus on the grapple check for each claw that hits. If it wins the grapple check and maintains the hold in the next round, it automatically bites the foe at that time. The bite deals no damage but injects a paralyzing venom.

Paralysis (Ex): Those bitten by a xill must succeed on a DC 14 Fortitude save or be paralyzed for 1d4 hours. The save DC is

Constitution-based.

Planewalk (Su): These planar travelers like to slip between the folds of space to attack enemies as though from thin air. They can cross from the Ethereal Plane with a move action but take 2 rounds to cross back, during which time they are immobile. As a xill fades away, it becomes harder to hit: Opponents have a 20% miss chance in the first round and a 50% miss chance in the second. A xill can planewalk with a willing or helpless creature.

Minor xorns are about 3 feet tall and wide and weigh about 120 pounds. Average xorns are about 5 feet tall and wide, weighing about 600 pounds. Elder xorns are about 8 feet tall and wide and weigh about 9,000 pounds. Xorns speak Common and Terran.

COMBAT

Xorns do not attack fleshly beings except to defend themselves or their property, since they cannot digest meat. Xorns are indifferent to creatures of the Material Plane—with the sole exception of anyone carrying a significant amount of precious

metals or minerals, which xorns eat. They can smell food up to 20 feet away. A xorn can be quite aggressive when seeking food, especially on the Material Plane, where such sustenance is harder to find than it is on its native plane. A xorn's favorite mode of attack is to wait just beneath a stone surface until a foe comes within reach, then emerge suddenly. Groups of xorns often send one of their number to the surface to negotiate for food while the remainder position themselves for a surprise attack.

All-Around Vision (Ex): A xorn's symmetrically placed eyes allow it to look in any direction, providing a +4 racial bonus on Spot and Search checks. A xorn can't be flanked.

Earth Glide (Ex): A xorn can glide through stone, dirt, or almost any other sort of earth except metal as easily as a fish swims through water. Its burrowing leaves behind no tunnel or hole, nor does it create any ripple or other signs of its presence. A *move earth* spell cast on an area containing a burrowing xorn flings the xorn back 30 feet, stunning the creature for 1 round unless it succeeds on a DC 15 Fortitude save.

A yeth hound stands 5 feet tall at the shoulder and weighs about 400 pounds.

Yeth hounds cannot speak, but understand Infernal.

COMBAT

Yeth hounds hunt only at night. They fear the sun and never venture out in daylight, even if their lives depend on it.

A yeth hound's natural weapons, as well as any weapons it wields, are treated as evil-aligned for the purpose of overcoming damage reduction.

Bay (Su): When a yeth hound howls or barks, all creatures except other evil outsiders within a 300-foot spread must succeed on a DC 11 Will save or become panicked for 2d4 rounds. This is a sonic mind-affecting fear effect. Whether or not the save is successful, an affected creature is immune to the same hound's bay for 24 hours. The save DC is Charisma-based.

Trip (Ex): A yeth hound that hits with its bite attack can attempt to trip the opponent (+3 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the yeth hound.

Flight (Su): A yeth hound can cease or resume flight as a free action.

Skills: *A yeth hound has a +4 racial bonus on Survival checks when tracking by scent.

Alignment:	Often neutral
Advancement:	13–16 HD (Huge); 17–36 HD (Gargantuan)

Level Adjustment:

—

A yrthak is blind. It senses sound and movement by means of a special organ on its long tongue. It emits powerfully focused beams of sound from the protrusion on its head. The creature is a yellowish-green color, with the wings and fin being more yellow and the head and body more green. The teeth are yellow.

A yrthak is about 20 feet long, with a wingspan of 40 feet. It weighs about 5,000 pounds.

Despite their intelligence, yrthaks do not speak.

COMBAT

A yrthak prefers to attack from the air, strafing the ground with sonic attacks or snatching up and dropping prey.

Sonic Lance (Su): Once every 2 rounds, a yrthak can focus sonic energy in a ray up to 60 feet long. This is a ranged touch attack that deals 6d6 points of damage to a single target.

Explosion (Su): A yrthak can fire its sonic lance at the ground, a large rock, a stone wall, or the like to create an explosion of shattered stone. This attack deals 2d6 points of piercing damage to all within 10 feet of the effect's center. This counts as a use of the sonic lance attack and thus is usable only once every 2 rounds, and never on the round following a sonic lance attack.

Blindsight (Ex): A yrthak can ascertain all foes within 120 feet. Beyond that range it is considered blinded. Yrthaks are invulnerable to gaze attacks, visual effects of spells such as illusions, and other attack forms that rely on sight. A yrthak whose sense of hearing is impaired is effectively blinded, treating all targets as having total concealment.

Immunities: Yrthaks have immunity to gaze attacks, visual effects, illusions, and other attack forms that rely on sight.

Skills: Yrthaks have a +4 racial bonus on Listen checks.

ZOMBIE

Zombies are corpses reanimated through dark and sinister magic.

Because of their utter lack of intelligence, the instructions given to a newly created zombie must be very simple.

CREATING A ZOMBIE

“Zombie” is an acquired template that can be added to any corporeal creature (other than an undead) that has a skeletal system (referred to hereafter as the base creature).

Size and Type: The creature’s type changes to undead. It retains any subtypes except alignment subtypes and subtypes that indicate kind. It does not gain the augmented subtype. It uses all the base creature’s statistics and special abilities except as noted here.

Hit Dice: Drop any Hit Dice from class levels (to a minimum of 1), double the number of Hit Dice left, and raise them to d12s. If the base creature has more than 10 Hit Dice (not counting those gained with experience), it can’t be made into a zombie with the *animate dead* spell.

Speed: If the base creature can fly, its maneuverability rating drops to clumsy.

Armor Class: Natural armor bonus increases by a number based on the zombie’s size:

Tiny or smaller +0

Small	+1
Medium	+2
Large	+3
Huge	+4
Gargantuan	+7
Colossal	+11

Base Attack: A zombie has a base attack bonus equal to 1/2 its Hit Dice.

Attacks: A zombie retains all the natural weapons, manufactured weapon attacks, and weapon proficiencies of the base creature. A zombie also gains a slam attack.

Damage: Natural and manufactured weapons deal damage normally. A slam attack deals damage depending on the zombie's size. (Use the base creature's slam damage if it's better.)

Fine	1
Diminutive	1d2
Tiny	1d3
Small	1d4
Medium	1d6
Large	1d8
Huge	2d6
Gargantuan	2d8
Colossal	4d6

Special Attacks: A zombie retains none of the base creature's special attacks.

Special Qualities: A zombie loses most special qualities of the base creature. It retains any extraordinary special qualities that improve its melee or ranged attacks. A zombie gains the following special quality.

Single Actions Only (Ex): Zombies have poor reflexes and can perform only a single move action or attack action each round. A zombie can move up to its speed and attack in the same round, but only if it attempts a charge.

Saves: Base save bonuses are Fort +1/3 HD, Ref +1/3 HD, and Will +1/2 HD + 2.

Abilities: A zombie's Strength increases by +2, its Dexterity decreases by 2, it has no Constitution or Intelligence score, its Wisdom changes to 10, and its Charisma changes to 1.

Skills: A zombie has no skills.

Feats: A zombie loses all feats of the base creature and gains Toughness.

Environment: Any land and underground.

Organization: Any.

Challenge Rating: Depends on Hit Dice, as follows:

Hit Dice	Challenge Rating
1/2	1/8
1	1/4
2	1/2
4	1
6	2
8–10	3
12–14	4
15–16	5
18–20	6

Treasure: None.

Alignment: Always neutral evil.

Advancement: As base creature, but double Hit Dice (maximum 20), or — if the base creature advances by character class.

MONSTERS (ANIMALS)

This section provides statistics and basic information for many common kinds of mundane animals. These creatures generally operate on instinct, driven by simple needs such as food and reproduction. Most animals, even predators, do not attack unless they or their young are threatened.

Animals are not capable of detailed reasoning, although with the Handle Animal skill it is possible to tame an animal and teach it to perform certain tricks.

Some herbivorous animals do not normally use their natural weapons to attack. As such, their natural weapons are treated as secondary attacks. The animal's attack and damage entries note this fact, with an explanatory footnote.

Animal Traits: An animal possesses the following traits (unless otherwise noted in a creature's entry).

—Intelligence score of 1 or 2 (no creature with an Intelligence score of 3 or higher can be an animal).

—Low-light vision.

—*Alignment:* Always neutral. Animals are not governed by a human sense of morality.

—*Treasure:* None. Animals never possess treasure.

Level Adjustment: —

Baboons are powerful and aggressive primates adapted to life on the ground. They prefer open spaces but climb trees to find safe places to rest overnight. A typical baboon is the size of a big dog.

Males can be 2 to 4 feet long and weigh as much as 90 pounds.

Combat

Baboons usually attack in groups.

Skills: Baboons have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

Feats:	Track ^B , Weapon Finesse
Environment:	Temperate forests
Organization:	Solitary, pair, or cete (3–5)
Challenge Rating:	1/2
Advancement:	2 HD (Small)

Level Adjustment: —

The badger is a furry animal with a squat, powerful body. Its strong forelimbs are armed with long claws for digging. An adult badger is 2 to 3 feet long and weighs 25 to 35 pounds.

Combat

Badgers attack with their sharp claws and teeth.

Rage (Ex): A badger that takes damage in combat flies into a berserk rage on its next turn, clawing and biting madly until either it or its opponent is dead. It gains +4 to Strength, +4 to Constitution, and –2 to Armor Class. The creature cannot end its rage voluntarily.

Skills: A badger has a +4 racial bonus on Escape Artist checks.

BAT

Diminutive Animal

Hit Dice:	1/4 d8 (1 hp)
Initiative:	+2
Speed:	5 ft (1 square), fly 40 ft. (good)

Skills:	Hide +14, Listen +8*, Move Silently +6, Spot +8*
Feats:	Alertness
Environment:	Temperate deserts
Organization:	Colony (10–40) or crowd (10–50)
Challenge Rating:	1/10
Advancement:	—

Level Adjustment: —

Bats are nocturnal flying mammals. The statistics presented here describe small, insectivorous bats.

Combat

Blindsight (Ex): A bat notices and locates creatures within 20 feet. Opponents still have 100% concealment against a creature with blindsight.

Skills: *A bat has a +4 racial bonus on Spot and Listen checks. These bonuses are lost if its blindsight is negated.

BEAR, BLACK

Medium Animal

Hit Dice:	3d8+6 (19 hp)
Initiative:	+1
Speed:	40 ft. (8 squares)
Armor Class:	13 (+1 Dex, +2 natural), touch 11, flat-footed 12
Base Attack/Grapple:	+2/+6
Attack:	Claw +6 melee (1d4+4)
Full Attack:	2 claws +6 melee (1d4+4) and bite +1 melee (1d6+2)

Abilities:	Str 19, Dex 13, Con 15, Int 2, Wis 12, Cha 6
Skills:	Climb +4, Listen +4, Spot +4, Swim +8
Feats:	Endurance, Run
Environment:	Temperate forests
Organization:	Solitary or pair
Challenge Rating:	2
Advancement:	4–5 HD (Medium)

Level Adjustment: —

The black bear is a forest-dwelling omnivore that usually is not dangerous unless an interloper threatens its cubs or food supply.

Black bears can be pure black, blond, or cinnamon in color and are rarely more than 5 feet long.

Combat

Black bears rip prey with their claws and teeth.

Skills: A black bear has a +4 racial bonus on Swim checks.

BEAR, BROWN

Large Animal

Hit Dice:	6d8+24 (51 hp)
Initiative:	+1
Speed:	40 ft. (8 squares)
Armor Class:	15 (–1 size, +1 Dex, +5 natural), touch 10, flat-footed 14
Base Attack/Grapple:	+4/+16
Attack:	Claw +11 melee (1d8+8)
Full Attack:	2 claws +11 melee (1d8+8) and bite +6 melee (2d6+4)

Space/Reach:	10 ft./5 ft.
Special Attacks:	Improved grab
Special Qualities:	Low-light vision, scent
Saves:	Fort +9, Ref +6, Will +3
Abilities:	Str 27, Dex 13, Con 19, Int 2, Wis 12, Cha 6
Skills:	Listen +4, Spot +7, Swim +12
Feats:	Endurance, Run, Track
Environment:	Cold forests
Organization:	Solitary or pair
Challenge Rating:	4
Advancement:	7–10 HD (Large)

Level Adjustment: —

These massive carnivores weigh more than 1,800 pounds and stand nearly 9 feet tall when they rear up on their hind legs. They are bad-tempered and territorial. The brown bear's statistics can be used for almost any big bear, including the grizzly.

Combat

A brown bear attacks mainly by tearing at opponents with its claws.

Improved Grab (Ex): To use this ability, a brown bear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Skills: A brown bear has a +4 racial bonus on Swim checks.

BEAR, POLAR

Large Animal

Hit Dice:	8d8+32 (68 hp)
Initiative:	+1
Speed:	40 ft. (8 squares), swim 30 ft.
Armor Class:	15 (−1 size, +1 Dex, +5 natural), touch 10, flat-footed 14
Base Attack/Grapple:	+6/+18
Attack:	Claw +13 (1d8+8)
Full Attack:	2 claws +13 melee (1d8+8) and bite +8 melee (2d6+4)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Improved grab
Special Qualities:	Low-light vision, scent
Saves:	Fort +10, Ref +7, Will +3
Abilities:	Str 27, Dex 13, Con 19, Int 2, Wis 12, Cha 6
Skills:	Hide −2*, Listen +5, Spot +7, Swim +16
Feats:	Endurance, Run, Track
Environment:	Cold plains
Organization:	Solitary or pair
Challenge Rating:	4
Advancement:	9–12 HD (Large)

Level Adjustment: —

These long, lean carnivores are slightly taller than brown bears.

Combat

Polar bears fight just as brown bears do.

Improved Grab (Ex): To use this ability, a polar bear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity.

Skills: A polar bear has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *A polar bear's white coat bestows a +12 racial bonus on Hide checks in snowy areas.

BISON

Large Animal

Hit Dice:	5d8+15 (37 hp)
Initiative:	+0
Speed:	40 ft. (8 squares)

Armor Class:	13 (-1 size, +4 natural), touch 9, flat-footed 13
Base Attack/Grapple:	+3/+13
Attack:	Gore +8 melee (1d8+9)
Full Attack:	Gore +8 melee (1d8+9)
Space/Reach:	10 ft./5 ft.
Special Attacks:	Stampede
Special Qualities:	Low-light vision, scent
Saves:	Fort +7, Ref +4, Will +1
Abilities:	Str 22, Dex 10, Con 16, Int 2, Wis 11, Cha 4
Skills:	Listen +7, Spot +5
Feats:	Alertness, Endurance
Environment:	Temperate plains
Organization:	Solitary or herd (6–30)
Challenge Rating:	2
Advancement:	6–7 HD (Large)

Level Adjustment: —

These herd animals can be aggressive when protecting young and during the mating season, but they generally prefer flight to fighting. A bison stands more than 6 feet tall at the shoulder and is 9 to 12 feet long. It weighs 1,800 to 2,400 pounds. The bison's statistics can be used for almost any large herd animal.

Combat

Stampede (Ex): A frightened herd of bison flees as a group in a random direction (but always away from the perceived source of danger). They literally run over anything of Large size or smaller that gets in their way, dealing 1d12 points of damage for each five bison in the herd (Reflex DC 18 half). The save DC is Strength-based.

BOAR

Medium Animal

Hit Dice:	3d8+12 (25 hp)
Initiative:	+0
Speed:	40 ft. (8 squares)
Armor Class:	16 (+6 natural), touch 10, flat-footed 16
Base Attack/Grapple:	+2/+4
Attack:	Gore +4 melee (1d8+3)
Full Attack:	Gore +4 melee (1d8+3)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Ferocity
Special Qualities:	Low-light vision, scent
Saves:	Fort +6, Ref +3, Will +2
Abilities:	Str 15, Dex 10, Con 17, Int 2, Wis 13, Cha 4
Skills:	Listen +7, Spot +5
Feats:	Alertness, Toughness
Environment:	Temperate forests
Organization:	Solitary or herd (5–8)
Challenge Rating:	2
Advancement:	4–5 HD (Medium)

Level Adjustment: —

Though not carnivores, these wild swine are bad-tempered and usually charge anyone who disturbs them. A boar is covered in coarse, grayish-black fur. Adult males are about 4 feet long and 3 feet high at the shoulder.

Combat

Ferocity (Ex): A boar is such a tenacious combatant that it continues to fight without penalty even while disabled or dying.

CAMEL

Large Animal

Hit Dice:	3d8+6 (19 hp)
Initiative:	+3
Speed:	50 ft. (10 squares)

Base Attack/Grapple:	+2/+10
Attack:	Bite +0 melee (1d4+2*)
Full Attack:	Bite +0 melee* (1d4+2*)
Space/Reach:	10 ft./5 ft.
Special Attacks:	—
Special Qualities:	Low-light vision, scent
Saves:	Fort +5, Ref +6, Will +1
Abilities:	Str 18, Dex 16, Con 14, Int 2, Wis 11, Cha 4
Skills:	Listen +5, Spot +5
Feats:	Alertness, Endurance
Environment:	Warm deserts
Organization:	Domesticated or herd (6–30)
Challenge Rating:	1
Advancement:	—

Level Adjustment: —

Camels are known for their ability to travel long distances without food or water.

The statistics presented here are for the dromedary, or one-humped camel, which thrives in warm deserts. A dromedary stands about 7 feet tall at the shoulder, with its hump rising 1 foot higher. The two-humped, or Bactrian, camel is suited to cooler, rocky areas. It is stockier, slower (speed 40 feet), and has a higher Constitution score (16).

Carrying Capacity: A light load for a camel is up to 300 pounds; a medium load, 301–600 pounds; and a heavy load, 601–900 pounds. A camel can drag 4,500 pounds.

Combat

*A camel's bite is treated as a secondary attack and adds only half the camel's Strength bonus to the damage roll.

CAT

Tiny Animal

Hit Dice:	1/2 d8 (2 hp)
Initiative:	+2
Speed:	30 ft. (6 squares)

Base Attack/Grapple:	+0/-12
Attack:	Claw +4 melee (1d2–4)
Full Attack:	2 claws +4 melee (1d2–4) and bite –1 melee (1d3–4)
Space/Reach:	2-1/2 ft./0 ft.
Special Attacks:	—
Special Qualities:	Low-light vision, scent
Saves:	Fort +2, Ref +4, Will +1
Abilities:	Str 3, Dex 15, Con 10, Int 2, Wis 12, Cha 7
Skills:	Balance +10, Climb +6, Hide +14*, Jump +10, Listen +3, Move Silently +6, Spot +3
Feats:	Weapon Finesse
Environment:	Temperate plains
Organization:	Domesticated or solitary
Challenge Rating:	1/4
Advancement:	—

Level Adjustment: —

The statistics presented here describe a common housecat.

Combat

Cats prefer to sneak up on their prey.

Skills: Cats have a +4 racial bonus on Climb, Hide, and Move Silently checks and a +8 racial bonus on Jump checks. Cats have a +8 racial bonus on Balance checks. They use their Dexterity modifier instead of their Strength modifier for Climb and Jump checks. *In areas of tall grass or heavy undergrowth, the Hide bonus rises to +8.

CHEETAH

Medium Animal

Hit Dice:	3d8+6 (19 hp)
Initiative:	+4
Speed:	50 ft. (10 squares)
Armor Class:	15 (+4 Dex, +1 natural), touch 14, flat-footed 11
Base Attack/Grapple:	+2/+5
Attack:	Bite +6 melee
Full Attack:	Bite +6 melee (1d6+3) and 2 claws +1 melee (1d2+1)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Trip
Special Qualities:	Low-light vision, scent, sprint
Saves:	Fort +5, Ref +7, Will +2
Abilities:	Str 16, Dex 19, Con 15, Int 2, Wis 12, Cha 6
Skills:	Hide +6, Listen +4, Move Silently +6, Spot +4
Feats:	Alertness, Weapon Finesse
Environment:	Warm plains
Organization:	Solitary, pair, or family (3–5)
Challenge Rating:	2
Advancement:	4–5 HD (Medium)

Level Adjustment: —

Cheetahs are swift feline predators of the plains. A cheetah is 3 to 5 feet long and weighs 110 to 130 pounds.

Combat

Cheetahs make sudden sprints to bring down prey.

Trip (Ex): A cheetah that hits with a claw or bite attack can attempt to trip the opponent (+3 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the cheetah.

Sprint (Ex): Once per hour, a cheetah can move ten times its normal speed (500 feet) when it makes a charge.

CROCODILE

Medium Animal

Hit Dice:	3d8+9 (22 hp)
Initiative:	+1
Speed:	20 ft. (4 squares), swim 30 ft.
Armor Class:	15 (+1 Dex, +4 natural), touch 11, flat-footed 14
Base Attack/Grapple:	+2/+6
Attack:	Bite +6 melee (1d8+6) or tail slap +6 melee (1d12+6)
Full Attack:	Bite +6 melee (1d8+6) or tail slap +6 melee (1d12+6)
Space/Reach:	5 ft./5 ft.
Special Attacks:	Improved grab
Special Qualities:	Hold breath, low-light vision
Saves:	Fort +6, Ref +4, Will +2
Abilities:	Str 19, Dex 12, Con 17, Int 1, Wis 12, Cha 2
Skills:	Hide +7*, Listen +4, Spot +4, Swim +12
Feats:	Alertness, Skill Focus (Hide)
Environment:	Warm marshes
Organization:	Solitary or colony (6–11)
Challenge Rating:	2
Advancement:	4–5 HD (Medium)

Level Adjustment: —

Crocodiles are aggressive predators 11 to 12 feet long. They lie mostly submerged in rivers or marshes, with only their eyes and nostrils showing, waiting for prey to come within reach.

Combat

Improved Grab (Ex): To use this ability, a crocodile must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, the crocodile establishes a hold on the opponent with its mouth and drags it into deep water, attempting to pin it to the bottom.

Hold Breath (Ex): A crocodile can hold its breath for a number of rounds equal to 4 x its Constitution score before it risks drowning.

Skills: A crocodile has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *A crocodile gains a +4 racial bonus on Hide checks when in the water. Further, a crocodile can lie in the water with only its eyes and nostrils showing, gaining a +10 cover bonus on Hide checks.

CROCODILE, GIANT

Huge Animal

Hit Dice:	7d8+28 (59 hp)
Initiative:	+1
Speed:	20 ft. (4 squares), swim 30 ft.
Armor Class:	16 (-2 size, +1 Dex, +7 natural), touch 9, flat-footed 15
Base Attack/Grapple:	+5/+21
Attack:	Bite +11 melee (2d8+12) or tail slap +11 melee (1d12+12)
Full Attack:	Bite +11 melee (2d8+12) or tail slap +11 melee (1d12+12)
Space/Reach:	15 ft./10 ft.
Special Attacks:	Improved grab
Special Qualities:	Hold breath, low-light vision
Saves:	Fort +9, Ref +6, Will +3
Abilities:	Str 27, Dex 12, Con 19, Int 1, Wis 12, Cha 2
Skills:	Hide +1*, Listen +5, Spot +5, Swim +16
Feats:	Alertness, Endurance, Skill Focus (Hide)
Environment:	Warm marshes
Organization:	Solitary or colony (6–11)
Challenge Rating:	4
Advancement:	8–14 HD (Huge)

Level Adjustment: —

These huge creatures usually live in salt water and can be more than 20 feet long.

Giant crocodiles fight and behave like their smaller cousins.

Feats:	Alertness, Track ^B
Environment:	Temperate plains
Organization:	Solitary or pack (5–12)
Challenge Rating:	1/3
Advancement:	—

Level Adjustment: —

The statistics presented here describe a fairly small dog of about 20 to 50 pounds in weight. They also can be used for small wild canines such as coyotes, jackals, and African wild dogs.

Combat

Dogs generally hunt in packs, chasing and exhausting prey until they can drag it down.

Skills: Dogs have a +4 racial bonus on Jump checks. *Dogs have a +4 racial bonus on Survival checks when tracking by scent.

DOG, RIDING

Medium Animal

Hit Dice:	2d8+4 (13 hp)

Level Adjustment:	—

This category includes working breeds such as collies, huskies, and St. Bernards.

Carrying Capacity: A light load for a riding dog is up to 100 pounds; a medium load, 101–200 pounds; and a heavy load, 201–300 pounds. A riding dog can drag 1,500 pounds.

Combat

If trained for war, these animals can make trip attacks just as wolves do (see the Wolf entry). A riding dog can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

Skills: Riding dogs have a +4 racial bonus on Jump checks. *Riding dogs have a +4 racial bonus on Survival checks when tracking by scent.

DONKEY

Medium Animal

Hit Dice:	2d8+2 (11 hp)
Initiative:	+1
Speed:	30 ft. (6 squares)
Armor Class:	13 (+1 Dex, +2 natural), touch 11, flat-footed 12

Saves:	Fort +3, Ref +4, Will +2
Abilities:	Str 10, Dex 15, Con 12, Int 2, Wis 14, Cha 6
Skills:	Listen +2, Spot +14
Feats:	Weapon Finesse
Environment:	Temperate mountains
Organization:	Solitary or pair
Challenge Rating:	1/2
Advancement:	2–3 HD (Medium)
Level Adjustment:	—

These birds of prey inhabit nearly every terrain and climate, though they all prefer high, secluded nesting spots. A typical eagle is about 3 feet long and has a wingspan of about 7 feet. The statistics presented here can describe any similarly-sized, diurnal bird of prey.

Combat

Eagles dive at prey, raking with their powerful talons.

Skills: Eagles have a +8 racial bonus on Spot checks.

ELEPHANT

Huge Animal

Hit Dice:	11d8+55 (104 hp)

Environment:	Warm plains
Organization:	Solitary or herd (6–30)
Challenge Rating:	7
Advancement:	12–22 HD (Huge)

Level Adjustment:

Massive herbivores of tropical lands, elephants are unpredictable creatures but nevertheless are sometimes used as mounts or beasts of burden.

This entry describes an African elephant. Indian elephants are slightly smaller and weaker (Strength 28), but more readily

trained (Wisdom 15). These statistics can also represent prehistoric creatures such as mammoths and mastodons.

Combat

Elephants tend to charge at threatening creatures.

Trample (Ex): Reflex half DC 25. The save DC is Strength-based.

HAWK

Tiny Animal

Hit Dice:	1d8 (4 hp)
Initiative:	+3

These creatures are similar to eagles but slightly smaller: 1 to 2 feet long, with wingspans of 6 feet or less.

Combat

Hawks combine both talons into a single attack.

Skills: Hawks have a +8 racial bonus on Spot checks.

HORSE

Horses are widely domesticated for riding and as beasts of burden.

Combat

A horse not trained for war does not normally use its hooves to attack. Its hoof attack is treated as a secondary attack and adds only half the horse's Strength bonus to damage. (These secondary attacks are noted with an asterisk in the Attack and Full Attack entries for the heavy horse and the light horse.)

Level Adjustment:	—

Hyenas are pack hunters infamous for their cunning and their unnerving vocalizations. The statistics presented here are for a striped hyena, which is about 3 feet long and weighs about 120 pounds.

Combat

A favorite tactic is to send a few individuals against the foe's front while the rest of the pack circles and attacks from the flanks or rear.

Trip (Ex): A hyena that hits with its bite attack can attempt to trip the opponent (+2 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the hyena.

Skills: *Hyenas have a +4 racial bonus on Hide checks in areas of tall grass or heavy undergrowth.

LEOPARD

Medium Animal

Hit Dice:	3d8+6 (19 hp)
Initiative:	+4
Speed:	40 ft (8 squares), climb 20 ft.

Level Adjustment:	—

These jungle cats are about 4 feet long and weigh about 120 pounds. They usually hunt at night. The statistics presented here can describe any feline of similar size, such as jaguars, panthers, and mountain lions.

Combat

Improved Grab (Ex): To use this ability, a leopard must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can rake.

Pounce (Ex): If a leopard charges a foe, it can make a full attack, including two rake attacks.

Rake (Ex): Attack bonus +6 melee, damage 1d3+1.

Skills: Leopards have a +8 racial bonus on Jump checks and a +4 racial bonus on Hide and Move Silently checks. Leopards have a +8 racial bonus on Balance and Climb checks. A leopard can always choose to take 10 on a Climb check, even if rushed or threatened. *In areas of tall grass or heavy undergrowth, the Hide bonus improves to +8.

Feats:	Alertness, Great Fortitude
Environment:	Warm forests
Organization:	Solitary
Challenge Rating:	2
Advancement:	4–5 HD (Medium)

Level Adjustment: —

This category includes fairly large, carnivorous lizards from 3 to 5 feet long.

Combat

Monitor lizards can be aggressive, using their powerful jaws to tear at prey or enemies.

Skills: A monitor lizard has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. Monitor lizards have a +4 racial bonus on Hide and Move Silently checks. *In forested or overgrown areas, the Hide bonus improves to +8.

MANTA RAY

Skills:	Listen +7, Spot +6, Swim +10
Feats:	Alertness, Endurance
Environment:	Warm aquatic
Organization:	Solitary or school (2–5)
Challenge Rating:	1
Advancement:	5–6 HD (Medium)

Level Adjustment: —

These fish are nonaggressive and generally avoid contact with other creatures. They filter plankton and similar small organisms from the water through their gaping, toothless maws.

Combat

*If threatened, a manta ray uses its size and weight to ram opponents. This is treated as a secondary attack.

Skills: A manta ray has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Skills:	Escape Artist +13, Hide +11, Listen +2, Spot +5, Swim +9
Feats:	Weapon Finesse
Environment:	Warm aquatic
Organization:	Solitary
Challenge Rating:	1
Advancement:	3–6 HD (Medium)

Level Adjustment: —

These bottom-dwelling sea creatures are dangerous only to their prey. If disturbed, they usually try to escape.

Combat

Improved Grab (Ex): To use this ability, an octopus must hit an opponent of any size with its arms attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and automatically deals bite damage.

Ink Cloud (Ex): An octopus can emit a cloud of jet-black ink 10 feet high by 10 feet wide by 10 feet long once per minute as a free action. The cloud provides total concealment, which the octopus normally uses to escape a losing fight. All vision within the cloud is obscured.

Jet (Ex): An octopus can jet backward once per round as a full-round action, at a speed of 200 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Skills: An octopus can change colors, giving it a +4 racial bonus on Hide checks. An octopus also can squeeze and contort its body, giving it a +10 racial bonus on Escape Artist checks. An octopus has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Skills:	Escape Artist +12, Hide +12, Listen +4, Spot +6, Swim +13
Feats:	Alertness, Skill Focus (Hide), Toughness
Environment:	Warm aquatic
Organization:	Solitary
Challenge Rating:	8
Advancement:	9–12 HD (Large); 13–24 HD (Huge)

Level Adjustment: —

These creatures are aggressive and territorial hunters, with arms reaching 10 feet or more in length. Their tentacles are studded with barbs and sharp-edged suckers.

Combat

An opponent can attack a giant octopus's tentacles with a sunder attempt as if they were weapons. A giant octopus's tentacles have 10 hit points each. If a giant octopus is currently grappling a target with the tentacle that is being attacked, it usually uses another limb to make its attack of opportunity against the opponent making the sunder attempt. Severing one of a giant octopus's tentacles deals 5 points of damage to the creature. A giant octopus usually withdraws from combat if it loses four

tentacles. The creature regrows severed limbs in 1d10+10 days.

Constrict (Ex): A giant octopus deals 2d8+6 points of damage with a successful grapple check.

Improved Grab (Ex): To use this ability, a giant octopus must hit an opponent of any size with a tentacle attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Ink Cloud (Ex): A giant octopus can emit a cloud of jet-black ink 20 feet high by 20 feet wide by 20 feet long once per minute as a free action. The cloud provides total concealment, which the octopus normally uses to escape a losing fight. All vision within the cloud is obscured.

Jet (Ex): A giant octopus can jet backward once per round as a full-round action, at a speed of 200 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Skills:	Listen +8*, Spot +7*, Swim +8
Feats:	Weapon Finesse
Environment:	Temperate aquatic
Organization:	Solitary, pair, or school (3–20)
Challenge Rating:	1/2
Advancement:	3–4 HD (Medium); 5–6 HD (Large)

Level Adjustment: —

Porpoises are mammals that tend to be playful, friendly, and helpful. A typical porpoise is 4 to 6 feet long and weighs 110 to 160 pounds. The statistics presented here can describe any small whale of similar size.

Combat

Blindsight (Ex): Porpoises can “see” by emitting high-frequency sounds, inaudible to most other creatures, that allow them to locate objects and creatures within 120 feet. A *silence* spell negates this and forces the porpoise to rely on its vision, which is approximately as good as a human’s.

Hold Breath (Ex): A porpoise can hold its breath for a number of rounds equal to $6 \times$ its Constitution score before it risks drowning.

Skills: A porpoise has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *A porpoise has a +4 racial bonus on Spot and Listen checks. These bonuses are lost if its blindsight is negated.

These omnivorous rodents thrive almost anywhere.

Combat

Rats usually run away. They bite only as a last resort.

Skills: Rats have a +4 racial bonus on Hide and Move Silently checks, and a +8 racial bonus on Balance, Climb, and Swim checks. A rat can always choose to take 10 on Climb checks, even if rushed or threatened. A rat uses its Dexterity modifier instead of its Strength modifier for Climb and Swim checks. A rat has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

The rhinoceros is infamous for its bad temper and willingness to charge intruders.

The statistics presented here are based on the African black rhino, which is 6 to 14 feet long, 3 to 6 feet high at the shoulder, and weighs up to 6,000 pounds. These statistics can describe any herbivore of similar size and similar natural weapons (antlers, horns, tusks, or the like).

Combat

When it is harassed or annoyed, a rhinoceros lowers its head and charges.

Powerful Charge (Ex): A rhinoceros deals 4d6+24 points of damage when it makes a charge.

These carnivorous fish are aggressive and liable to make unprovoked attacks against anything that approaches them. Smaller sharks are from 5 to 8 feet long and not usually dangerous to creatures other than their prey. Large sharks can reach around 15 feet in length and are a serious threat. Huge sharks are true monsters, like great whites, that can exceed 20 feet in length.

Combat

Sharks circle and observe potential prey, then dart in and bite with their powerful jaws.

Blindsight (Ex): A shark can locate creatures underwater within a 30-foot radius. This ability works only when the shark is underwater.

Keen Scent (Ex): A shark can notice creatures by scent in a 180-foot radius and detect blood in the water at ranges of up to a mile.

Skills: A shark has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

SNAKE

Snakes usually are not aggressive and flee when confronted.

Skills: Snakes have a +4 racial bonus on Hide, Listen, and Spot checks and a +8 racial bonus on Balance and Climb checks. A snake can always choose to take 10 on a Climb check, even if rushed or threatened. Snakes use either their Strength modifier or Dexterity modifier for Climb checks, whichever is higher. A snake has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Level Adjustment: —

Constrictor snakes usually are not aggressive and flee when confronted. They hunt for food but do not attempt to make a meal out of any creature that is too large to constrict.

Combat

Constrictor snakes hunt by grabbing prey with their mouths and then squeezing it with their powerful bodies.

Constrict (Ex): On a successful grapple check, a constrictor snake deals 1d3+4 points of damage.

Improved Grab (Ex): To use this ability, a constrictor snake must hit with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

These creatures range widely in size. They are not particularly aggressive, but will often lash out with a bite attack before attempting to retreat.

Combat

Viper snakes rely on their venomous bite to kill prey and defend themselves.

Poison (Ex): A viper snake has a poisonous bite that deals initial and secondary damage of 1d6 Con. The save DC varies by the snake's size, as shown on the table below. The save DCs are Constitution-based.

Size	Fort DC
Tiny	10
Small	10

These free-swimming mollusks are fairly aggressive. They are more feared than sharks in some locales.

Combat

Improved Grab (Ex): To use this ability, a squid must hit an opponent of any size with its arms attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and automatically deals bite damage. *A squid has a +4 racial bonus on grapple checks.

Ink Cloud (Ex): A squid can emit a cloud of jet-black ink 10 feet high by 10 feet wide by 10 feet long once per minute as a free action. The cloud provides total concealment, which the squid normally uses to escape a losing fight. All vision within the cloud is obscured.

Jet (Ex): A squid can jet backward once per round as a full-round action, at a speed of 240 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Skills: A squid has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line

Level Adjustment:	—

These voracious creatures can have bodies more than 20 feet long and attack almost anything they meet.

Combat

An opponent can attack a giant squid's tentacles with a sunder attempt as if they were weapons. A giant squid's tentacles have 10 hit points each. If a giant squid is currently grappling a target with the tentacle that is being attacked, it usually uses another limb to make its attack of opportunity against the opponent making the sunder attempt. Severing one of a giant squid's tentacles deals 5 points of damage to the creature. A giant squid usually withdraws from combat if it loses five tentacles. The creature regrows severed limbs in 1d10+10 days.

Constrict (Ex): A giant squid deals 1d6+8 points of damage with a successful grapple check.

Improved Grab (Ex): To use this ability, a giant squid must hit an opponent of any size with a tentacle attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict. *A giant squid has a +4 racial bonus on grapple checks.

Ink Cloud (Ex): A giant squid can emit a cloud of jet-black ink 20 feet high by 20 feet wide by 20 feet long once per minute as a free action. The cloud provides total concealment, which the squid normally uses to escape a losing fight. All vision within the cloud is obscured.

Jet (Ex): A giant squid can jet backward once per round as a full-round action, at a speed of 320 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Skills: A giant squid has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

These little mammals are aggressive predators but usually confine themselves to smaller prey. The statistics presented here can also apply to ferrets.

Combat

Attach (Ex): If a weasel hits with a bite attack, it uses its powerful jaws to latch onto the opponent's body and automatically deals bite damage each round it remains attached. An attached weasel loses its Dexterity bonus to Armor Class and has an AC of 12. An attached weasel can be struck with a weapon or grappled itself. To remove an attached weasel through grappling, the opponent must achieve a pin against the creature.

Skills: Weasels have a +4 racial bonus on Move Silently checks and a +8 racial bonus on Balance and Climb checks. They use their Dexterity modifier for Climb checks. A weasel can always choose to take 10 on a Climb check, even if rushed or threatened.

WHALE

Some varieties of these seagoing mammals are among the largest animals known. Relatively small whales (such as the orca presented here) can be vicious predators, attacking virtually anything they detect.

Blindsight (Ex): Whales can "see" by emitting high-frequency sounds, inaudible to most other creatures, that allow them to locate objects and creatures within 120 feet. A *silence* spell negates this and forces the whale to rely on its vision, which is approximately as good as a human's.

Hold Breath (Ex): A whale can hold its breath for a number of rounds equal to $8 \times$ its Constitution score before it risks drowning.

Skills: A whale has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line. *A whale has a +4 racial bonus on Spot and Listen checks. These bonuses are lost if its blindsight is negated.

Environment:	Temperate forests
Organization:	Solitary, pair, or pack (7–16)
Challenge Rating:	1
Advancement:	3 HD (Medium); 4–6 HD (Large)
Level Adjustment:	—

Wolves are pack hunters known for their persistence and cunning.

Combat

A favorite tactic is to send a few individuals against the foe's front while the rest of the pack circles and attacks from the flanks or rear.

Trip (Ex): A wolf that hits with a bite attack can attempt to trip the opponent (+1 check modifier) as a free action without making a touch attack or provoking an attack of opportunity. If the attempt fails, the opponent cannot react to trip the wolf.

Skills: *Wolves have a +4 racial bonus on Survival checks when tracking by scent.

WOLVERINE

Medium Animal

Hit Dice:	3d8+15 (28 hp)
Initiative:	+2
Speed:	30 ft. (6 squares), burrow 10 ft., climb 10 ft.
Armor Class:	14 (+2 Dex, +2 natural), touch 12, flat-footed 12

Base Attack/Grapple:	+2/+4

Skills:	Climb +10, Listen +6, Spot +6
Feats:	Alertness, Toughness, Track ^B
Environment:	Cold forests
Organization:	Solitary
Challenge Rating:	2
Advancement:	4–5 HD (Large)

Level Adjustment: —

These creatures are similar to badgers but are bigger, stronger, and even more ferocious.

COMBAT

Rage (Ex): A wolverine that takes damage in combat flies into a berserk rage on its next turn, clawing and biting madly until either it or its opponent is dead. It gains +4 to Strength, +4 to Constitution, and –2 to Armor Class. The creature cannot end its rage voluntarily.

Skills: Wolverines have a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened.

MONSTERS (VERMIN)

These creatures operate on instinct, driven by simple needs such as food and reproduction. Except where noted, vermin attack only when hungry or threatened.

Vermin Traits: Vermin possess the following traits (unless otherwise noted in a creature's entry).

—Mindless: No Intelligence score, and immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).

—Darkvision out to 60 feet.

—*Alignment:* Always neutral. Vermin are not governed by a human sense of morality.

—*Treasure:* Vermin generally possess no treasure. For those that do, this treasure consists of possessions formerly owned by a creature that the monster has killed.

Giant ants are among the hardiest and most adaptable vermin. Soldiers and workers are about 6 feet long, while queens can grow to a length of 9 feet.

Acid Sting (Ex): A giant soldier ant has a stinger and an acid-producing gland in its abdomen. If it successfully grabs an opponent, it can attempt to sting each round (+3 attack bonus). A hit with the sting attack deals 1d4+1 points of piercing damage and 1d4 points of acid damage.

Improved Grab (Ex): To use this ability, a giant ant must hit with its bite attack. A giant soldier ant that wins the ensuing grapple check establishes a hold and can sting.

Skills: *Giant ants have a +4 racial bonus on Survival checks when tracking by scent and a +8 racial bonus on Climb checks. A giant ant can always choose to take 10 on Climb checks, even if rushed or threatened.

Challenge Rating:	1
Treasure:	No coins; 1/4 goods (honey only); no items
Advancement:	4–6 HD (Medium); 7–9 HD (Large)

Level Adjustment: —

Although many times larger, growing to a length of about 5 feet, giant bees behave generally the same as their smaller cousins. Giant bees are usually not aggressive except when defending themselves or their hive.

Poison (Ex): Injury, Fortitude DC 11, initial and secondary damage 1d4 Con. The save DC is Constitution-based. A giant bee that successfully stings another creature pulls away, leaving its stinger in the creature. The bee then dies.

Skills: Giant bees have a +4 racial bonus on Spot checks. *They also have a +4 racial bonus on Survival checks to orient themselves.

GIANT BOMBARDIER BEETLE

Medium Vermin

Hit Dice:	2d8+4 (13 hp)
Initiative:	+0
Speed:	30 ft. (6 squares)
Armor Class:	16 (+6 natural), touch 10, flat-footed 16
Base Attack/Grapple:	+1/+2

Feats:	—
Environment:	Warm forests
Organization:	Cluster (2–5) or click (6–11)
Challenge Rating:	2
Advancement:	3–4 HD (Medium); 5–6 HD (Large)

Level Adjustment: —

These creatures feed primarily on carrion and offal, gathering heaps of the stuff in which to build nests and lay eggs. A giant bombardier beetle is about 6 feet long. Giant bombardier beetles normally attack only to defend themselves, their nests, or their eggs.

Acid Spray (Ex): When attacked or disturbed, the creature can release a 10-foot cone of acidic vapor once per round. Those within the cone must succeed on a DC 13 Fortitude save or take 1d4+2 points of acid damage. The save DC is Constitution-based.

GIANT FIRE BEETLE

Small Vermin

Hit Dice:	1d8 (4 hp)

Environment:	Warm plains
Organization:	Cluster (2–5) or colony (6–11)
Challenge Rating:	1/3
Advancement:	2–3 HD (Small)

Level Adjustment: —

These luminous nocturnal insects are prized by miners and adventurers. They have two glands, one above each eye, that produce a red glow. The glands' luminosity persists for 1d6 days after removal from the beetle, illuminating a roughly circular area with a 10-foot radius. Giant fire beetles are about 2 feet long.

GIANT STAG BEETLE

Large Vermin

Hit Dice:	7d8+21 (52 hp)
Initiative:	+0
Speed:	20 ft. (4 squares)

Organization:	Cluster (2–5) or mass (6–11)
Challenge Rating:	4
Alignment:	Always neutral
Advancement:	8–10 HD (Large); 11–21 HD (Huge)

Level Adjustment: —

These creatures are serious pests that greedily devour cultivated crops. A single beetle can strip an entire farm in short order. An adult giant stag beetle is about 10 feet long.

Trample (Ex): Reflex half DC 19. The save DC is Strength-based.

GIANT PRAYING MANTIS

Skills:	Hide -1*, Spot +6
Feats:	—
Environment:	Temperate forests
Organization:	Solitary
Challenge Rating:	3
Advancement:	5–8 HD (Large); 9–12 HD (Huge)

Level Adjustment: —

This patient carnivore remains completely still as it waits for prey to come near.

Improved Grab (Ex): To use this ability, a giant praying mantis must hit with its claws attack. If it wins the ensuing grapple check, it establishes a hold and makes a bite attack as a primary attack (at its full +6 attack bonus).

Skills: A giant praying mantis has a +4 racial bonus on Hide and Spot checks. *Because of its camouflage, the Hide bonus increases to +12 when a mantis is surrounded by foliage.

Monstrous scorpions are likely to attack any creature that approaches, and they usually charge when attacking prey.

Constrict (Ex): A monstrous scorpion deals automatic claw damage on a successful grapple check.

Improved Grab (Ex): To use this ability, a monstrous scorpion must hit with a claw attack. A monstrous scorpion can use either its Strength modifier or Dexterity modifier for grapple checks, whichever is better.

Poison (Ex): A monstrous scorpion has a poisonous sting. The details vary by the scorpion's size, as follows. The save DCs are Constitution-based. The indicated damage is initial and secondary damage.

Size	Fort DC	Damage	Size	Fort DC	Damage
------	---------	--------	------	---------	--------

Tiny	12	1 Con	Huge	18	1d6 Con
Small	12	1d2 Con	Gargantuan	23	1d8 Con
Medium	13	1d3 Con	Colossal	33	1d10 Con
Large	14	1d4 Con			

Skills: A monstrous scorpion has a +4 racial bonus on Climb, Hide, and Spot checks.

All monstrous spiders are aggressive predators that use their poisonous bites to subdue or kill prey.

Monstrous spiders come in two general types: hunters and web-spinners. Hunters rove about, while web-spinners usually attempt to trap prey. Hunting spiders can spin webs to use as lairs, but cannot use their webs as weapons the way web-spinners can. A hunting spider has a base land speed 10 feet faster than the figures given in the statistics blocks.

Poison (Ex): A monstrous spider has a poisonous bite. The details vary by the spider's size, as shown on the table below. The save DCs are Constitution-based. The indicated damage is initial and secondary damage.

Size	Fort DC	Damage	Size	Fort DC	Damage
Tiny	10	1d2 Str	Huge	16	1d8 Str
Small	10	1d3 Str	Gargantuan	20	2d6 Str
Medium	12	1d4 Str	Colossal	28	2d8 Str
Large	13	1d6 Str			

Web (Ex): Both types of monstrous spiders often wait in their webs or in trees, then lower themselves silently on silk strands and leap onto prey passing beneath. A single strand is strong enough to support the spider and one creature of the same size. Web-spinners can throw a web eight times per day. This is similar to an attack with a net but has a maximum range of 50 feet, with a range increment of 10 feet, and is effective against targets up to one size category larger than the spider. An entangled creature can escape with a successful Escape Artist check or burst it with a Strength check. Both are standard actions whose DCs are given in the table below. The check DCs are Constitution-based, and the Strength check DC includes a +4 racial bonus.

Web-spinners often create sheets of sticky webbing from 5 to 60 feet square, depending on the size of the spider. They usually position these sheets to snare flying creatures but can also try to trap prey on the ground. Approaching creatures must succeed on a DC 20 Spot check to notice a web; otherwise they stumble into it and become trapped as though by a successful web attack. Attempts to escape or burst the webbing gain a +5 bonus if the trapped creature has something to walk on or grab while pulling free. Each 5-foot section has the hit points given on the table, and sheet webs have damage reduction 5/—.

A monstrous spider can move across its own web at its climb speed and can pinpoint the location of any creature touching its web.

Size	Escape Artist DC	Break DC	Hit Points
Tiny	10	14	2
Small	10	14	4
Medium	12	16	6
Large	13	17	12
Huge	16	20	14
Gargantuan	20	24	16
Colossal	28	32	18

Tremorsense (Ex): A monstrous spider can detect and pinpoint any creature or object within 60 feet in contact with the ground, or within any range in contact with the spider's webs.

Skills: Monstrous spiders have a +4 racial bonus on Hide and Spot checks and a +8 racial bonus on Climb checks. A monstrous spider can always choose to take 10 on Climb checks, even if rushed or threatened. Monstrous spiders use either their Strength or Dexterity modifier for Climb checks, whichever is higher. *Hunting spiders have a +10 racial bonus on Jump checks and a +8 racial bonus on Spot checks. Web-spinning spiders have a +8 racial bonus on Hide and Move Silently checks when using their webs.

TYPES, SUBTYPES, & SPECIAL ABILITIES

Aberration Type: An aberration has a bizarre anatomy, strange abilities, an alien mindset, or any combination of the three.

Features: An aberration has the following features.

- d8 Hit Dice.
- Base attack bonus equal to 3/4 total Hit Dice (as cleric).
- Good Will saves.
- Skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die, with quadruple skill points for the first Hit Die.
- Traits:* An aberration possesses the following traits (unless otherwise noted in a creature's entry).
- Darkvision out to 60 feet.
- Proficient with its natural weapons. If generally humanoid in form, proficient with all simple weapons and any weapon it is described as using.
- Proficient with whatever type of armor (light, medium, or heavy) it is described as wearing, as well as all lighter types. Aberrations not indicated as wearing armor are not proficient with armor. Aberrations are proficient with shields if they are proficient with any form of armor.
- Aberrations eat, sleep, and breathe.

Ability Score Loss (Su): Some attacks reduce the opponent's score in one or more abilities. This loss can be temporary (ability damage) or permanent (ability drain).

Ability Damage: This attack damages an opponent's ability score. The creature's descriptive text gives the ability and the amount of damage. If an attack that causes ability damage scores a critical hit, it deals twice the indicated amount of damage (if the damage is expressed as a die range, roll two dice). Ability damage returns at the rate of 1 point per day for each affected ability.

Ability Drain: This effect permanently reduces a living opponent's ability score when the creature hits with a melee attack. The creature's descriptive text gives the ability and the amount drained. If an attack that causes ability drain scores a critical hit, it drains twice the indicated amount (if the damage is expressed as a die range, roll two dice). Unless otherwise specified in the creature's description, a draining creature gains 5 temporary hit points (10 on a critical hit) whenever it drains an ability score no matter how many points it drains. Temporary hit points gained in this fashion last for a maximum of 1 hour. Some ability drain attacks allow a Fortitude save (DC $10 + 1/2$ draining creature's racial HD + draining creature's Cha modifier; the exact DC is given in the creature's descriptive text). If no saving throw is mentioned, none is allowed.

Alternate Form (Su): A creature with this special quality has the ability to assume one or more specific alternate forms. This ability works much like the *polymorph* spell, except that the creature is limited to the forms specified, and does not regain any hit points for changing its form. Assuming an alternate form results in the following changes to the creature:

- The creature retains the type and subtype of its original form. It gains the size of its new form.
- The creature loses the natural weapons, natural armor, movement modes, and extraordinary special attacks of its original form.
- The creature gains the natural weapons, natural armor, movement modes, and extraordinary special attacks of its new form.
- The creature retains the special qualities of its original form. It does not gain any special qualities of its new form.
- The creature retains the spell-like abilities and supernatural attacks of its old form (except for breath weapons and gaze attacks). It does not gain the spell-like abilities or supernatural attacks of its new form.
- The creature gains the physical ability scores (Str, Dex, Con) of its new form. It retains the mental ability scores (Int, Wis, Cha) of its original form.
- The creature retains its hit points and save bonuses, although its save modifiers may change due to a change in ability scores.
- The creature retains any spellcasting ability it had in its original form, although it must be able to speak intelligibly to cast spells with verbal components and it must have humanlike hands to cast spells with somatic components.
- The creature is effectively camouflaged as a creature of its new form, and it gains a +10 bonus on Disguise checks if it uses this ability to create a disguise.

Air Subtype: This subtype usually is used for elementals and outsiders with a connection to the Elemental Plane Air. Air creatures always have fly speeds and usually have perfect maneuverability.

Angel Subtype: Angels are a race of celestials, or good outsiders, native to the good-aligned Outer Planes.

Traits: An angel possesses the following traits (unless otherwise noted in a creature's entry).

- Darkvision out to 60 feet and low-light vision.
- Immunity to acid, cold, and petrification.

- Resistance to electricity 10 and fire 10.
- +4 racial bonus on saves against poison.
- Protective Aura (Su): Against attacks made or effects created by evil creatures, this ability provides a +4 deflection bonus to AC and a +4 resistance bonus on saving throws to anyone within 20 feet of the angel. Otherwise, it functions as a *magic circle against evil* effect and a *lesser globe of invulnerability*, both with a radius of 20 feet (caster level equals angel's HD). (The defensive benefits from the circle are not included in an angel's statistics block.)
- Tongues (Su): All angels can speak with any creature that has a language, as though using a *tongues* spell (caster level equal to angel's Hit Dice). This ability is always active.

Animal Type: An animal is a living, nonhuman creature, usually a vertebrate with no magical abilities and no innate capacity for language or culture.

Features: An animal has the following features (unless otherwise noted in a creature's entry).

- d8 Hit Dice.
- Base attack bonus equal to 3/4 total Hit Dice (as cleric).
- Good Fortitude and Reflex saves (certain animals have different good saves).
- Skill points equal to (2 + Int modifier, minimum 1) per Hit Die, with quadruple skill points for the first Hit Die.
- Traits:* An animal possesses the following traits (unless otherwise noted in a creature's entry).
- Intelligence score of 1 or 2 (no creature with an Intelligence score of 3 or higher can be an animal).
- Low-light vision.
- Alignment: Always neutral.
- Treasure: None.
- Proficient with its natural weapons only. A noncombative herbivore uses its natural weapons as a secondary attack. Such attacks are made with a -5 penalty on the creature's attack rolls, and the animal receives only 1/2 its Strength modifier as a damage adjustment.
- Proficient with no armor unless trained for war.
- Animals eat, sleep, and breathe.

Aquatic Subtype: These creatures always have swim speeds and thus can move in water without making Swim checks. An aquatic creature can breathe underwater. It cannot also breathe air unless it has the amphibious special quality.

Archon Subtype: Archons are a race of celestials, or good outsiders, native to lawful good-aligned Outer Planes.

Traits: An archon possesses the following traits (unless otherwise noted in a creature's entry).

- Darkvision out to 60 feet and low-light vision.
- Aura of Menace (Su): A righteous aura surrounds archons that fight or get angry. Any hostile creature within a 20-foot radius of an archon must succeed on a Will save to resist its effects. The save DC varies with the type of archon, is Charisma-based, and includes a +2 racial bonus. Those who fail take a -2 penalty on attacks, AC, and saves for 24 hours or until they successfully hit the archon that generated the aura. A creature that has resisted or broken the effect cannot be affected again by the same archon's aura for 24 hours.
- Immunity to electricity and petrification.
- +4 racial bonus on saves against poison.
- Magic Circle against Evil (Su): A magic circle against evil effect always surrounds an archon (caster level equals the archon's Hit Dice). (The defensive benefits from the circle are not included in an archon's statistics block.)
- Teleport (Su): Archons can use greater teleport at will, as the spell (caster level 14th), except that the creature can transport only itself and up to 50 pounds of objects.
- Tongues (Su): All archons can speak with any creature that has a language, as though using a *tongues* spell (caster level 14th). This ability is always active.

Augmented Subtype: A creature receives this subtype whenever something happens to change its original type. Some creatures (those with an inherited template) are born with this subtype; others acquire it when they take on an acquired template. The augmented subtype is always paired with the creature's original type. A creature with the augmented subtype usually has the traits of its current type, but the features of its original type.

Blindsight (Ex): Using nonvisual senses, such as acute smell or hearing, a creature with blindsense notices things it cannot see. The creature usually does not need to make Spot or Listen checks to pinpoint the location of a creature within range of its blindsense ability, provided that it has line of effect to that creature. Any opponent the creature cannot see still has total concealment against the creature with blindsense, and the creature still has the normal miss chance when attacking foes that have concealment. Visibility still affects the movement of a creature with blindsense. A creature with blindsense is still denied its Dexterity bonus to Armor Class against attacks from creatures it cannot see.

Blindsight (Ex): This ability is similar to blindsense, but is far more discerning. Using nonvisual senses, such as sensitivity to vibrations, keen smell, acute hearing, or echolocation, a creature with blindsight maneuvers and fights as well as a sighted creature. Invisibility, darkness, and most kinds of concealment are irrelevant, though the creature must have line of effect to a creature or object to discern that creature or object. The ability's range is specified in the creature's descriptive text. The creature usually does not need to make Spot or Listen checks to notice creatures within range of its blindsight ability. Unless noted otherwise, blindsight is continuous, and the creature need do nothing to use it. Some forms of blindsight, however, must be triggered as a free action. If so, this is noted in the creature's description. If a creature must trigger its blindsight ability, the creature gains the benefits of blindsight only during its turn.

Breath Weapon (Su): A breath weapon attack usually deals damage and is often based on some type of energy. Such breath weapons allow a Reflex save for half damage (DC $10 + 1/2$ breathing creature's racial HD + breathing creature's Con modifier; the exact DC is given in the creature's descriptive text). A creature is immune to its own breath weapon unless otherwise noted. Some breath weapons allow a Fortitude save or a Will save instead of a Reflex save.

Change Shape (Su): A creature with this special quality has the ability to assume the appearance of a specific creature or type of creature (usually a humanoid), but retains most of its own physical qualities. A creature cannot change shape to a form more than one size category smaller or larger than its original form. Changing shape results in the following changes to the creature:

- The creature retains the type and subtype of its original form. It gains the size of its new form.
- The creature loses the natural weapons, movement modes, and extraordinary special attacks of its original form.
- The creature gains the natural weapons, movement modes, and extraordinary special attacks of its new form.
- The creature retains all other special attacks and qualities of its original form, except for breath weapons and gaze attacks.
- The creature retains the ability scores of its original form.
- The creature retains its hit points and saves.
- The creature retains any spellcasting ability it had in its original form, although it must be able to speak intelligibly to cast spells with verbal components and it must have humanlike hands to cast spells with somatic components.
- The creature is effectively camouflaged as a creature of its new form, and gains a +10 bonus on Disguise checks if it uses this ability to create a disguise.

Chaotic Subtype: A subtype usually applied only to outsiders native to the chaotic-aligned Outer Planes. Most creatures that have this subtype also have chaotic alignments; however, if their alignments change they still retain the subtype. Any effect that depends on alignment affects a creature with this subtype as if the creature has a chaotic alignment, no matter what its alignment actually is. The creature also suffers effects according to its actual alignment. A creature with the chaotic subtype overcomes damage reduction as if its natural weapons and any weapons it wields were chaotic-aligned (see Damage Reduction, below).

Cold Subtype: A creature with the cold subtype has immunity to cold. It has vulnerability to fire, which means it takes half again as much (+50%) damage as normal from fire, regardless of whether a saving throw is allowed, or if the save is a success or failure.

Constrict (Ex): A creature with this special attack can crush an opponent, dealing bludgeoning damage, after making a successful grapple check. The amount of damage is given in the creature's entry. If the creature also has the improved grab ability it deals constriction damage in addition to damage dealt by the weapon used to grab.

Construct Type: A construct is an animated object or artificially constructed creature.

Features: A construct has the following features.

- 10-sided Hit Dice.
- Base attack bonus equal to 3/4 total Hit Dice (as cleric).
- No good saving throws.
- Skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die, with quadruple skill points for the first Hit Die, if the construct has an Intelligence score. However, most constructs are mindless and gain no skill points or feats.

Traits: A construct possesses the following traits (unless otherwise noted in a creature's entry).

- No Constitution score.
- Low-light vision.
- Darkvision out to 60 feet.
- Immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).
- Immunity to poison, sleep effects, paralysis, stunning, disease, death effects, and necromancy effects.
- Cannot heal damage on their own, but often can be repaired by exposing them to a certain kind of effect (see the creature's description for details) or through the use of the Craft Construct feat. A construct with the fast healing special quality still

benefits from that quality.

- Not subject to critical hits, nonlethal damage, ability damage, ability drain, fatigue, exhaustion, or energy drain.
- Immunity to any effect that requires a Fortitude save (unless the effect also works on objects, or is harmless).
- Not at risk of death from massive damage. Immediately destroyed when reduced to 0 hit points or less.
- Since it was never alive, a construct cannot be raised or resurrected.
- Because its body is a mass of unliving matter, a construct is hard to destroy. It gains bonus hit points based on size, as shown on the following table.

Construct Size	Bonus Hit Points	Construct Size	Bonus Hit Points
Fine	—	Large	30
Diminutive	—	Huge	40
Tiny	—	Gargantuan	60
Small	10	Colossal	80
Medium	20		

- Proficient with its natural weapons only, unless generally humanoid in form, in which case proficient with any weapon mentioned in its entry.
- Proficient with no armor.
- Constructs do not eat, sleep, or breathe.

Damage Reduction (Ex or Su): A creature with this special quality ignores damage from most weapons and natural attacks. Wounds heal immediately, or the weapon bounces off harmlessly (in either case, the opponent knows the attack was ineffective). The creature takes normal damage from energy attacks (even nonmagical ones), spells, spell-like abilities, and supernatural abilities. A certain kind of weapon can sometimes damage the creature normally, as noted below.

The entry indicates the amount of damage ignored (usually 5 to 15 points) and the type of weapon that negates the ability. Some monsters are vulnerable to piercing, bludgeoning, or slashing damage.

Some monsters are vulnerable to certain materials, such as alchemical silver, adamantine, or cold-forged iron. Attacks from weapons that are not made of the correct material have their damage reduced, even if the weapon has an enhancement bonus. Some monsters are vulnerable to magic weapons. Any weapon with at least a +1 magical enhancement bonus on attack and damage rolls overcomes the damage reduction of these monsters. Such creatures' natural weapons (but not their attacks with weapons) are treated as magic weapons for the purpose of overcoming damage reduction.

A few very powerful monsters are vulnerable only to epic weapons; that is, magic weapons with at least a +6 enhancement bonus. Such creatures' natural weapons are also treated as epic weapons for the purpose of overcoming damage reduction. Some monsters are vulnerable to chaotic-, evil-, good-, or lawful-aligned weapons. When a cleric casts *align weapon*, affected weapons might gain one or more of these properties, and certain magic weapons have these properties as well. A creature with an alignment subtype (chaotic, evil, good, or lawful) can overcome this type of damage reduction with its natural weapons and weapons it wields as if the weapons or natural weapons had an alignment (or alignments) that match the subtype(s) of the creature.

When a damage reduction entry has a dash (–) after the slash, no weapon negates the damage reduction.

A few creatures are harmed by more than one kind of weapon. A weapon of either type overcomes this damage reduction.

A few other creatures require combinations of different types of attacks to overcome their damage reduction. A weapon must be both types to overcome this damage reduction. A weapon that is only one type is still subject to damage reduction.

Dragon Type: A dragon is a reptilelike creature, usually winged, with magical or unusual abilities.

Features: A dragon has the following features.

- 12-sided Hit Dice.
- Base attack bonus equal to total Hit Dice (as fighter).
- Good Fortitude, Reflex, and Will saves.

—Skill points equal to $(6 + \text{Int modifier, minimum 1}) \times 4$ per Hit Die, with quadruple skill points for the first Hit Die.

Traits: A dragon possesses the following traits (unless otherwise noted in the description of a particular kind).

- Darkvision out to 60 feet and low-light vision.
- Immunity to magic sleep effects and paralysis effects.
- Proficient with its natural weapons only unless humanoid in form (or capable of assuming humanoid form), in which case proficient with all simple weapons and any weapons mentioned in its entry.
- Proficient with no armor.
- Dragons eat, sleep, and breathe.

Earth Subtype: This subtype usually is used for elementals and outsiders with a connection to the Elemental Plane of Earth. Earth creatures usually have burrow speeds, and most earth creatures can burrow through solid rock.

Elemental Type: An elemental is a being composed of one of the four classical elements: air, earth, fire, or water.

Features: An elemental has the following features.

—8-sided Hit Dice.

—Base attack bonus equal to 3/4 total Hit Dice (as cleric).

—Good saves depend on the element: Fortitude (earth, water) or Reflex (air, fire).

—Skill points equal to $(2 + \text{Int modifier}, \text{minimum } 1)$ per Hit Die, with quadruple skill points for the first Hit Die.

Traits: An elemental possesses the following traits (unless otherwise noted in a creature's entry).

—Darkvision out to 60 feet.

—Immunity to poison, sleep effects, paralysis, and stunning.

—Not subject to critical hits or flanking.

—Unlike most other living creatures, an elemental does not have a dual nature—its soul and body form one unit. When an elemental is slain, no soul is set loose. Spells that restore souls to their bodies, such as *raise dead*, *reincarnate*, and *resurrection*, don't work on an elemental. It takes a different magical effect, such as *limited wish*, *wish*, *miracle*, or *true resurrection*, to restore it to life.

—Proficient with natural weapons only, unless generally humanoid in form, in which case proficient with all simple weapons and any weapons mentioned in its entry.

—Proficient with whatever type of armor (light, medium, or heavy) that it is described as wearing, as well as all lighter types. Elementals not indicated as wearing armor are not proficient with armor. Elementals are proficient with shields if they are proficient with any form of armor.

—Elementals do not eat, sleep, or breathe.

Energy Drain (Su): This attack saps a living opponent's vital energy and happens automatically when a melee or ranged attack hits. Each successful energy drain bestows one or more negative levels (the creature's description specifies how many). If an attack that includes an energy drain scores a critical hit, it drains twice the given amount. Unless otherwise specified in the creature's description, a draining creature gains 5 temporary hit points (10 on a critical hit) for each negative level it bestows on an opponent. These temporary hit points last for a maximum of 1 hour. An affected opponent takes a -1 penalty on all skill checks and ability checks, attack rolls, and saving throws, and loses one effective level or Hit Die (whenever level is used in a die roll or calculation) for each negative level. A spellcaster loses one spell slot of the highest level of spells she can cast and (if applicable) one prepared spell of that level; this loss persists until the negative level is removed. Negative levels remain until 24 hours have passed or until they are removed with a spell, such as *restoration*. If a negative level is not removed before 24 hours have passed, the affected creature must attempt a Fortitude save (DC $10 + 1/2$ draining creature's racial HD + draining creature's Cha modifier; the exact DC is given in the creature's descriptive text). On a success, the negative level goes away with no harm to the creature. On a failure, the negative level goes away, but the creature's level is also reduced by one. A separate saving throw is required for each negative level.

Evil Subtype: A subtype usually applied only to outsiders native to the evil-aligned Outer Planes. Evil outsiders are also called fiends. Most creatures that have this subtype also have evil alignments; however, if their alignments change, they still retain the subtype. Any effect that depends on alignment affects a creature with this subtype as if the creature has an evil alignment, no matter what its alignment actually is. The creature also suffers effects according to its actual alignment. A creature with the evil subtype overcomes damage reduction as if its natural weapons and any weapons it wields were evil-aligned (see Damage Reduction, above).

Extraplanar Subtype: A subtype applied to any creature when it is on a plane other than its native plane. A creature that travels the planes can gain or lose this subtype as it goes from plane to plane. Monster entries assume that encounters with creatures take place on the Material Plane, and every creature whose native plane is not the Material Plane has the extraplanar subtype (but would not have when on its home plane). Every extraplanar creature in this book has a home plane mentioned in its description. Creatures not labeled as extraplanar are natives of the Material Plane, and they gain the extraplanar subtype if they leave the Material Plane. No creature has the extraplanar subtype when it is on a transitive plane, such as the Astral Plane, the Ethereal Plane, and the Plane of Shadow.

Fast Healing (Ex): A creature with the fast healing special quality regains hit points at an exceptionally fast rate, usually 1 or more hit points per round, as given in the creature's entry. Except where noted here, fast healing is just like natural healing. Fast healing does not restore hit points lost from starvation, thirst, or suffocation, and it does not allow a creature to regrow lost body parts. Unless otherwise stated, it does not allow lost body parts to be reattached.

Fear (Su or Sp): Fear attacks can have various effects.

Fear Aura (Su): The use of this ability is a free action. The aura can freeze an opponent (such as a mummy's despair) or function like the *fear* spell. Other effects are possible. A fear aura is an area effect. The descriptive text gives the size and kind of area.

Fear Cones (Sp) and Rays (Su): These effects usually work like the *fear* spell. If a fear effect allows a saving throw, it is a Will save (DC 10 + 1/2 fearsome creature's racial HD + creature's Cha modifier; the exact DC is given in the creature's descriptive text). All fear attacks are mind-affecting fear effects.

Fey Type: A fey is a creature with supernatural abilities and connections to nature or to some other force or place. Fey are usually human-shaped.

Features: A fey has the following features.

—6-sided Hit Dice.

—Base attack bonus equal to 1/2 total Hit Dice (as wizard).

—Good Reflex and Will saves.

—Skill points equal to (6 + Int modifier, minimum 1) per Hit Die, with quadruple skill points for the first Hit Die.

Traits: A fey possesses the following traits (unless otherwise noted in a creature's entry).

—Low-light vision.

—Proficient with all simple weapons and any weapons mentioned in its entry.

—Proficient with whatever type of armor (light, medium, or heavy) that it is described as wearing, as well as all lighter types.

Fey not indicated as wearing armor are not proficient with armor. Fey are proficient with shields if they are proficient with any form of armor.

—Fey eat, sleep, and breathe.

Fire Subtype: A creature with the fire subtype has immunity to fire. It has vulnerability to cold, which means it takes half again as much (+50%) damage as normal from cold, regardless of whether a saving throw is allowed, or if the save is a success or failure.

Flight (Ex or Su): A creature with this ability can cease or resume flight as a free action. If the ability is supernatural, it becomes ineffective in an antimagic field, and the creature loses its ability to fly for as long as the antimagic effect persists.

Frightful Presence (Ex): This special quality makes a creature's very presence unsettling to foes. It takes effect automatically when the creature performs some sort of dramatic action (such as charging, attacking, or snarling). Opponents within range who witness the action may become frightened or shaken. Actions required to trigger the ability are given in the creature's descriptive text. The range is usually 30 feet, and the duration is usually 5d6 rounds. This ability affects only opponents with fewer Hit Dice or levels than the creature has. An affected opponent can resist the effects with a successful Will save (DC 10 + 1/2 frightful creature's racial HD + frightful creature's Cha modifier; the exact DC is given in the creature's descriptive text). An opponent that succeeds on the saving throw is immune to that same creature's frightful presence for 24 hours. Frightful presence is a mind-affecting fear effect.

Gaze (Su): A gaze special attack takes effect when opponents look at the creature's eyes. The attack can have almost any sort of effect: petrification, death, charm, and so on. The typical range is 30 feet, but check the creature's entry for details. The type of saving throw for a gaze attack varies, but it is usually a Will or Fortitude save (DC 10 + 1/2 gazing creature's racial HD + gazing creature's Cha modifier; the exact DC is given in the creature's descriptive text). A successful saving throw negates the effect. A monster's gaze attack is described in abbreviated form in its description. Each opponent within range of a gaze attack must attempt a saving throw each round at the beginning of his or her turn in the initiative order. Only looking directly at a creature with a gaze attack leaves an opponent vulnerable. Opponents can avoid the need to make the saving throw by not looking at the creature, in one of two ways.

Averting Eyes: The opponent avoids looking at the creature's face, instead looking at its body, watching its shadow, tracking it in a reflective surface, and so on. Each round, the opponent has a 50% chance to not need to make a saving throw against the gaze attack. The creature with the gaze attack, however, gains concealment against that opponent.

Wearing a Blindfold: The opponent cannot see the creature at all (also possible to achieve by turning one's back on the creature or shutting one's eyes). The creature with the gaze attack gains total concealment against the opponent.

A creature with a gaze attack can actively gaze as an attack action by choosing a target within range. That opponent must attempt a saving throw but can try to avoid this as described above. Thus, it is possible for an opponent to save against a creature's gaze twice during the same round, once before the opponent's action and once during the creature's turn.

Gaze attacks can affect ethereal opponents. A creature is immune to gaze attacks of others of its kind unless otherwise noted. Allies of a creature with a gaze attack might be affected. All the creature's allies are considered to be averting their eyes from the creature with the gaze attack, and have a 50% chance to not need to make a saving throw against the gaze attack each round. The creature also can veil its eyes, thus negating its gaze ability.

Giant Type: A giant is a humanoid-shaped creature of great strength, usually of at least Large size.

Features: A giant has the following features.

—8-sided Hit Dice.

—Base attack bonus equal to 3/4 total Hit Dice (as cleric).

—Good Fortitude saves.

—Skill points equal to (2 + Int modifier, minimum 1) per Hit Die, with quadruple skill points for the first Hit Die.

Traits: A giant possesses the following traits (unless otherwise noted in a creature's entry).

—Low-light vision.

—Proficient with all simple and martial weapons, as well as any natural weapons.

—Proficient with whatever type of armor (light, medium or heavy) it is described as wearing, as well as all lighter types.

Giants not described as wearing armor are not proficient with armor. Giants are proficient with shields if they are proficient with any form of armor.

—Giants eat, sleep, and breathe.

Goblinoid Subtype: Goblinoids are stealthy humanoids who live by hunting and raiding and who all speak Goblin.

Good Subtype: A subtype usually applied only to outsiders native to the good-aligned Outer Planes. Most creatures that have this subtype also have good alignments; however, if their alignments change, they still retain the subtype. Any effect that depends on alignment affects a creature with this subtype as if the creature has a good alignment, no matter what its alignment actually is. The creature also suffers effects according to its actual alignment. A creature with the good subtype overcomes damage reduction as if its natural weapons and any weapons it wields were good-aligned (see Damage Reduction, above).

Humanoid Type: A humanoid usually has two arms, two legs, and one head, or a humanlike torso, arms, and a head.

Humanoids have few or no supernatural or extraordinary abilities, but most can speak and usually have well-developed societies. They usually are Small or Medium. Every humanoid creature also has a subtype.

Humanoids with 1 Hit Die exchange the features of their humanoid Hit Die for the class features of a PC or NPC class. Humanoids of this sort are presented as 1st-level warriors, which means that they have average combat ability and poor saving throws.

Humanoids with more than 1 Hit Die are the only humanoids who make use of the features of the humanoid type.

Features: A humanoid has the following features (unless otherwise noted in a creature's entry).

—8-sided Hit Dice, or by character class.

—Base attack bonus equal to 3/4 total Hit Dice (as cleric).

—Good Reflex saves (usually; a humanoid's good save varies).

—Skill points equal to (2 + Int modifier, minimum 1) per Hit Die, with quadruple skill points for the first Hit Die, or by character class.

Traits: A humanoid possesses the following traits (unless otherwise noted in a creature's entry).

—Proficient with all simple weapons, or by character class.

—Proficient with whatever type of armor (light, medium, or heavy) it is described as wearing, or by character class. If a humanoid does not have a class and wears armor, it is proficient with that type of armor and all lighter types. Humanoids not indicated as wearing armor are not proficient with armor. Humanoids are proficient with shields if they are proficient with any form of armor.

—Humanoids breathe, eat, and sleep.

Improved Grab (Ex): If a creature with this special attack hits with a melee weapon (usually a claw or bite attack), it deals normal damage and attempts to start a grapple as a free action without provoking an attack of opportunity. No initial touch attack is required. Unless otherwise noted, improved grab works only against opponents at least one size category smaller than the creature. The creature has the option to conduct the grapple normally, or simply use the part of its body it used in the improved grab to hold the opponent. If it chooses to do the latter, it takes a -20 penalty on grapple checks, but is not considered grappled itself; the creature does not lose its Dexterity bonus to AC, still threatens an area, and can use its remaining attacks against other opponents. A successful hold does not deal any extra damage unless the creature also has the constrict special attack. If the creature does not constrict, each successful grapple check it makes during successive rounds automatically deals the damage indicated for the attack that established the hold. Otherwise, it deals constriction damage as well (the amount is given in the creature's descriptive text). When a creature gets a hold after an improved grab attack, it pulls the opponent into its space. This act does not provoke attacks of opportunity. It can even move (possibly carrying away the opponent), provided it can drag the opponent's weight.

Incorporeal Subtype: An incorporeal creature has no physical body. It can be harmed only by other incorporeal creatures, magic weapons or creatures that strike as magic weapons, and spells, spell-like abilities, or supernatural abilities. It is immune to all nonmagical attack forms. Even when hit by spells or magic weapons, it has a 50% chance to ignore any damage from a corporeal source (except for positive energy, negative energy, force effects such as *magic missile*, or attacks made with *ghost touch* weapons). Although it is not a magical attack, holy water can affect incorporeal undead, but a hit with

holy water has a 50% chance of not affecting an incorporeal creature.

An incorporeal creature has no natural armor bonus but has a deflection bonus equal to its Charisma bonus (always at least +1, even if the creature's Charisma score does not normally provide a bonus).

An incorporeal creature can enter or pass through solid objects, but must remain adjacent to the object's exterior, and so cannot pass entirely through an object whose space is larger than its own. It can sense the presence of creatures or objects within a square adjacent to its current location, but enemies have total concealment (50% miss chance) from an incorporeal creature that is inside an object. In order to see farther from the object it is in and attack normally, the incorporeal creature must emerge. An incorporeal creature inside an object has total cover, but when it attacks a creature outside the object it only has cover, so a creature outside with a readied action could strike at it as it attacks. An incorporeal creature cannot pass through a force effect.

An incorporeal creature's attacks pass through (ignore) natural armor, armor, and shields, although deflection bonuses and force effects (such as *mage armor*) work normally against it. Incorporeal creatures pass through and operate in water as easily as they do in air. Incorporeal creatures cannot fall or take falling damage. Incorporeal creatures cannot make trip or grapple attacks, nor can they be tripped or grappled. In fact, they cannot take any physical action that would move or manipulate an opponent or its equipment, nor are they subject to such actions. Incorporeal creatures have no weight and do not set off traps that are triggered by weight.

An incorporeal creature moves silently and cannot be heard with Listen checks if it doesn't wish to be. It has no Strength score, so its Dexterity modifier applies to both its melee attacks and its ranged attacks. Nonvisual senses, such as scent and blindsight, are either ineffective or only partly effective with regard to incorporeal creatures. Incorporeal creatures have an innate sense of direction and can move at full speed even when they cannot see.

Lawful: A subtype usually applied only to outsiders native to the lawful-aligned Outer Planes. Most creatures that have this subtype also have lawful alignments; however, if their alignments change, they still retain the subtype. Any effect that depends on alignment affects a creature with this subtype as if the creature has a lawful alignment, no matter what its alignment actually is. The creature also suffers effects according to its actual alignment. A creature with the lawful subtype overcomes damage reduction as if its natural weapons and any weapons it wields were lawful-aligned (see Damage Reduction, above).

Low-Light Vision (Ex): A creature with low-light vision can see twice as far as a human in starlight, moonlight, torchlight, and similar conditions of shadowy illumination. It retains the ability to distinguish color and detail under these conditions.

Magical Beast Type: Magical beasts are similar to animals but can have Intelligence scores higher than 2. Magical beasts usually have supernatural or extraordinary abilities, but sometimes are merely bizarre in appearance or habits.

Features: A magical beast has the following features.

—10-sided Hit Dice.

—Base attack bonus equal to total Hit Dice (as fighter).

—Good Fortitude and Reflex saves.

—Skill points equal to $(2 + \text{Int modifier, minimum 1}) \times 4$ per Hit Die, with quadruple skill points for the first Hit Die.

Traits: A magical beast possesses the following traits (unless otherwise noted in a creature's entry).

—Darkvision out to 60 feet and low-light vision.

—Proficient with its natural weapons only.

—Proficient with no armor.

—Magical beasts eat, sleep, and breathe.

Manufactured Weapons: Some monsters employ manufactured weapons when they attack. Creatures that use swords, bows, spears, and the like follow the same rules as characters, including those for additional attacks from a high base attack bonus and two-weapon fighting penalties. This category also includes "found items," such as rocks and logs, that a creature wields in combat—in essence, any weapon that is not intrinsic to the creature.

Some creatures combine attacks with natural and manufactured weapons when they make a full attack. When they do so, the manufactured weapon attack is considered the primary attack unless the creature's description indicates otherwise and any natural weapons the creature also uses are considered secondary natural attacks. These secondary attacks do not interfere with the primary attack as attacking with an off-hand weapon does, but they take the usual -5 penalty (or -2 with the Multiattack feat) for such attacks, even if the natural weapon used is normally the creature's primary natural weapon.

Monstrous Humanoid Type: Monstrous humanoids are similar to humanoids, but with monstrous or animalistic features. They often have magical abilities as well.

Features: A monstrous humanoid has the following features.

—8-sided Hit Dice.

—Base attack bonus equal to total Hit Dice (as fighter).

- Good Reflex and Will saves.
- Skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die, with quadruple skill points for the first Hit Die.
- Traits:* A monstrous humanoid possesses the following traits (unless otherwise noted in a creature's entry).
- Darkvision out to 60 feet.
- Proficient with all simple weapons and any weapons mentioned in its entry.
- Proficient with whatever type of armor (light, medium, or heavy) it is described as wearing, as well as all lighter types. Monstrous humanoids not indicated as wearing armor are not proficient with armor. Monstrous humanoids are proficient with shields if they are proficient with any form of armor.
- Monstrous humanoids eat, sleep, and breathe.

Movement Modes: Creatures may have modes of movement other than walking and running. These are natural, not magical, unless specifically noted in a monster description.

Burrow: A creature with a burrow speed can tunnel through dirt, but not through rock unless the descriptive text says otherwise. Creatures cannot charge or run while burrowing. Most burrowing creatures do not leave behind tunnels other creatures can use (either because the material they tunnel through fills in behind them or because they do not actually dislocate any material when burrowing); see the individual creature descriptions for details.

Climb: A creature with a climb speed has a +8 racial bonus on all Climb checks. The creature must make a Climb check to climb any wall or slope with a DC of more than 0, but it always can choose to take 10 even if rushed or threatened while climbing. The creature climbs at the given speed while climbing. If it chooses an accelerated climb it moves at double the given climb speed (or its base land speed, whichever is lower) and makes a single Climb check at a -5 penalty. Creatures cannot run while climbing. A creature retains its Dexterity bonus to Armor Class (if any) while climbing, and opponents get no special bonus on their attacks against a climbing creature.

Fly: A creature with a fly speed can move through the air at the indicated speed if carrying no more than a light load. (Note that medium armor does not necessarily constitute a medium load.) All fly speeds include a parenthetical note indicating maneuverability, as follows:

—Perfect: The creature can perform almost any aerial maneuver it wishes. It moves through the air as well as a human moves over smooth ground.

—Good: The creature is very agile in the air (like a housefly or a hummingbird), but cannot change direction as readily as those with perfect maneuverability.

—Average: The creature can fly as adroitly as a small bird.

—Poor: The creature flies as well as a very large bird.

—Clumsy: The creature can barely maneuver at all.

A creature that flies can make dive attacks. A dive attack works just like a charge, but the diving creature must move a minimum of 30 feet and descend at least 10 feet. It can make only claw or talon attacks, but these deal double damage. A creature can use the run action while flying, provided it flies in a straight line.

Swim: A creature with a swim speed can move through water at its swim speed without making Swim checks. It has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. The creature can always choose to take 10 on a Swim check, even if distracted or endangered. The creature can use the run action while swimming, provided it swims in a straight line.

Native Subtype: A subtype applied only to outsiders. These creatures have mortal ancestors or a strong connection to the Material Plane and can be raised, reincarnated, or resurrected just as other living creatures can be. Creatures with this subtype are native to the Material Plane (hence the subtype's name). Unlike true outsiders, native outsiders need to eat and sleep.

Natural Weapons: Natural weapons are weapons that are physically a part of a creature. A creature making a melee attack with a natural weapon is considered armed and does not provoke attacks of opportunity. Likewise, it threatens any space it can reach. Creatures do not receive additional attacks from a high base attack bonus when using natural weapons. The number of attacks a creature can make with its natural weapons depends on the type of the attack—generally, a creature can make one bite attack, one attack per claw or tentacle, one gore attack, one sting attack, or one slam attack (although Large creatures with arms or arm-like limbs can make a slam attack with each arm). Refer to the individual monster descriptions. Unless otherwise noted, a natural weapon threatens a critical hit on a natural attack roll of 20.

When a creature has more than one natural weapon, one of them (or sometimes a pair or set of them) is the primary weapon. All the creature's remaining natural weapons are secondary.

The primary weapon is given in the creature's Attack entry, and the primary weapon or weapons is given first in the creature's Full Attack entry. A creature's primary natural weapon is its most effective natural attack, usually by virtue of the creature's physiology, training, or innate talent with the weapon. An attack with a primary natural weapon uses the creature's full attack bonus. Attacks with secondary natural weapons are less effective and are made with a -5 penalty on the attack roll, no matter how many there are. (Creatures with the Multiattack feat take only a -2 penalty on secondary attacks.) This penalty applies even when the creature makes a single attack with the secondary weapon as part of the attack action or as an attack of

opportunity.

Natural weapons have types just as other weapons do. The most common are summarized below.

Bite: The creature attacks with its mouth, dealing piercing, slashing, and bludgeoning damage.

Claw or Talon: The creature rips with a sharp appendage, dealing piercing and slashing damage.

Gore: The creature spears the opponent with an antler, horn, or similar appendage, dealing piercing damage.

Slap or Slam: The creature batters opponents with an appendage, dealing bludgeoning damage.

Sting: The creature stabs with a stinger, dealing piercing damage. Sting attacks usually deal damage from poison in addition to hit point damage.

Tentacle: The creature flails at opponents with a powerful tentacle, dealing bludgeoning (and sometimes slashing) damage.

Nonabilities: Some creatures lack certain ability scores. These creatures do not have an ability score of 0—they lack the ability altogether. The modifier for a nonability is +0. Other effects of nonabilities are detailed below.

Strength: Any creature that can physically manipulate other objects has at least 1 point of Strength. A creature with no Strength score can't exert force, usually because it has no physical body or because it doesn't move. The creature automatically fails Strength checks. If the creature can attack, it applies its Dexterity modifier to its base attack bonus instead of a Strength modifier.

Dexterity: Any creature that can move has at least 1 point of Dexterity. A creature with no Dexterity score can't move. If it can perform actions (such as casting spells), it applies its Intelligence modifier to initiative checks instead of a Dexterity modifier. The creature automatically fails Reflex saves and Dexterity checks.

Constitution: Any living creature has at least 1 point of Constitution. A creature with no Constitution has no body or no metabolism. It is immune to any effect that requires a Fortitude save unless the effect works on objects or is harmless. The creature is also immune to ability damage, ability drain, and energy drain, and automatically fails Constitution checks. A creature with no Constitution cannot tire and thus can run indefinitely without tiring (unless the creature's description says it cannot run).

Intelligence: Any creature that can think, learn, or remember has at least 1 point of Intelligence. A creature with no Intelligence score is mindless, an automaton operating on simple instincts or programmed instructions. It has immunity to mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects) and automatically fails Intelligence checks.

Mindless creatures do not gain feats or skills, although they may have bonus feats or racial skill bonuses.

Wisdom: Any creature that can perceive its environment in any fashion has at least 1 point of Wisdom. Anything with no Wisdom score is an object, not a creature. Anything without a Wisdom score also has no Charisma score.

Charisma: Any creature capable of telling the difference between itself and things that are not itself has at least 1 point of Charisma. Anything with no Charisma score is an object, not a creature. Anything without a Charisma score also has no Wisdom score.

Ooze Type: An ooze is an amorphous or mutable creature, usually mindless.

Features: An ooze has the following features.

—10-sided Hit Dice.

—Base attack bonus equal to 3/4 total Hit Dice (as cleric).

—No good saving throws.

—Skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die, with quadruple skill points for the first Hit Die, if the ooze has an Intelligence score. However, most oozes are mindless and gain no skill points or feats.

Traits: An ooze possesses the following traits (unless otherwise noted in a creature's entry).

—Mindless: No Intelligence score, and immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).

—Blind (but have the blindsight special quality), with immunity to gaze attacks, visual effects, illusions, and other attack forms that rely on sight.

—Immunity to poison, sleep effects, paralysis, polymorph, and stunning.

—Some oozes have the ability to deal acid damage to objects. In such a case, the amount of damage is equal to $10 + 1/2$ ooze's HD + ooze's Con modifier per full round of contact.

—Not subject to critical hits or flanking.

—Proficient with its natural weapons only.

—Proficient with no armor.

—Oozes eat and breathe, but do not sleep.

Outsider Type: An outsider is at least partially composed of the essence (but not necessarily the material) of some plane other than the Material Plane. Some creatures start out as some other type and become outsiders when they attain a higher (or lower) state of spiritual existence.

Features: An outsider has the following features.

- 8-sided Hit Dice.
- Base attack bonus equal to total Hit Dice (as fighter).
- Good Fortitude, Reflex, and Will saves.
- Skill points equal to $(8 + \text{Int modifier, minimum } 1)$ per Hit Die, with quadruple skill points for the first Hit Die.
- Traits:* An outsider possesses the following traits (unless otherwise noted in a creature's entry).
- Darkvision out to 60 feet.
- Unlike most other living creatures, an outsider does not have a dual nature—its soul and body form one unit. When an outsider is slain, no soul is set loose. Spells that restore souls to their bodies, such as *raise dead*, *reincarnate*, and *resurrection*, don't work on an outsider. It takes a different magical effect, such as *limited wish*, *wish*, *miracle*, or *true resurrection* to restore it to life. An outsider with the native subtype can be raised, reincarnated, or resurrected just as other living creatures can be.
- Proficient with all simple and martial weapons and any weapons mentioned in its entry.
- Proficient with whatever type of armor (light, medium, or heavy) it is described as wearing, as well as all lighter types. Outsiders not indicated as wearing armor are not proficient with armor. Outsiders are proficient with shields if they are proficient with any form of armor.
- Outsiders breathe, but do not need to eat or sleep (although they can do so if they wish). Native outsiders breathe, eat, and sleep.

Paralysis (Ex or Su): This special attack renders the victim immobile. Paralyzed creatures cannot move, speak, or take any physical actions. The creature is rooted to the spot, frozen and helpless. Paralysis works on the body, and a character can usually resist it with a Fortitude saving throw (the DC is given in the creature's description). Unlike *hold person* and similar effects, a paralysis effect does not allow a new save each round. A winged creature flying in the air at the time that it is paralyzed cannot flap its wings and falls. A swimmer can't swim and may drown.

Plant Type: This type comprises vegetable creatures. Note that regular plants, such as one finds growing in gardens and fields, lack Wisdom and Charisma scores (see Nonabilities, above) and are not creatures, but objects, even though they are alive.

Features: A plant creature has the following features.

- 8-sided Hit Dice.
- Base attack bonus equal to 3/4 total Hit Dice (as cleric).
- Good Fortitude saves.
- Skill points equal to $(2 + \text{Int modifier, minimum } 1)$ per Hit Die, with quadruple skill points for the first Hit Die, if the plant creature has an Intelligence score. However, some plant creatures are mindless and gain no skill points or feats.
- Traits:* A plant creature possesses the following traits (unless otherwise noted in a creature's entry).
- Low-light vision.
- Immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).
- Immunity to poison, sleep effects, paralysis, polymorph, and stunning.
- Not subject to critical hits.
- Proficient with its natural weapons only.
- Proficient with no armor.
- Plants breathe and eat, but do not sleep.

Poison (Ex): Poison attacks deal initial damage, such as ability damage (see page 305) or some other effect, to the opponent on a failed Fortitude save. Unless otherwise noted, another saving throw is required 1 minute later (regardless of the first save's result) to avoid secondary damage. A creature's descriptive text provides the details.

A creature with a poison attack is immune to its own poison and the poison of others of its kind.

The Fortitude save DC against a poison attack is equal to $10 + 1/2$ poisoning creature's racial HD + poisoning creature's Con modifier (the exact DC is given in the creature's descriptive text).

A successful save avoids (negates) the damage.

Pounce (Ex): When a creature with this special attack makes a charge, it can follow with a full attack—including rake attacks if the creature also has the rake ability.

Powerful Charge (Ex): When a creature with this special attack makes a charge, its attack deals extra damage in addition to the normal benefits and hazards of a charge. The amount of damage from the attack is given in the creature's description.

Psionics (Sp): These are spell-like abilities that a creature generates with the power of its mind. Psionic abilities are usually usable at will.

Rake (Ex): A creature with this special attack gains extra natural attacks when it grapples its foe. Normally, a monster can attack with only one of its natural weapons while grappling, but a monster with the rake ability usually gains two additional claw attacks that it can use only against a grappled foe. Rake attacks are not subject to the usual -4 penalty for attacking with a natural weapon in a grapple.

A monster with the rake ability must begin its turn grappling to use its rake—it can't begin a grapple and rake in the same turn.

Ray (Su or Sp): This form of special attack works like a ranged attack. Hitting with a ray attack requires a successful ranged touch attack roll, ignoring armor, natural armor, and shield and using the creature's ranged attack bonus. Ray attacks have no range increment. The creature's descriptive text specifies the maximum range, effects, and any applicable saving throw.

Regeneration (Ex): A creature with this ability is difficult to kill. Damage dealt to the creature is treated as nonlethal damage. The creature automatically heals nonlethal damage at a fixed rate per round, as given in the entry. Certain attack forms, typically fire and acid, deal lethal damage to the creature, which doesn't go away. The creature's descriptive text describes the details. A regenerating creature that has been rendered unconscious through nonlethal damage can be killed with a coup de grace. The attack cannot be of a type that automatically converts to nonlethal damage.

Attack forms that don't deal hit point damage ignore regeneration. Regeneration also does not restore hit points lost from starvation, thirst, or suffocation. Regenerating creatures can regrow lost portions of their bodies and can reattach severed limbs or body parts; details are in the creature's descriptive text. Severed parts that are not reattached wither and die normally.

A creature must have a Constitution score to have the regeneration ability.

Reptilian Subtype: These creatures are scaly and usually coldblooded. The reptilian subtype is only used to describe a set of humanoid races, not all animals and monsters that are truly reptiles.

Resistance to Energy (Ex): A creature with this special quality ignores some damage of the indicated type each time it takes damage of that kind (commonly acid, cold, fire, or electricity). The entry indicates the amount and type of damage ignored.

Scent (Ex): This special quality allows a creature to detect approaching enemies, sniff out hidden foes, and track by sense of smell. Creatures with the scent ability can identify familiar odors just as humans do familiar sights.

The creature can detect opponents within 30 feet by sense of smell. If the opponent is upwind, the range increases to 60 feet; if downwind, it drops to 15 feet. Strong scents, such as smoke or rotting garbage, can be detected at twice the ranges noted above. Overpowering scents, such as skunk musk or troglodyte stench, can be detected at triple normal range.

When a creature detects a scent, the exact location of the source is not revealed—only its presence somewhere within range. The creature can take a move action to note the direction of the scent.

Whenever the creature comes within 5 feet of the source, the creature pinpoints the source's location.

A creature with the Track feat and the scent ability can follow tracks by smell, making a Wisdom (or Survival) check to find or follow a track. The typical DC for a fresh trail is 10 (no matter what kind of surface holds the scent). This DC increases or decreases depending on how strong the quarry's odor is, the number of creatures, and the age of the trail. For each hour that the trail is cold, the DC increases by 2. The ability otherwise follows the rules for the Track feat. Creatures tracking by scent ignore the effects of surface conditions and poor visibility.

Shapechanger Subtype: A shapechanger has the supernatural ability to assume one or more alternate forms. Many magical effects allow some kind of shape shifting, and not every creature that can change shapes has the shapechanger subtype.

Traits: A shapechanger possesses the following traits (unless otherwise noted in a creature's entry).

—Proficient with its natural weapons, with simple weapons, and with any weapons mentioned in the creature's description.
—Proficient with any armor mentioned in the creature's description, as well as all lighter forms. If no form of armor is mentioned, the shapechanger is not proficient with armor. A shapechanger is proficient with shields if it is proficient with any type of armor.

Sonic Attacks (Su): Unless otherwise noted, a sonic attack follows the rules for spreads. The range of the spread is measured from the creature using the sonic attack. Once a sonic attack has taken effect, deafening the subject or stopping its ears does not end the effect. Stopping one's ears ahead of time allows opponents to avoid having to make saving throws against mind-affecting sonic attacks, but not other kinds of sonic attacks (such as those that deal damage). Stopping one's ears is a full-round action and requires wax or other soundproof material to stuff into the ears.

Special Abilities: A special ability is either extraordinary (Ex), spell-like (Sp), or supernatural (Su).

Extraordinary: Extraordinary abilities are nonmagical, don't become ineffective in an *antimagic field*, and are not subject to any effect that disrupts magic. Using an extraordinary ability is a free action unless otherwise noted.

Spell-Like: Spell-like abilities are magical and work just like spells (though they are not spells and so have no verbal, somatic, material, focus, or XP components). They go away in an *antimagic field* and are subject to spell resistance if the spell the ability resembles or duplicates would be subject to spell resistance.

A spell-like ability usually has a limit on how often it can be used. A spell-like ability that can be used at will has no use limit. Using a spell-like ability is a standard action unless noted otherwise, and doing so while threatened provokes attacks of opportunity. It is possible to make a Concentration check to use a spell-like ability defensively and avoid provoking an attack of opportunity, just as when casting a spell. A spell-like ability can be disrupted just as a spell can be. Spell-like abilities cannot be used to counterspell, nor can they be counterspelled.

For creatures with spell-like abilities, a designated caster level defines how difficult it is to dispel their spell-like effects and to define any level-dependent variables (such as range and duration) the abilities might have. The creature's caster level never affects which spell-like abilities the creature has; sometimes the given caster level is lower than the level a spellcasting character would need to cast the spell of the same name. If no caster level is specified, the caster level is equal to the creature's Hit Dice. The saving throw (if any) against a spell-like ability is $10 + \text{the level of the spell the ability resembles or duplicates} + \text{the creature's Cha modifier}$.

Some spell-like abilities duplicate spells that work differently when cast by characters of different classes. A monster's spell-like abilities are presumed to be the sorcerer/wizard versions. If the spell in question is not a sorcerer/wizard spell, then default to cleric, druid, bard, paladin, and ranger, in that order.

Supernatural: Supernatural abilities are magical and go away in an *antimagic field* but are not subject to spell resistance. Supernatural abilities cannot be dispelled. Using a supernatural ability is a standard action unless noted otherwise.

Supernatural abilities may have a use limit or be usable at will, just like spell-like abilities. However, supernatural abilities do not provoke attacks of opportunity and never require Concentration checks. Unless otherwise noted, a supernatural ability has an effective caster level equal to the creature's Hit Dice. The saving throw (if any) against a supernatural ability is $10 + 1/2 \text{ the creature's HD} + \text{the creature's ability modifier (usually Charisma)}$.

Spell Immunity (Ex): A creature with spell immunity avoids the effects of spells and spell-like abilities that directly affect it. This works exactly like spell resistance, except that it cannot be overcome. Sometimes spell immunity is conditional or applies to only spells of a certain kind or level. Spells that do not allow spell resistance are not affected by spell immunity.

Spell Resistance (Ex): A creature with spell resistance can avoid the effects of spells and spell-like abilities that directly affect it. To determine if a spell or spell-like ability works against a creature with spell resistance, the caster must make a caster level check ($1d20 + \text{caster level}$). If the result equals or exceeds the creature's spell resistance, the spell works normally, although the creature is still allowed a saving throw.

Spells: Sometimes a creature can cast arcane or divine spells just as a member of a spellcasting class can (and can activate magic items accordingly). Such creatures are subject to the same spellcasting rules that characters are, except as follows. A spellcasting creature that lacks hands or arms can provide any somatic component a spell might require by moving its body. Such a creature also does need material components for its spells. The creature can cast the spell by either touching the required component (but not if the component is in another creature's possession) or having the required component on its person. Sometimes spellcasting creatures utilize the Eschew Materials feat to avoid fussing with noncostly components. A spellcasting creature is not actually a member of a class unless its entry says so, and it does not gain any class abilities. A creature with access to cleric spells must prepare them in the normal manner and receives domain spells if noted, but it does not receive domain granted powers unless it has at least one level in the cleric class.

Summon (Sp): A creature with the *summon* ability can summon specific other creatures of its kind much as though casting a *summon monster* spell, but it usually has only a limited chance of success (as specified in the creature's entry). Roll d%: On a failure, no creature answers the summons. Summoned creatures automatically return whence they came after 1 hour. A creature that has just been summoned cannot use its own summon ability for 1 hour. Most creatures with the ability to summon do not use it lightly, since it leaves them beholden to the summoned creature. In general, they use it only when necessary to save their own lives. An appropriate spell level is given for each summoning ability for purposes of Concentration checks and attempts to dispel the summoned creature. No experience points are awarded for summoned monsters.

Swallow Whole (Ex): If a creature with this special attack begins its turn with an opponent held in its mouth (see Improved Grab), it can attempt a new grapple check (as though attempting to pin the opponent). If it succeeds, it swallows its prey, and the opponent takes bite damage. Unless otherwise noted, the opponent can be up to one size category smaller than the swallowing creature. Being swallowed has various consequences, depending on the creature doing the swallowing. A swallowed creature is considered to be grappled, while the creature that did the swallowing is not. A swallowed creature can try to cut its way free with any light slashing or piercing weapon (the amount of cutting damage required to get free is noted in the creature description), or it can just try to escape the grapple. The Armor Class of the interior of a creature that swallows

whole is normally $10 + 1/2$ its natural armor bonus, with no modifiers for size or Dexterity. If the swallowed creature escapes the grapple, success puts it back in the attacker's mouth, where it may be bitten or swallowed again.

Swarm Subtype: A swarm is a collection of Fine, Diminutive, or Tiny creatures that acts as a single creature. A swarm has the characteristics of its type, except as noted here. A swarm has a single pool of Hit Dice and hit points, a single initiative modifier, a single speed, and a single Armor Class. A swarm makes saving throws as a single creature. A single swarm occupies a square (if it is made up of nonflying creatures) or a cube (of flying creatures) 10 feet on a side, but its reach is 0 feet, like its component creatures. In order to attack, it moves into an opponent's space, which provokes an attack of opportunity. It can occupy the same space as a creature of any size, since it crawls all over its prey. A swarm can move through squares occupied by enemies and vice versa without impediment, although the swarm provokes an attack of opportunity if it does so. A swarm can move through cracks or holes large enough for its component creatures.

A swarm of Tiny creatures consists of 300 nonflying creatures or 1,000 flying creatures. A swarm of Diminutive creatures consists of 1,500 nonflying creatures or 5,000 flying creatures. A swarm of Fine creatures consists of 10,000 creatures, whether they are flying or not. Swarms of nonflying creatures include many more creatures than could normally fit in a 10-foot square based on their normal space, because creatures in a swarm are packed tightly together and generally crawl over each other and their prey when moving or attacking. Larger swarms are represented by multiples of single swarms. The area occupied by a large swarm is completely shapeable, though the swarm usually remains in contiguous squares.

Traits: A swarm has no clear front or back and no discernible anatomy, so it is not subject to critical hits or flanking. A swarm made up of Tiny creatures takes half damage from slashing and piercing weapons. A swarm composed of Fine or Diminutive creatures is immune to all weapon damage. Reducing a swarm to 0 hit points or lower causes it to break up, though damage taken until that point does not degrade its ability to attack or resist attack. Swarms are never staggered or reduced to a dying state by damage. Also, they cannot be tripped, grappled, or bull rushed, and they cannot grapple an opponent.

A swarm is immune to any spell or effect that targets a specific number of creatures (including single-target spells such as *disintegrate*), with the exception of mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects) if the swarm has an Intelligence score and a hive mind. A swarm takes half again as much damage (+50%) from spells or effects that affect an area, such as splash weapons and many evocation spells.

Swarms made up of Diminutive or Fine creatures are susceptible to high winds such as that created by a *gust of wind* spell. For purposes of determining the effects of wind on a swarm, treat the swarm as a creature of the same size as its constituent creatures. A swarm rendered unconscious by means of nonlethal damage becomes disorganized and dispersed, and does not reform until its hit points exceed its nonlethal damage.

Swarm Attack: Creatures with the swarm subtype don't make standard melee attacks. Instead, they deal automatic damage to any creature whose space they occupy at the end of their move, with no attack roll needed. Swarm attacks are not subject to a miss chance for concealment or cover. A swarm's statistics block has "swarm" in the Attack and Full Attack entries, with no attack bonus given. The amount of damage a swarm deals is based on its Hit Dice, as shown below.

Swarm HD	Swarm Base Damage
1–5	1d6
6–10	2d6
11–15	3d6
16–20	4d6
21 or more	5d6

A swarm's attacks are nonmagical, unless the swarm's description states otherwise. Damage reduction sufficient to reduce a swarm attack's damage to 0, being incorporeal, and other special abilities usually give a creature immunity (or at least resistance) to damage from a swarm. Some swarms also have acid, poison, blood drain, or other special attacks in addition to normal damage.

Swarms do not threaten creatures in their square, and do not make attacks of opportunity with their swarm attack. However, they distract foes whose squares they occupy, as described below.

Distraction (Ex): Any living creature vulnerable to a swarm's damage that begins its turn with a swarm in its square is nauseated for 1 round; a Fortitude save (DC $10 + 1/2$ swarm's HD + swarm's Con modifier; the exact DC is given in a swarm's description) negates the effect. Spellcasting or concentrating on spells within the area of a swarm requires a Concentration check (DC 20 + spell level). Using skills that involve patience and concentration requires a DC 20 Concentration check.

Telepathy (Su): A creature with this ability can communicate telepathically with any other creature within a certain range (specified in the creature's entry, usually 100 feet) that has a language. It is possible to address multiple creatures at once telepathically, although maintaining a telepathic conversation with more than one creature at a time is just as difficult as simultaneously speaking and listening to multiple people at the same time.

Some creatures have a limited form of telepathy, while others have a more powerful form of the ability.

Trample (Ex): As a full-round action, a creature with this special attack can move up to twice its speed and literally run over any opponents at least one size category smaller than itself. The creature merely has to move over the opponents in its path; any creature whose space is completely covered by the trampling creature's space is subject to the trample attack. If a target's space is larger than 5 feet, it is only considered trampled if the trampling creature moves over all the squares it occupies. If the trampling creature moves over only some of a target's space, the target can make an attack of opportunity against the trampling creature at a -4 penalty. A trampling creature that accidentally ends its movement in an illegal space returns to the last legal position it occupied, or the closest legal position, if there's a legal position that's closer.

A trample attack deals bludgeoning damage (the creature's slam damage + 1-1/2 times its Str modifier). The creature's descriptive text gives the exact amount.

Trampled opponents can attempt attacks of opportunity, but these take a -4 penalty. If they do not make attacks of opportunity, trampled opponents can attempt Reflex saves to take half damage.

The save DC against a creature's trample attack is $10 + 1/2 \text{ creature's HD} + \text{creature's Str modifier}$ (the exact DC is given in the creature's descriptive text). A trampling creature can only deal trampling damage to each target once per round, no matter how many times its movement takes it over a target creature.

Tremorsense (Ex): A creature with tremorsense is sensitive to vibrations in the ground and can automatically pinpoint the location of anything that is in contact with the ground. Aquatic creatures with tremorsense can also sense the location of creatures moving through water. The ability's range is specified in the creature's descriptive text.

Treasure: This entry in a monster description describes how much wealth a creature owns. In most cases, a creature keeps valuables in its home or lair and has no treasure with it when it travels. Intelligent creatures that own useful, portable treasure (such as magic items) tend to carry and use these, leaving bulky items at home. Treasure can include coins, goods, and items. Creatures can have varying amounts of each, as follows.

Standard: Refer to the treasure tables and roll d% once for each type of treasure (Coins, Goods, Items) on the Level section of the table that corresponds to the creature's Challenge Rating (for groups of creatures, use the Encounter Level for the encounter instead). Some creatures have double, triple, or even quadruple standard treasure; in these cases, roll for each type of treasure two, three, or four times.

None: The creature collects no treasure of its own.

Nonstandard: Some creatures have quirks or habits that affect the types of treasure they collect. These creatures use the same treasure tables, but with special adjustments.

Fractional Coins: Roll on the Coins column in the section corresponding to the creature's Challenge Rating, but divide the result as indicated.

% Goods or Items: The creature has goods or items only some of the time. Before checking for goods or items, roll d% against the given percentage. On a success, make a normal roll on the appropriate Goods or Items column (which may still result in no goods or items).

Double Goods or Items: Roll twice on the appropriate Goods or Items column.

Parenthetical Notes: Some entries for goods or items include notes that limit the types of treasure a creature collects. When a note includes the word "no," it means the creature does not collect or cannot keep that thing. If a random roll generates such a result, treat the result as "none" instead.

When a note includes the word "only," the creature goes out of its way to collect treasure of the indicated type. Treat all results from that column as the indicated type of treasure.

It's sometimes necessary to reroll until the right sort of item appears.

Turn Resistance (Ex): A creature with this special quality (usually an undead) is less easily affected by clerics or paladins. When resolving a turn, rebuke, command, or bolster attempt, add the indicated number to the creature's Hit Dice total.

Undead Type: Undead are once-living creatures animated by spiritual or supernatural forces.

Features: An undead creature has the following features.

—12-sided Hit Dice.

—Base attack bonus equal to 1/2 total Hit Dice (as wizard).

—Good Will saves.

—Skill points equal to $(4 + \text{Int modifier, minimum 1}) \text{ per Hit Die}$, with quadruple skill points for the first Hit Die, if the undead creature has an Intelligence score. However, many undead are mindless and gain no skill points or feats.

Traits: An undead creature possesses the following traits (unless otherwise noted in a creature's entry).

—No Constitution score.

—Darkvision out to 60 feet.

—Immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).

—Immunity to poison, sleep effects, paralysis, stunning, disease, and death effects.

- Not subject to critical hits, nonlethal damage, ability drain, or energy drain. Immune to damage to its physical ability scores (Strength, Dexterity, and Constitution), as well as to fatigue and exhaustion effects.
- Cannot heal damage on its own if it has no Intelligence score, although it can be healed. Negative energy (such as an *inflict* spell) can heal undead creatures. The fast healing special quality works regardless of the creature's Intelligence score.
- Immunity to any effect that requires a Fortitude save (unless the effect also works on objects or is harmless).
- Uses its Charisma modifier for Concentration checks.
- Not at risk of death from massive damage, but when reduced to 0 hit points or less, it is immediately destroyed.
- Not affected by *raise dead* and *reincarnate* spells or abilities. *Resurrection* and *true resurrection* can affect undead creatures. These spells turn undead creatures back into the living creatures they were before becoming undead.
- Proficient with its natural weapons, all simple weapons, and any weapons mentioned in its entry.
- Proficient with whatever type of armor (light, medium, or heavy) it is described as wearing, as well as all lighter types. Undead not indicated as wearing armor are not proficient with armor. Undead are proficient with shields if they are proficient with any form of armor.
- Undead do not breathe, eat, or sleep.

Vermin Type: This type includes insects, arachnids, other arthropods, worms, and similar invertebrates.

Features: Vermin have the following features.

- 8-sided Hit Dice.
- Base attack bonus equal to 3/4 total Hit Dice (as cleric).
- Good Fortitude saves.
- Skill points equal to $(2 + \text{Int modifier, minimum 1})$ per Hit Die, with quadruple skill points for the first Hit Die, if the vermin has an Intelligence score. However, most vermin are mindless and gain no skill points or feats.
- Traits:* Vermin possess the following traits (unless otherwise noted in a creature's entry).
 - Mindless: No Intelligence score, and immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).
 - Darkvision out to 60 feet.
 - Proficient with their natural weapons only.
 - Proficient with no armor.
 - Vermin breathe, eat, and sleep.

Vulnerability to Energy: Some creatures have vulnerability to a certain kind of energy effect (typically either cold or fire). Such a creature takes half again as much (+50%) damage as normal from the effect, regardless of whether a saving throw is allowed, or if the save is a success or failure.

Water Subtype: This subtype usually is used for elementals and outsiders with a connection to the Elemental Plane of Water. Creatures with the water subtype always have swim speeds and can move in water without making Swim checks. A water creature can breathe underwater and usually can breathe air as well.

IMPROVING MONSTERS

Each of the monster entries describes a typical creature of its kind. However, there are several methods by which extraordinary or unique monsters can be created using a typical creature as the foundation: by adding character classes, increasing a monster's Hit Dice, or by adding a template to a monster. These methods are not mutually exclusive—it's possible for a monster with a template to be improved by both increasing its Hit Dice and adding character class levels.

Class Levels: Intelligent creatures that are reasonably humanoid in shape most commonly advance by adding class levels. Creatures that fall into this category have an entry of "By character class" in their Advancement line. When a monster adds a class level, that level usually represents an increase in experience and learned skills and capabilities.

Increased Hit Dice: Intelligent creatures that are not humanoid in shape, and nonintelligent monsters, can advance by increasing their Hit Dice. Creatures with increased Hit Dice are usually superior specimens of their race, bigger and more powerful than their run-of-the-mill fellows.

Templates: Both intelligent and nonintelligent creatures with an unusual heritage or an inflicted change in their essential nature may be modified with a template. Templates usually result in tougher monsters with capabilities that differ from those of their common kin.

Each of these three methods for improving monsters is discussed in more detail below.

ABILITY SCORE ARRAYS

Monsters are assumed to have completely average (or standard) ability scores—a 10 or an 11 in each ability, as modified by their racial bonuses. However, improved monsters are individuals and often have better than normal ability scores, and usually make use of either the elite array or the nonelite array of ability scores. Monsters who improve by adding a template, and monsters who improve by increasing their Hit Dice, may use any of the three arrays (standard, nonelite, or elite). Any monster unique enough to be improved could easily be considered elite.

Elite Array: The elite array is 15, 14, 13, 12, 10, 8. While the monster has one weakness compared to a typical member of its race, it is significantly better overall. The elite array is most appropriate for monsters who add levels in a player character class.

Nonelite Array: The nonelite array is 13, 12, 11, 10, 9, 8. The nonelite array does not necessarily make a monster better than normal, but it does customize the monster as an individual with strengths and weaknesses compared to a typical member of its race. The nonelite array is most appropriate for monsters who add class levels in a NPC class.

Ability Score Improvement: Treat monster Hit Dice the same as character level for determining ability score increases. This only applies to Hit Dice increases, monsters do not gain ability score increases for levels they "already reached" with their racial Hit Dice, since these adjustments are included in their basic ability scores.

MONSTERS AND CLASS LEVELS

If a creature acquires a character class, it follows the rules for multiclass characters.

The creature's Hit Dice equal the number of class levels it has plus its racial Hit Dice. A creature's "monster class" is always a favored class, and the creature never takes XP penalties for having it. Additional Hit Dice gained from taking levels in a character class never affect a creature's size.

Humanoids and Class Levels: Creatures with 1 or less HD replace their monster levels with their character levels. The monster loses the attack bonus, saving throw bonuses, skills, and feats granted by its 1 monster HD and gains the attack bonus, save bonuses, skills, feats, and other class abilities of a 1st-level character of the appropriate class.

Level Adjustment and Effective Character Level: To determine the effective character level (ECL) of a monster character, add its level adjustment to its racial Hit Dice and character class levels. The monster is considered to have experience points equal to the minimum needed to be a character of its ECL.

If you choose to equip a monster with gear, use its ECL as its character level for purposes of determining how much equipment it can purchase. Generally, only monsters with an Advancement entry of "By character class" receive NPC gear; other creatures adding character levels should be treated as monsters of the appropriate CR and assigned treasure, not equipment.

Feat Acquisition and Ability Score Increases: A monster's total Hit Dice, not its ECL, govern its acquisition of feats and ability score increases.

INCREASING HIT DICE

As its Hit Dice increase, a creature's attack bonuses and saving throw modifiers might improve. It gains more feats and skills,

depending on its type, as shown on Table: Creature Improvement by Type.

Note that if a creature acquires a character class, it improves according to its class, not its type.

Table: Creature Improvement by Type

	Hit Die	Attack Bonus	Good Saving Throws	Skill Points*
Aberration	d8	HD x3/4 (as cleric)	Will	2 + Int mod per HD
Animal	d8	HD x3/4 (as cleric)	Fort, Ref (and sometimes Will)	2 + Int mod per HD
Construct	d10	HD x3/4 (as cleric)	—	2 + Int mod per HD**
Dragon	d12	HD (as fighter)	Fort, Ref, Will	6 + Int mod per HD
Elemental	d8	HD x3/4 (as cleric)	Ref (Air, Fire), or Fort (Earth, Water)	2 + Int mod per HD
Fey	d6	HD x1/2 (as wizard)	Ref, Will	6 + Int mod per HD
Giant	d8	HD x3/4 (as cleric)	Fort	2 + Int mod per HD
Humanoid	d8	HD x3/4 (as cleric)	Varies (any one)	2 + Int mod per HD
Magical beast	d10	HD (as fighter)	Fort, Ref	2 + Int mod per HD
Monstrous humanoid	d8	HD (as fighter)	Ref, Will	2 + Int mod per HD
Ooze	d10	HD x3/4 (as cleric)	—	2 + Int mod per HD**
Outsider	d8	HD (as fighter)	Fort, Ref, Will	8 + Int mod per HD
Plant	d8	HD x3/4 (as cleric)	Fort	2 + Int mod per HD**
Undead	d12	HD x1/2 (as wizard)	Will	4 + Int mod per HD**
Vermin	d8	HD x3/4 (as cleric)	Fort	2 + Int mod per HD**

All types have a number of feats equal to 1 + 1 per 3 Hit Dice.

* As long as a creature has an Intelligence of at least 1, it gains a minimum of 1 skill point per Hit Die.

** Creatures with an Intelligence score of “—” gain no skill points or feats.

SIZE INCREASES

A creature may become larger when its Hit Dice are increased (the new size is noted parenthetically in the monster’s Advancement entry).

A size increase affects any special ability the creature has that is affected by size. Increased size also affects a creature’s ability scores, AC, attack bonuses, and damage values as indicated on the tables below.

Table: Changes to Statistics by Size

Old Size*	New Size	Str	Dex	Con	Natural Armor	AC/ Attack
Fine	Diminutive	Same	-2	Same	Same	-4
Diminutive	Tiny	+2	-2	Same	Same	-2
Tiny	Small	+4	-2	Same	Same	-1
Small	Medium	+4	-2	+2	Same	-1
Medium	Large	+8	-2	+4	+2	-1
Large	Huge	+8	-2	+4	+3	-1
Huge	Gargantuan	+8	Same	+4	+4	-2
Gargantuan	Colossal	+8	Same	+4	+5	-4

*Repeat the adjustment if the creature moves up more than one size.

Table: Increased Damage By Size

Old Damage (Each)*	New Damage
1d2	1d3
1d3	1d4
1d4	1d6
1d6	1d8
1d8	2d6
1d10	2d8
2d6	3d6
2d8	3d8

* Repeat the adjustment if the creature moves up more than one size category.

TEMPLATES

Certain creatures are created by adding a template to an existing creature. A templated creature can represent a freak of nature, the individual creation of a single experimenter, or the first generation of offspring from parents of different species.

ACQUIRED AND INHERITED TEMPLATES

Some templates can be added to creatures anytime. Templates such as these are referred to as acquired templates, indicating that the creature did not always have the attributes of the template.

Other templates, known as inherited templates, are part of a creature from the beginning of its existence. Creatures are born with these templates.

It's possible for a certain kind of template to be of either type.

READING A TEMPLATE

A template's description provides a set of instructions for altering an existing creature, known as the base creature. The changes that a template might cause to each line of a creature's statistics block are discussed below. Generally, if a template does not cause a change to a certain statistic, that entry is missing from the template description. For clarity, the entry for a statistic or attribute that is not changed is sometimes given as "Same as the base creature."

Size and Type: Templates often change a creature's type, and may change the creature's size.

If a template changes the base creature's type, the creature also acquires the augmented subtype unless the template description indicates otherwise. The augmented subtype is always paired with the creature's original type. Unless a template indicates otherwise, the new creature has the traits of the new type but the features of the original type.

If a template changes a creature's size, use Table: Changes to Statistics by Size to calculate changes to natural armor, Armor Class, attack rolls, and grapple bonus.

Hit Dice and Hit Points: Most templates do not change the number of Hit Dice a monster has, but some do. Some templates change the size of a creature's Hit Dice (usually by changing the creature type). A few templates change previously acquired Hit Dice, and continue to change Hit Dice gained with class levels, but most templates that change Hit Dice change only the creature's original HD and leave class Hit Dice unchanged.

If the Hit Dice entry in a template description is missing, Hit Dice and hit points do not change unless the creature's Constitution modifier changes.

Initiative: If a template changes the monster's Dexterity, or if it adds or removes the Improved Initiative feat, this entry changes.

Speed: If a template modifies a creature's speed, the template states how that happens. More commonly, a template adds a new movement mode.

Armor Class: If a template changes the creature's size, see Table: Changes to Statistics by Size to determine its new Armor Class and to see whether its natural armor changes. In some cases the method of determining Armor Class changes radically; the template description explains how to adjust the creature's AC.

Base Attack/Grapple: Templates usually do not change a creature's base attack bonus. If a template modifies a creature's base attack bonus, the template description states how that happens. Changes to a creature's Strength score can change a creature's grapple bonus, as can changes to its size.

Attack and Full Attack: Most templates do not change a creature's attack bonus or modes of attack, even when the creature's type changes (the creature's base attack bonus is the same as a creature of the original type). Of course, any change in ability scores may affect attack bonuses. If Strength or Dexterity changes, use the new modifier to determine attack bonuses. A change in a monster's size also changes its attack bonus; see Table: Changes to Statistics by Size.

Damage: Damage changes with Strength. If the creature uses a two-handed weapon or has a single natural weapon, it adds 1-1/2 times its Strength bonus to the damage. If it has more than a single attack then it adds its Strength bonus to damage rolls for the primary attack and 1/2 its Strength bonus to all secondary attacks.

Space/Reach: A template may change this entry if it changes the monster's size. Note that this table does not take into account special situations such as exceptional reach.

Special Attacks: A template may add or remove special attacks. The template description gives the details of any special attacks a template provides, including how to determine saving throw DCs, if applicable.

Special Qualities: A template may add or remove special qualities. The template description gives the details of any special qualities a template provides, including how to determine saving throw DCs, if applicable. Even if the special qualities entry is missing from a template description, the creature still gains any qualities associated with its new type.

Base Saves: As with attacks, changing a monster's type does not always change its base saving throw bonuses. You only need to adjust them for new modifiers for Constitution, Dexterity, or Wisdom. A template may, however, state that a monster has a different "good" saving throw.

Abilities: If a template changes one or more ability scores, these changes are noted here.

Skills: As with attacks, changing a monster's type does not always change its skill points. Most templates don't change the number of Hit Dice a creature has, so you don't need to adjust skills in that case unless the key abilities for those skills have changed, or the template gives a bonus on one or more skills, or unless the template gives a feat that provides a bonus on a skill check.

Some templates change how skill points are determined, but this change usually only affects skill points gained after the template is applied. Treat skills listed in the base creature's description as class skills, as well as any new skills provided by the template.

Feats: Since most templates do not change the number of Hit Dice a creature has, a template will not change the number of feats the creature has. Some templates grant one or more bonus feats.

Environment: Usually the same as the base creature.

Organization: Usually the same as the base creature.

Challenge Rating: Most templates increase the creature's Challenge Rating. A template might provide a modifier to be added to the base creature's CR, or it might specify a range of modifiers depending on the base creature's original Hit Dice or CR.

Treasure: Usually the same as the base creature.

Alignment: Usually the same as the base creature, unless the template is associated with a certain alignment.

Advancement: Usually the same as the base creature.

Level Adjustment: This entry is a modifier to the base creature's level adjustment. Any level adjustment is meaningless unless the creature retains a high enough Intelligence (minimum 3) to gain class levels after applying the template.

Adding More Than One Template

In theory, there's no limit to the number of templates you can add to a creature. To add more than one template, just apply each template one at a time. Always apply inherited templates before applying acquired templates. Whenever you add multiple templates, pay attention to the creature's type—you may add a template that makes the creature ineligible for other templates you might want to add.

ADVANCED MONSTER CHALLENGE RATING

When adding class levels to a creature with 1 or less HD, you advance the creature like a character. Otherwise, use the following guidelines.

ADDING CLASS LEVELS

If you are advancing a monster by adding player character class levels, decide if the class levels directly improve the monster's existing capabilities.

When adding class levels to a creature, you should give it typical ability scores appropriate for that class. Most creatures are built using the standard array of ability scores: 11, 11, 11, 10, 10, 10, adjusted by racial modifiers. If you give a creature a PC class use the elite array of ability scores before racial adjustments: 15, 14, 13, 12, 10, 8. Creatures with NPC classes use the nonelite array of 13, 12, 11, 10, 9, 8. T

Associated Class Levels

Class levels that increase a monster's existing strengths are known as associated class levels. Each associated class level a monster has increases its CR by 1.

Barbarian, fighter, paladin, and ranger are associated classes for a creature that relies on its fighting ability.

Rogue and ranger are associated classes for a creature that relies on stealth to surprise its foes, or on skill use to give itself an advantage.

A spellcasting class is an associated class for a creature that already has the ability to cast spells as a character of the class in question, since the monster's levels in the spellcasting class stack with its innate spellcasting ability.

Nonassociated Class Levels

If you add a class level that doesn't directly play to a creature's strength the class level is considered nonassociated, and things get a little more complicated. Adding a nonassociated class level to a monster increases its CR by 1/2 per level until one of its nonassociated class levels equals its original Hit Dice. At that point, each additional level of the same class or a similar one is considered associated and increases the monster's CR by 1.

Levels in NPC classes are always treated as nonassociated.

ADDING HIT DICE

When you improve a monster by adding Hit Dice, use Table: Improved Monster CR Increase to determine the effect on the

creature's CR. Keep in mind that many monsters that advance by adding Hit Dice also increase in size. Do not stack this CR increase with any increase from class levels. In general, once you've doubled a creature's CR, you should closely watch any additional increases in its abilities. Adding Hit Dice to a creature improves several of its abilities, and radical increases might not follow this progression indefinitely. Compare the monster's improved attack bonus, saving throw bonuses, and any DCs of its special abilities from the HD increase to typical characters of the appropriate level and adjust the CR accordingly.

Table: Improved Monster CR Increase

Creature's Original Type	CR Increase
Aberration, construct, elemental, fey, giant, humanoid, ooze, plant, undead, vermin	+1 per 4 HD added
Animal, magical beast, monstrous humanoid	+1 per 3 HD added
Dragon, outsider, nonassociated class levels	+1 per 2 HD or 2 levels added
Directly associated class levels	+1 per level added
Other Modifiers:	
Size increased to Large or larger	+1 to CR
Monster's ability scores based on elite array*	+1 to CR
Monster possesses special attacks or qualities that significantly improve combat effectiveness	+2 to CR
Monster possesses special attacks or qualities that improve combat effectiveness in a minor way	+1 to CR
Template added	+ template CR modifier

* Do not apply this increase if you advance a monster by class levels. (Monsters advanced by class levels are assumed to use the elite array.)

INCREASING SIZE

Generally, increasing a monster's size increases its combat effectiveness. Large creatures gain increased Strength, reach, and other benefits. Apply this modifier if you increase a creature beyond Medium and in conjunction with any other increases. Be careful, though. Monsters that benefit from a smaller size may actually lose effectiveness because of a size increase. Monsters that don't benefit from size increases don't advance in that manner for this reason.

ADDING SPECIAL ABILITIES

You can add any sort of spell-like, supernatural, or extraordinary ability to a creature. As with a class level, you should determine how much, or how little, this ability adds to the creature's existing repertoire. A suite of abilities that work together should be treated as a single modifier for this purpose. If the ability (or combination of abilities) significantly increases the monster's combat effectiveness, increase its CR by 2. Minor abilities increase the creature's CR by 1, and truly trivial abilities may not increase CR at all. If the special abilities a monster gains are not tied to a class or Hit Die increase, this CR increase stacks.

A significant special attack is one that stands a good chance of incapacitating or crippling a character in one round. A significant special quality is one that seriously diminishes the monster's vulnerability to common attacks. Do not add this factor twice if a monster has both special attacks and special qualities.

Make sure to "scale" your evaluation of these abilities by the monster's current CR.

MONSTER FEATS

These feats apply to abilities most commonly found amongst monsters or are related to monsters.

ABILITY FOCUS [GENERAL]

Choose one of the creature's special attacks.

Prerequisite: Special attack.

Benefit: Add +2 to the DC for all saving throws against the special attack on which the creature focuses.

Special: A creature can gain this feat multiple times. Its effects do not stack. Each time the creature takes the feat it applies to a different special attack.

AWESOME BLOW [GENERAL, FIGHTER]

Prerequisites: Str 25, Power Attack, Improved Bull Rush, size Large or larger.

Benefit: As a standard action, the creature may choose to subtract 4 from its melee attack roll and deliver an awesome blow. If the creature hits a corporeal opponent smaller than itself with an awesome blow, its opponent must succeed on a Reflex save (DC = damage dealt) or be knocked flying 10 feet in a direction of the attacking creature's choice and fall prone. The attacking creature can only push the opponent in a straight line, and the opponent can't move closer to the attacking creature than the square it started in. If an obstacle prevents the completion of the opponent's move, the opponent and the obstacle each take 1d6 points of damage, and the opponent stops in the space adjacent to the obstacle.

CRAFT CONSTRUCT [ITEM CREATION]

Prerequisites: Craft Magic Arms and Armor, Craft Wondrous Item.

Benefit: A creature with this feat can create any construct whose prerequisites it meets. Enchanting a construct takes one day for each 1,000 gp in its market price. To enchant a construct, a spellcaster must spend 1/25 the item's price in XP and use up raw materials costing half of this price (see individual construct monster entries for details).

A creature with this feat can repair constructs that have taken damage. In one day of work, the creature can repair up to 20 points of damage by expending 50 gp per point of damage repaired.

A newly created construct has average hit points for its Hit Dice.

EMPOWER SPELL-LIKE ABILITY [GENERAL]

Prerequisite: Spell-like ability at caster level 6th or higher.

Benefit: Choose one of the creature's spell-like abilities, subject to the restrictions below. The creature can use that ability as an empowered spell-like ability three times per day (or less, if the ability is normally usable only once or twice per day). When a creature uses an empowered spell-like ability, all variable, numeric effects of the spell-like ability are increased by one half. Saving throws and opposed rolls are not affected. Spell-like abilities without random variables are not affected. The creature can only select a spell-like ability duplicating a spell with a level less than or equal to half its caster level (round down) -2. For a summary, see the table in the description of the Quicken Spell-Like Ability feat.

Special: This feat can be taken multiple times. Each time it is taken, the creature can apply it to a different one of its spell-like abilities.

FLYBY ATTACK [GENERAL]

Prerequisite: Fly speed.

Benefit: When flying, the creature can take a move action (including a dive) and another standard action at any point during the move. The creature cannot take a second move action during a round when it makes a flyby attack.

Normal: Without this feat, the creature takes a standard action either before or after its move.

HOVER [GENERAL]

Prerequisite: Fly speed.

Benefit: When flying, the creature can halt its forward motion and hover in place as a move action. It can then fly in any direction, including straight down or straight up, at half speed, regardless of its maneuverability.

If a creature begins its turn hovering, it can hover in place for the turn and take a full-round action. A hovering creature cannot make wing attacks, but it can attack with all other limbs and appendages it could use in a full attack. The creature can instead use a breath weapon or cast a spell instead of making physical attacks, if it could normally do so.

If a creature of Large size or larger hovers within 20 feet of the ground in an area with lots of loose debris, the draft from its wings creates a hemispherical cloud with a radius of 60 feet. The winds so generated can snuff torches, small campfires, exposed lanterns, and other small, open flames of non-magical origin. Clear vision within the cloud is limited to 10 feet.

Creatures have concealment at 15 to 20 feet (20% miss chance). At 25 feet or more, creatures have total concealment (50% miss chance, and opponents cannot use sight to locate the creature).

Those caught in the cloud must succeed on a Concentration check (DC 10 + 1/2 creature's HD) to cast a spell.

Normal: Without this feat, a creature must keep moving while flying unless it has perfect maneuverability.

IMPROVED NATURAL ARMOR [GENERAL]

Prerequisites: Natural armor, Con 13.

Benefit: The creature's natural armor bonus increases by 1.

Special: A creature can gain this feat multiple times. Each time the creature takes the feat its natural armor bonus increases by another point.

IMPROVED NATURAL ATTACK [GENERAL]

Prerequisite: Natural weapon, base attack bonus +4.

Benefit: Choose one of the creature's natural attack forms. The damage for this natural weapon increases by one step, as if the creature's size had increased by one category: 1d2, 1d3, 1d4, 1d6, 1d8, 2d6, 3d6, 4d6, 6d6, 8d6, 12d6.

A weapon or attack that deals 1d10 points of damage increases as follows: 1d10, 2d8, 3d8, 4d8, 6d8, 8d8, 12d8.

MULTIATTACK [GENERAL]

Prerequisite: Three or more natural attacks.

Benefit: The creature's secondary attacks with natural weapons take only a -2 penalty.

Normal: Without this feat, the creature's secondary attacks with natural weapons take a -5 penalty.

MULTIWEAPON FIGHTING [GENERAL]

Prerequisites: Dex 13, three or more hands.

Benefit: Penalties for fighting with multiple weapons are reduced by 2 with the primary hand and reduced by 6 with off hands.

Normal: A creature without this feat takes a -6 penalty on attacks made with its primary hand and a -10 penalty on attacks made with its off hands. (It has one primary hand, and all the others are off hands.) See Two-Weapon Fighting.

Special: This feat replaces the Two-Weapon Fighting feat for creatures with more than two arms.

QUICKEN SPELL-LIKE ABILITY [GENERAL]

Prerequisite: Spell-like ability at caster level 10th or higher.

Benefit: Choose one of the creature's spell-like abilities, subject to the restrictions described below. The creature can use that ability as a quickened spell-like ability three times per day (or less, if the ability is normally usable only once or twice per day).

Using a quickened spell-like ability is a free action that does not provoke an attack of opportunity. The creature can perform another action—including the use of another spell-like ability—in the same round that it uses a quickened spell-like ability. The creature may use only one quickened spell-like ability per round.

The creature can only select a spell-like ability duplicating a spell with a level less than or equal to half its caster level (round down) -4. For a summary, see the table below.

In addition, a spell-like ability that duplicates a spell with a casting time greater than 1 full round cannot be quickened.

Normal: Normally the use of a spell-like ability requires a standard action and provokes an attack of opportunity unless noted otherwise.

Special: This feat can be taken multiple times. Each time it is taken, the creature can apply it to a different one of its spell-like abilities.

Empower and Quicken Spell-Like Ability

Spell Level to Empower	Caster Level to Empower	Caster Level to Quicken
0	4th	8th
1st	6th	10th
2nd	8th	12th
3rd	10th	14th
4th	12th	16th
5th	14th	18th
6th	16th	20th

7th	18th	—
8th	20th	—
9th	—	—

SNATCH [GENERAL]

Prerequisite: Size Huge or larger.

Benefits: The creature can choose to start a grapple when it hits with a claw or bite attack, as though it had the improved grab special attack. If the creature gets a hold on a creature three or more sizes smaller, it squeezes each round for automatic bite or claw damage. A snatched opponent held in the creature's mouth is not allowed a Reflex save against the creature's breath weapon, if it has one.

The creature can drop a creature it has snatched as a free action or use a standard action to fling it aside. A flung creature travels $1d6 \times 10$ feet, and takes 1d6 points of damage per 10 feet traveled. If the creature flings a snatched opponent while flying, the opponent takes this amount of falling damage, whichever is greater.

WINGOVER [GENERAL]

Prerequisite: Fly speed.

Benefits: A flying creature with this feat can change direction quickly once each round as a free action. This feat allows it to turn up to 180 degrees regardless of its maneuverability, in addition to any other turns it is normally allowed. A creature cannot gain altitude during a round when it executes a wingover, but it can dive.

The change of direction consumes 10 feet of flying movement.

MONSTERS AS RACES

While every monster has the statistics that a player would need to play the creature as a character, most monsters are not suitable as PCs. Creatures who have an Intelligence score of 2 or lower, who have no way to communicate, or who are so different from other PCs that they disrupt the campaign should not be used. Some creatures have strange innate abilities or great physical power, and thus are questionable at best as characters (except in high-level campaigns).

Starting Level of a Monster PC: Monsters suitable for play have a level adjustment given in their statistics. Add a monster's level adjustment to its Hit Dice and class levels to get the creature's effective character level, or ECL. Effectively, monsters with a level adjustment become multiclass character when they take class levels. A creature's "monster class" is always a favored class, and the creature never takes XP penalties for having it.

Humanoids and Class Levels: Creatures with 1 or less HD replace their monster levels with their character levels. The monster loses the attack bonus, saving throw bonuses, skills, and feats granted by its 1 monster HD and gains the attack bonus, save bonuses, skills, feats, and other class abilities of a 1st-level character of the appropriate class.

Characters with more than 1 Hit Die because of their race do not get a feat for their first class level as members of the common races do, and they do not multiply the skill points for their first class level by four. Instead, they have already received a feat for their first Hit Die because of race, and they have already multiplied their racial skill points for their first Hit Die by four.

Level Adjustment and Effective Character Level: To determine the effective character level (ECL) of a monster character, add its level adjustment to its racial Hit Dice and character class levels.

Use ECL instead of character level to determine how many experience points a monster character needs to reach its next level. Also use ECL to determine starting wealth for a monster character.

Monster characters treat skills mentioned in their monster entry as class skills.

If a monster has 1 Hit Die or less, or if it is a template creature, it must start the game with one or more class levels, like a regular character. If a monster has 2 or more Hit Dice, it can start with no class levels (though it can gain them later).

Even if the creature is of a kind that normally advances by Hit Dice rather than class levels a PC can gain class levels rather than Hit Dice.

Hit Dice: The creature's Hit Dice equal the number of class levels it has plus its racial Hit Dice. Additional Hit Dice gained from taking levels in a character class never affect a creature's size like additional racial Hit Dice do.

Feat Acquisition and Ability Score Increases: A monster's total Hit Dice, not its ECL, govern its acquisition of feats and ability score increases.

Ability Scores for Monster PCs: While a monsters statistics give the ability scores for a typical creature of a certain kind, any "monster" creature that becomes an adventurer is definitely not typical. Therefore, when creating a PC from a creature, check to see if the creature's entry has any ability scores of 10 or higher. If so, for each score, subtract 10 (if the score is even) or 11 (if the score is odd) to get the creature's modifier for that ability based on its race or kind. Generate the character's ability scores as normal, then add the racial ability modifiers to get their ability scores.

Note: Some monsters have base ability scores other than 10 and 11. If alternate scores were used this will be indicated in the monster entry. Also, some monsters that make good PCs have their racial ability modifiers and other traits already listed in their monster entry.

For ability scores lower than 10, the procedure is different. First, determine the character's ability scores, and compare that number to the monster's average ability score, using either the table below that applies to Intelligence or the table that applies to the other five ability scores.

The separate table for Intelligence ensures that no PC ends up with an Intelligence score lower than 3. This is important, because creatures with an Intelligence score lower than 3 are not playable characters. Creatures with any ability score lower than 1 are also not playable.

Other Statistics for Monsters: Creatures with Hit Dice of 1 or less have normal, class-based Hit Dice and features. They get skills and feats appropriate to a 1st-level character (even if they have a level adjustment).

Those with 2 or more Hit Dice have statistics based on these Hit Dice plus Hit Dice for class levels (if any).

Experience for Monsters: A monster with Hit Dice of 1 or less, no level adjustment, and class levels uses the same tables as standard PC races when determining experience needed.

A monster with Hit Dice of 1 or less, a level adjustment, and class levels adds its class levels, Hit Die, and level adjustment together when determining experience needed (class level + HD + level adjustment).

A monster with more than one Hit Die, a level adjustment, and class levels adds its Hit Dice, class levels, and level adjustment together when determining experience needed (HD + level adjustment + class level).

CARRYING, MOVEMENT, & EXPLORATION

CARRYING CAPACITY

Encumbrance rules determine how much a character's armor and equipment slow him or her down. Encumbrance comes in two parts: encumbrance by armor and encumbrance by total weight.

Encumbrance by Armor: A character's armor defines his or her maximum Dexterity bonus to AC, armor check penalty, speed, and running speed. Unless your character is weak or carrying a lot of gear, that's all you need to know. The extra gear your character carries won't slow him or her down any more than the armor already does.

If your character is weak or carrying a lot of gear, however, then you'll need to calculate encumbrance by weight. Doing so is most important when your character is trying to carry some heavy object.

Weight: If you want to determine whether your character's gear is heavy enough to slow him or her down more than the armor already does, total the weight of all the character's items, including armor, weapons, and gear. Compare this total to the character's Strength on Table: Carrying Capacity. Depending on how the weight compares to the character's carrying capacity, he or she may be carrying a light, medium, or heavy load. Like armor, a character's load affects his or her maximum Dexterity bonus to AC, carries a check penalty (which works like an armor check penalty), reduces the character's speed, and affects how fast the character can run, as shown on Table: Carrying Loads. A medium or heavy load counts as medium or heavy armor for the purpose of abilities or skills that are restricted by armor. Carrying a light load does not encumber a character.

If your character is wearing armor, use the worse figure (from armor or from load) for each category. Do not stack the penalties.

Lifting and Dragging: A character can lift as much as his or her maximum load over his or her head.

A character can lift as much as double his or her maximum load off the ground, but he or she can only stagger around with it. While overloaded in this way, the character loses any Dexterity bonus to AC and can move only 5 feet per round (as a full-round action).

A character can generally push or drag along the ground as much as five times his or her maximum load. Favorable conditions can double these numbers, and bad circumstances can reduce them to one-half or less.

Bigger and Smaller Creatures: The figures on Table: Carrying Capacity are for Medium bipedal creatures. A larger bipedal creature can carry more weight depending on its size category, as follows: Large x2, Huge x4, Gargantuan x8, Colossal x16. A smaller creature can carry less weight depending on its size category, as follows: Small x3/4, Tiny x1/2, Diminutive x1/4, Fine x1/8.

Quadrupeds can carry heavier loads than characters can. Instead of the multipliers given above, multiply the value corresponding to the creature's Strength score from Table: Carrying Capacity by the appropriate modifier, as follows: Fine x1/4, Diminutive x1/2, Tiny x3/4, Small x1, Medium x1-1/2, Large x3, Huge x6, Gargantuan x12, Colossal x24.

Tremendous Strength: For Strength scores not shown on Table: Carrying Capacity, find the Strength score between 20 and 29 that has the same number in the "ones" digit as the creature's Strength score does and multiply the numbers in that row by 4 for every ten points the creature's strength is above the score for that row.

Table: Carrying Capacity

MOVEMENT

There are three movement scales, as follows.

- Tactical, for combat, measured in feet (or squares) per round.
- Local, for exploring an area, measured in feet per minute.
- Overland, for getting from place to place, measured in miles per hour or miles per day.

Modes of Movement: While moving at the different movement scales, creatures generally walk, hustle, or run.

Walk: A walk represents unhurried but purposeful movement at 3 miles per hour for an unencumbered human.

Hustle: A hustle is a jog at about 6 miles per hour for an unencumbered human. A character moving his or her speed twice in a single round, or moving that speed in the same round that he or she performs a standard action or another move action is hustling when he or she moves.

Run (x3): Moving three times speed is a running pace for a character in heavy armor. It represents about 9 miles per hour for a human in full plate.

Run (x4): Moving four times speed is a running pace for a character in light, medium, or no armor. It represents about 12 miles per hour for an unencumbered human, or 8 miles per hour for a human in chainmail.

TACTICAL MOVEMENT

Use tactical movement for combat. Characters generally don't walk during combat—they hustle or run. A character who moves his or her speed and takes some action is hustling for about half the round and doing something else the other half.

Hampered Movement: Difficult terrain, obstacles, or poor visibility can hamper movement. When movement is hampered, each square moved into usually counts as two squares, effectively reducing the distance that a character can cover in a move. If more than one condition applies, multiply together all additional costs that apply. (This is a specific exception to the normal rule for doubling)

In some situations, your movement may be so hampered that you don't have sufficient speed even to move 5 feet (1 square). In such a case, you may use a full-round action to move 5 feet (1 square) in any direction, even diagonally. Even though this looks like a 5-foot step, it's not, and thus it provokes attacks of opportunity normally. (You can't take advantage of this rule to move through impassable terrain or to move when all movement is prohibited to you.)

You can't run or charge through any square that would hamper your movement.

LOCAL MOVEMENT

Characters exploring an area use local movement, measured in feet per minute.

Walk: A character can walk without a problem on the local scale.

Hustle: A character can hustle without a problem on the local scale. See Overland Movement, below, for movement measured in miles per hour.

Run: A character with a Constitution score of 9 or higher can run for a minute without a problem. Generally, a character can run for a minute or two before having to rest for a minute.

OVERLAND MOVEMENT

Characters covering long distances cross-country use overland movement. Overland movement is measured in miles per hour or miles per day. A day represents 8 hours of actual travel time. For rowed watercraft, a day represents 10 hours of rowing. For a sailing ship, it represents 24 hours.

Walk: A character can walk 8 hours in a day of travel without a problem. Walking for longer than that can wear him or her out (see Forced March, below).

Hustle: A character can hustle for 1 hour without a problem. Hustling for a second hour in between sleep cycles deals 1 point of nonlethal damage, and each additional hour deals twice the damage taken during the previous hour of hustling. A character who takes any nonlethal damage from hustling becomes fatigued.

A fatigued character can't run or charge and takes a penalty of -2 to Strength and Dexterity. Eliminating the nonlethal damage also eliminates the fatigue.

Run: A character can't run for an extended period of time.

Attempts to run and rest in cycles effectively work out to a hustle.

Terrain: The terrain through which a character travels affects how much distance he or she can cover in an hour or a day (see Table: Terrain and Overland Movement). A highway is a straight, major, paved road. A road is typically a dirt track. A trail is like a road, except that it allows only single-file travel and does not benefit a party traveling with vehicles. Trackless terrain is a wild area with no paths.

Forced March: In a day of normal walking, a character walks for 8 hours. The rest of the daylight time is spent making and breaking camp, resting, and eating.

A character can walk for more than 8 hours in a day by making a forced march. For each hour of marching beyond 8 hours, a Constitution check (DC 10, +2 per extra hour) is required. If the check fails, the character takes 1d6 points of nonlethal damage. A character who takes any nonlethal damage from a forced march becomes fatigued. Eliminating the nonlethal damage also eliminates the fatigue. It's possible for a character to march into unconsciousness by pushing himself too hard.

Mounted Movement: A mount bearing a rider can move at a hustle. The damage it takes when doing so, however, is lethal damage, not nonlethal damage. The creature can also be ridden in a forced march, but its Constitution checks automatically fail, and, again, the damage it takes is lethal damage. Mounts also become fatigued when they take any damage from hustling or forced marches.

See Table: Mounts and Vehicles for mounted speeds and speeds for vehicles pulled by draft animals.

Waterborne Movement: See Table: Mounts and Vehicles for speeds for water vehicles.

Longship (sailed and rowed)	3 miles	72 miles
Galley (rowed and sailed)	4 miles	96 miles

1 Quadrupeds, such as horses, can carry heavier loads than characters can. See [Carrying Capacity](#), above, for more information.

2 Rafts, barges, keelboats, and rowboats are used on lakes and rivers. If going downstream, add the speed of the current (typically 3 miles per hour) to the speed of the vehicle. In addition to 10 hours of being rowed, the vehicle can also float an additional 14 hours, if someone can guide it, so add an additional 42 miles to the daily distance traveled. These vehicles can't be rowed against any significant current, but they can be pulled upstream by draft animals on the shores.

MOVING IN THREE DIMENSIONS

Tactical Aerial Movement

Once movement becomes three-dimensional and involves turning in midair and maintaining a minimum velocity to stay aloft, it gets more complicated. Most flying creatures have to slow down at least a little to make a turn, and many are limited to fairly wide turns and must maintain a minimum forward speed. Each flying creature has a maneuverability, as shown on Table: Maneuverability. The entries on the table are defined below.

Minimum Forward Speed: If a flying creature fails to maintain its minimum forward speed, it must land at the end of its movement. If it is too high above the ground to land, it falls straight down, descending 150 feet in the first round of falling. If this distance brings it to the ground, it takes falling damage. If the fall doesn't bring the creature to the ground, it must spend its next turn recovering from the stall. It must succeed on a DC 20 Reflex save to recover. Otherwise it falls another 300 feet. If it hits the ground, it takes falling damage. Otherwise, it has another chance to recover on its next turn.

Hover: The ability to stay in one place while airborne.

Move Backward: The ability to move backward without turning around.

Reverse: A creature with good maneuverability uses up 5 feet of its speed to start flying backward.

Turn: How much the creature can turn after covering the stated distance.

Turn in Place: A creature with good or average maneuverability can use some of its speed to turn in place.

Maximum Turn: How much the creature can turn in any one space.

Up Angle: The angle at which the creature can climb.

Up Speed: How fast the creature can climb.

Down Angle: The angle at which the creature can descend.

Down Speed: A flying creature can fly down at twice its normal flying speed.

Between Down and Up: An average, poor, or clumsy flier must fly level for a minimum distance after descending and before climbing. Any flier can begin descending after a climb without an intervening distance of level flight.

Table: Maneuverability

EVASION AND PURSUIT

In round-by-round movement, simply counting off squares, it's impossible for a slow character to get away from a determined fast character without mitigating circumstances. Likewise, it's no problem for a fast character to get away from a slower one.

When the speeds of the two concerned characters are equal, there's a simple way to resolve a chase: If one creature is pursuing another, both are moving at the same speed, and the chase continues for at least a few rounds, have them make opposed Dexterity checks to see who is the faster over those rounds. If the creature being chased wins, it escapes. If the pursuer wins, it catches the fleeing creature.

Sometimes a chase occurs overland and could last all day, with the two sides only occasionally getting glimpses of each other at a distance. In the case of a long chase, an opposed Constitution check made by all parties determines which can keep pace the longest. If the creature being chased rolls the highest, it gets away. If not, the chaser runs down its prey, outlasting it with stamina.

MOVING AROUND IN SQUARES

In general, when the characters aren't engaged in round-by-round combat, they should be able to move anywhere and in any manner that you can imagine real people could. A 5-foot square, for instance, can hold several characters; they just can't all fight effectively in that small space. The rules for movement are important for combat, but outside combat they can impose unnecessary hindrances on character activities.

EXPLORATION

VISION AND LIGHT

Dwarves and half-orcs have darkvision, but everyone else needs light to see by. See Table: Light Sources and Illumination for the radius that a light source illuminates and how long it lasts.

In an area of bright light, all characters can see clearly. A creature can't hide in an area of bright light unless it is invisible or has cover.

In an area of shadowy illumination, a character can see dimly. Creatures within this area have concealment relative to that character. A creature in an area of shadowy illumination can make a Hide check to conceal itself.

In areas of darkness, creatures without darkvision are effectively blinded. In addition to the obvious effects, a blinded creature has a 50% miss chance in combat (all opponents have total concealment), loses any Dexterity bonus to AC, takes a -2 penalty to AC, moves at half speed, and takes a -4 penalty on Search checks and most Strength and Dexterity-based skill checks.

Characters with low-light vision (elves, gnomes, and half-elves) can see objects twice as far away as the given radius. Double the effective radius of bright light and of shadowy illumination for such characters.

Characters with darkvision (dwarves and half-orcs) can see lit areas normally as well as dark areas within 60 feet. A creature can't hide within 60 feet of a character with darkvision unless it is invisible or has cover.

Table: Light Sources and Illumination

Object	Bright	Shadowy	Duration
Candle	n/a ¹	5 ft.	1 hr.
Everburning torch	20 ft.	40 ft.	Permanent
Lamp, common	15 ft.	30 ft.	6 hr./pint
Lantern, bullseye ²	60-ft. cone	120-ft. cone	6 hr./pint
Lantern, hooded	30 ft.	60 ft.	6 hr./pint

Torch	20 ft.	40 ft.	1 hr.
Spell	Bright	Shadowy	Duration
<i>Continual flame</i>	20 ft.	40 ft.	Permanent
<i>Dancing lights</i> (torches)	20 ft. (each)	40 ft. (each)	1 min.
<i>Daylight</i>	60 ft.	120 ft.	30 min.
<i>Light</i>	20 ft.	40 ft.	10 min.

¹ A candle does not provide bright illumination, only shadowy illumination.

² A bullseye lantern illuminates a cone, not a radius.

BREAKING AND ENTERING

When attempting to break an object, you have two choices: smash it with a weapon or break it with sheer strength.

Smashing an Object

Smashing a weapon or shield with a slashing or bludgeoning weapon is accomplished by the sunder special attack. Smashing an object is a lot like sundering a weapon or shield, except that your attack roll is opposed by the object's AC. Generally, you can smash an object only with a bludgeoning or slashing weapon.

Armor Class: Objects are easier to hit than creatures because they usually don't move, but many are tough enough to shrug off some damage from each blow. An object's Armor Class is equal to 10 + its size modifier + its Dexterity modifier. An inanimate object has not only a Dexterity of 0 (-5 penalty to AC), but also an additional -2 penalty to its AC. Furthermore, if you take a full-round action to line up a shot, you get an automatic hit with a melee weapon and a +5 bonus on attack rolls with a ranged weapon.

Hardness: Each object has hardness—a number that represents how well it resists damage. Whenever an object takes damage, subtract its hardness from the damage. Only damage in excess of its hardness is deducted from the object's hit points (see Table: Common Armor, Weapon, and Shield Hardness and Hit Points; Table: Substance Hardness and Hit Points; and Table: Object Hardness and Hit Points).

Hit Points: An object's hit point total depends on what it is made of and how big it is (see Table: Common Armor, Weapon, and Shield Hardness and Hit Points; Table: Substance Hardness and Hit Points; and Table: Object Hardness and Hit Points). When an object's hit points reach 0, it's ruined.

Very large objects have separate hit point totals for different sections.

Energy Attacks: Acid and sonic attacks deal damage to most objects just as they do to creatures; roll damage and apply it normally after a successful hit. Electricity and fire attacks deal half damage to most objects; divide the damage dealt by 2 before applying the hardness. Cold attacks deal one-quarter damage to most objects; divide the damage dealt by 4 before applying the hardness.

Ranged Weapon Damage: Objects take half damage from ranged weapons (unless the weapon is a siege engine or something similar). Divide the damage dealt by 2 before applying the object's hardness.

Ineffective Weapons: Certain weapons just can't effectively deal damage to certain objects.

Immunities: Objects are immune to nonlethal damage and to critical hits.

Even animated objects, which are otherwise considered creatures, have these immunities because they are constructs.

Magic Armor, Shields, and Weapons: Each +1 of enhancement bonus adds 2 to the hardness of armor, a weapon, or a shield and +10 to the item's hit points.

Vulnerability to Certain Attacks: Certain attacks are especially successful against some objects. In such cases, attacks deal double their normal damage and may ignore the object's hardness.

Damaged Objects: A damaged object remains fully functional until the item's hit points are reduced to 0, at which point it is destroyed.

Damaged (but not destroyed) objects can be repaired with the Craft skill.

Saving Throws: Nonmagical, unattended items never make saving throws. They are considered to have failed their saving throws, so they always are affected by spells. An item attended by a character (being grasped, touched, or worn) makes saving throws as the character (that is, using the character's saving throw bonus).

Magic items always get saving throws. A magic item's Fortitude, Reflex, and Will save bonuses are equal to 2 + one-half its caster level. An attended magic item either makes saving throws as its owner or uses its own saving throw bonus, whichever is better.

Animated Objects: Animated objects count as creatures for purposes of determining their Armor Class (do not treat them as inanimate objects).

Breaking Items

When a character tries to break something with sudden force rather than by dealing damage, use a Strength check (rather than an attack roll and damage roll, as with the sunder special attack) to see whether he or she succeeds. The DC depends more on the construction of the item than on the material.

If an item has lost half or more of its hit points, the DC to break it drops by 2.

Larger and smaller creatures get size bonuses and size penalties on Strength checks to break open doors as follows: Fine -16, Diminutive -12, Tiny -8, Small -4, Large +4, Huge +8, Gargantuan +12, Colossal +16.

A crowbar or portable ram improves a character's chance of breaking open a door.

TREASURE

MONSTERS WITH TREASURE

Every monster has a treasure rating (indicating how much treasure it has, although for some creatures the rating is “None”). The tables found below are used to determine the specifics. After referencing the level and kind of treasure (coins, goods, items) found in the creature’s description, roll on the appropriate row and columns of the proper table.

When generating an encounter dealing with monsters away from their lair, remember that a creature only takes what it can easily carry with it. In the case of a creature that cannot use treasure, that generally means nothing. The monster safeguards or hides its treasure as well as it can, but it leaves it behind when outside the lair.

Using the Treasure Table

Cross-reference the level of the treasure on the left with the type of treasure. The level of the treasure is equal to the CR of the monsters in the encounter. A standard treasure (one that includes coins, goods, and items) requires three rolls, one for each category.

Table: Treasure Values per Encounter

Encounter Level	Treasure per Encounter	Encounter Level	Treasure per Encounter
1	300 gp	11	7,500 gp
2	600 gp	12	9,800 gp
3	900 gp	13	13,000 gp
4	1,200 gp	14	17,000 gp
5	1,600 gp	15	22,000 gp
6	2,000 gp	16	28,000 gp
7	2,600 gp	17	36,000 gp

9	4,500 gp	19	61,000 gp
10	5,800 gp	20	80,000 gp

On average, the PCs should earn one treasure suitable to their level for each encounter they overcome.

DUNGEONS

TYPES OF DUNGEONS

The four basic dungeon types are defined by their current status. Many dungeons are variations on these basic types or combinations of more than one of them. Sometimes old dungeons are used again and again by different inhabitants for different purposes.

Ruined Structure: Once occupied, this place is now abandoned (completely or in part) by its original creator or creators, and other creatures have wandered in. Many subterranean creatures look for abandoned underground constructions in which to make their lairs. Any traps that might exist have probably been set off, but wandering beasts might very well be common.

Occupied Structure: This type of dungeon is still in use. Creatures (usually intelligent) live there, although they may not be the dungeon's creators. An occupied structure might be a home, a fortress, a temple, an active mine, a prison, or a headquarters. This type of dungeon is less likely to have traps or wandering beasts, and more likely to have organized guards—both on watch and on patrol. Traps or wandering beasts that might be encountered are usually under the control of the occupants. Occupied structures have furnishings to suit the inhabitants, as well as decorations, supplies, and the ability for occupants to move around (doors they can open, hallways large enough for them to pass through, and so on). The inhabitants might have a communication system, and they almost certainly control an access to the outside.

Some dungeons are partially occupied and partially empty or in ruins. In such cases, the occupants are typically not the original builders but instead a group of intelligent creatures that have set up their base, lair, or fortification within an abandoned dungeon.

Safe Storage: When people want to protect something, they might bury it underground. Whether the item they want to protect is a fabulous treasure, a forbidden artifact, or the dead body of an important figure, these valuable objects are placed within a dungeon and surrounded by barriers, traps, and guardians.

The safe storage type of dungeon is the most likely to have traps but the least likely to have wandering beasts. This type of dungeon normally is built for function rather than appearance, but sometimes it has ornamentation in the form of statuary or painted walls. This is particularly true of the tombs of important people.

Sometimes, however, a vault or a crypt is constructed in such a way as to house living guardians. The problem with this strategy is that something must be done to keep the creatures alive between intrusion attempts. Magic is usually the best solution to provide food and water for these creatures. Even if there's no way anything living can survive in a safe storage dungeon, certain monsters can still serve as guardians. Builders of vaults or tombs often place undead creatures or constructs, both of which have no need for sustenance or rest, to guard their dungeons. Magic traps can attack intruders by summoning monsters into the dungeon. These guardians also need no sustenance, since they appear only when they're needed and disappear when their task is done.

Natural Cavern Complex: Underground caves provide homes for all sorts of subterranean monsters. Created naturally and connected by a labyrinthine tunnel system, these caverns lack any sort of pattern, order, or decoration. With no intelligent force behind its construction, this type of dungeon is the least likely to have traps or even doors.

Fungi of all sorts thrive in caves, sometimes growing in huge forests of mushrooms and puffballs. Subterranean predators prowl these forests, looking for those feeding upon the fungi. Some varieties of fungus give off a phosphorescent glow, providing a natural cavern complex with its own limited light source. In other areas, a *daylight* spell or similar magical effect can provide enough light for green plants to grow.

Often, a natural cavern complex connects with another type of dungeons, the caves having been discovered when the manufactured dungeon was delved. A cavern complex can connect two otherwise unrelated dungeons, sometimes creating a strange mixed environment. A natural cavern complex joined with another dungeon often provides a route by which subterranean creatures find their way into a manufactured dungeon and populate it.

WALLS

Sometimes, masonry walls—stones piled on top of each other (usually but not always held in place with mortar)—divide dungeons into corridors and chambers. Dungeon walls can also be hewn from solid rock, leaving them with a rough, chiseled look. Or, dungeon walls can be the smooth, unblemished stone of a naturally occurring cave. Dungeon walls are difficult to break down or through, but they're generally easy to climb.

Table: Walls

1 Per 10-foot-by-10-foot section.

2 These modifiers can be applied to any of the other wall types.

3 Or an additional 50 hit points, whichever is greater.

Masonry Walls: The most common kind of dungeon wall, masonry walls are usually at least 1 foot thick. Often these ancient walls sport cracks and crevices, and sometimes dangerous slimes or small monsters live in these areas and wait for prey. Masonry walls stop all but the loudest noises. It takes a DC 20 Climb check to travel along a masonry wall.

Superior Masonry Walls: Sometimes masonry walls are better built (smoother, with tighter-fitting stones and less cracking), and occasionally these superior walls are covered with plaster or stucco. Covered walls often bear paintings, carved reliefs, or other decoration. Superior masonry walls are no more difficult to destroy than regular masonry walls but are more difficult to climb (DC 25).

Hewn Stone Walls: Such walls usually result when a chamber or passage is tunneled out from solid rock. The rough surface of a hewn wall frequently provides minuscule ledges where fungus grows and fissures where vermin, bats, and subterranean snakes live. When such a wall has an “other side” (it separates two chambers in the dungeon), the wall is usually at least 3 feet thick; anything thinner risks collapsing from the weight of all the stone overhead. It takes a DC 25 Climb check to climb a hewn stone wall.

Unworked Stone Walls: These surfaces are uneven and rarely flat. They are smooth to the touch but filled with tiny holes, hidden alcoves, and ledges at various heights. They’re also usually wet or at least damp, since it’s water that most frequently creates natural caves. When such a wall has an “other side,” the wall is usually at least 5 feet thick. It takes a DC 15 Climb check to move along an unworked stone wall.

SPECIAL WALLS

Reinforced Walls: These are masonry walls with iron bars on one or both sides of the wall, or placed within the wall to strengthen it. The hardness of a reinforced wall remains the same, but its hit points are doubled and the Strength check DC to break through it is increased by 10.

Iron Walls: These walls are placed within dungeons around important places such as vaults.

Paper Walls: Paper walls are the opposite of iron walls, placed as screens to block line of sight but nothing more.

Wooden Walls: Wooden walls often exist as recent additions to older dungeons, used to create animal pens, storage bins, or just to make a number of smaller rooms out of a larger one.

Magically Treated Walls: These walls are stronger than average, with a greater hardness, more hit points, and a higher break DC. Magic can usually double the hardness and hit points and can add up to 20 to the break DC. A magically treated wall also gains a saving throw against spells that could affect it, with the save bonus equaling $2 + \text{one-half the caster level of the magic reinforcing the wall}$. Creating a magic wall requires the Craft Wondrous Item feat and the expenditure of 1,500 gp for each 10-foot-by-10-foot wall section.

Walls with Arrow Slits: Walls with arrow slits can be made of any durable material but are most commonly masonry, hewn stone, or wood. Such a wall allows defenders to fire arrows or crossbow bolts at intruders from behind the safety of the wall. Archers behind arrow slits have improved cover that gives them a +8 bonus to Armor Class, a +4 bonus on Reflex saves, and the benefits of the improved evasion class feature.

FLOORS

As with walls, dungeon floors come in many types.

Flagstone: Like masonry walls, flagstone floors are made of fitted stones. They are usually cracked and only somewhat level. Slime and mold grows in these cracks. Sometimes water runs in rivulets between the stones or sits in stagnant puddles. Flagstone is the most common dungeon floor.

Uneven Flagstone: Over time, some floors can become so uneven that a DC 10 Balance check is required to run or charge across the surface. Failure means the character can't move in this round. Floors as treacherous as this should be the exception, not the rule.

Hewn Stone Floors: Rough and uneven, hewn floors are usually covered with loose stones, gravel, dirt, or other debris. A DC 10 Balance check is required to run or charge across such a floor. Failure means the character can still act, but can't run or charge in this round.

Light Rubble: Small chunks of debris litter the ground. Light rubble adds 2 to the DC of Balance and Tumble checks.

Dense Rubble: The ground is covered with debris of all sizes. It costs 2 squares of movement to enter a square with dense rubble. Dense rubble adds 5 to the DC of Balance and Tumble checks, and it adds 2 to the DC of Move Silently checks.

Smooth Stone Floors: Finished and sometimes even polished, smooth floors are found only in dungeons with capable and careful builders.

Natural Stone Floors: The floor of a natural cave is as uneven as the walls. Caves rarely have flat surfaces of any great size. Rather, their floors have many levels. Some adjacent floor surfaces might vary in elevation by only a foot, so that moving from one to the other is no more difficult than negotiating a stair step, but in other places the floor might suddenly drop off or rise up several feet or more, requiring Climb checks to get from one surface to the other. Unless a path has been worn and well marked in the floor of a natural cave, it takes 2 squares of movement to enter a square with a natural stone floor, and the DC of Balance and Tumble checks increases by 5. Running and charging are impossible, except along paths.

SPECIAL FLOORS

Slippery: Water, ice, slime, or blood can make any of the dungeon floors described in this section more treacherous. Slippery floors increase the DC of Balance and Tumble checks by 5.

Grate: A grate often covers a pit or an area lower than the main floor. Grates are usually made from iron, but large ones can also be made from iron-bound timbers. Many grates have hinges to allow access to what lies below (such grates can be locked like any door), while others are permanent and designed not to move. A typical 1-inch-thick iron grate has 25 hit points, hardness 10, and a DC of 27 for Strength checks to break through it or tear it loose.

Ledge: Ledges allow creatures to walk above some lower area. They often circle around pits, run along underground streams, form balconies around large rooms, or provide a place for archers to stand while firing upon enemies below. Narrow ledges (12 inches wide or less) require those moving along them to make Balance checks. Failure results in the moving character falling off the ledge. Ledges sometimes have railings. In such a case, characters gain a +5 circumstance bonus on Balance checks to move along the ledge. A character who is next to a railing gains a +2 circumstance bonus on his or her opposed Strength check to avoid being bull rushed off the edge.

Ledges can also have low walls 2 to 3 feet high along their edges. Such walls provide cover against attackers within 30 feet on the other side of the wall, as long as the target is closer to the low wall than the attacker is.

Transparent Floor: Transparent floors, made of reinforced glass or magic materials (even a *wall of force*), allow a dangerous setting to be viewed safely from above. Transparent floors are sometimes placed over lava pools, arenas, monster dens, and torture chambers. They can be used by defenders to watch key areas for intruders.

Sliding Floors: A sliding floor is a type of trapdoor, designed to be moved and thus reveal something that lies beneath it. A typical sliding floor moves so slowly that anyone standing on one can avoid falling into the gap it creates, assuming there's somewhere else to go. If such a floor slides quickly enough that there's a chance of a character falling into whatever lies beneath—a spiked pit, a vat of burning oil, or a pool filled with sharks—then it's a trap.

Trap Floors: Some floors are designed to become suddenly dangerous. With the application of just the right amount of weight, or the pull of a lever somewhere nearby, spikes protrude from the floor, gouts of steam or flame shoot up from hidden holes, or the entire floor tilts. These strange floors are sometimes found in an arena, designed to make combats more exciting and deadly. Construct these floors as you would any other trap.

DOORS

Doors in dungeons are much more than mere entrances and exits. Often they can be encounters all by themselves.

Dungeon doors come in three basic types: wooden, stone, and iron.

Table: Doors

Door Type	Typical Thickness	Hardness	Hit Points	Break DC	
				Stuck	Locked
Simple wooden	1 in.	5	10 hp	13	15
Good wooden	1-1/2 in.	5	15 hp	16	18

Hinge	—	10	30 hp		

1 DC to lift. Use appropriate door figure for breaking.

Wooden Doors: Constructed of thick planks nailed together, sometimes bound with iron for strength (and to reduce swelling from dungeon dampness), wooden doors are the most common type. Wooden doors come in varying strengths: simple, good, and strong doors. Simple doors (break DC 13) are not meant to keep out motivated attackers. Good doors (break DC 16), while sturdy and long-lasting, are still not meant to take much punishment. Strong doors (break DC 23) are bound in iron and are a sturdy barrier to those attempting to get past them. Iron hinges fasten the door to its frame, and typically a circular pull-ring in the center is there to help open it. Sometimes, instead of a pull-ring, a door has an iron pull-bar on one or both sides of the door to serve as a handle. In inhabited dungeons, these doors are usually well maintained (not stuck) and unlocked, although important areas are locked up if possible.

Stone: Carved from solid blocks of stone, these heavy, unwieldy doors are often built so that they pivot when opened, although dwarves and other skilled craftsfolk are able to fashion hinges strong enough to hold up a stone door. Secret doors concealed within a stone wall are usually stone doors. Otherwise, such doors stand as tough barriers protecting something important beyond. Thus, they are often locked or barred.

Iron: Rusted but sturdy, iron doors in a dungeon are hinged like wooden doors. These doors are the toughest form of nonmagical door. They are usually locked or barred.

Locks, Bars, and Seals: Dungeon doors may be locked, trapped, reinforced, barred, magically sealed, or sometimes just stuck. All but the weakest characters can eventually knock down a door with a heavy tool such as a sledgehammer, and a number of spells and magic items give characters an easy way around a locked door.

Attempts to literally chop a door down with a slashing or bludgeoning weapon use the hardness and hit points given in Table: Doors. Often the easiest way to overcome a recalcitrant door is not by demolishing it but by breaking its lock, bar, or hinges. When assigning a DC to an attempt to knock a door down, use the following as guidelines:

DC 10 or Lower: a door just about anyone can break open.

DC 11–15: a door that a strong person could break with one try and an average person might be able to break with one try.

DC 16–20: a door that almost anyone could break, given time.

DC 21–25: a door that only a strong or very strong person has a hope of breaking, probably not on the first try.

DC 26 or Higher: a door that only an exceptionally strong person has a hope of breaking.

For specific examples in applying these guidelines, see Table: Random Door Types.

Locks: Dungeon doors are often locked, and thus the Open Lock skill comes in very handy. Locks are usually built into the door, either on the edge opposite the hinges or right in the middle of the door. Built-in locks either control an iron bar that juts out of the door and into the wall of its frame, or else a sliding iron bar or heavy wooden bar that rests behind the entire door. By contrast, padlocks are not built-in but usually run through two rings, one on the door and the other on the wall. More complex locks, such as combination locks and puzzle locks, are usually built into the door itself. Because such keyless locks are larger and more complex, they are typically only found in sturdy doors (strong wooden, stone, or iron doors).

The Open Lock DC to pick a lock often falls into the range of 20 to 30, although locks with lower or higher DCs can exist. A door can have more than one lock, each of which must be unlocked separately. Locks are often trapped, usually with poison needles that extend out to prick a rogue's finger.

Breaking a lock is sometimes quicker than breaking the whole door. If a PC wants to whack at a lock with a weapon, treat the typical lock as having hardness 15 and 30 hit points. A lock can only be broken if it can be attacked separately from the door, which means that a built-in lock is immune to this sort of treatment. In an occupied dungeon, every locked door should have a key somewhere.

A special door (see below for examples) might have a lock with no key, instead requiring that the right combination of nearby levers must be manipulated or the right symbols must be pressed on a keypad in the correct sequence to open the door.

Stuck Doors: Dungeons are often damp, and sometimes doors get stuck, particularly wooden doors. Assume that about 10% of wooden doors and 5% of nonwooden doors are stuck. These numbers can be doubled (to 20% and 10%, respectively) for long-abandoned or neglected dungeons.

Barred Doors: When characters try to bash down a barred door, it's the quality of the bar that matters, not the material the door is made of. It takes a DC 25 Strength check to break through a door with a wooden bar, and a DC 30 Strength check if the bar is made of iron. Characters can attack the door and destroy it instead, leaving the bar hanging in the now-open doorway.

Magic Seals: In addition to magic traps spells such as *arcane lock* can discourage passage through a door. A door with an *arcane lock* spell on it is considered locked even if it doesn't have a physical lock. It takes a *knock* spell, a *dispel magic* spell, or a successful Strength check to get through such a door.

Hinges: Most doors have hinges. Obviously, sliding doors do not. (They usually have tracks or grooves instead, allowing them to slide easily to one side.)

Standard Hinges: These hinges are metal, joining one edge of the door to the doorframe or wall. Remember that the door swings open toward the side with the hinges. (So, if the hinges are on the PCs' side, the door opens toward them; otherwise it opens away from them.) Adventurers can take the hinges apart one at a time with successful Disable Device checks (assuming the hinges are on their side of the door, of course). Such a task has a DC of 20 because most hinges are rusted or stuck. Breaking a hinge is difficult. Most have hardness 10 and 30 hit points. The break DC for a hinge is the same as for breaking down the door.

Nested Hinges: These hinges are much more complex than ordinary hinges, and are found only in areas of excellent construction. These hinges are built into the wall and allow the door to swing open in either direction. PCs can't get at the hinges to fool with them unless they break through the doorframe or wall. Nested hinges are typically found on stone doors but sometimes on wooden or iron doors as well.

Pivots: Pivots aren't really hinges at all, but simple knobs jutting from the top and bottom of the door that fit into holes in the doorframe, allowing the door to spin. The advantages of pivots is that they can't be dismantled like hinges and they're simple to make. The disadvantage is that since the door pivots on its center of gravity (typically in the middle), nothing larger than half the door's width can fit through. Doors with pivots are usually stone and are often quite wide to overcome this disadvantage. Another solution is to place the pivot toward one side and have the door be thicker at that end and thinner toward the other end so that it opens more like a normal door. Secret doors in walls often turn on pivots, since the lack of hinges makes it easier to hide the door's presence. Pivots also allow objects such as bookcases to be used as secret doors.

Secret Doors: Disguised as a bare patch of wall (or floor, or ceiling), a bookcase, a fireplace, or a fountain, a secret door leads to a secret passage or room. Someone examining the area finds a secret door, if one exists, on a successful Search check (DC 20 for a typical secret door to DC 30 for a well-hidden secret door). Elves have a chance to detect a secret door just by casually looking at an area.

Many secret doors require a special method of opening, such as a hidden button or pressure plate. Secret doors can open like normal doors, or they may pivot, slide, sink, rise, or even lower like a drawbridge to permit access. Builders might put a secret door down low near the floor or high up in a wall, making it difficult to find or reach. Wizards and sorcerers have a spell, *phase door*, that allows them to create a magic secret door that only they can use.

Magic Doors: Enchanted by the original builders, a door might speak to explorers, warning them away. It might be protected from harm, increasing its hardness or giving it more hit points as well as an improved saving throw bonus against *disintegrate* and other similar spells. A magic door might not lead into the space revealed beyond, but instead it might be a portal to a faraway place or even another plane of existence. Other magic doors might require passwords or special keys to open them.

Portcullises: These special doors consist of iron or thick, ironbound, wooden shafts that descend from a recess in the ceiling above an archway. Sometimes a portcullis has crossbars that create a grid, sometimes not. Typically raised by means of a winch or a capstan, a portcullis can be dropped quickly, and the shafts end in spikes to discourage anyone from standing underneath (or from attempting to dive under it as it drops). Once it is dropped, a portcullis locks, unless it is so large that no normal person could lift it anyway. In any event, lifting a typical portcullis requires a DC 25 Strength check.

WALLS, DOORS, AND DETECT SPELLS

Stone walls, iron walls, and iron doors are usually thick enough to block most *detect* spells, such as *detect thoughts*. Wooden walls, wooden doors, and stone doors are usually not thick enough to do so. However, a secret stone door built into a wall and as thick as the wall itself (at least 1 foot) does block most *detect* spells.

ROOMS

Rooms in dungeons vary in shape and size. Although many are simple in construction and appearance, particularly interesting rooms have multiple levels joined by stairs, ramps, or ladders, as well as statuary, altars, pits, chasms, bridges, and more. Underground chambers are prone to collapse, so many rooms—particularly large ones—have arched ceilings or pillars to support the weight of the rock overhead.

Common dungeon rooms fall into the following broad categories.

Guard Post: Intelligent, social denizens of the dungeon will generally have a series of adjacent rooms they consider “theirs,” and they’ll guard the entrances to that common area.

Living Quarters: All but the most nomadic creatures have a lair where they can rest, eat, and store their treasure. Living quarters commonly include beds (if the creature sleeps), possessions (both valuable and mundane), and some sort of food preparation area. Noncombatant creatures such as juveniles and the elderly are often found here.

Work Area: Most intelligent creatures do more than just guard, eat, and sleep, and many devote rooms to magic laboratories, workshops for weapons and armor, or studios for more esoteric tasks.

Shrine: Any creature that is particularly religious may have some place dedicated to worship, and others may venerate something of great historical or personal value. Depending on the creature’s resources and piety, a shrine can be humble or extensive. A shrine is where PCs will likely encounter NPC clerics, and it’s common for wounded monsters to flee to a shrine friendly to them when they seek healing.

Vault: Well protected, often by a locked iron door, a vault is a special room that contains treasure. There's usually only one entrance—an appropriate place for a trap.

Crypt: Although sometimes constructed like a vault, a crypt can also be a series of individual rooms, each with its own sarcophagus, or a long hall with recesses on either side—shelves to hold coffins or bodies.

Those who are worried about undead rising from the grave take the precaution of locking and trapping a crypt from the outside—making the crypt easy to get into but difficult to leave. Those worried about tomb robbers make their crypts difficult to get into. Some builders do both, just to be on the safe side.

CORRIDORS

All dungeons have rooms, and most have corridors. While most corridors simply connect rooms, sometimes they can be encounter areas in their own right because of traps, guard patrols, and wandering monsters out on the hunt.

Corridor Traps: Because passageways in dungeons tend to be narrow, offering few movement options, dungeon builders like to place traps in them. In a cramped passageway, there's no way for intruders to move around concealed pits, falling stones, arrow traps, tilting floors, and sliding or rolling rocks that fill the entire passage. For the same reason, magic traps such as *glyphs of warding* are effective in hallways as well.

Mazes: Usually, passages connect chambers in the simplest and straightest manner possible. Some dungeon builders, however, design a maze or a labyrinth within the dungeon. This sort of construction is difficult to navigate (or at least to navigate quickly) and, when filled with monsters or traps, can be an effective barrier.

A maze can be used to cut off one area of the dungeon, deflecting intruders away from a protected spot. Generally, though, the far side of a maze holds an important crypt or vault—someplace that the dungeon's regular inhabitants rarely need to get to.

MISCELLANEOUS FEATURES

Stairs: The usual way to connect different levels of a dungeon is with stairs. Straight stairways, spiral staircases, or stairwells with multiple landings between flights of stairs are all common in dungeons, as are ramps (sometimes with an incline so slight that it can be difficult to notice; Spot DC 15). Stairs are important accessways, and are sometimes guarded or trapped. Traps on stairs often cause intruders to slide or fall down to the bottom, where a pit, spikes, a pool of acid, or some other danger awaits.

Gradual Stairs: Stairs that rise less than 5 feet for every 5 feet of horizontal distance they cover don't affect movement, but characters who attack a foe below them gain a +1 bonus on attack rolls from being on higher ground. Most stairs in dungeons are gradual, except for spiral stairs (see below).

Steep Stairs: Characters moving up steep stairs (which rise at a 45-degree angle or steeper) must spend 2 squares of movement to enter each square of stairs. Characters running or charging down steep stairs must succeed on a DC 10 Balance check upon entering the first steep stairs square. Characters who fail stumble and must end their movement $1d2 \times 5$ feet later. Characters who fail by 5 or more take 1d6 points of damage and fall prone in the square where they end their movement. Steep stairs increase the DC of Tumble checks by 5.

Spiral Stairs: This form of steep stairs is designed to make defending a fortress easier. Characters gain cover against foes below them on spiral stairs because they can easily duck around the staircase's central support.

Railings and Low Walls: Stairs that are open to large rooms often have railings or low walls. They function as described for ledges (see Special Floors).

Bridge: A bridge connects two higher areas separated by a lower area, stretching across a chasm, over a river, or above a pit. A simple bridge might be a single wooden plank, while an elaborate one could be made of mortared stone with iron supports and side rails.

Narrow Bridge: If a bridge is particularly narrow, such as a series of planks laid over lava fissures, treat it as a ledge (see Special Floors). It requires a Balance check (DC dependent on width) to cross such a bridge.

Rope Bridge: Constructed of wooden planks suspended from ropes, a rope bridge is convenient because it's portable and can be easily removed. It takes two full-round actions to untie one end of a rope bridge, but a DC 15 Use Rope check reduces the time to a move action. If only one of the two supporting ropes is attached, everyone on the bridge must succeed on a DC 15 Reflex save to avoid falling off, and thereafter must make DC 15 Climb checks to move along the remnants of the bridge. Rope bridges are usually 5 feet wide. The two ropes that support them have 8 hit points each.

Drawbridge: Some bridges have mechanisms that allow them to be extended or retracted from the gap they cross. Typically, the winch mechanism exists on only one side of the bridge. It takes a move action to lower a drawbridge, but the bridge doesn't come down until the beginning of the lowering character's next turn. It takes a full-round action to raise a drawbridge; the drawbridge is up at the end of the action. Particularly long or wide drawbridges may take more time to raise and lower, and some may require Strength checks to rotate the winch.

Railings and Low Walls: Some bridges have railings or low walls along the sides. If a bridge does, the railing or low walls affect Balance checks and bull rush attempts as described for ledges (see Special Floors). Low walls likewise provide cover to bridge occupants.

Chutes and Chimneys: Stairs aren't the only way to move up and down in a dungeon. Sometimes a vertical shaft connects levels of a dungeon or links a dungeon with the surface. Chutes are usually traps that dump characters into a lower area—often a place featuring some dangerous situation with which they must contend.

Pillar: A common sight in any dungeon, pillars and columns give support to ceilings. The larger the room, the more likely it has pillars. As a rule of thumb, the deeper in the dungeon a room is, the thicker the pillars need to be to support the overhead weight. Pillars tend to be polished and often have carvings, paintings, or inscriptions upon them.

Slender Pillar: These pillars are only a foot or two across, so they don't occupy a whole square. A creature standing in the same square as a slender pillar gains a +2 cover bonus to Armor Class and a +1 cover bonus on Reflex saves (these bonuses don't stack with cover bonuses from other sources). The presence of a slender pillar does not otherwise affect a creature's fighting space, because it's assumed that the creature is using the pillar to its advantage when it can. A typical slender pillar has AC 4, hardness 8, and 250 hit points.

Wide Pillar: These pillars take up an entire square and provide cover to anyone behind them. They have AC 3, hardness 8, and 900 hit points. A DC 20 Climb check is sufficient to climb most pillars; the DC increases to 25 for polished or unusually slick ones.

Stalagmite/Stalactite: These tapering natural rock columns extend from the floor (stalagmite) or the ceiling (stalactite). Stalagmites and stalactites function as slender pillars.

Statue: Most statues function as wide pillars, taking up a square and providing cover. Some statues are smaller and act as slender pillars. A DC 15 Climb check allows a character to climb a statue.

Tapestry: Elaborately embroidered patterns or scenes on cloth, tapestries hang from the walls of well-appointed dungeon rooms or corridors. Crafty builders take advantage of tapestries to place alcoves, concealed doors, or secret switches behind them.

Tapestries provide total concealment (50% miss chance) to characters behind them if they're hanging from the ceiling, or concealment (20% miss chance) if they're flush with the wall. Climbing a big tapestry isn't particularly difficult, requiring a DC 15 Climb check (or DC 10 if a wall is within reach).

Pedestal: Anything important on display in a dungeon, from a fabulous treasure to a coffin, tends to rest atop a pedestal or a dais. Raising the object off the floor focuses attention on it (and, in practical terms, keeps it safe from any water or other substance that might seep onto the floor). A pedestal is often trapped to protect whatever sits atop it. It can conceal a secret trapdoor beneath itself or provide a way to reach a door in the ceiling above itself.

Only the largest pedestals take up an entire square; most provide no cover.

Pool: Pools of water collect naturally in low spots in dungeons (a dry dungeon is rare). Pools can also be wells or natural underground springs, or they can be intentionally created basins, cisterns, and fountains. In any event, water is fairly common in dungeons, harboring sightless fish and sometimes aquatic monsters. Pools provide water for dungeon denizens, and thus are as important an area for a predator to control as a watering hole aboveground in the wild.

Shallow Pool: If a square contains a shallow pool, it has roughly 1 foot of standing water. It costs 2 squares of movement to move into a square with a shallow pool, and the DC of Tumble checks in such squares increases by 2.

Deep Pool: These squares have at least 4 feet of standing water. It costs Medium or larger creatures 4 squares of movement to move into a square with a deep pool, or characters can swim if they wish. Small or smaller creatures must swim to move through a square containing a deep pool. Tumbling is impossible in a deep pool. The water in a deep pool provides cover for Medium or larger creatures. Smaller creatures gain improved cover (+8 bonus to AC, +4 bonus on Reflex saves). Medium or larger creatures can crouch as a move action to gain this improved cover. Creatures with this improved cover take a -10 penalty on attacks against creatures that aren't also underwater.

Deep pool squares are usually clustered together and surrounded by a ring of shallow pool squares. Both shallow pools and deep pools impose a -2 circumstance penalty on Move Silently checks.

Special Pools: Through accident or design, a pool can become magically enhanced. Rarely, a pool or a fountain may be found that has the ability to bestow beneficial magic on those who drink from it. However, magic pools are just as likely to curse the drinker. Typically, water from a magic pool loses its potency if removed from the pool for more than an hour or so.

Some pools have fountains. Occasionally these are merely decorative, but they often serve as the focus of a trap or the source of a pool's magic.

Most pools are made of water, but anything's possible in a dungeon. Pools can hold unsavory substances such as blood, poison, oil, or magma. And even if a pool holds water, it can be holy water, saltwater, or water tainted with disease.

Elevator: In place of or in addition to stairs, an elevator (essentially an oversized dumbwaiter) can take inhabitants from one dungeon level to the next. Such an elevator may be mechanical (using gears, pulleys, and winches) or magical (such as a *levitate* spell cast on a movable flat surface). A mechanical elevator might be as small as a platform that holds one character at a time, or as large as an entire room that raises and lowers. A clever builder might design an elevator room that moves up or down without the occupants' knowledge to catch them in a trap, or one that appears to have moved when it actually remained still.

A typical elevator ascends or descends 10 feet per round at the beginning of the operator's turn (or on initiative count 0 if it functions without regard to whether creatures are on it. Elevators can be enclosed, can have railings or low walls, or may simply be treacherous floating platforms.

Ladders: Whether free-standing or rungs set into a wall, a ladder requires a DC 0 Climb check to ascend or descend.

Shifting Stone or Wall: These features can cut off access to a passage or room, trapping adventurers in a dead end or preventing escape out of the dungeon. Shifting walls can force explorers to go down a dangerous path or prevent them from entering a special area. Not all shifting walls need be traps. For example, stones controlled by pressure plates, counterweights, or a secret lever can shift out of a wall to become a staircase leading to a hidden upper room or secret ledge. Shifting stones and walls are generally constructed as traps with triggers and Search and Disable Device DCs. However they don't have Challenge Ratings because they're inconveniences, not deadly in and of themselves.

Teleporters: Sometimes useful, sometimes devious, places in a dungeon rigged with a teleportation effect (such as a *teleportation circle*) transport characters to some other location in the dungeon or someplace far away. They can be traps, teleporting the unwary into dangerous situations, or they can be an easy mode of transport for those who built or live in the dungeon, good for bypassing barriers and traps or simply to get around more quickly. Devious dungeon designers might place a teleporter in a room that transports characters to another seemingly identical room so that they don't even know they've been teleported. A *detect magic* spell will provide a clue to the presence of a teleporter, but direct experimentation or other research is the only way to discover where the teleporter leads.

Altars: Temples—particularly to dark gods—often exist underground. Usually taking the form of a stone block, an altar is the main fixture and central focus of such a temple. Sometimes all the other trappings of the temple are long gone, lost to theft, age, and decay, but the altar survives. Some altars have traps or powerful magic within them. Most take up one or two squares on the grid and provide cover to creatures behind them.

CAVE-INS AND COLLAPSES (CR 8)

Cave-ins and collapsing tunnels are extremely dangerous. Not only do dungeon explorers face the danger of being crushed by tons of falling rock, even if they survive they may be buried beneath a pile of rubble or cut off from the only known exit. A cave-in buries anyone in the middle of the collapsing area, and then sliding debris damages anyone in the periphery of the collapse. A typical corridor subject to a cave-in might have a bury zone with a 15-foot radius and a 10-foot-radius slide zone extending beyond the bury zone. A weakened ceiling can be spotted with a DC 20 Knowledge (architecture and engineering) or DC 20 Craft (stonemasonry) check. Remember that Craft checks can be made untrained as Intelligence checks. A dwarf can make such a check if he simply passes within 10 feet of a weakened ceiling.

A weakened ceiling may collapse when subjected to a major impact or concussion. A character can cause a cave-in by destroying half the pillars holding the ceiling up.

Characters in the bury zone of a cave-in take 8d6 points of damage, or half that amount if they make a DC 15 Reflex save. They are subsequently buried. Characters in the slide zone take 3d6 points of damage, or no damage at all if they make a DC 15 Reflex save. Characters in the slide zone who fail their saves are buried.

Characters take 1d6 points of nonlethal damage per minute while buried. If such a character falls unconscious, he must make a DC 15 Constitution check. If it fails, he takes 1d6 points of lethal damage each minute thereafter until freed or dead.

Characters who aren't buried can dig out their friends. In 1 minute, using only her hands, a character can clear rocks and debris equal to five times her heavy load limit. The amount of loose stone that fills a 5-foot-by-5-foot area weighs one ton (2,000 pounds). Armed with an appropriate tool, such as a pick, crowbar, or shovel, a digger can clear loose stone twice as quickly as by hand. You may allow a buried character to free himself with a DC 25 Strength check.

Slimes, Molds, and Fungi

In a dungeon's damp, dark recesses, molds and fungi thrive. While some plants and fungi are monsters and other slime, mold, and fungus is just normal, innocuous stuff, a few varieties are dangerous dungeon encounters. For purposes of spells and other special effects, all slimes, molds, and fungi are treated as plants. Like traps, dangerous slimes and molds have CRs, and characters earn XP for encountering them.

A form of glistening organic sludge coats almost anything that remains in the damp and dark for too long. This kind of slime, though it might be repulsive, is not dangerous.

Molds and fungi flourish in dark, cool, damp places. While some are as inoffensive as the normal dungeon slime, others are quite dangerous. Mushrooms, puffballs, yeasts, mildew, and other sorts of bulbous, fibrous, or flat patches of fungi can be found throughout most dungeons. They are usually inoffensive, and some are even edible (though most are unappealing or odd-tasting).

Green Slime (CR 4): This dungeon peril is a dangerous variety of normal slime. Green slime devours flesh and organic materials on contact and is even capable of dissolving metal. Bright green, wet, and sticky, it clings to walls, floors, and ceilings in patches, reproducing as it consumes organic matter. It drops from walls and ceilings when it detects movement (and possible food) below.

A single 5-foot square of green slime deals 1d6 points of Constitution damage per round while it devours flesh. On the first round of contact, the slime can be scraped off a creature (most likely destroying the scraping device), but after that it must be frozen, burned, or cut away (dealing damage to the victim as well). Anything that deals cold or fire damage, sunlight, or a

remove disease spell destroys a patch of green slime. Against wood or metal, green slime deals 2d6 points of damage per round, ignoring metal's hardness but not that of wood. It does not harm stone.

Yellow Mold (CR 6): If disturbed, a 5-foot square of this mold bursts forth with a cloud of poisonous spores. All within 10 feet of the mold must make a DC 15 Fortitude save or take 1d6 points of Constitution damage. Another DC 15 Fortitude save is required 1 minute later—even by those who succeeded on the first save—to avoid taking 2d6 points of Constitution damage. Fire destroys yellow mold, and sunlight renders it dormant.

Brown Mold (CR 2): Brown mold feeds on warmth, drawing heat from anything around it. It normally comes in patches 5 feet in diameter, and the temperature is always cold in a 30-foot radius around it. Living creatures within 5 feet of it take 3d6 points of nonlethal cold damage. Fire brought within 5 feet of brown mold causes it to instantly double in size. Cold damage, such as from a *cone of cold*, instantly destroys it.

Phosphorescent Fungus (No CR): This strange underground fungus grows in clumps that look almost like stunted shrubbery. Drow elves cultivate it for food and light. It gives off a soft violet glow that illuminates underground caverns and passages as well as a candle does. Rare patches of fungus illuminate as well as a torch does.

WILDERNESS

GETTING LOST

There are many ways to get lost in the wilderness. Following an obvious road, trail, or feature such as a stream or shoreline prevents any possibility of becoming lost, but travelers striking off cross-country may become disoriented—especially in conditions of poor visibility or in difficult terrain.

Poor Visibility: Any time characters cannot see at least 60 feet in the prevailing conditions of visibility, they may become lost. Characters traveling through fog, snow, or a downpour might easily lose the ability to see any landmarks not in their immediate vicinity. Similarly, characters traveling at night may be at risk, too, depending on the quality of their light sources, the amount of moonlight, and whether they have darkvision or lowlight vision.

Difficult Terrain: Any character in forest, moor, hill, or mountain terrain may become lost if he or she moves away from a trail, road, stream, or other obvious path or track. Forests are especially dangerous because they obscure far-off landmarks and make it hard to see the sun or stars.

Chance to Get Lost: If conditions exist that make getting lost a possibility, the character leading the way must succeed on a Survival check or become lost. The difficulty of this check varies based on the terrain, the visibility conditions, and whether or not the character has a map of the area being traveled through. Refer to the table below and use the highest DC that applies.

	Survival DC		Survival DC
Moor or hill, map	6	Poor visibility	12
Mountain, map	8	Mountain, no map	12
Moor or hill, no map	10	Forest	15

A character with at least 5 ranks in Knowledge (geography) or Knowledge (local) pertaining to the area being traveled through gains a +2 bonus on this check.

Check once per hour (or portion of an hour) spent in local or overland movement to see if travelers have become lost. In the case of a party moving together, only the character leading the way makes the check.

Effects of Being Lost: If a party becomes lost, it is no longer certain of moving in the direction it intended to travel.

Randomly determine the direction in which the party actually travels during each hour of local or overland movement. The characters' movement continues to be random until they blunder into a landmark they can't miss, or until they recognize that they are lost and make an effort to regain their bearings.

Recognizing that You're Lost: Once per hour of random travel, each character in the party may attempt a Survival check (DC 20, -1 per hour of random travel) to recognize that they are no longer certain of their direction of travel. Some circumstances may make it obvious that the characters are lost.

Setting a New Course: A lost party is also uncertain of determining in which direction it should travel in order to reach a desired objective. Determining the correct direction of travel once a party has become lost requires a Survival check (DC 15, +2 per hour of random travel). If a character fails this check, he chooses a random direction as the "correct" direction for resuming travel.

Once the characters are traveling along their new course, correct or incorrect, they may get lost again. If the conditions still make it possible for travelers to become lost, check once per hour of travel as described in Chance to Get Lost, above, to see if the party maintains its new course or begins to move at random again.

Conflicting Directions: It's possible that several characters may attempt to determine the right direction to proceed after becoming lost. Make a Survival check for each character in secret, then tell the players whose characters succeeded the correct direction in which to travel, and tell the players whose characters failed a random direction they think is right.

Regaining Your Bearings: There are several ways to become un-lost. First, if the characters successfully set a new course and follow it to the destination they’re trying to reach, they’re not lost anymore. Second, the characters through random movement might run into an unmistakable landmark. Third, if conditions suddenly improve—the fog lifts or the sun comes up—lost characters may attempt to set a new course, as described above, with a +4 bonus on the Survival check. Finally, magic may make their course clear.

FOREST TERRAIN

Forest terrain can be divided into three categories: sparse, medium, and dense. An immense forest could have all three categories within its borders, with more sparse terrain at the outer edge of the forest and dense forest at its heart. The table below describes in general terms how likely it is that a given square has a terrain element in it.

Forest Terrain Features

	Category of Forest		
	Sparse	Medium	Dense
Typical trees	50%	70%	80%
Massive trees	—	10%	20%
Light undergrowth	50%	70%	50%
Heavy undergrowth	—	20%	50%

Trees: The most important terrain element in a forest is the trees, obviously. A creature standing in the same square as a tree gains a +2 bonus to Armor Class and a +1 bonus on Reflex saves (these bonuses don’t stack with cover bonuses from other sources). The presence of a tree doesn’t otherwise affect a creature’s fighting space, because it’s assumed that the creature is using the tree to its advantage when it can. The trunk of a typical tree has AC 4, hardness 5, and 150 hp. A DC 15 Climb check is sufficient to climb a tree. Medium and dense forests have massive trees as well. These trees take up an entire square and provide cover to anyone behind them. They have AC 3, hardness 5, and 600 hp. Like their smaller counterparts, it takes a DC 15 Climb check to climb them.

Undergrowth: Vines, roots, and short bushes cover much of the ground in a forest. A space covered with light undergrowth costs 2 squares of movement to move into, and it provides concealment. Undergrowth increases the DC of Tumble and Move Silently checks by 2 because the leaves and branches get in the way. Heavy undergrowth costs 4 squares of movement to move into, and it provides concealment with a 30% miss chance (instead of the usual 20%). It increases the DC of Tumble and Move Silently checks by 5. Heavy undergrowth is easy to hide in, granting a +5 circumstance bonus on Hide checks. Running and charging are impossible. Squares with undergrowth are often clustered together. Undergrowth and trees aren’t mutually exclusive; it’s common for a 5-foot square to have both a tree and undergrowth.

Forest Canopy: It’s common for elves and other forest dwellers to live on raised platforms far above the surface floor. These wooden platforms generally have rope bridges between them. To get to the treehouses, characters generally ascend the trees’ branches (Climb DC 15), use rope ladders (Climb DC 0), or take pulley elevators (which can be made to rise a number of feet equal to a Strength check, made each round as a full-round action). Creatures on platforms or branches in a forest canopy are considered to have cover when fighting creatures on the ground, and in medium or dense forests they have concealment as well.

Other Forest Terrain Elements: Fallen logs generally stand about 3 feet high and provide cover just as low walls do. They cost 5 feet of movement to cross. Forest streams are generally 5 to 10 feet wide and no more than 5 feet deep. Pathways wind through most forests, allowing normal movement and providing neither cover nor concealment. These paths are less common in dense forests, but even unexplored forests will have occasional game trails.

Stealth and Detection in a Forest: In a sparse forest, the maximum distance at which a Spot check for detecting the nearby presence of others can succeed is $3d6 \times 10$ feet. In a medium forest, this distance is $2d8 \times 10$ feet, and in a dense forest it is $2d6 \times 10$ feet.

Because any square with undergrowth provides concealment, it’s usually easy for a creature to use the Hide skill in the forest. Logs and massive trees provide cover, which also makes hiding possible.

The background noise in the forest makes Listen checks more difficult, increasing the DC of the check by 2 per 10 feet, not 1 (but note that Move Silently is also more difficult in undergrowth).

Forest Fires (CR 6)

Most campfire sparks ignite nothing, but if conditions are dry, winds are strong, or the forest floor is dried out and flammable, a forest fire can result. Lightning strikes often set trees afire and start forest fires in this way. Whatever the cause of the fire, travelers can get caught in the conflagration.

A forest fire can be spotted from as far away as $2d6 \times 100$ feet by a character who makes a Spot check, treating the fire as a Colossal creature (reducing the DC by 16). If all characters fail their Spot checks, the fire moves closer to them. They automatically see it when it closes to half the original distance.

Characters who are blinded or otherwise unable to make Spot checks can feel the heat of the fire (and thus automatically “spot” it) when it is 100 feet away.

The leading edge of a fire (the downwind side) can advance faster than a human can run (assume 120 feet per round for winds of moderate strength). Once a particular portion of the forest is ablaze, it remains so for $2d4 \times 10$ minutes before dying to a smoking smolder. Characters overtaken by a forest fire may find the leading edge of the fire advancing away from them faster than they can keep up, trapping them deeper and deeper in its grasp.

Within the bounds of a forest fire, a character faces three dangers: heat damage, catching on fire, and smoke inhalation.

Heat Damage: Getting caught within a forest fire is even worse than being exposed to extreme heat (see Heat Dangers).

Breathing the air causes a character to take 1d6 points of damage per round (no save). In addition, a character must make a Fortitude save every 5 rounds (DC 15, +1 per previous check) or take 1d4 points of nonlethal damage. A character who holds his breath can avoid the lethal damage, but not the nonlethal damage. Those wearing heavy clothing or any sort of armor take a -4 penalty on their saving throws. In addition, those wearing metal armor or coming into contact with very hot metal are affected as if by a *heat metal* spell.

Catching on Fire: Characters engulfed in a forest fire are at risk of catching on fire when the leading edge of the fire overtakes them, and are then at risk once per minute thereafter (see Catching on Fire).

Smoke Inhalation: Forest fires naturally produce a great deal of smoke. A character who breathes heavy smoke must make a Fortitude save each round (DC 15, +1 per previous check) or spend that round choking and coughing. A character who chokes for 2 consecutive rounds takes 1d6 points of nonlethal damage. Also, smoke obscures vision, providing concealment to characters within it.

MARSH TERRAIN

Two categories of marsh exist: relatively dry moors and watery swamps. Both are often bordered by lakes (described in Aquatic Terrain, below), which effectively are a third category of terrain found in marshes.

The table below describes terrain features found in marshes.

Marsh Terrain Features

— Marsh Category —

	Moor	Swamp
Shallow bog	20%	40%
Deep bog	5%	20%
Light undergrowth	30%	20%
Heavy undergrowth	10%	20%

Bogs: If a square is part of a shallow bog, it has deep mud or standing water of about 1 foot in depth. It costs 2 squares of movement to move into a square with a shallow bog, and the DC of Tumble checks in such a square increases by 2.

A square that is part of a deep bog has roughly 4 feet of standing water. It costs Medium or larger creatures 4 squares of movement to move into a square with a deep bog, or characters can swim if they wish. Small or smaller creatures must swim to move through a deep bog. Tumbling is impossible in a deep bog.

The water in a deep bog provides cover for Medium or larger creatures. Smaller creatures gain improved cover (+8 bonus to AC, +4 bonus on Reflex saves). Medium or larger creatures can crouch as a move action to gain this improved cover.

Creatures with this improved cover take a -10 penalty on attacks against creatures that aren't underwater.

Deep bog squares are usually clustered together and surrounded by an irregular ring of shallow bog squares.

Both shallow and deep bogs increase the DC of Move Silently checks by 2.

Undergrowth: The bushes, rushes, and other tall grasses in marshes function as undergrowth does in a forest (see above). A square that is part of a bog does not also have undergrowth.

Quicksand: Patches of quicksand present a deceptively solid appearance (appearing as undergrowth or open land) that may trap careless characters. A character approaching a patch of quicksand at a normal pace is entitled to a DC 8 Survival check to spot the danger before stepping in, but charging or running characters don't have a chance to detect a hidden bog before blundering in. A typical patch of quicksand is 20 feet in diameter; the momentum of a charging or running character carries him or her $1d2 \times 5$ feet into the quicksand.

Effects of Quicksand: Characters in quicksand must make a DC 10 Swim check every round to simply tread water in place, or a DC 15 Swim check to move 5 feet in whatever direction is desired. If a trapped character fails this check by 5 or more, he sinks below the surface and begins to drown whenever he can no longer hold his breath (see the Swim skill description).

Characters below the surface of a bog may swim back to the surface with a successful Swim check (DC 15, +1 per consecutive round of being under the surface).

Rescue: Pulling out a character trapped in quicksand can be difficult. A rescuer needs a branch, spear haft, rope, or similar tool that enables him to reach the victim with one end of it. Then he must make a DC 15 Strength check to successfully pull the victim, and the victim must make a DC 10 Strength check to hold onto the branch, pole, or rope. If the victim fails to hold on, he must make a DC 15 Swim check immediately to stay above the surface. If both checks succeed, the victim is pulled 5 feet closer to safety.

Hedgerows: Common in moors, hedgerows are tangles of stones, soil, and thorny bushes. Narrow hedgerows function as low walls, and it takes 15 feet of movement to cross them. Wide hedgerows are more than 5 feet tall and take up entire squares.

They provide total cover, just as a wall does. It takes 4 squares of movement to move through a square with a wide hedgerow; creatures that succeed on a DC 10 Climb check need only 2 squares of movement to move through the square.

Other Marsh Terrain Elements: Some marshes, particularly swamps, have trees just as forests do, usually clustered in small stands. Paths lead across many marshes, winding to avoid bog areas. As in forests, paths allow normal movement and don't provide the concealment that undergrowth does.

Stealth and Detection in a Marsh: In a moor, the maximum distance at which a Spot check for detecting the nearby presence of others can succeed is $6d6 \times 10$ feet. In a swamp, this distance is $2d8 \times 10$ feet.

Undergrowth and deep bogs provide plentiful concealment, so it's easy to hide in a marsh.

A marsh imposes no penalties on Listen checks, and using the Move Silently skill is more difficult in both undergrowth and bogs.

HILLS TERRAIN

A hill can exist in most other types of terrain, but hills can also dominate the landscape. Hills terrain is divided into two categories: gentle hills and rugged hills. Hills terrain often serves as a transition zone between rugged terrain such as mountains and flat terrain such as plains.

Hills Terrain Features

Hills Category		
	Gentle Hill	Rugged Hill
Gradual slope	75%	40%
Steep slope	20%	50%
Cliff	5%	10%
Light undergrowth	15%	15%

Gradual Slope: This incline isn't steep enough to affect movement, but characters gain a +1 bonus on melee attacks against foes downhill from them.

Steep Slope: Characters moving uphill (to an adjacent square of higher elevation) must spend 2 squares of movement to enter each square of steep slope. Characters running or charging downhill (moving to an adjacent square of lower elevation) must succeed on a DC 10 Balance check upon entering the first steep slope square. Mounted characters make a DC 10 Ride check instead. Characters who fail this check stumble and must end their movement $1d2 \times 5$ feet later. Characters who fail by 5 or more fall prone in the square where they end their movement. A steep slope increases the DC of Tumble checks by 2.

Cliff: A cliff typically requires a DC 15 Climb check to scale and is $1d4 \times 10$ feet tall, although the needs of your map may mandate a taller cliff. A cliff isn't perfectly vertical, taking up 5-foot squares if it's less than 30 feet tall and 10-foot squares if it's 30 feet or taller.

Light Undergrowth: Sagebrush and other scrubby bushes grow on hills, although they rarely cover the landscape as they do in forests and marshes. Light undergrowth provides concealment and increases the DC of Tumble and Move Silently checks by 2.

Other Hills Terrain Elements: Trees aren't out of place in hills terrain, and valleys often have active streams (5 to 10 feet wide and no more than 5 feet deep) or dry streambeds (treat as a trench 5 to 10 feet across) in them. If you add a stream or streambed, remember that water always flows downhill.

Stealth and Detection in Hills: In gentle hills, the maximum distance at which a Spot check for detecting the nearby presence of others can succeed is $2d10 \times 10$ feet. In rugged hills, this distance is $2d6 \times 10$ feet.

Hiding in hills terrain can be difficult if there isn't undergrowth around. A hilltop or ridge provides enough cover to hide from anyone below the hilltop or ridge.

Hills don't affect Listen or Move Silently checks.

MOUNTAIN TERRAIN

The three mountain terrain categories are alpine meadows, rugged mountains, and forbidding mountains. As characters ascend into a mountainous area, they're likely to face each terrain category in turn, beginning with alpine meadows, extending through rugged mountains, and reaching forbidding mountains near the summit.

Mountains have an important terrain element, the rock wall, that is marked on the border between squares rather than taking up squares itself.

Mountain Terrain Features

Mountain Category			
	Alpine Meadow	Rugged	Forbidding
Gradual slope	50%	25%	15%
Steep slope	40%	55%	55%
Cliff	10%	15%	20%
Chasm	—	5%	10%

Light undergrowth	20%	10%	—
Scree	—	20%	30%
Dense rubble	—	20%	30%

Gradual and Steep Slopes: These function as described in Hills Terrain, above.

Cliff: These terrain elements also function like their hills terrain counterparts, but they're typically $2d6 \times 10$ feet tall. Cliffs taller than 80 feet take up 20 feet of horizontal space.

Chasm: Usually formed by natural geological processes, chasms function like pits in a dungeon setting. Chasms aren't hidden, so characters won't fall into them by accident (although bull rushes are another story). A typical chasm is $2d4 \times 10$ feet deep, at least 20 feet long, and anywhere from 5 feet to 20 feet wide. It takes a DC 15 Climb check to climb out of a chasm. In forbidding mountain terrain, chasms are typically $2d8 \times 10$ feet deep.

Light Undergrowth: This functions as described in Forest Terrain, above.

Scree: A field of shifting gravel, scree doesn't affect speed, but it can be treacherous on a slope. The DC of Balance and Tumble checks increases by 2 if there's scree on a gradual slope and by 5 if there's scree on a steep slope. The DC of Move Silently checks increases by 2 if the scree is on a slope of any kind.

Dense Rubble: The ground is covered with rocks of all sizes. It costs 2 squares of movement to enter a square with dense rubble. The DC of Balance and Tumble checks on dense rubble increases by 5, and the DC of Move Silently checks increases by +2.

Rock Wall: A vertical plane of stone, rock walls require DC 25 Climb checks to ascend. A typical rock wall is $2d4 \times 10$ feet tall in rugged mountains and $2d8 \times 10$ feet tall in forbidding mountains. Rock walls are drawn on the edges of squares, not in the squares themselves.

Cave Entrance: Found in cliff and steep slope squares and next to rock walls, cave entrances are typically between 5 and 20 feet wide and 5 feet deep. Beyond the entrance, a cave could be anything from a simple chamber to the entrance to an elaborate dungeon. Caves used as monster lairs typically have 1d3 rooms that are $1d4 \times 10$ feet across.

Other Mountain Terrain Features: Most alpine meadows begin above the tree line, so trees and other forest elements are rare in the mountains. Mountain terrain can include active streams (5 to 10 feet wide and no more than 5 feet deep) and dry streambeds (treat as a trench 5 to 10 feet across). Particularly high-altitude areas tend to be colder than the lowland areas that surround them, so they may be covered in ice sheets (described below).

Stealth and Detection in Mountains: As a guideline, the maximum distance in mountain terrain at which a Spot check for detecting the nearby presence of others can succeed is $4d10 \times 10$ feet. Certain peaks and ridgelines afford much better vantage points, of course, and twisting valleys and canyons have much shorter spotting distances. Because there's little vegetation to obstruct line of sight, the specifics on your map are your best guide for the range at which an encounter could begin. As in hills terrain, a ridge or peak provides enough cover to hide from anyone below the high point.

It's easier to hear faraway sounds in the mountains. The DC of Listen checks increases by 1 per 20 feet between listener and source, not per 10 feet.

Avalanches (CR 7)

The combination of high peaks and heavy snowfalls means that avalanches are a deadly peril in many mountainous areas. While avalanches of snow and ice are common, it's also possible to have an avalanche of rock and soil.

An avalanche can be spotted from as far away as $1d10 \times 500$ feet downslope by a character who makes a DC 20 Spot check, treating the avalanche as a Colossal creature. If all characters fail their Spot checks to determine the encounter distance, the avalanche moves closer to them, and they automatically become aware of it when it closes to half the original distance. It's possible to hear an avalanche coming even if you can't see it. Under optimum conditions (no other loud noises occurring), a character who makes a DC 15 Listen check can hear the avalanche or landslide when it is $1d6 \times 500$ feet away. This check might have a DC of 20, 25, or higher in conditions where hearing is difficult (such as in the middle of a thunderstorm).

A landslide or avalanche consists of two distinct areas: the bury zone (in the direct path of the falling debris) and the slide zone (the area the debris spreads out to encompass). Characters in the bury zone always take damage from the avalanche; characters in the slide zone may be able to get out of the way. Characters in the bury zone take $8d6$ points of damage, or half that amount if they make a DC 15 Reflex save. They are subsequently buried (see below). Characters in the slide zone take $3d6$ points of damage, or no damage if they make a DC 15 Reflex save. Those who fail their saves are buried.

Buried characters take $1d6$ points of nonlethal damage per minute. If a buried character falls unconscious, he or she must make a DC 15 Constitution check or take $1d6$ points of lethal damage each minute thereafter until freed or dead.

The typical avalanche has a width of $1d6 \times 100$ feet, from one edge of the slide zone to the opposite edge. The bury zone in the center of the avalanche is half as wide as the avalanche's full width.

To determine the precise location of characters in the path of an avalanche, roll $1d6 \times 20$; the result is the number of feet from the center of the path taken by the bury zone to the center of the party's location. Avalanches of snow and ice advance at a speed of 500 feet per round, and rock avalanches travel at a speed of 250 feet per round.

Mountain Travel

High altitude can be extremely fatiguing—or sometimes deadly—to creatures that aren't used to it. Cold becomes extreme, and the lack of oxygen in the air can wear down even the most hardy of warriors.

Acclimated Characters: Creatures accustomed to high altitude generally fare better than lowlanders. Any creature with an Environment entry that includes mountains is considered native to the area, and acclimated to the high altitude. Characters can also acclimate themselves by living at high altitude for a month. Characters who spend more than two months away from the mountains must reacclimate themselves when they return. Undead, constructs, and other creatures that do not breathe are immune to altitude effects.

Altitude Zones: In general, mountains present three possible altitude bands: low pass, low peak/high pass, and high peak.

Low Pass (lower than 5,000 feet): Most travel in low mountains takes place in low passes, a zone consisting largely of alpine meadows and forests. Travelers may find the going difficult (which is reflected in the movement modifiers for traveling through mountains), but the altitude itself has no game effect.

Low Peak or High Pass (5,000 to 15,000 feet): Ascending to the highest slopes of low mountains, or most normal travel through high mountains, falls into this category. All nonacclimated creatures labor to breathe in the thin air at this altitude. Characters must succeed on a Fortitude save each hour (DC 15, +1 per previous check) or be fatigued. The fatigue ends when the character descends to an altitude with more air. Acclimated characters do not have to attempt the Fortitude save.

High Peak (more than 15,000 feet): The highest mountains exceed 20,000 feet in height. At these elevations, creatures are subject to both high altitude fatigue (as described above) and altitude sickness, whether or not they're acclimated to high altitudes. Altitude sickness represents long-term oxygen deprivation, and it affects mental and physical ability scores. After each 6-hour period a character spends at an altitude of over 15,000 feet, he must succeed on a Fortitude save (DC 15, +1 per previous check) or take 1 point of damage to all ability scores. Creatures acclimated to high altitude receive a +4 competence bonus on their saving throws to resist high altitude effects and altitude sickness, but eventually even seasoned mountaineers must abandon these dangerous elevations.

DESERT TERRAIN

Desert terrain exists in warm, temperate, and cold climates, but all deserts share one common trait: little rain. The three categories of desert terrain are tundra (cold deserts), rocky desert (often temperate), and sandy desert (often warm).

Tundra differs from the other desert categories in two important ways. Because snow and ice cover much of the landscape, it's easy to find water. And during the height of summer, the permafrost thaws to a depth of a foot or so, turning the landscape into a vast field of mud. The muddy tundra affects movement and skill use as the shallow bogs described in marsh terrain, although there's little standing water.

The table above describes terrain elements found in each of the three desert categories. The terrain elements on this table are mutually exclusive; for instance, a square of tundra may contain either light undergrowth or an ice sheet, but not both.

Desert Terrain Features

Desert Category		
Tundra	Rocky	Sandy
Light undergrowth	15%	5%
Ice sheet	25%	—
Light rubble	5%	30%
Dense rubble	—	30%
Sand dunes	—	50%

Light Undergrowth: Consisting of scrubby, hardy bushes and cacti, light undergrowth functions as described for other terrain types.

Ice Sheet: The ground is covered with slippery ice. It costs 2 squares of movement to enter a square covered by an ice sheet, and the DC of Balance and Tumble checks there increases by 5. A DC 10 Balance check is required to run or charge across an ice sheet.

Light Rubble: Small rocks are strewn across the ground, making nimble movement more difficult. The DC of Balance and Tumble checks increases by 2.

Dense Rubble: This terrain feature consists of more and larger stones. It costs 2 squares of movement to enter a square with dense rubble. The DC of Balance and Tumble checks increases by 5, and the DC of Move Silently checks increases by 2.

Sand Dunes: Created by the action of wind on sand, sand dunes function as hills that move. If the wind is strong and consistent, a sand dune can move several hundred feet in a week's time. Sand dunes can cover hundreds of squares. They always have a gentle slope pointing in the direction of the prevailing wind and a steep slope on the leeward side.

Other Desert Terrain Features: Tundra is sometimes bordered by forests, and the occasional tree isn't out of place in the cold wastes. Rocky deserts have towers and mesas consisting of flat ground surrounded on all sides by cliffs and steep slopes (described in Mountain Terrain, above). Sandy deserts sometimes have quicksand; this functions as described in Marsh Terrain, above, although desert quicksand is a waterless mixture of fine sand and dust. All desert terrain is crisscrossed with dry streambeds (treat as trenches 5 to 15 feet wide) that fill with water on the rare occasions when rain falls.

Stealth and Detection in the Desert: In general, the maximum distance in desert terrain at which a Spot check for detecting the nearby presence of others can succeed is $6d6 \times 20$ feet; beyond this distance, elevation changes and heat distortion in warm deserts makes spotting impossible. The presence of dunes in sandy deserts limits spotting distance to $6d6 \times 10$ feet. The desert imposes neither bonuses nor penalties on Listen or Spot checks. The scarcity of undergrowth or other elements that offer concealment or cover makes hiding more difficult.

Sandstorms

A sandstorm reduces visibility to $1d10 \times 5$ feet and provides a -4 penalty on Listen, Search, and Spot checks. A sandstorm deals 1d3 points of nonlethal damage per hour to any creatures caught in the open, and leaves a thin coating of sand in its wake. Driving sand creeps in through all but the most secure seals and seams, to chafe skin and contaminate carried gear.

PLAINS TERRAIN

Plains come in three categories: farms, grasslands, and battlefields. Farms are common in settled areas, of course, while grasslands represent untamed plains. The battlefields where large armies clash are temporary places, usually reclaimed by natural vegetation or the farmer's plow. Battlefields represent a third terrain category because adventurers tend to spend a lot of time there, not because they're particularly prevalent.

The table below shows the proportions of terrain elements in the different categories of plains. On a farm, light undergrowth represents most mature grain crops, so farms growing vegetable crops will have less light undergrowth, as will all farms during the time between harvest and a few months after planting.

The terrain elements in the table below are mutually exclusive.

Plains Terrain Features

	Plains Category		
	Far m	Grassland	Battlefield
Light undergrowth	40%	20%	10%
Heavy undergrowth	—	10%	—
Light rubble	—	—	10%
Trench	5%	—	5%
Berm	—	—	5%

Undergrowth: Whether they're crops or natural vegetation, the tall grasses of the plains function like light undergrowth in a forest. Particularly thick bushes form patches of heavy undergrowth that dot the landscape in grasslands.

Light Rubble: On the battlefield, light rubble usually represents something that was destroyed: the ruins of a building or the scattered remnants of a stone wall, for example. It functions as described in the desert terrain section above.

Trench: Often dug before a battle to protect soldiers, a trench functions as a low wall, except that it provides no cover against adjacent foes. It costs 2 squares of movement to leave a trench, but it costs nothing extra to enter one. Creatures outside a trench who make a melee attack against a creature inside the trench gain a +1 bonus on melee attacks because they have higher ground. In farm terrain, trenches are generally irrigation ditches.

Berm: A common defensive structure, a berm is a low, earthen wall that slows movement and provides a measure of cover. Put a berm on the map by drawing two adjacent rows of steep slope (described in Hills Terrain, above), with the edges of the berm on the downhill side. Thus, a character crossing a two-square berm will travel uphill for 1 square, then downhill for 1 square. Two square berms provide cover as low walls for anyone standing behind them. Larger berms provide the low wall benefit for anyone standing 1 square downhill from the top of the berm.

Fences: Wooden fences are generally used to contain livestock or impede oncoming soldiers. It costs an extra square of movement to cross a wooden fence. A stone fence provides a measure of cover as well, functioning as low walls. Mounted characters can cross a fence without slowing their movement if they succeed on a DC 15 Ride check. If the check fails, the steed crosses the fence, but the rider falls out of the saddle.

Other Plains Terrain Features: Occasional trees dot the landscape in many plains, although on battlefields they're often felled to provide raw material for siege engines (described in Urban Features). Hedgerows (described in Marsh Terrain) are found in plains as well. Streams, generally 5 to 20 feet wide and 5 to 10 feet deep, are commonplace.

Stealth and Detection in Plains: In plains terrain, the maximum distance at which a Spot check for detecting the nearby presence of others can succeed is $6d6 \times 40$ feet, although the specifics of your map may restrict line of sight. Plains terrain provides no bonuses or penalties on Listen and Spot checks. Cover and concealment are not uncommon, so a good place of refuge is often nearby, if not right at hand.

AQUATIC TERRAIN

Aquatic terrain is the least hospitable to most PCs, because they can't breathe there. Aquatic terrain doesn't offer the variety that land terrain does. The ocean floor holds many marvels, including undersea analogues of any of the terrain elements described earlier in this section. But if characters find themselves in the water because they were bull rushed off the deck of a

pirate ship, the tall kelp beds hundreds of feet below them don't matter. Accordingly, these rules simply divide aquatic terrain into two categories: flowing water (such as streams and rivers) and nonflowing water (such as lakes and oceans).

Flowing Water: Large, placid rivers move at only a few miles per hour, so they function as still water for most purposes. But some rivers and streams are swifter; anything floating in them moves downstream at a speed of 10 to 40 feet per round. The fastest rapids send swimmers bobbing downstream at 60 to 90 feet per round. Fast rivers are always at least rough water (Swim DC 15), and whitewater rapids are stormy water (Swim DC 20). If a character is in moving water, move her downstream the indicated distance at the end of her turn. A character trying to maintain her position relative to the riverbank can spend some or all of her turn swimming upstream.

Swept Away: Characters swept away by a river moving 60 feet per round or faster must make DC 20 Swim checks every round to avoid going under. If a character gets a check result of 5 or more over the minimum necessary, he arrests his motion by catching a rock, tree limb, or bottom snag—he is no longer being carried along by the flow of the water. Escaping the rapids by reaching the bank requires three DC 20 Swim checks in a row. Characters arrested by a rock, limb, or snag can't escape under their own power unless they strike out into the water and attempt to swim their way clear. Other characters can rescue them as if they were trapped in quicksand (described in Marsh Terrain, above).

Nonflowing Water: Lakes and oceans simply require a swim speed or successful Swim checks to move through (DC 10 in calm water, DC 15 in rough water, DC 20 in stormy water). Characters need a way to breathe if they're underwater; failing that, they risk drowning. When underwater, characters can move in any direction as if they were flying with perfect maneuverability.

Stealth and Detection Underwater: How far you can see underwater depends on the water's clarity. As a guideline, creatures can see $4d8 \times 10$ feet if the water is clear, and $1d8 \times 10$ feet if it's murky. Moving water is always murky, unless it's in a particularly large, slow-moving river.

It's hard to find cover or concealment to hide underwater (except along the seafloor). Listen and Move Silently checks function normally underwater.

Invisibility: An invisible creature displaces water and leaves a visible, body-shaped "bubble" where the water was displaced. The creature still has concealment (20% miss chance), but not total concealment (50% miss chance).

Underwater Combat

Land-based creatures can have considerable difficulty when fighting in water. Water affects a creature's Armor Class, attack rolls, damage, and movement. In some cases a creature's opponents may get a bonus on attacks. The effects are summarized in the accompanying table. They apply whenever a character is swimming, walking in chestdeep water, or walking along the bottom.

Ranged Attacks Underwater: Thrown weapons are ineffective underwater, even when launched from land. Attacks with other ranged weapons take a -2 penalty on attack rolls for every 5 feet of water they pass through, in addition to the normal penalties for range.

Attacks from Land: Characters swimming, floating, or treading water on the surface, or wading in water at least chest deep, have improved cover (+8 bonus to AC, +4 bonus on Reflex saves) from opponents on land. Landbound opponents who have *freedom of movement* effects ignore this cover when making melee attacks against targets in the water. A completely submerged creature has total cover against opponents on land unless those opponents have *freedom of movement* effects. Magical effects are unaffected except for those that require attack rolls (which are treated like any other effects) and fire effects.

Fire: Nonmagical fire (including alchemist's fire) does not burn underwater. Spells or spell-like effects with the fire descriptor are ineffective underwater unless the caster makes a Spellcraft check (DC 20 + spell level). If the check succeeds, the spell creates a bubble of steam instead of its usual fiery effect, but otherwise the spell works as described. A supernatural fire effect is ineffective underwater unless its description states otherwise. The surface of a body of water blocks line of effect for any fire spell. If the caster has made a Spellcraft check to make the fire spell usable underwater, the surface still blocks the spell's line of effect.

Table: Combat Adjustments Underwater

Attack/Damage				
Condition	Slashing or Bludgeoning	Tail	Movement	Off Balance? ⁴
<i>Freedom of movement</i>	normal/normal	normal/normal	normal	No
Has a swim speed	-2/half	normal	normal	No
Successful Swim check	-2/half ¹	-2/half	quarter or half ²	No
Firm footing ³	-2/half	-2/half	half	No
None of the above	-2/half	-2/half	normal	Yes

¹ A creature without a *freedom of movement* effects or a swim speed makes grapple checks underwater at a -2 penalty, but deals damage normally when grappling.

² A successful Swim check lets a creature move one-quarter its speed as a move action or one-half its speed as a full-round action.

3 Creatures have firm footing when walking along the bottom, braced against a ship's hull, or the like. A creature can only walk along the bottom if it wears or carries enough gear to weigh itself down—at least 16 pounds for Medium creatures, twice that for each size category larger than Medium, and half that for each size category smaller than Medium.

4 Creatures flailing about in the water (usually because they failed their Swim checks) have a hard time fighting effectively. An off-balance creature loses its Dexterity bonus to Armor Class, and opponents gain a +2 bonus on attacks against it.

Floods

In many wilderness areas, river floods are a common occurrence.

In spring, an enormous snowmelt can engorge the streams and rivers it feeds. Other catastrophic events such as massive rainstorms or the destruction of a dam can create floods as well.

During a flood, rivers become wider, deeper, and swifter. Assume that a river rises by 1d10+10 feet during the spring flood, and its width increases by a factor of $1d4 \times 50\%$. Fords may disappear for days, bridges may be swept away, and even ferries might not be able to manage the crossing of a flooded river. A river in flood makes Swim checks one category harder (calm water becomes rough, and rough water becomes stormy). Rivers also become 50% swifter.

URBAN ADVENTURES

At first glance, a city is much like a dungeon, made up of walls, doors, rooms, and corridors. Adventures that take place in cities have two salient differences from their dungeon counterparts, however. Characters have greater access to resources, and they must contend with law enforcement.

Access to Resources: Unlike in dungeons and the wilderness, characters can buy and sell gear quickly in a city. A large city or metropolis probably has high-level NPCs and experts in obscure fields of knowledge who can provide assistance and decipher clues. And when the PCs are battered and bruised, they can retreat to the comfort of a room at the inn.

The freedom to retreat and ready access to the marketplace means that the players have a greater degree of control over the pacing of an urban adventure.

Law Enforcement: The other key distinctions between adventuring in a city and delving into a dungeon is that a dungeon is, almost by definition, a lawless place where the only law is that of the jungle: Kill or be killed. A city, on the other hand, is held together by a code of laws, many of which are explicitly designed to prevent the sort of behavior that adventurers engage in all the time: killing and looting. Even so, most cities' laws recognize monsters as a threat to the stability the city relies on, and prohibitions about murder rarely apply to monsters such as aberrations or evil outsiders. Most evil humanoids, however, are typically protected by the same laws that protect all the citizens of the city. Having an evil alignment is not a crime (except in some severely theocratic cities, perhaps, with the magical power to back up the law); only evil deeds are against the law. Even when adventurers encounter an evildoer in the act of perpetrating some heinous evil upon the populace of the city, the law tends to frown on the sort of vigilante justice that leaves the evildoer dead or otherwise unable to testify at a trial.

Weapon And Spell Restrictions

Different cities have different laws about such issues as carrying weapons in public and restricting spellcasters.

The city's laws may not affect all characters equally. A monk isn't hampered at all by a law about peace-bonding weapons, but a cleric is reduced to a fraction of his power if all holy symbols are confiscated at the city's gates.

Urban Features

Walls, doors, poor lighting, and uneven footing: In many ways a city is much like a dungeon. Some new considerations for an urban setting are covered below.

Walls and Gates

Many cities are surrounded by walls. A typical small city wall is a fortified stone wall 5 feet thick and 20 feet high. Such a wall is fairly smooth, requiring a DC 30 Climb check to scale. The walls are crenellated on one side to provide a low wall for the guards atop it, and there is just barely room for guards to walk along the top of the wall. A typical small city wall has AC 3, hardness 8, and 450 hp per 10-foot section.

A typical large city wall is 10 feet thick and 30 feet high, with crenellations on both sides for the guards on top of the wall. It is likewise smooth, requiring a DC 30 Climb check to scale. Such a wall has AC 3, hardness 8, and 720 hp per 10-foot section.

A typical metropolis wall is 15 feet thick and 40 feet tall. It has crenellations on both sides and often has a tunnel and small rooms running through its interior. Metropolis walls have AC 3, hardness 8, and 1,170 hp per 10-foot section.

Unlike smaller cities, metropolises often have interior walls as well as surrounding walls—either old walls that the city has outgrown, or walls dividing individual districts from each other. Sometimes these walls are as large and thick as the outer walls, but more often they have the characteristics of a large city's or small city's walls.

Watch Towers: Some city walls are adorned with watch towers set at irregular intervals. Few cities have enough guards to keep someone constantly stationed at every tower, unless the city is expecting attack from outside. The towers provide a superior view of the surrounding countryside as well as a point of defense against invaders.

Watch towers are typically 10 feet higher than the wall they adjoin, and their diameter is 5 times the thickness of the wall. Arrow slits line the outer sides of the upper stories of a tower, and the top is crenellated like the surrounding walls are. In a

small tower (25 feet in diameter adjoining a 5-foot-thick wall), a simple ladder typically connect the tower's stories and the roof. In a larger tower, stairs serve that purpose.

Heavy wooden doors, reinforced with iron and bearing good locks (Open Lock DC 30), block entry to a tower, unless the tower is in regular use. As a rule, the captain of the guard keeps the key to the tower secured on her person, and a second copy is in the city's inner fortress or barracks.

Gates: A typical city gate is a gatehouse with two portcullises and murder holes above the space between them. In towns and some small cities, the primary entry is through iron double doors set into the city wall.

Gates are usually open during the day and locked or barred at night. Usually, one gate lets in travelers after sunset and is staffed by guards who will open it for someone who seems honest, presents proper papers, or offers a large enough bribe (depending on the city and the guards).

Guards and Soldiers

A city typically has full-time military personnel equal to 1% of its adult population, in addition to militia or conscript soldiers equal to 5% of the population. The full-time soldiers are city guards responsible for maintaining order within the city, similar to the role of modern police, and (to a lesser extent) for defending the city from outside assault. Conscript soldiers are called up to serve in case of an attack on the city.

A typical city guard force works on three eight-hour shifts, with 30% of the force on a day shift (8 A.M. to 4 P.M.), 35% on an evening shift (4 P.M. to 12 A.M.), and 35% on a night shift (12 A.M. to 8 A.M.). At any given time, 80% of the guards on duty are on the streets patrolling, while the remaining 20% are stationed at various posts throughout the city, where they can respond to nearby alarms. At least one such guard post is present within each neighborhood of a city (each neighborhood consisting of several districts).

The majority of a city guard force is made up of warriors, mostly 1st level. Officers include higher-level warriors, fighters, a fair number of clerics, and wizards or sorcerers, as well as multiclass fighter/spellcasters.

Siege Engines

Siege engines are large weapons, temporary structures, or pieces of equipment traditionally used in besieging a castle or fortress.

Table: Siege Engines

Item	Cost	Damage	Critical	Range Increment	Typical Crew

Catapult Attack Modifiers

Condition	Modifier
No line of sight to target square	-6
Successive shots (crew can see where most recent misses landed)	Cumulative +2 per previous miss (maximum +10)
Successive shots (crew can't see where most recent misses landed, but observer is providing feedback)	Cumulative +1 per previous miss (maximum +5)

Catapult, Heavy: A heavy catapult is a massive engine capable of throwing rocks or heavy objects with great force. Because the catapult throws its payload in a high arc, it can hit squares out of its line of sight. To fire a heavy catapult, the crew chief makes a special check against DC 15 using only his base attack bonus, Intelligence modifier, range increment penalty, and the appropriate modifiers from the lower section of Table 3–26. If the check succeeds, the catapult stone hits the square the catapult was aimed at, dealing the indicated damage to any object or character in the square. Characters who succeed on a DC 15 Reflex save take half damage. Once a catapult stone hits a square, subsequent shots hit the same square unless the catapult is reaimed or the wind changes direction or speed.

If a catapult stone misses, roll 1d8 to determine where it lands. This determines the misdirection of the throw, with 1 being back toward the catapult and 2 through 8 counting clockwise around the target square. Then, count 3 squares away from the target square for every range increment of the attack.

Loading a catapult requires a series of full-round actions. It takes a DC 15 Strength check to winch the throwing arm down; most catapults have wheels to allow up to two crew members to use the aid another action, assisting the main winch operator. A DC 15 Profession (siege engineer) check latches the arm into place, and then another DC 15 Profession (siege engineer)

check loads the catapult ammunition. It takes four full-round actions to reaim a heavy catapult (multiple crew members can perform these full-round actions in the same round, so it would take a crew of four only 1 round to reaim the catapult). A heavy catapult takes up a space 15 feet across.

Catapult, Light: This is a smaller, lighter version of the heavy catapult. It functions as the heavy catapult, except that it takes a DC 10 Strength check to winch the arm into place, and only two full-round actions are required to reaim the catapult. A light catapult takes up a space 10 feet across.

Ballista: A ballista is essentially a Huge heavy crossbow fixed in place. Its size makes it hard for most creatures to aim it. Thus, a Medium creature takes a -4 penalty on attack rolls when using a ballista, and a Small creature takes a -6 penalty. It takes a creature smaller than Large two full-round actions to reload the ballista after firing.

A ballista takes up a space 5 feet across.

Ram: This heavy pole is sometimes suspended from a movable scaffold that allows the crew to swing it back and forth against objects. As a full-round action, the character closest to the front of the ram makes an attack roll against the AC of the construction, applying the -4 penalty for lack of proficiency. (It's not possible to be proficient with this device.) In addition to the damage given on Table: Siege Engines, up to nine other characters holding the ram can add their Strength modifier to the ram's damage, if they devote an attack action to doing so. It takes at least one Huge or larger creature, two Large creatures, four Medium-size creatures, or eight Small creatures to swing a ram. (Tiny or smaller creatures can't use a ram.)

A ram is typically 30 feet long. In a battle, the creatures wielding the ram stand in two adjacent columns of equal length, with the ram between them.

Siege Tower: This device is a massive wooden tower on wheels or rollers that can be rolled up against a wall to allow attackers to scale the tower and thus to get to the top of the wall with cover. The wooden walls are usually 1 foot thick. A typical siege tower takes up a space 15 feet across. The creatures inside push it at a speed of 10 feet (and a siege tower can't run). The eight creatures pushing on the ground floor have total cover, and those on higher floors get improved cover and can fire through arrow slits.

City Streets

Typical city streets are narrow and twisting. Most streets average 15 to 20 feet wide [(1d4+1)×5 feet], while alleys range from 10 feet wide to only 5 feet. Cobblestones in good condition allow normal movement, but ones in poor repair and heavily rutted dirt streets are considered light rubble, increasing the DC of Balance and Tumble checks by 2.

Some cities have no larger thoroughfares, particularly cities that gradually grew from small settlements to larger cities. Cities that are planned, or perhaps have suffered a major fire that allowed authorities to construct new roads through formerly inhabited areas, might have a few larger streets through town. These main roads are 25 feet wide—offering room for wagons to pass each other—with 5-foot-wide sidewalks on either side.

Crowds: Urban streets are often full of people going about their daily lives. In most cases, it isn't necessary to put every 1st-level commoner on the map when a fight breaks out on the city's main thoroughfare. Instead just indicate which squares on the map contain crowds. If crowds see something obviously dangerous, they'll move away at 30 feet per round at initiative count 0. It takes 2 squares of movement to enter a square with crowds. The crowds provide cover for anyone who does so, enabling a Hide check and providing a bonus to Armor Class and on Reflex saves.

Directing Crowds: It takes a DC 15 Diplomacy check or DC 20 Intimidate check to convince a crowd to move in a particular direction, and the crowd must be able to hear or see the character making the attempt. It takes a full-round action to make the Diplomacy check, but only a free action to make the Intimidate check.

If two or more characters are trying to direct a crowd in different directions, they make opposed Diplomacy or Intimidate checks to determine whom the crowd listens to. The crowd ignores everyone if none of the characters' check results beat the DCs given above.

Above and beneath the Streets

Rooftops: Getting to a roof usually requires climbing a wall (see the Walls section), unless the character can reach a roof by jumping down from a higher window, balcony, or bridge. Flat roofs, common only in warm climates (accumulated snow can cause a flat roof to collapse), are easy to run across. Moving along the peak of a roof requires a DC 20 Balance check.

Moving on an angled roof surface without changing altitude (moving parallel to the peak, in other words) requires a DC 15 Balance check. Moving up and down across the peak of a roof requires a DC 10 Balance check.

Eventually a character runs out of roof, requiring a long jump across to the next roof or down to the ground. The distance to the next closest roof is usually 1d3×5 feet horizontally, but the roof across the gap is equally likely to be 5 feet higher, 5 feet lower, or the same height. Use the guidelines in the Jump skill (a horizontal jump's peak height is one-fourth of the horizontal distance) to determine whether a character can make a jump.

Sewers: To get into the sewers, most characters open a grate (a full-round action) and jump down 10 feet. Sewers are built exactly like dungeons, except that they're much more likely to have floors that are slippery or covered with water. Sewers are also similar to dungeons in terms of creatures liable to be encountered therein. Some cities were built atop the ruins of older civilizations, so their sewers sometimes lead to treasures and dangers from a bygone age.

City Buildings

Most city buildings fall into three categories. The majority of buildings in the city are two to five stories high, built side by side to form long rows separated by secondary or main streets. These row houses usually have businesses on the ground floor, with offices or apartments above.

Inns, successful businesses, and large warehouses—as well as millers, tanners, and other businesses that require extra space—are generally large, free-standing buildings with up to five stories.

Finally, small residences, shops, warehouses, or storage sheds are simple, one-story wooden buildings, especially if they're in poorer neighborhoods.

Most city buildings are made of a combination of stone or clay brick (on the lower one or two stories) and timbers (for the upper stories, interior walls, and floors). Roofs are a mixture of boards, thatch, and slates, sealed with pitch. A typical lower-story wall is 1 foot thick, with AC 3, hardness 8, 90 hp, and a Climb DC of 25. Upper-story walls are 6 inches thick, with AC 3, hardness 5, 60 hp, and a Climb DC of 21. Exterior doors on most buildings are good wooden doors that are usually kept locked, except on public buildings such as shops and taverns.

Buying Buildings

Characters might want to buy their own buildings or even construct their own castle. Use the prices in Table: Buildings directly, or as a guide when extrapolating costs for more exotic structures.

Table: Buildings

Item	Cost
Simple house	1,000 gp
Grand house	5,000 gp
Mansion	100,000 gp
Tower	50,000 gp
Keep	150,000 gp
Castle	500,000 gp
Huge castle	1,000,000 gp
Moat with bridge	50,000 gp

Simple House: This one- to three-room house is made of wood and has a thatched roof.

Grand House: This four- to ten-room house is made of wood and has a thatched roof.

Mansion: This ten- to twenty-room residence has two or three stories and is made of wood and brick. It has a slate roof.

Tower: This round or square, three-level tower is made of stone.

Keep: This fortified stone building has fifteen to twenty-five rooms.

Castle: A castle is a keep surrounded by a 15-foot stone wall with four towers. The wall is 10 feet thick.

Huge Castle: A huge castle is a particularly large keep with numerous associated buildings (stables, forge, granaries, and so on) and an elaborate 20-foot-high wall that creates bailey and courtyard areas. The wall has six towers and is 10 feet thick.

Moat with Bridge: The moat is 15 feet deep and 30 feet wide. The bridge may be a wooden drawbridge or a permanent stone structure.

City Lights

If a city has main thoroughfares, they are lined with lanterns hanging at a height of 7 feet from building awnings. These lanterns are spaced 60 feet apart, so their illumination is all but continuous. Secondary streets and alleys are not lit; it is common for citizens to hire lantern-bearers when going out after dark.

Alleys can be dark places even in daylight, thanks to the shadows of the tall buildings that surround them. A dark alley in daylight is rarely dark enough to afford true concealment, but it can lend a +2 circumstance bonus on Hide checks.

WEATHER

Sometimes weather can play an important role in an adventure.

Table: Random Weather is an appropriate weather table for general use, and can be used as a basis for a local weather tables.

Terms on that table are defined as follows.

Calm: Wind speeds are light (0 to 10 mph).

Cold: Between 0° and 40° Fahrenheit during the day, 10 to 20 degrees colder at night.

Cold Snap: Lowers temperature by -10° F.

Downpour: Treat as rain (see Precipitation, below), but conceals as fog. Can create floods (see above). A downpour lasts for 2d4 hours.

Heat Wave: Raises temperature by +10° F.

Hot: Between 85° and 110° Fahrenheit during the day, 10 to 20 degrees colder at night.

Moderate: Between 40° and 60° Fahrenheit during the day, 10 to 20 degrees colder at night.

Powerful Storm (Windstorm/Blizzard/Hurricane/Tornado): Wind speeds are over 50 mph (see Table: Wind Effects). In addition, blizzards are accompanied by heavy snow (1d3 feet), and hurricanes are accompanied by downpours (see above). Windstorms last for 1d6 hours. Blizzards last for 1d3 days. Hurricanes can last for up to a week, but their major impact on characters will come in a 24-to-48-hour period when the center of the storm moves through their area. Tornadoes are very short-lived (1d6×10 minutes), typically forming as part of a thunderstorm system.

Precipitation: Roll d% to determine whether the precipitation is fog (01–30), rain/snow (31–90), or sleet/hail (91–00). Snow and sleet occur only when the temperature is 30° Fahrenheit or below. Most precipitation lasts for 2d4 hours. By contrast, hail lasts for only 1d20 minutes but usually accompanies 1d4 hours of rain.

Storm (Duststorm/Snowstorm/Thunderstorm): Wind speeds are severe (30 to 50 mph) and visibility is cut by three-quarters. Storms last for 2d4–1 hours. See Storms, below, for more details.

Warm: Between 60° and 85° Fahrenheit during the day, 10 to 20 degrees colder at night.

Windy: Wind speeds are moderate to strong (10 to 30 mph); see Table: Wind Effects on the following page.

Table: Random Weather

d%	Weather	Cold Climate	Temperate Climate ¹	Desert
01–70	Normal weather	Cold, calm	Normal for season ²	Hot, calm
71–80	Abnormal weather	Heat wave (01–30) or cold snap (31–100)	Heat wave (01–50) or cold snap (51–100)	Hot, windy
81–90	Inclement weather	Precipitation (snow)	Precipitation (normal for season)	Hot, windy
91–99	Storm	Snowstorm	Thunderstorm, snowstorm ³	Duststorm
100	Powerful storm	Blizzard	Windstorm, blizzard ⁴ , hurricane, tornado	Downpour

¹ Temperate includes forest, hills, marsh, mountains, plains, and warm aquatic.

² Winter is cold, summer is warm, spring and autumn are temperate. Marsh regions are slightly warmer in winter.

Rain, Snow, Sleet, and Hail

Bad weather frequently slows or halts travel and makes it virtually impossible to navigate from one spot to another. Torrential downpours and blizzards obscure vision as effectively as a dense fog.

Most precipitation is rain, but in cold conditions it can manifest as snow, sleet, or hail. Precipitation of any kind followed by a cold snap in which the temperature dips from above freezing to 30° F or below may produce ice. *Rain:* Rain reduces visibility ranges by half, resulting in a –4 penalty on Spot and Search checks. It has the same effect on flames, ranged weapon attacks, and Listen checks as severe wind.

Snow: Falling snow has the same effects on visibility, ranged weapon attacks, and skill checks as rain, and it costs 2 squares of movement to enter a snow-covered square. A day of snowfall leaves 1d6 inches of snow on the ground.

Heavy Snow: Heavy snow has the same effects as normal snowfall, but also restricts visibility as fog does (see Fog, below). A day of heavy snow leaves 1d4 feet of snow on the ground, and it costs 4 squares of movement to enter a square covered with heavy snow. Heavy snow accompanied by strong or severe winds may result in snowdrifts 1d4×5 feet deep, especially in and around objects big enough to deflect the wind—a cabin or a large tent, for instance. There is a 10% chance that a heavy snowfall is accompanied by lightning (see Thunderstorm, below). Snow has the same effect on flames as moderate wind.

Sleet: Essentially frozen rain, sleet has the same effect as rain while falling (except that its chance to extinguish protected flames is 75%) and the same effect as snow once on the ground.

Hail: Hail does not reduce visibility, but the sound of falling hail makes Listen checks more difficult (–4 penalty). Sometimes (5% chance) hail can become large enough to deal 1 point of lethal damage (per storm) to anything in the open. Once on the ground, hail has the same effect on movement as snow.

Storms

The combined effects of precipitation (or dust) and wind that accompany all storms reduce visibility ranges by three quarters, imposing a –8 penalty on Spot, Search, and Listen checks. Storms make ranged weapon attacks impossible, except for those using siege weapons, which have a –4 penalty on attack rolls. They automatically extinguish candles, torches, and similar unprotected flames. They cause protected flames, such as those of lanterns, to dance wildly and have a 50% chance to extinguish these lights. See Table: Wind Effects for possible consequences to creatures caught outside without shelter during such a storm. Storms are divided into the following three types.

Duststorm (CR 3): These desert storms differ from other storms in that they have no precipitation. Instead, a duststorm blows fine grains of sand that obscure vision, smother unprotected flames, and can even choke protected flames (50% chance).

Most duststorms are accompanied by severe winds and leave behind a deposit of 1d6 inches of sand. However, there is a 10% chance for a greater duststorm to be accompanied by windstorm-magnitude winds (see Table: Wind Effects). These greater duststorms deal 1d3 points of nonlethal damage each round to anyone caught out in the open without shelter and also pose a

choking hazard (see Drowning—except that a character with a scarf or similar protection across her mouth and nose does not begin to choke until after a number of rounds equal to $10 \times$ her Constitution score). Greater duststorms leave 2d3–1 feet of fine sand in their wake.

Snowstorm: In addition to the wind and precipitation common to other storms, snowstorms leave 1d6 inches of snow on the ground afterward.

Thunderstorm: In addition to wind and precipitation (usually rain, but sometimes also hail), thunderstorms are accompanied by lightning that can pose a hazard to characters without proper shelter (especially those in metal armor). As a rule of thumb, assume one bolt per minute for a 1-hour period at the center of the storm. Each bolt causes electricity damage equal to 1d10 eight-sided dice. One in ten thunderstorms is accompanied by a tornado (see below).

Powerful Storms: Very high winds and torrential precipitation reduce visibility to zero, making Spot, Search, and Listen checks and all ranged weapon attacks impossible. Unprotected flames are automatically extinguished, and protected flames have a 75% chance of being doused. Creatures caught in the area must make a DC 20 Fortitude save or face the effects based on the size of the creature (see Table: Wind Effects). Powerful storms are divided into the following four types.

Windstorm: While accompanied by little or no precipitation, windstorms can cause considerable damage simply through the force of their wind.

Blizzard: The combination of high winds, heavy snow (typically 1d3 feet), and bitter cold make blizzards deadly for all who are unprepared for them.

Hurricane: In addition to very high winds and heavy rain, hurricanes are accompanied by floods. Most adventuring activity is impossible under such conditions.

Tornado: One in ten thunderstorms is accompanied by a tornado.

Fog

Whether in the form of a low-lying cloud or a mist rising from the ground, fog obscures all sight, including darkvision, beyond 5 feet. Creatures 5 feet away have concealment (attacks by or against them have a 20% miss chance).

Winds

The wind can create a stinging spray of sand or dust, fan a large fire, heel over a small boat, and blow gases or vapors away. If powerful enough, it can even knock characters down (see Table: Wind Effects), interfere with ranged attacks, or impose penalties on some skill checks.

Light Wind: A gentle breeze, having little or no game effect.

Moderate Wind: A steady wind with a 50% chance of extinguishing small, unprotected flames, such as candles.

Strong Wind: Gusts that automatically extinguish unprotected flames (candles, torches, and the like). Such gusts impose a –2 penalty on ranged attack rolls and on Listen checks.

Severe Wind: In addition to automatically extinguishing any unprotected flames, winds of this magnitude cause protected flames (such as those of lanterns) to dance wildly and have a 50% chance of extinguishing these lights. Ranged weapon attacks and Listen checks are at a –4 penalty. This is the velocity of wind produced by a *gust of wind* spell.

Windstorm: Powerful enough to bring down branches if not whole trees, windstorms automatically extinguish unprotected flames and have a 75% chance of blowing out protected flames, such as those of lanterns. Ranged weapon attacks are impossible, and even siege weapons have a –4 penalty on attack rolls. Listen checks are at a –8 penalty due to the howling of the wind.

Hurricane-Force Wind: All flames are extinguished. Ranged attacks are impossible (except with siege weapons, which have a –8 penalty on attack rolls). Listen checks are impossible: All characters can hear is the roaring of the wind. Hurricane-force winds often fell trees.

Tornado (CR 10): All flames are extinguished. All ranged attacks are impossible (even with siege weapons), as are Listen checks. Instead of being blown away (see Table: Wind Effects), characters in close proximity to a tornado who fail their Fortitude saves are sucked toward the tornado. Those who come in contact with the actual funnel cloud are picked up and whirled around for 1d10 rounds, taking 6d6 points of damage per round, before being violently expelled (falling damage may apply). While a tornado's rotational speed can be as great as 300 mph, the funnel itself moves forward at an average of 30 mph (roughly 250 feet per round). A tornado uproots trees, destroys buildings, and causes other similar forms of major destruction.

1 The siege weapon category includes ballista and catapult attacks as well as boulders tossed by giants.

2 Flying or airborne creatures are treated as one size category smaller than their actual size, so an airborne Gargantuan dragon is treated as Huge for purposes of wind effects.

Checked: Creatures are unable to move forward against the force of the wind. Flying creatures are blown back 1d6×5 feet.

Knocked Down: Creatures are knocked prone by the force of the wind. Flying creatures are instead blown back 1d6×10 feet.

Blown Away: Creatures on the ground are knocked prone and rolled 1d4×10 feet, taking 1d4 points of nonlethal damage per 10 feet. Flying creatures are blown back 2d6×10 feet and take 2d6 points of nonlethal damage due to battering and buffeting.

THE ENVIRONMENT

Environmental hazards specific to one kind of terrain (such as an avalanche, which occurs in the mountains) are described in Wilderness, above. Environmental hazards common to more than one setting are detailed below.

ACID EFFECTS

Corrosive acids deals 1d6 points of damage per round of exposure except in the case of total immersion (such as into a vat of acid), which deals 10d6 points of damage per round. An attack with acid, such as from a hurled vial or a monster's spittle, counts as a round of exposure.

The fumes from most acids are inhaled poisons. Those who come close enough to a large body of acid to dunk a creature in it must make a DC 13 Fortitude save or take 1 point of Constitution damage. All such characters must make a second save 1 minute later or take another 1d4 points of Constitution damage.

Creatures immune to acid's caustic properties might still drown in it if they are totally immersed (see Drowning).

COLD DANGERS

Cold and exposure deal nonlethal damage to the victim. This nonlethal damage cannot be recovered until the character gets out of the cold and warms up again. Once a character is rendered unconscious through the accumulation of nonlethal damage, the cold and exposure begins to deal lethal damage at the same rate.

An unprotected character in cold weather (below 40° F) must make a Fortitude save each hour (DC 15, +1 per previous check) or take 1d6 points of nonlethal damage. A character who has the Survival skill may receive a bonus on this saving throw and may be able to apply this bonus to other characters as well (see the skill Description).

In conditions of severe cold or exposure (below 0° F), an unprotected character must make a Fortitude save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 points of nonlethal damage on each failed save. A character who has the Survival skill may receive a bonus on this saving throw and may be able to apply this bonus to other characters as well (see the skill description). Characters wearing winter clothing only need check once per hour for cold and exposure damage.

A character who takes any nonlethal damage from cold or exposure is beset by frostbite or hypothermia (treat her as fatigued). These penalties end when the character recovers the nonlethal damage she took from the cold and exposure.

Extreme cold (below -20° F) deals 1d6 points of lethal damage per minute (no save). In addition, a character must make a Fortitude save (DC 15, +1 per previous check) or take 1d4 points of nonlethal damage. Those wearing metal armor or coming into contact with very cold metal are affected as if by a *chill metal* spell.

Ice Effects

Characters walking on ice must spend 2 squares of movement to enter a square covered by ice, and the DC for Balance and Tumble checks increases by +5. Characters in prolonged contact with ice may run the risk of taking damage from severe cold (see above).

DARKNESS

Darkvision allows many characters and monsters to see perfectly well without any light at all, but characters with normal vision (or low-light vision, for that matter) can be rendered completely blind by putting out the lights. Torches or lanterns can be blown out by sudden gusts of subterranean wind, magical light sources can be dispelled or countered, or magical traps might create fields of impenetrable darkness.

In many cases, some characters or monsters might be able to see, while others are blinded. For purposes of the following points, a blinded creature is one who simply can't see through the surrounding darkness.

—Creatures blinded by darkness lose the ability to deal extra damage due to precision (for example, a sneak attack).

—Blinded creatures are hampered in their movement, and pay 2 squares of movement per square moved into (double normal cost). Blinded creatures can't run or charge.

—All opponents have total concealment from a blinded creature, so the blinded creature has a 50% miss chance in combat. A blinded creature must first pinpoint the location of an opponent in order to attack the right square; if the blinded creature launches an attack without pinpointing its foe, it attacks a random square within its reach. For ranged attacks or spells against a foe whose location is not pinpointed, roll to determine which adjacent square the blinded creature is facing; its attack is directed at the closest target that lies in that direction.

—A blinded creature loses its Dexterity adjustment to AC and takes a -2 penalty to AC.

—A blinded creature takes a -4 penalty on Search checks and most Strength- and Dexterity-based skill checks, including any with an armor check penalty. A creature blinded by darkness automatically fails any skill check relying on vision.

—Creatures blinded by darkness cannot use gaze attacks and are immune to gaze attacks.

A creature blinded by darkness can make a Listen check as a free action each round in order to locate foes (DC equal to opponents' Move Silently checks). A successful check lets a blinded character hear an unseen creature "over there somewhere." It's almost impossible to pinpoint the location of an unseen creature. A Listen check that beats the DC by 20 reveals the unseen creature's square (but the unseen creature still has total concealment from the blinded creature).

—A blinded creature can grope about to find unseen creatures. A character can make a touch attack with his hands or a weapon into two adjacent squares using a standard action. If an unseen target is in the designated square, there is a 50% miss chance on the touch attack. If successful, the groping character deals no damage but has pinpointed the unseen creature's current location. (If the unseen creature moves, its location is once again unknown.)

—If a blinded creature is struck by an unseen foe, the blinded character pinpoints the location of the creature that struck him (until the unseen creature moves, of course). The only exception is if the unseen creature has a reach greater than 5 feet (in which case the blinded character knows the location of the unseen opponent, but has not pinpointed him) or uses a ranged attack (in which case, the blinded character knows the general direction of the foe, but not his location).

—A creature with the scent ability automatically pinpoints unseen creatures within 5 feet of its location.

FALLING

Falling Damage: The basic rule is simple: 1d6 points of damage per 10 feet fallen, to a maximum of 20d6.

If a character deliberately jumps instead of merely slipping or falling, the damage is the same but the first 1d6 is nonlethal damage. A DC 15 Jump check or DC 15 Tumble check allows the character to avoid any damage from the first 10 feet fallen and converts any damage from the second 10 feet to nonlethal damage. Thus, a character who slips from a ledge 30 feet up takes 3d6 damage. If the same character deliberately jumped, he takes 1d6 points of nonlethal damage and 2d6 points of lethal damage. And if the character leaps down with a successful Jump or Tumble check, he takes only 1d6 points of nonlethal damage and 1d6 points of lethal damage from the plunge.

Falls onto yielding surfaces (soft ground, mud) also convert the first 1d6 of damage to nonlethal damage. This reduction is cumulative with reduced damage due to deliberate jumps and the Jump skill.

Falling into Water: Falls into water are handled somewhat differently. If the water is at least 10 feet deep, the first 20 feet of falling do no damage. The next 20 feet do nonlethal damage (1d3 per 10-foot increment). Beyond that, falling damage is lethal damage (1d6 per additional 10-foot increment).

Characters who deliberately dive into water take no damage on a successful DC 15 Swim check or DC 15 Tumble check, so long as the water is at least 10 feet deep for every 30 feet fallen. However, the DC of the check increases by 5 for every 50 feet of the dive.

FALLING OBJECTS

Just as characters take damage when they fall more than 10 feet, so too do they take damage when they are hit by falling objects.

Objects that fall upon characters deal damage based on their weight and the distance they have fallen. For each 200 pounds of an object's weight, the object deals 1d6 points of damage, provided it falls at least 10 feet. Distance also comes into play, adding an additional 1d6 points of damage for every 10-foot increment it falls beyond the first (to a maximum of 20d6 points of damage).

Objects smaller than 200 pounds also deal damage when dropped, but they must fall farther to deal the same damage. Use Table: Damage from Falling Objects to see how far an object of a given weight must drop to deal 1d6 points of damage.

Table: Damage from Falling Objects

Object Weight	Falling Distance
200–101 lb.	20 ft.
100–51 lb.	30 ft.
50–31 lb.	40 ft.
30–11 lb.	50 ft.
10–6 lb.	60 ft.
5–1 lb.	70 ft.

For each additional increment an object falls, it deals an additional 1d6 points of damage.

Objects weighing less than 1 pound do not deal damage to those they land upon, no matter how far they have fallen.

HEAT DANGERS

Heat deals nonlethal damage that cannot be recovered until the character gets cooled off (reaches shade, survives until nightfall, gets doused in water, is targeted by *endure elements*, and so forth). Once rendered unconscious through the accumulation of nonlethal damage, the character begins to take lethal damage at the same rate.

A character in very hot conditions (above 90° F) must make a Fortitude saving throw each hour (DC 15, +1 for each previous check) or take 1d4 points of nonlethal damage. Characters wearing heavy clothing or armor of any sort take a –4 penalty on their saves. A character with the Survival skill may receive a bonus on this saving throw and may be able to apply this bonus to other characters as well (see the skill description). Characters reduced to unconsciousness begin taking lethal damage (1d4 points per hour).

In severe heat (above 110° F), a character must make a Fortitude save once every 10 minutes (DC 15, +1 for each previous check) or take 1d4 points of nonlethal damage. Characters wearing heavy clothing or armor of any sort take a –4 penalty on their saves. A character with the Survival skill may receive a bonus on this saving throw and may be able to apply this bonus to other characters as well. Characters reduced to unconsciousness begin taking lethal damage (1d4 points per each 10-minute period).

A character who takes any nonlethal damage from heat exposure now suffers from heatstroke and is fatigued.

These penalties end when the character recovers the nonlethal damage she took from the heat.

Extreme heat (air temperature over 140° F, fire, boiling water, lava) deals lethal damage. Breathing air in these temperatures deals 1d6 points of damage per minute (no save). In addition, a character must make a Fortitude save every 5 minutes (DC 15, +1 per previous check) or take 1d4 points of nonlethal damage. Those wearing heavy clothing or any sort of armor take a –4 penalty on their saves. In addition, those wearing metal armor or coming into contact with very hot metal are affected as if by a *heat metal* spell.

Boiling water deals 1d6 points of scalding damage, unless the character is fully immersed, in which case it deals 10d6 points of damage per round of exposure.

Catching on Fire

Characters exposed to burning oil, bonfires, and noninstantaneous magic fires might find their clothes, hair, or equipment on fire. Spells with an instantaneous duration don't normally set a character on fire, since the heat and flame from these come and go in a flash.

Characters at risk of catching fire are allowed a DC 15 Reflex save to avoid this fate. If a character's clothes or hair catch fire, he takes 1d6 points of damage immediately. In each subsequent round, the burning character must make another Reflex saving throw. Failure means he takes another 1d6 points of damage that round. Success means that the fire has gone out. (That is, once he succeeds on his saving throw, he's no longer on fire.)

A character on fire may automatically extinguish the flames by jumping into enough water to douse himself. If no body of water is at hand, rolling on the ground or smothering the fire with cloaks or the like permits the character another save with a +4 bonus.

Those unlucky enough to have their clothes or equipment catch fire must make DC 15 Reflex saves for each item. Flammable items that fail take the same amount of damage as the character.

Lava Effects

Lava or magma deals 2d6 points of damage per round of exposure, except in the case of total immersion (such as when a character falls into the crater of an active volcano), which deals 20d6 points of damage per round.

Damage from magma continues for 1d3 rounds after exposure ceases, but this additional damage is only half of that dealt during actual contact (that is, 1d6 or 10d6 points per round).

An immunity or resistance to fire serves as an immunity to lava or magma. However, a creature immune to fire might still drown if completely immersed in lava (see Drowning, below).

SMOKE EFFECTS

A character who breathes heavy smoke must make a Fortitude save each round (DC 15, +1 per previous check) or spend that round choking and coughing. A character who chokes for 2 consecutive rounds takes 1d6 points of nonlethal damage. Smoke obscures vision, giving concealment (20% miss chance) to characters within it.

STARVATION AND THIRST

Characters might find themselves without food or water and with no means to obtain them. In normal climates, Medium characters need at least a gallon of fluids and about a pound of decent food per day to avoid starvation. (Small characters need half as much.) In very hot climates, characters need two or three times as much water to avoid dehydration.

A character can go without water for 1 day plus a number of hours equal to his Constitution score. After this time, the character must make a Constitution check each hour (DC 10, +1 for each previous check) or take 1d6 points of nonlethal damage.

A character can go without food for 3 days, in growing discomfort. After this time, the character must make a Constitution check each day (DC 10, +1 for each previous check) or take 1d6 points of nonlethal damage.

Characters who have taken nonlethal damage from lack of food or water are fatigued. Nonlethal damage from thirst or starvation cannot be recovered until the character gets food or water, as needed—not even magic that restores hit points heals this damage.

SUFFOCATION

A character who has no air to breathe can hold her breath for 2 rounds per point of Constitution. After this period of time, the character must make a DC 10 Constitution check in order to continue holding her breath. The save must be repeated each round, with the DC increasing by +1 for each previous success.

When the character fails one of these Constitution checks, she begins to suffocate. In the first round, she falls unconscious (0 hit points). In the following round, she drops to -1 hit points and is dying. In the third round, she suffocates.

Slow Suffocation: A Medium character can breathe easily for 6 hours in a sealed chamber measuring 10 feet on a side. After that time, the character takes 1d6 points of nonlethal damage every 15 minutes. Each additional Medium character or significant fire source (a torch, for example) proportionally reduces the time the air will last.

Small characters consume half as much air as Medium characters. A larger volume of air, of course, lasts for a longer time.

WATER DANGERS

Any character can wade in relatively calm water that isn't over his head, no check required. Similarly, swimming in calm water only requires skill checks with a DC of 10. Trained swimmers can just take 10. (Remember, however, that armor or heavy gear makes any attempt at swimming much more difficult. See the Swim skill description.)

By contrast, fast-moving water is much more dangerous. On a successful DC 15 Swim check or a DC 15 Strength check, it deals 1d3 points of nonlethal damage per round (1d6 points of lethal damage if flowing over rocks and cascades). On a failed check, the character must make another check that round to avoid going under.

Very deep water is not only generally pitch black, posing a navigational hazard, but worse, it deals water pressure damage of 1d6 points per minute for every 100 feet the character is below the surface. A successful Fortitude save (DC 15, +1 for each previous check) means the diver takes no damage in that minute. Very cold water deals 1d6 points of nonlethal damage from hypothermia per minute of exposure.

Drowning

Any character can hold her breath for a number of rounds equal to twice her Constitution score. After this period of time, the character must make a DC 10 Constitution check every round in order to continue holding her breath. Each round, the DC increases by 1.

When the character finally fails her Constitution check, she begins to drown. In the first round, she falls unconscious (0 hp). In the following round, she drops to -1 hit points and is dying. In the third round, she drowns.

It is possible to drown in substances other than water, such as sand, quicksand, fine dust, and silos full of grain.

TRAPS

Types of Traps: A trap can be either mechanical or magic in nature. Mechanical traps include pits, arrow traps, falling blocks, water-filled rooms, whirling blades, and anything else that depends on a mechanism to operate. A mechanical trap can be constructed by a PC through successful use of the Craft (trapmaking) skill (see Designing a Trap, below, and the skill description).

Magic traps are further divided into spell traps and magic device traps. Magic device traps initiate spell effects when activated, just as wands, rods, rings, and other magic items do. Creating a magic device trap requires the Craft Wondrous Item feat (see Designing a Trap and the feat description).

Spell traps are simply spells that themselves function as traps. Creating a spell trap requires the services of a character who can cast the needed spell or spells, who is usually either the character creating the trap or an NPC spellcaster hired for the purpose.

MECHANICAL TRAPS

Dungeons are frequently equipped with deadly mechanical (nonmagical) traps. A trap typically is defined by its location and triggering conditions, how hard it is to spot before it goes off, how much damage it deals, and whether or not the heroes receive a saving throw to mitigate its effects. Traps that attack with arrows, sweeping blades, and other types of weaponry make normal attack rolls, with a specific attack bonus dictated by the trap's design.

Creatures who succeed on a DC 20 Search check detect a simple mechanical trap before it is triggered. (A simple trap is a snare, a trap triggered by a tripwire, or a large trap such as a pit.)

A character with the trap sense class feature who succeeds on a DC 21 (or higher) Search check detects a well-hidden or complex mechanical trap before it is triggered. Complex traps are denoted by their triggering mechanisms and involve pressure plates, mechanisms linked to doors, changes in weight, disturbances in the air, vibrations, and other sorts of unusual triggers.

MAGIC TRAPS

Many spells can be used to create dangerous traps. Unless the spell or item description states otherwise, assume the following to be true.

- A successful Search check (DC 25 + spell level) made by a rogue (and only a rogue) detects a magic trap before it goes off. Other characters have no chance to find a magic trap with a Search check.
- Magic traps permit a saving throw in order to avoid the effect (DC 10 + spell level $\times \frac{1}{2}$ 1.5).
- Magic traps may be disarmed by a rogue (and only a rogue) with a successful Disable Device check (DC 25 + spell level).

ELEMENTS OF A TRAP

All traps—mechanical or magic—have the following elements: trigger, reset, Search DC, Disable Device DC, attack bonus (or saving throw or onset delay), damage/effect, and Challenge Rating. Some traps may also include optional elements, such as poison or a bypass. These characteristics are described below.

Trigger

A trap's trigger determines how it is sprung.

Location: A location trigger springs a trap when someone stands in a particular square.

Proximity: This trigger activates the trap when a creature approaches within a certain distance of it. A proximity trigger differs from a location trigger in that the creature need not be standing in a particular square. Creatures that are flying can spring a trap with a proximity trigger but not one with a location trigger. Mechanical proximity triggers are extremely sensitive to the slightest change in the air. This makes them useful only in places such as crypts, where the air is unusually still.

The proximity trigger used most often for magic device traps is the *alarm* spell. Unlike when the spell is cast, an *alarm* spell used as a trigger can have an area that's no larger than the area the trap is meant to protect.

Some magic device traps have special proximity triggers that activate only when certain kinds of creatures approach. For example, a *detect good* spell can serve as a proximity trigger on an evil altar, springing the attached trap only when someone of good alignment gets close enough to it.

Sound: This trigger springs a magic trap when it detects any sound. A sound trigger functions like an ear and has a +15 bonus on Listen checks. A successful Move Silently check, magical *silence*, and other effects that would negate hearing defeat it. A trap with a sound trigger requires the casting of *clairaudience* during its construction.

Visual: This trigger for magic traps works like an actual eye, springing the trap whenever it “sees” something. A trap with a visual trigger requires the casting of *arcane eye*, *clairvoyance*, or *true seeing* during its construction. Sight range and the Spot bonus conferred on the trap depend on the spell chosen, as shown.

Spell	Sight Range	Spot Bonus
<i>arcane eye</i>	Line of sight (unlimited range)	+20
<i>clairvoyance</i>	One preselected location	+15
<i>true seeing</i>	Line of sight (up to 120 ft.)	+30

If you want the trap to “see” in the dark, you must either choose the *true seeing* option or add *darkvision* to the trap as well. (*Darkvision* limits the trap’s sight range in the dark to 60 feet.) If invisibility, disguises, or illusions can fool the spell being used, they can fool the visual trigger as well.

Touch: A touch trigger, which springs the trap when touched, is one of the simplest kinds of trigger to construct. This trigger may be physically attached to the part of the mechanism that deals the damage or it may not. You can make a magic touch trigger by adding *alarm* to the trap and reducing the area of the effect to cover only the trigger spot.

Timed: This trigger periodically springs the trap after a certain duration has passed.

Spell: All spell traps have this kind of trigger. The appropriate spell descriptions explain the trigger conditions for traps that contain spell triggers.

Reset

A reset element is the set of conditions under which a trap becomes ready to trigger again.

No Reset: Short of completely rebuilding the trap, there’s no way to trigger it more than once. Spell traps have no reset element.

Repair: To get the trap functioning again, you must repair it.

Manual: Resetting the trap requires someone to move the parts back into place. This is the kind of reset element most mechanical traps have.

Automatic: The trap resets itself, either immediately or after a timed interval.

Repairing and Resetting Mechanical Traps

Repairing a mechanical trap requires a Craft (trapmaking) check against a DC equal to the one for building it. The cost for raw materials is one-fifth of the trap’s original market price. To calculate how long it takes to fix a trap, use the same calculations you would for building it, but use the cost of the raw materials required for repair in place of the market price. Resetting a trap usually takes only a minute or so. For a trap with a more difficult reset method, you should set the time and labor required.

Bypass (Optional Element)

If the builder of a trap wants to be able to move past the trap after it is created or placed, it’s a good idea to build in a bypass mechanism —something that temporarily disarms the trap. Bypass elements are typically used only with mechanical traps; spell traps usually have built-in allowances for the caster to bypass them.

Lock: A lock bypass requires a DC 30 Open Lock check to open.

Hidden Switch: A hidden switch requires a DC 25 Search check to locate.

Hidden Lock: A hidden lock combines the features above, requiring a DC 25 Search check to locate and a DC 30 Open Lock check to open.

Search and Disable Device DCs

The builder sets the Search and Disable Device DCs for a mechanical trap. For a magic trap, the values depend on the highest-level spell used.

Mechanical Trap: The base DC for both Search and Disable Device checks is 20. Raising or lowering either of these DCs affects the base cost (Table: Cost Modifiers for Mechanical Traps) and possibly the CR (Table: CR Modifiers for Mechanical Traps).

Magic Trap: The DC for both Search and Disable Device checks is equal to 25 + the spell level of the highest-level spell used. Only characters with the trap sense class feature can attempt a Search check or a Disable Device check involving a magic trap. These DCs do not affect the trap’s cost or CR.

Attack Bonus/Saving Throw DC

A trap usually either makes an attack roll or forces a saving throw to avoid it. Occasionally a trap uses both of these options, or neither (see Never Miss).

Pits: These are holes (covered or not) that characters can fall into and take damage. A pit needs no attack roll, but a successful Reflex save (DC set by the builder) avoids it. Other save-dependent mechanical traps also fall into this category.

Pits in dungeons come in three basic varieties: uncovered, covered, and chasms. Pits and chasms can be defeated by judicious application of the Climb skill, the Jump skill, or various magical means.

Uncovered pits serve mainly to discourage intruders from going a certain way, although they cause much grief to characters who stumble into them in the dark, and they can greatly complicate a melee taking place nearby.

Covered pits are much more dangerous. They can be detected with a DC 20 Search check, but only if the character is taking the time to carefully examine the area before walking across it. A character who fails to detect a covered pit is still entitled to a DC 20 Reflex save to avoid falling into it. However, if she was running or moving recklessly at the time, she gets no saving throw and falls automatically.

Trap coverings can be as simple as piled refuse (straw, leaves, sticks, garbage), a large rug, or an actual trapdoor concealed to appear as a normal part of the floor. Such a trapdoor usually swings open when enough weight (usually about 50 to 80 pounds) is placed upon it. Devious trap builders sometimes design trapdoors so that they spring back shut after they open. The trapdoor might lock once it's back in place, leaving the stranded character well and truly trapped. Opening such a trapdoor is just as difficult as opening a regular door (assuming the trapped character can reach it), and a DC 13 Strength check is needed to keep a spring-loaded door open.

Pit traps often have something nastier than just a hard floor at the bottom. A trap designer may put spikes, monsters, or a pool of acid, lava, or even water at the bottom. Spikes at the bottom of a pit deal damage as daggers with a +10 attack bonus and a +1 bonus on damage for every 10 feet of the fall (to a maximum bonus on damage of +5). If the pit has multiple spikes, a falling victim is attacked by 1d4 of them. This damage is in addition to any damage from the fall itself.

Monsters sometimes live in pits. Any monster that can fit into the pit might have been placed there by the dungeon's designer, or might simply have fallen in and not been able to climb back out.

A secondary trap, mechanical or magical, at the bottom of a pit can be particularly deadly. Activated by a falling victim, the secondary trap attacks the already injured character when she's least ready for it.

Ranged Attack Traps: These traps fling darts, arrows, spears, or the like at whoever activated the trap. The builder sets the attack bonus. A ranged attack trap can be configured to simulate the effect of a composite bow with a high strength rating which provides the trap with a bonus on damage equal to its strength rating.

Melee Attack Traps: These traps feature such obstacles as sharp blades that emerge from walls and stone blocks that fall from ceilings. Once again, the builder sets the attack bonus.

Damage/Effect

The effect of a trap is what happens to those who spring it. Usually this takes the form of either damage or a spell effect, but some traps have special effects.

Pits: Falling into a pit deals 1d6 points of damage per 10 feet of depth.

Ranged Attack Traps: These traps deal whatever damage their ammunition normally would. If a trap is constructed with a high strength rating, it has a corresponding bonus on damage.

Melee Attack Traps: These traps deal the same damage as the melee weapons they "wield." In the case of a falling stone block, you can assign any amount of bludgeoning damage you like, but remember that whoever resets the trap has to lift that stone back into place.

A melee attack trap can be constructed with a built-in bonus on damage rolls, just as if the trap itself had a high Strength score.

Spell Traps: Spell traps produce the spell's effect. Like all spells, a spell trap that allows a saving throw has a save DC of 10 + spell level + caster's relevant ability modifier.

Magic Device Traps: These traps produce the effects of any spells included in their construction, as described in the appropriate entries. If the spell in a magic device trap allows a saving throw, its save DC is $10 + \text{spell level} \times 1.5$. Some spells make attack rolls instead.

Special: Some traps have miscellaneous features that produce special effects, such as drowning for a water trap or ability damage for poison. Saving throws and damage depend on the poison or are set by the builder, as appropriate.

Miscellaneous Trap Features

Some traps include optional features that can make them considerably more deadly. The most common such features are discussed below.

Alchemical Item: Mechanical traps may incorporate alchemical devices or other special substances or items, such as tanglefoot bags, alchemist's fire, thunderstones, and the like. Some such items mimic spell effects. If the item mimics a spell effect, it increases the CR as shown on Table: CR Modifiers for Mechanical Traps.

Gas: With a gas trap, the danger is in the inhaled poison it delivers. Traps employing gas usually have the never miss and onset delay features (see below).

Liquid: Any trap that involves a danger of drowning is in this category. Traps employing liquid usually have the never miss and onset delay features (see below).

Multiple Target: Traps with this feature can affect more than one character.

Never Miss: When the entire dungeon wall moves to crush you, your quick reflexes won't help, since the wall can't possibly miss. A trap with this feature has neither an attack bonus nor a saving throw to avoid, but it does have an onset delay (see below). Most traps involving liquid or gas are of the never miss variety.

Onset Delay: An onset delay is the amount of time between when the trap is sprung and when it deals damage. A never miss trap always has an onset delay.

Poison: Traps that employ poison are deadlier than their nonpoisonous counterparts, so they have correspondingly higher CRs. To determine the CR modifier for a given poison, consult Table: CR Modifiers for Mechanical Traps. Only injury, contact, and inhaled poisons are suitable for traps; ingested types are not. Some traps simply deal the poison's damage. Others deal damage with ranged or melee attacks as well.

Pit Spikes: Treat spikes at the bottom of a pit as daggers, each with a +10 attack bonus. The damage bonus for each spike is +1 per 10 feet of pit depth (to a maximum of +5). Each character who falls into the pit is attacked by 1d4 spikes. Pit spikes do not add to the average damage of the trap (see Average Damage, below).

Pit Bottom: If something other than spikes waits at the bottom of a pit, it's best to treat that as a separate trap (see Multiple Traps, below) with a location trigger that activates on any significant impact, such as a falling character.

Touch Attack: This feature applies to any trap that needs only a successful touch attack (melee or ranged) to hit.

SAMPLE TRAPS

The costs listed for mechanical traps are market prices; those for magic traps are raw material costs. Caster level and class for the spells used to produce the trap effects are provided in the entries for magic device traps and spell traps. For all other spells used (in triggers, for example), the caster level is assumed to be the minimum required.

CR 1 Traps

Basic Arrow Trap: CR 1; mechanical; proximity trigger; manual reset; Atk +10 ranged (1d6/x3, arrow); Search DC 20; Disable Device DC 20. *Market Price:* 2,000 gp.

Camouflaged Pit Trap: CR 1; mechanical; location trigger; manual reset; DC 20 Reflex save avoids; 10 ft. deep (1d6, fall); Search DC 24; Disable Device DC 20. *Market Price:* 1,800 gp.

Deeper Pit Trap: CR 1; mechanical; location trigger; manual reset; hidden switch bypass (Search DC 25); DC 15 Reflex save avoids; 20 ft. deep (2d6, fall); multiple targets (first target in each of two adjacent 5-ft. squares); Search DC 20; Disable Device DC 23. *Market Price:* 1,300 gp.

Fusillade of Darts: CR 1; mechanical; location trigger; manual reset; Atk +10 ranged (1d4+1, dart); multiple targets (fires 1d4 darts at each target in two adjacent 5-ft. squares); Search DC 14; Disable Device DC 20. *Market Price:* 500 gp.

Poison Dart Trap: CR 1; mechanical; location trigger; manual reset; Atk +8 ranged (1d4 plus poison, dart); poison (bloodroot, DC 12 Fortitude save resists, 0/1d4 Con plus 1d3 Wis); Search DC 20; Disable Device DC 18. *Market Price:* 700 gp.

Poison Needle Trap: CR 1; mechanical; touch trigger; manual reset; Atk +8 ranged (1 plus greenblood oil poison); Search DC 22; Disable Device DC 20. *Market Price:* 1,300 gp.

Portcullis Trap: CR 1; mechanical; location trigger; manual reset; Atk +10 melee (3d6); Search DC 20; Disable Device DC 20. *Note:* Damage applies only to those underneath the portcullis. Portcullis blocks passageway. *Market Price:* 1,400 gp.

Razor-Wire across Hallway: CR 1; mechanical; location trigger; no reset; Atk +10 melee (2d6, wire); multiple targets (first target in each of two adjacent 5-ft. squares); Search DC 22; Disable Device DC 15. *Market Price:* 400 gp.

Rolling Rock Trap: CR 1; mechanical; location trigger; manual reset; Atk +10 melee (2d6, rock); Search DC 20; Disable Device DC 22. *Market Price:* 1,400 gp.

Scything Blade Trap: CR 1; mechanical; location trigger; automatic reset; Atk +8 melee (1d8/x3); Search DC 21; Disable Device DC 20. *Market Price:* 1,700 gp.

Spear Trap: CR 1; mechanical; location trigger; manual reset; Atk +12 ranged (1d8/x3, spear); Search DC 20; Disable Device DC 20. *Note:* 200-ft. max range, target determined randomly from those in its path. *Market Price:* 1,200 gp.

Swinging Block Trap: CR 1; mechanical; touch trigger; manual reset; Atk +5 melee (4d6, stone block); Search DC 20; Disable Device DC 20. *Market Price:* 500 gp.

Wall Blade Trap: CR 1; mechanical; touch trigger; automatic reset; hidden switch bypass (Search DC 25); Atk +10 melee (2d4/x4, scythe); Search DC 22; Disable Device DC 22. *Market Price:* 2,500 gp.

CR 2 Traps

Box of Brown Mold: CR 2; mechanical; touch trigger (opening the box); automatic reset; 5-ft. cold aura (3d6, cold nonlethal); Search DC 22; Disable Device DC 16. *Market Price:* 3,000 gp.

Bricks from Ceiling: CR 2; mechanical; touch trigger; repair reset; Atk +12 melee (2d6, bricks); multiple targets (all targets in two adjacent 5-ft. squares); Search DC 20; Disable Device DC 20. *Market Price:* 2,400 gp.

Burning Hands Trap: CR 2; magic device; proximity trigger (*alarm*); automatic reset; spell effect (*burning hands*, 1st-level wizard, 1d4 fire, DC 11 Reflex save half damage); Search DC 26; Disable Device DC 26. *Cost:* 500 gp, 40 XP.

Camouflaged Pit Trap: CR 2; mechanical; location trigger; manual reset; DC 20 Reflex save avoids; 20 ft. deep (2d6, fall); multiple targets (first target in each of two adjacent 5-ft. squares); Search DC 24; Disable Device DC 19. *Market Price:* 3,400 gp.

Inflict Light Wounds Trap: CR 2; magic device; touch trigger; automatic reset; spell effect (*inflict light wounds*, 1st-level cleric, 1d8+1, DC 11 Will save half damage); Search DC 26; Disable Device DC 26. *Cost:* 500 gp, 40 XP.

Javelin Trap: CR 2; mechanical; location trigger; manual reset; Atk +16 ranged (1d6+4, javelin); Search DC 20; Disable Device DC 18. *Market Price:* 4,800 gp.

Large Net Trap: CR 2; mechanical; location trigger; manual reset; Atk +5 melee (see note); Search DC 20; Disable Device DC 25. *Note:* Characters in 10-ft. square are grappled by net (Str 18) if they fail a DC 14 Reflex save. *Market Price:* 3,000 gp.

Pit Trap: CR 2; mechanical, location trigger; manual reset; DC 20 Reflex save avoids; 40 ft. deep (4d6, fall); Search DC 20; Disable Device DC 20. *Market Price:* 2,000 gp.

Poison Needle Trap: CR 2; mechanical; touch trigger; repair reset; lock bypass (Open Lock DC 30); Atk +17 melee (1 plus poison, needle); poison (blue whinnis, DC 14 Fortitude save resists (poison only), 1 Con/unconsciousness); Search DC 22; Disable Device DC 17. *Market Price:* 4,720 gp.

Spiked Pit Trap: CR 2; mechanical; location trigger; automatic reset; DC 20 Reflex save avoids; 20 ft. deep (2d6, fall); multiple targets (first target in each of two adjacent 5-ft. squares); pit spikes (Atk +10 melee, 1d4 spikes per target for 1d4+2 each); Search DC 18; Disable Device DC 15. *Market Price:* 1,600 gp.

Tripping Chain: CR 2; mechanical; location trigger; automatic reset; multiple traps (tripping and melee attack); Atk +15 melee touch (trip), Atk +15 melee (2d4+2, spiked chain); Search DC 15; Disable Device DC 18. *Market Price:* 3,800 gp.

Note: This trap is really one CR 1 trap that trips and a second CR 1 trap that attacks with a spiked chain. If the tripping attack succeeds, a +4 bonus applies to the spiked chain attack because the opponent is prone.

Well-Camouflaged Pit Trap: CR 2; mechanical; location trigger; repair reset; DC 20 Reflex save avoids; 10 ft. deep (1d6, fall); Search DC 27; Disable Device DC 20. *Market Price:* 4,400 gp.

CR 3 Traps

Burning Hands Trap: CR 3; magic device; proximity trigger (*alarm*); automatic reset; spell effect (*burning hands*, 5th-level wizard, 5d4 fire, DC 11 Reflex save half damage); Search DC 26; Disable Device DC 26. *Cost:* 2,500 gp, 200 XP.

Camouflaged Pit Trap: CR 3; mechanical; location trigger; manual reset; DC 20 Reflex save avoids; 30 ft. deep (3d6, fall); multiple targets (first target in each of two adjacent squares); Search DC 24; Disable Device DC 18. *Market Price:* 4,800 gp.

Ceiling Pendulum: CR 3; mechanical; timed trigger; automatic reset; Atk +15 melee (1d12+8/x3, greataxe); Search DC 15; Disable Device DC 27. *Market Price:* 14,100 gp.

Fire Trap: CR 3; spell; spell trigger; no reset; spell effect (*fire trap*, 3rd-level druid, 1d4+3 fire, DC 13 Reflex save half damage); Search DC 27; Disable Device DC 27. *Cost:* 85 gp to hire NPC spellcaster.

Extended Bane Trap: CR 3; magic device; proximity trigger (*detect good*); automatic reset; spell effect (extended *bane*, 3rd-level cleric, DC 13 Will save negates); Search DC 27; Disable Device DC 27. *Cost:* 3,500 gp, 280 XP.

Ghoul Touch Trap: CR 3; magic device; touch trigger; automatic reset; spell effect (*ghoul touch*, 3rd-level wizard, DC 13 Fortitude save negates); Search DC 27; Disable Device DC 27. *Cost:* 3,000 gp, 240 XP.

Hail of Needles: CR 3; mechanical; location trigger; manual reset; Atk +20 ranged (2d4); Search DC 22; Disable Device DC 22. *Market Price:* 5,400 gp.

Acid Arrow Trap: CR 3; magic device; proximity trigger (*alarm*); automatic reset; Atk +2 ranged touch; spell effect (*acid arrow*, 3rd-level wizard, 2d4 acid/round for 2 rounds); Search DC 27; Disable Device DC 27. *Cost:* 3,000 gp, 240 XP.

Pit Trap: CR 3; mechanical, location trigger; manual reset; DC 20 Reflex save avoids; 60 ft. deep (6d6, fall); Search DC 20; Disable Device DC 20. *Market Price:* 3,000 gp.

Poisoned Arrow Trap: CR 3; mechanical; touch trigger; manual reset; lock bypass (Open Lock DC 30); Atk +12 ranged (1d8 plus poison, arrow); poison (Large monstrous scorpion venom, DC 14 Fortitude save resists, 1d4 Con/1d4 Con); Search DC 19; Disable Device DC 15. *Market Price:* 2,900 gp.

Spiked Pit Trap: CR 3; mechanical; location trigger; manual reset; DC 20 Reflex save avoids; 20 ft. deep (2d6, fall); multiple targets (first target in each of two adjacent 5-ft. squares); pit spikes (Atk +10 melee, 1d4 spikes per target for 1d4+2 each); Search DC 21; Disable Device DC 20. *Market Price:* 3,600 gp.

DESIGNING A TRAP

Mechanical Traps: Simply select the elements you want the trap to have and add up the adjustments to the trap's Challenge Rating that those elements require (see Table: CR Modifiers for Mechanical Traps) to arrive at the trap's final CR. From the CR you can derive the DC of the Craft (trapmaking) checks a character must make to construct the trap.

Magic Traps: As with mechanical traps, you don't have to do anything other than decide what elements you want and then determine the CR of the resulting trap (see Table: CR Modifiers for Magic Traps). If a player character wants to design and construct a magic trap, he must have the Craft Wondrous Item feat. In addition, he must be able to cast the spell or spells that the trap requires—or, failing that, he must be able to hire an NPC to cast the spells for him.

Challenge Rating of a Trap

To calculate the Challenge Rating of a trap, add all the CR modifiers (see the tables below) to the base CR for the trap type.

Mechanical Trap: The base CR for a mechanical trap is 0. If your final CR is 0 or lower, add features until you get a CR of 1 or higher.

Magic Trap: For a spell trap or magic device trap, the base CR is 1. The highest-level spell used modifies the CR (see Table: CR Modifiers for Magic Traps).

Average Damage: If a trap (either mechanical or magic) does hit point damage, calculate the average damage for a successful hit and round that value to the nearest multiple of 7. Use this value to adjust the Challenge Rating of the trap, as indicated on the tables below. Damage from poisons and pit spikes does not count toward this value, but damage from a high strength rating and extra damage from multiple attacks does.

For a magic trap, only one modifier applies to the CR—either the level of the highest-level spell used in the trap, or the average damage figure, whichever is larger.

Multiple Traps: If a trap is really two or more connected traps that affect approximately the same area, determine the CR of each one separately.

Multiple Dependent Traps: If one trap depends on the success of the other (that is, you can avoid the second trap altogether by not falling victim to the first), they must be treated as separate traps.

Multiple Independent Traps: If two or more traps act independently (that is, none depends on the success of another to activate), use their CRs to determine their combined Encounter Level as though they were monsters. The resulting Encounter Level is the CR for the combined traps.

Mechanical Trap Cost

The base cost of a mechanical trap is 1,000 gp. Apply all the modifiers from Table: Cost Modifiers for Mechanical Traps for the various features you've added to the trap to get the modified base cost.

The final cost is equal to (modified base cost x Challenge Rating) + extra costs. The minimum cost for a mechanical trap is (CR x 100) gp.

After you've multiplied the modified base cost by the Challenge Rating, add the price of any alchemical items or poison you incorporated into the trap. If the trap uses one of these elements and has an automatic reset, multiply the poison or alchemical item cost by 20 to provide an adequate supply of doses.

Multiple Traps: If a trap is really two or more connected traps, determine the final cost of each separately, then add those values together. This holds for both multiple dependent and multiple independent traps (see the previous section).

Magic Device Trap Cost

Building a magic device trap involves the expenditure of experience points as well as gold pieces, and requires the services of a spellcaster. Table: Cost Modifiers for Magic Device Traps summarizes the cost information for magic device traps. If the trap uses more than one spell (for instance, a sound or visual trigger spell in addition to the main spell effect), the builder must pay for them all (except *alarm*, which is free unless it must be cast by an NPC; see below).

The costs derived from Table: Cost Modifiers for Magic Device Traps assume that the builder is casting the necessary spells himself (or perhaps some other PC is providing the spells for free). If an NPC spellcaster must be hired to cast them those costs must be factored in as well.

A magic device trap takes one day to construct per 500 gp of its cost.

Table: Cost Modifiers for Magic Device Traps

Feature	Cost Modifier
Alarm spell used in trigger	—
<i>One-Shot Trap</i>	
Each spell used in trap	+50 gp x caster level x spell level, +4 XP x caster level x spell level
Material components	+ Cost of all material components
XP components	+ Total of XP components x 5 gp
<i>Automatic Reset Trap</i>	

Each spell used in trap	+500 gp x caster level x spell level, +40 XP x caster level x spell level
Material components	+ Cost of all material components x 100 gp
XP components	+ Total of XP components x 500 gp

Spell Trap Cost

A spell trap has a cost only if the builder must hire an NPC spellcaster to cast it.

Craft DCs for Mechanical Traps

Once you know the Challenge Rating of a trap determine the Craft (trapmaking) DC by referring to the table and the modifiers given below.

Trap CR Base Craft

(Trapmaking) DC

1–3	20
4–6	25
7–10	30

Additional Components Modifier to Craft (Trapmaking) DC

Proximity trigger	+5
Automatic reset	+5

Making the Checks: To determine how much progress a character makes on building a trap each week, that character makes a Craft (trapmaking) check. See the Craft skill description for details on Craft checks and the circumstances that can affect them.

PLANES

WHAT IS A PLANE?

The planes of existence are different realities with interwoven connections. Except for rare linking points, each plane is effectively its own universe with its own natural laws.

The planes break down into a number of general types: the Material Plane, the Transitive Planes, the Inner Planes, the Outer Planes, and the demiplanes.

Material Plane: The Material Plane tends to be the most Earthlike of all planes and operates under the same set of natural laws that our own real world does. This is the default plane for most adventures.

Transitive Planes: These three planes have one important common characteristic: Each is used to get from one place to another. The Astral Plane is a conduit to all other planes, while the Ethereal Plane and the Plane of Shadow both serve as means of transportation within the Material Plane they're connected to. These planes have the strongest regular interaction with the Material Plane and are often accessed by using various spells. They have native inhabitants as well.

Inner Planes: These six planes are manifestations of the basic building blocks of the universe. Each is made up of a single type of energy or element that overwhelms all others. The natives of a particular Inner Plane are made of the same energy or element as the plane itself.

Outer Planes: The deities live on the Outer Planes, as do creatures such as celestials, demons, and devils. Each of the Outer Planes has an alignment, representing a particular moral or ethical outlook, and the natives of each plane tend to behave in agreement with that plane's alignment. The Outer Planes are also the final resting place of souls from the Material Plane, whether that final rest takes the form of calm introspection or eternal damnation.

Demiplanes: This catch-all category covers all extradimensional spaces that function like planes but have measurable size and limited access. Other kinds of planes are theoretically infinite in size, but a demiplane might be only a few hundred feet across.

PLANAR TRAITS

Each plane of existence has its own properties—the natural laws of its universe.

Planar traits are broken down into a number of general areas.

All planes have the following kinds of traits.

Physical Traits: These traits determine the laws of physics and nature on the plane, including how gravity and time function.

Elemental and Energy Traits: These traits determine the dominance of particular elemental or energy forces.

Alignment Traits: Just as characters may be lawful neutral or chaotic good, many planes are tied to a particular moral or ethical outlook.

Magic Traits: Magic works differently from plane to plane, and magic traits set the boundaries for what it can and can't do.

Physical Traits

The two most important natural laws set by physical traits are how gravity works and how time passes. Other physical traits pertain to the size and shape of a plane and how easily a plane's nature can be altered.

Gravity: The direction of gravity's pull may be unusual, and it might even change directions within the plane itself.

Normal Gravity: Most planes have gravity similar to that of the Material Plane. The usual rules for ability scores, carrying capacity, and encumbrance apply. Unless otherwise noted in a description, it is assumed every plane has the normal gravity trait.

Heavy Gravity: The gravity on a plane with this trait is much more intense than on the Material Plane. As a result, Balance, Climb, Jump, Ride, Swim, and Tumble checks incur a -2 circumstance penalty, as do all attack rolls. All item weights are effectively doubled, which might affect a character's speed. Weapon ranges are halved. A character's Strength and Dexterity scores are not affected. Characters who fall on a heavy gravity plane take 1d10 points of damage for each 10 feet fallen, to a maximum of 20d10 points of damage.

Light Gravity: The gravity on a plane with this trait is less intense than on the Material Plane. As a result, creatures find that they can lift more, but their movements tend to be ungainly. Characters on a plane with the light gravity trait take a -2 circumstance penalty on attack rolls and Balance, Ride, Swim, and Tumble checks. All items weigh half as much. Weapon ranges double, and characters gain a +2 circumstance bonus on Climb and Jump checks.

Strength and Dexterity don't change as a result of light gravity, but what you can do with such scores does change. These advantages apply to travelers from other planes as well as natives.

Falling characters on a light gravity plane take 1d4 points of damage for each 10 feet of the fall (maximum 20d4).

No Gravity: Individuals on a plane with this trait merely float in space, unless other resources are available to provide a direction for gravity's pull.

Objective Directional Gravity: The strength of gravity on a plane with this trait is the same as on the Material Plane, but the direction is not the traditional "down" toward the ground. It may be down toward any solid object, at an angle to the surface of the plane itself, or even upward.

In addition, objective directional gravity may change from place to place. The direction of "down" may vary.

Subjective Directional Gravity: The strength of gravity on a plane with this trait is the same as on the Material Plane, but each individual chooses the direction of gravity's pull. Such a plane has no gravity for unattended objects and nonsentient creatures. This sort of environment can be very disorienting to the newcomer, but is common on "weightless" planes.

Characters on a plane with subjective directional gravity can move normally along a solid surface by imagining "down" near their feet. If suspended in midair, a character "flies" by merely choosing a "down" direction and "falling" that way. Under such a procedure, an individual "falls" 150 feet in the first round and 300 feet in each succeeding round. Movement is straight-line only. In order to stop, one has to slow one's movement by changing the designated "down" direction (again, moving 150 feet in the new direction in the first round and 300 feet per round thereafter).

It takes a DC 16 Wisdom check to set a new direction of gravity as a free action; this check can be made once per round. Any character who fails this Wisdom check in successive rounds receives a +6 bonus on subsequent checks until he or she succeeds.

Time: The rate of time's passage can vary on different planes, though it remains constant within any particular plane. Time is always subjective for the viewer. The same subjectivity applies to various planes. Travelers may discover that they'll pick up or lose time while moving among the planes, but from their point of view, time always passes naturally.

Normal Time: This trait describes the way time passes on the Material Plane. One hour on a plane with normal time equals one hour on the Material Plane. Unless otherwise noted in a description, every plane has the normal time trait.

Timeless: On planes with this trait, time still passes, but the effects of time are diminished. How the timeless trait can affect certain activities or conditions such as hunger, thirst, aging, the effects of poison, and healing varies from plane to plane. The danger of a timeless plane is that once one leaves such a plane for one where time flows normally, conditions such as hunger and aging do occur retroactively.

Flowing Time: On some planes, time can flow faster or slower. One may travel to another plane, spend a year there, then return to the Material Plane to find that only six seconds have elapsed. Everything on the plane returned to is only a few seconds older. But for that traveler and the items, spells, and effects working on him, that year away was entirely real.

When designating how time works on planes with flowing time, put the Material Plane's flow of time first, followed by the same flow in the other plane.

Erratic Time: Some planes have time that slows down and speeds up, so an individual may lose or gain time as he moves between the two planes. The following is provided as an example.

d%	Time on Material Plane	Time on Erratic Time Plane
01–10	1 day	1 round
11–40	1 day	1 hour
41–60	1 day	1 day
61–90	1 hour	1 day
91–	1 round	1 day
100		

To the denizens of such a plane, time flows naturally and the shift is unnoticed.

If a plane is timeless with respect to magic, any spell cast with a noninstantaneous duration is permanent until dispelled.

Shape and Size: Planes come in a variety of sizes and shapes. Most planes are infinite, or at least so large that they may as well be infinite.

Infinite: Planes with this trait go on forever, though they may have finite components within them. Or they may consist of ongoing expanses in two directions, like a map that stretches out infinitely.

Finite Shape: A plane with this trait has defined edges or borders. These borders may adjoin other planes or hard, finite borders such as the edge of the world or a great wall. Demiplanes are often finite.

Self-Contained Shape: On planes with this trait, the borders wrap in on themselves, depositing the traveler on the other side of the map. A spherical plane is an example of a self-contained, finite plane, but there can be cubes, toruses, and flat planes with magical edges that teleport the traveler to an opposite edge when he crosses them.

Some demiplanes are self-contained.

Morphic Traits: This trait measures how easily the basic nature of a plane can be changed. Some planes are responsive to sentient thought, while others can be manipulated only by extremely powerful creatures. And some planes respond to physical or magical efforts.

Alterable Morphic: On a plane with this trait, objects remain where they are (and what they are) unless affected by physical force or magic. You can change the immediate environment as a result of tangible effort.

Highly Morphic: On a plane with this trait, features of the plane change so frequently that it's difficult to keep a particular area stable. Such planes may react dramatically to specific spells, sentient thought, or the force of will. Others change for no reason.

Magically Morphic: Specific spells can alter the basic material of a plane with this trait.

Divinely Morphic: Specific unique beings (deities or similar great powers) have the ability to alter objects, creatures, and the landscape on planes with this trait. Ordinary characters find these planes similar to alterable planes in that they may be affected by spells and physical effort. But the deities may cause these areas to change instantly and dramatically, creating great kingdoms for themselves.

Static: These planes are unchanging. Visitors cannot affect living residents of the plane, nor objects that the denizens possess. Any spells that would affect those on the plane have no effect unless the plane's static trait is somehow removed or suppressed. Spells cast before entering a plane with the static trait remain in effect, however.

Even moving an unattended object within a static plane requires a DC 16 Strength check. Particularly heavy objects may be impossible to move.

Sentient: These planes are ones that respond to a single thought—that of the plane itself. Travelers would find the plane's landscape changing as a result of what the plane thought of the travelers, either becoming more or less hospitable depending on its reaction.

Elemental and Energy Traits

Four basic elements and two types of energy together make up everything. The elements are earth, air, fire, and water. The types of energy are positive and negative.

The Material Plane reflects a balancing of those elements and energies; all are found there. Each of the Inner Planes is dominated by one element or type of energy. Other planes may show off various aspects of these elemental traits. Many planes have no elemental or energy traits; these traits are noted in a plane's description only when they are present.

Air-Dominant: Mostly open space, planes with this trait have just a few bits of floating stone or other elements. They usually have a breathable atmosphere, though such a plane may include clouds of acidic or toxic gas. Creatures of the earth subtype are uncomfortable on air-dominant planes because they have little or no natural earth to connect with. They take no actual damage, however.

Earth-Dominant: Planes with this trait are mostly solid. Travelers who arrive run the risk of suffocation if they don't reach a cavern or other pocket within the earth. Worse yet, individuals without the ability to burrow are entombed in the earth and must dig their way out (5 feet per turn). Creatures of the air subtype are uncomfortable on earth dominant planes because these planes are tight and claustrophobic to them. But they suffer no inconvenience beyond having difficulty moving.

Fire-Dominant: Planes with this trait are composed of flames that continually burn without consuming their fuel source. Fire-dominant planes are extremely hostile to Material Plane creatures, and those without resistance or immunity to fire are soon immolated.

Unprotected wood, paper, cloth, and other flammable materials catch fire almost immediately, and those wearing unprotected flammable clothing catch on fire. In addition, individuals take 3d10 points of fire damage every round they are on a fire-dominant plane. Creatures of the water subtype are extremely uncomfortable on fire-dominant planes. Those that are made of water take double damage each round.

Water-Dominant: Planes with this trait are mostly liquid. Visitors who can't breathe water or reach a pocket of air will likely drown. Creatures of the fire subtype are extremely uncomfortable on water-dominant planes. Those made of fire take 1d10 points of damage each round.

Positive-Dominant: An abundance of life characterizes planes with this trait. The two kinds of positive-dominant traits are minor positive-dominant and major positive-dominant. A minor positive-dominant plane is a riotous explosion of life in all its forms. Colors are brighter, fires are hotter, noises are louder, and sensations are more intense as a result of the positive energy swirling through the plane. All individuals in a positive-dominant plane gain fast healing 2 as an extraordinary ability.

Major positive-dominant planes go even further. A creature on a major positive-dominant plane must make a DC 15 Fortitude save to avoid being blinded for 10 rounds by the brilliance of the surroundings. Simply being on the plane grants fast healing 5 as an extraordinary ability. In addition, those at full hit points gain 5 additional temporary hit points per round. These temporary hit points fade 1d20 rounds after the creature leaves the major positive-dominant plane. However, a creature must make a DC 20 Fortitude save each round that its temporary hit points exceed its normal hit point total. Failing the saving throw results in the creature exploding in a riot of energy, killing it.

Negative-Dominant: Planes with this trait are vast, empty reaches that suck the life out of travelers who cross them. They tend to be lonely, haunted planes, drained of color and filled with winds bearing the soft moans of those who died within them. As with positive-dominant planes, negative-dominant planes can be either minor or major. On minor negative-dominant planes, living creatures take 1d6 points of damage per round. At 0 hit points or lower, they crumble into ash.

Major negative-dominant planes are even more severe. Each round, those within must make a DC 25 Fortitude save or gain a negative level. A creature whose negative levels equal its current levels or Hit Dice is slain, becoming a wraith. The *death ward* spell protects a traveler from the damage and energy drain of a negative-dominant plane.

Alignment Traits

Some planes have a predisposition to a certain alignment. Most of the inhabitants of these planes also have the plane's particular alignment, even powerful creatures such as deities. In addition, creatures of alignments contrary to the plane have a tougher time dealing with its natives and situations.

The alignment trait of a plane affects social interactions there. Characters who follow other alignments than most of the inhabitants do may find life more difficult.

Alignment traits have multiple components. First are the moral (good or evil) and ethical (lawful or chaotic) components; a plane can have either a moral component, an ethical component, or one of each. Second, the specific alignment trait indicates whether each moral or ethical component is mildly or strongly evident.

Good-Aligned/Evil-Aligned: These planes have chosen a side in the battle of good versus evil. No plane can be both good-aligned and evil-aligned.

Law-Aligned/Chaos-Aligned: Law versus chaos is the key struggle for these planes and their residents. No plane can be both law-aligned and chaos-aligned.

Each part of the moral/ethical alignment trait has a descriptor, either "mildly" or "strongly," to show how powerful the influence of alignment is on the plane.

Mildly Aligned: Creatures who have an alignment opposite that of a mildly aligned plane take a -2 circumstance penalty on all Charisma-based checks.

Strongly Aligned: On planes that are strongly aligned, a -2 circumstance penalty applies on all Charisma-based checks made by all creatures not of the plane's alignment. In addition, the -2 penalty affects all Intelligence-based and Wisdom-based checks, too.

The penalties for the moral and ethical components of the alignment trait do stack.

Neutral-Aligned: A mildly neutral-aligned plane does not apply a circumstance penalty to anyone.

The Material Plane is considered mildly neutral-aligned, though it may contain high concentrations of evil or good, law or chaos in places.

A strongly neutral-aligned plane would stand in opposition to all other moral and ethical principles: good, evil, law, and chaos. Such a plane may be more concerned with the balance of the alignments than with accommodating and accepting alternate points of view. In the same fashion as for other strongly aligned planes, strongly neutral-aligned planes apply a -2 circumstance penalty to Intelligence-, Wisdom-, or Charisma-based checks by any creature that isn't neutral. The penalty is applied twice (once for law/chaos, and once for good/evil), so neutral good, neutral evil, lawful neutral, and chaotic neutral creatures take a -2 penalty and lawful good, chaotic good, chaotic evil, and lawful evil creatures take a -4 penalty.

Magic Traits

A plane's magic trait describes how magic works on the plane compared to how it works on the Material Plane. Particular locations on a plane (such as those under the direct control of deities) may be pockets where a different magic trait applies.

Normal Magic: This magic trait means that all spells and supernatural abilities function as written. Unless otherwise noted in a description, every plane has the normal magic trait.

Wild Magic: On a plane with the wild magic trait spells and spell-like abilities function in radically different and sometimes dangerous ways. Any spell or spell-like ability used on a wild magic plane has a chance to go awry. The caster must make a level check (DC 15 + the level of the spell or effect) for the magic to function normally. For spell-like abilities, use the level or HD of the creature employing the ability for the caster level check and the level of the spell-like ability to set the DC for the caster level check. Failure on this check means that something strange happens; roll d% and consult the following table.

d%	Effect
01–19	Spell rebounds on caster with normal effect. If the spell cannot affect the caster, it simply fails.
20–23	A circular pit 15 feet wide opens under the caster's feet; it is 10 feet deep per level of the caster.
24–27	The spell fails, but the target or targets of the spell are pelted with a rain of small objects (anything from flowers to rotten fruit), which disappear upon striking. The barrage continues for 1 round. During this time the targets are blinded and must make Concentration checks (DC 15 + spell level) to cast spells.
28–31	The spell affects a random target or area. Randomly choose a different target from among those in range of the spell or center the spell at a random place within range of the spell. To generate direction randomly, roll 1d8 and count clockwise around the compass, starting with south. To generate range randomly, roll 3d6. Multiply the result by 5 feet for close range spells, 20 feet for medium range spells, or 80 feet for long range spells.

32–35	The spell functions normally, but any material components are not consumed. The spell is not expended from the caster's mind (a spell slot or prepared spell can be used again). An item does not lose charges, and the effect does not count against an item's or spell-like ability's use limit.
36–39	The spell does not function. Instead, everyone (friend or foe) within 30 feet of the caster receives the effect of a <i>heal</i> spell.
40–43	The spell does not function. Instead, a <i>deeper darkness</i> and a <i>silence</i> effect cover a 30-foot radius around the caster for 2d4 rounds.
44–47	The spell does not function. Instead, a <i>reverse gravity</i> effect covers a 30-foot radius around the caster for 1 round.
48–51	The spell functions, but shimmering colors swirl around the caster for 1d4 rounds. Treat this a <i>glitterdust</i> effect with a save DC of $10 + \text{the level of the spell}$ that generated this result.
52–59	Nothing happens. The spell does not function. Any material components are used up. The spell or spell slot is used up, and charges or uses from an item are used up.
60–71	Nothing happens. The spell does not function. Any material components are not consumed. The spell is not expended from the caster's mind (a spell slot or prepared spell can be used again). An item does not lose charges, and the effect does not count against an item's or spell-like ability's use limit.
72–98	The spell functions normally.
99–100	The spell functions strongly. Saving throws against the spell incur a –2 penalty. The spell has the maximum possible effect, as if it were cast with the Maximize Spell feat. If the spell is already maximized with the feat, there is no further effect.

Impeded Magic: Particular spells and spell-like abilities are more difficult to cast on planes with this trait, often because the nature of the plane interferes with the spell.

To cast an impeded spell, the caster must make a Spellcraft check ($DC 20 + \text{the level of the spell}$). If the check fails, the spell does not function but is still lost as a prepared spell or spell slot. If the check succeeds, the spell functions normally.

Enhanced Magic: Particular spells and spell-like abilities are easier to use or more powerful in effect on planes with this trait than they are on the Material Plane.

Natives of a plane with the enhanced magic trait are aware of which spells and spell-like abilities are enhanced, but planar travelers may have to discover this on their own.

If a spell is enhanced, certain metamagic feats can be applied to it without changing the spell slot required or the casting time. Spellcasters on the plane are considered to have that feat or feats for the purpose of applying them to that spell. Spellcasters native to the plane must gain the feat or feats normally if they want to use them on other planes as well.

Limited Magic: Planes with this trait permit only the use of spells and spell-like abilities that meet particular qualifications. Magic can be limited to effects from certain schools or subschools, to effects with certain descriptors, or to effects of a certain level (or any combination of these qualities). Spells and spell-like abilities that don't meet the qualifications simply don't work.

Dead Magic: These planes have no magic at all. A plane with the dead magic trait functions in all respects like an *antimagic field* spell. Divination spells cannot detect subjects within a dead magic plane, nor can a spellcaster use *teleport* or another spell to move in or out. The only exception to the “no magic” rule is permanent planar portals, which still function normally.

HOW PLANES INTERACT

Separate Planes: Two planes that are separate do not overlap or directly connect to each other. They are like planets in different orbits. The only way to get from one separate plane to the other is to go through a third plane.

Coterminous Planes: Planes that touch at specific points are coterminous. Where they touch, a connection exists, and travelers can leave one reality behind and enter the other.

Coexistent Planes: If a link between two planes can be created at any point, the two planes are coexistent. These planes overlap each other completely. A coexistent plane can be reached from anywhere on the plane it overlaps. When moving on a coexistent plane, it is often possible to see into or interact with the plane it coexists with.

Layered Planes

Infinities may be broken into smaller infinities, and planes into smaller, related planes. These layers are effectively separate planes of existence, and each layer can have its own planar traits. Layers are connected to each other through a variety of planar gates, natural vortices, paths, and shifting borders.

Access to a layered plane from elsewhere usually happens on a specific layer: the first layer of the plane, which can be either the top layer or the bottom layer, depending on the specific plane. Most fixed access points (such as portals and natural vortices) reach this layer, which makes it the gateway for other layers of the plane. The *plane shift* spell also deposits the spellcaster on the first layer of the plane.

PLANE DESCRIPTIONS

THE MATERIAL PLANE

The Material Plane is the center of most cosmologies and defines what is considered normal.

The Material Plane has the following traits:

- Normal gravity.
- Normal Time
- Alterable morphic.
- No Elemental or Energy Traits (specific locations may have these traits, however)
- Mildly neutral-aligned.
- Normal magic.

THE ETHEREAL PLANE

The Ethereal Plane is coexistent with the Material Plane and often other planes as well. The Material Plane itself is visible from the Ethereal Plane, but it appears muted and indistinct, its colors blurring into each other and its edges turning fuzzy. While it is possible to see into the Material Plane from the Ethereal Plane, the Ethereal Plane is usually invisible to those on the Material Plane. Normally, creatures on the Ethereal Plane cannot attack creatures on the Material Plane, and vice versa. A traveler on the Ethereal Plane is invisible, incorporeal, and utterly silent to someone on the Material Plane.

The Ethereal Plane is mostly empty of structures and impediments. However, the plane has its own inhabitants. Some of these are other ethereal travelers, but the ghosts found here pose a particular peril to those who walk the fog.

It has the following traits.

- No gravity.
- Alterable morphic. The plane contains little to alter, however.
- Mildly neutral-aligned.
- Normal magic. Spells function normally on the Ethereal Plane, though they do not cross into the Material Plane. The only exceptions are spells and spell-like abilities that have the force descriptor and abjuration spells that affect ethereal beings. Spellcasters on the Material Plane must have some way to detect foes on the Ethereal Plane before targeting them with force-based spells, of course. While it's possible to hit ethereal enemies with a force spell cast on the Material Plane, the reverse isn't possible. No magical attacks cross from the Ethereal Plane to the Material Plane, including force attacks.

PLANE OF SHADOW

The Plane of Shadow is a dimly lit dimension that is both coterminous to and coexistent with the Material Plane. It overlaps the Material Plane much as the Ethereal Plane does, so a planar traveler can use the Plane of Shadow to cover great distances quickly.

The Plane of Shadow is also coterminous to other planes. With the right spell, a character can use the Plane of Shadow to visit other realities.

The Plane of Shadow is a world of black and white; color itself has been bleached from the environment. It is otherwise appears similar to the Material Plane.

Despite the lack of light sources, various plants, animals, and humanoids call the Plane of Shadow home.

The Plane of Shadow is magically morphic, and parts continually flow onto other planes. As a result, creating a precise map of the plane is next to impossible, despite the presence of landmarks.

The Plane of Shadow has the following traits.

- Magically morphic. Certain spells modify the base material of the Plane of Shadow. The utility and power of these spells within the Plane of Shadow make them particularly useful for explorers and natives alike.
- Mildly neutral-aligned.
- Enhanced magic. Spells with the shadow descriptor are enhanced on the Plane of Shadow. Such spells are cast as though they were prepared with the Maximize Spell feat, though they don't require the higher spell slots. Furthermore, specific spells become more powerful on the Plane of Shadow. *Shadow conjuration* and *shadow evocation* spells are 30% as powerful as the conjurations and evocations they mimic (as opposed to 20%). *Greater shadow conjuration* and *greater shadow evocation* are 70% as powerful (not 60%), and a *shades* spell conjures at 90% of the power of the original (not 80%).
- Impeded magic. Spells that use or generate light or fire may fizz when cast on the Plane of Shadow. A spellcaster attempting a spell with the light or fire descriptor must succeed on a Spellcraft check (DC 20 + the level of the spell). Spells that produce light are less effective in general, because all light sources have their ranges halved on the Plane of Shadow. Despite the dark nature of the Plane of Shadow, spells that produce, use, or manipulate darkness are unaffected by the plane.

THE ASTRAL PLANE

The Astral Plane is the space between the planes. When a character moves through an interplanar portal or projects her spirit to a different plane of existence, she travels through the Astral Plane. Even spells that allow instantaneous movement across a plane briefly touch the Astral Plane.

The Astral Plane is a great, endless sphere of clear silvery sky, both above and below. Occasional bits of solid matter can be found here, but most of the Astral Plane is an endless, open domain.

Both planar travelers and refugees from other planes call the Astral Plane home.

The Astral Plane has the following traits.

- Subjective directional gravity.
- Timeless. Age, hunger, thirst, poison, and natural healing don't function in the Astral Plane, though they resume functioning when the traveler leaves the Astral Plane.
- Mildly neutral-aligned.
- Enhanced magic. All spells and spell-like abilities used within the Astral Plane may be employed as if they were improved by the Quicken Spell feat. Already quickened spells and spell-like abilities are unaffected, as are spells from magic items. Spells so quickened are still prepared and cast at their unmodified level. As with the Quicken Spell feat, only one quickened spell can be cast per round.

ELEMENTAL PLANE OF AIR

The Elemental Plane of Air is an empty plane, consisting of sky above and sky below.

The Elemental Plane of Air is the most comfortable and survivable of the Inner Planes, and it is the home of all manner of airborne creatures. Indeed, flying creatures find themselves at a great advantage on this plane. While travelers without flight can survive easily here, they are at a disadvantage.

The Elemental Plane of Air has the following traits.

- Subjective directional gravity. Inhabitants of the plane determine their own "down" direction. Objects not under the motive force of others do not move.
- Air-dominant.
- Enhanced magic. Spells and spell-like abilities that use, manipulate, or create air (including spells of the Air domain) are both empowered and enlarged (as if the Empower Spell and Enlarge Spell metamagic feats had been used on them, but the spells don't require higher-level slots).
- Impeded magic. Spells and spell-like abilities that use or create earth (including spells of the Earth domain and spells that summon earth elementals or outsiders with the earth subtype) are impeded.

ELEMENTAL PLANE OF EARTH

The Elemental Plane of Earth is a solid place made of rock, soil, and stone. An unwary and unprepared traveler may find himself entombed within this vast solidity of material and have his life crushed into nothingness, his powdered remains a warning to any foolish enough to follow.

Despite its solid, unyielding nature, the Elemental Plane of Earth is varied in its consistency, ranging from relatively soft soil to veins of heavier and more valuable metal.

The Elemental Plane of Earth has the following traits.

- Earth-dominant.
- Enhanced magic. Spells and spell-like abilities that use, manipulate, or create earth or stone (including those of the Earth domain) are both empowered and extended (as if the Empower Spell and Extend Spell metamagic feats had been used on them, but the spells don't require higher-level slots). Spells and spell-like abilities that are already empowered or extended are unaffected by this benefit.
- Impeded magic. Spells and spell-like abilities that use or create air (including spells of the Air domain and spells that summon air elementals or outsiders with the air subtype) are impeded.

ELEMENTAL PLANE OF FIRE

Everything is alight on the Elemental Plane of Fire. The ground is nothing more than great, evershifting plates of compressed flame. The air ripples with the heat of continual firestorms, and the most common liquid is magma, not water. The oceans are made of liquid flame, and the mountains ooze with molten lava. Fire survives here without need for fuel or air, but flammables brought onto the plane are consumed readily.

The Elemental Plane of Fire has the following traits.

- Fire-dominant.
- Enhanced magic. Spells and spell-like abilities with the fire descriptor are both maximized and enlarged (as if the Maximize Spell and Enlarge Spell had been used on them, but the spells don't require higher-level slots). Spells and spell-like abilities that are already maximized or enlarged are unaffected by this benefit.

- Impeded magic. Spells and spell-like abilities that use or create water (including spells of the Water domain and spells that summon water elementals or outsiders with the water subtype) are impeded.

ELEMENTAL PLANE OF WATER

The Elemental Plane of Water is a sea without a floor or a surface, an entirely fluid environment lit by a diffuse glow. It is one of the more hospitable of the Inner Planes once a traveler gets past the problem of breathing the local medium.

The eternal oceans of this plane vary between ice cold and boiling hot, between saline and fresh. They are perpetually in motion, wracked by currents and tides. The plane's permanent settlements form around bits of flotsam and jetsam suspended within this endless liquid. These settlements drift on the tides of the Elemental Plane of Water.

The Elemental Plane of Water has the following traits.

- Subjective directional gravity. The gravity here works similar to that of the Elemental Plane of Air. But sinking or rising on the Elemental Plane of Water is slower (and less dangerous) than on the Elemental Plane of Air.
- Water-dominant.
- Enhanced magic. Spells and spell-like abilities that use or create water are both extended and enlarged (as if the Extend Spell and Enlarge Spell metamagic feats had been used on them, but the spells don't require higher-level slots). Spells and spell-like abilities that are already extended or enlarged are unaffected by this benefit.
- Impeded magic. Spells and spell-like abilities with the fire descriptor (including spells of the Fire domain) are impeded.

NEGATIVE ENERGY PLANE

To an observer, there's little to see on the Negative Energy Plane. It is a dark, empty place, an eternal pit where a traveler can fall until the plane itself steals away all light and life. The Negative Energy Plane is the most hostile of the Inner Planes, and the most uncaring and intolerant of life. Only creatures immune to its life-draining energies can survive there.

The Negative Energy Plane has the following traits.

- Subjective directional gravity.
- Major negative-dominant. Some areas within the plane have only the minor negative-dominant trait, and these islands tend to be inhabited.
- Enhanced magic. Spells and spell-like abilities that use negative energy are maximized (as if the Maximize Spell metamagic feat had been used on them, but the spells don't require higher-level slots). Spells and spell-like abilities that are already maximized are unaffected by this benefit. Class abilities that use negative energy, such as rebuking and controlling undead, gain a +10 bonus on the roll to determine Hit Dice affected.
- Impeded magic. Spells and spell-like abilities that use positive energy, including *cure* spells, are impeded. Characters on this plane take a -10 penalty on Fortitude saving throws made to remove negative levels bestowed by an energy drain attack.

Random Encounters: Because the Negative Energy Plane is virtually devoid of creatures, random encounters on the plane are exceedingly rare.

POSITIVE ENERGY PLANE

The Positive Energy Plane has no surface and is akin to the Elemental Plane of Air with its wide-open nature. However, every bit of this plane glows brightly with innate power. This power is dangerous to mortal forms, which are not made to handle it. Despite the beneficial effects of the plane, it is one of the most hostile of the Inner Planes. An unprotected character on this plane swells with power as positive energy is force-fed into her. Then, her mortal frame unable to contain that power, she immolates as if she were a small planet caught at the edge of a supernova. Visits to the Positive Energy Plane are brief, and even then travelers must be heavily protected.

The Positive Energy Plane has the following traits.

- Subjective directional gravity.
- Major positive-dominant. Some regions of the plane have the minor positive-dominant trait instead, and those islands tend to be inhabited.
- Enhanced magic. Spells and spell-like abilities that use positive energy, including *cure* spells, are maximized (as if the Maximize Spell metamagic feat had been used on them, but the spells don't require higher-level slots). Spells and spell-like abilities that are already maximized are unaffected by this benefit. Class abilities that use positive energy, such as turning and destroying undead, gain a +10 bonus on the roll to determine Hit Dice affected. (Undead are almost impossible to find on this plane, however.)
- Impeded magic. Spells and spell-like abilities that use negative energy (including *inflict* spells) are impeded.

Random Encounters: Because the Positive Energy Plane is virtually devoid of creatures, random encounters on the plane are exceedingly rare.

PSIONIC RACES

DROMITES

- +2 Charisma, -2 Strength, -2 Wisdom
- Monstrous Humanoid: Dromites are not subject to spells or effects that affect humanoids only, such as *charm person* or *dominate person*.
- Small: As a Small creature, a dromite gains a +1 size bonus to Armor Class, a +1 size bonus on attack rolls, and a +4 size bonus on Hide checks, but it uses smaller weapons than humans use, and its lifting and carrying limits are three-quarters of those of a Medium character.
- Dromite base land speed is 20 feet.
- Chitin: A dromite's skin is hardened, almost like an exoskeleton, and grants the character a +3 natural armor bonus to AC and one of the following kinds of resistance to energy: cold 5, electricity 5, fire 5, or sonic 5. The player chooses what type of energy resistance is gained when the character is created. (This choice also dictates which caste the dromite belongs to.) This natural energy resistance stacks with any future energy resistance gained through other effects.
- Naturally Psionic: Dromites gain 1 bonus power point at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.
- Psi-Like Ability: 1/day—*energy ray*. A dromite always deals the kind of energy damage that its chitin has resistance to (for example, a dromite who has resistance to cold 5 deals cold damage with its *energy ray*). Manifester level is equal to 1/2 Hit Dice (minimum 1st). The save DC is Charisma-based.
- Scent: Its antennae give a dromite the scent ability. A dromite can detect opponents by scent within 30 feet. If the opponent is upwind, the range increases to 60 feet; if downwind, it drops to 15 feet. Strong scents, such as smoke or rotting garbage, can be detected at twice the ranges noted above. Overpowering scents, such as skunk musk or troglodyte stench, can be detected at triple normal range. When a dromite detects a scent, the exact location of the source is not revealed—only its presence somewhere within range. The dromite can take a move action to note the direction of the scent. Whenever the dromite comes within 5 feet of the source, the dromite pinpoints the source's location.
- Blind-Fight: Its antennae also give a dromite Blind-Fight as a bonus feat.
- Compound Eyes: This feature of its anatomy gives a dromite a +2 racial bonus on Spot checks.
- Automatic Languages: Common. Bonus Languages: Dwarven, Gnome, Goblin, Terran.
- Favored Class: Wilder.
- Level Adjustment: +1.

DUERGAR

- +2 Constitution, -4 Charisma
- Medium: As Medium creatures, duergar have no special bonuses or penalties due to their size.
- Duergar base land speed is 20 feet. However, gray dwarves can move at this speed even when wearing medium or heavy armor or when carrying a medium or heavy load (unlike other creatures, whose speed is reduced in such situations).
- Darkvision out to 120 feet.
- Immunity to paralysis, phantasms, and poison.
- +2 racial bonus on saves against spells and spell-like effects.
- Stability: Duergar are exceptionally stable on their feet. A duergar receives a +4 bonus on ability checks made to resist being bull rushed or tripped when standing on the ground (but not when climbing, flying, riding or otherwise not standing firmly on the ground).
- Stonecunning: This ability grants a duergar a +2 racial bonus on Search checks to notice unusual stonework, such as sliding walls, stonework, traps, new construction (even when built to match the old), unsafe stone surfaces, shaky stone ceilings, and the like. Something that isn't stone but that is disguised as stone also counts as unusual stonework.
A gray dwarf who merely comes within 10 feet of unusual stonework can make a Search check as if he were actively searching, and a duergar can use the Search skill to find stonework traps as a rogue can. A duergar can also intuit depth, sensing his approximate depth underground as naturally as a human can sense which way is up. Duergar have a sixth sense about stonework, an innate ability that they get plenty of opportunity to practice and hone in their underground homes.
- Psi-Like Abilities: 1/day—*expansion*, *invisibility*. These abilities affect only the duergar and whatever he carries. Manifester level is equal to Hit Dice (minimum 3rd).
- Naturally Psionic: Duergar gain 3 bonus power points at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.

- +1 racial bonus on attack rolls against orcs (including half-orcs) and goblinoids (including goblins, hobgoblins, and bugbears).
- +4 dodge bonus to Armor Class against creatures of the giant type (such as ogres, trolls, and hill giants).
- Light Sensitivity (Ex): Duergar are dazzled in sunlight or within the radius of a *daylight* spell.
- Duergar have a +4 racial bonus on Move Silently checks and a +1 racial bonus on Listen and Spot checks. They have a +2 racial bonus on Appraise and Craft checks that are related to stone or metal.
- Automatic Languages: Common, Dwarven, Undercommon. Bonus Languages: Draconic, Giant, Goblin, Orc, Terran.
- Favored Class: Fighter.
- Level Adjustment: +1.

ELANS

- -2 Charisma
- Aberration: Elans are not subject to spells or effects that affect humanoids only, such as *charm person* or *dominate person*.
- Medium: As Medium creatures, elans have no special bonuses or penalties due to their size.
- Elan base land speed is 30 feet.
- Elans (unlike most aberrations) do not have darkvision.
- Naturally Psionic: Elans gain 2 bonus power points at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.
- Resistance (Su): Elans can use psionic energy to increase their resistance to various forms of attack. As an immediate action, an elan can spend 1 power point to gain a +4 racial bonus on saving throws until the beginning of her next action.
- Resilience (Su): When an elan takes damage, she can spend power points to reduce its severity. As an immediate action, she can reduce the damage she is about to take by 2 hit points for every 1 power point she spends.
- Repletion (Su): An elan can sustain her body without need of food or water. If she spends 1 power point, an elan does not need to eat or drink for 24 hours.
- Automatic Language: Common. Bonus Languages: Any (other than secret languages, such as Druidic). Elans' past lives expose them to wide ranges of language.
- Favored Class: Psion.
- Level Adjustment: +0.

HALF-GIANTS

- +2 Strength, +2 Constitution, -2 Dexterity: Half-giants are tough and strong, but not too nimble.
- Giant: Half-giants are not subject to spells or effects that affect humanoids only, such as *charm person* or *dominate person*.
- Medium: As Medium creatures, half-giants have no special bonuses or penalties due to their size.
- Half-giant base land speed is 30 feet.
- Low-Light Vision: A half-giant can see twice as far as a human in starlight, moonlight, torchlight, and similar conditions of poor illumination. He retains the ability to distinguish color and detail under these conditions.
- Fire Acclimated: Half-giants have a +2 racial bonus on saving throws against all fire spells and effects. Half-giants are accustomed to enduring high temperatures.
- Powerful Build: The physical stature of half-giants lets them function in many ways as if they were one size category larger. Whenever a half-giant is subject to a size modifier or special size modifier for an opposed check (such as during grapple checks, bull rush attempts, and trip attempts), the half-giant is treated as one size larger if doing so is advantageous to him. A half-giant is also considered to be one size larger when determining whether a creature's special attacks based on size (such as improved grab or swallow whole) can affect him. A half-giant can use weapons designed for a creature one size larger without penalty. However, his space and reach remain those of a creature of his actual size. The benefits of this racial trait stack with the effects of powers, abilities, and spells that change the subject's size category.
- Naturally Psionic: Half-giants gain 2 bonus power points at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.
- Psi-Like Ability: 1/day—*stomp*. Manifester level is equal to 1/2 Hit Dice (minimum 1st). The save DC is Charisma-based.
- Automatic Language: Common. Bonus Languages: Draconic, Giant, Gnoll, Ignan.
- Favored Class: Psychic warrior.
- Level Adjustment: +1.

MAENADS

- Medium: As Medium creatures, maenads have no special bonuses or penalties due to their size.

- Maenad base land speed is 30 feet.
- Naturally Psionic: Maenads gain 2 bonus power points at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.
- Psi-Like Ability: 1/day—*energy ray*. A maenad can deal only sonic damage with this ability. It is accompanied by a tremendous scream of rage. Manifester level is equal to 1/2 Hit Dice (minimum 1st). The save DC is Charisma-based.
- Outburst (Ex): Once per day, for up to 4 rounds, a maenad can subjugate her mentality to gain a boost of raw physical power. When she does so, she takes a -2 penalty to Intelligence and Wisdom but gains a +2 bonus to Strength.
- Automatic Languages: Common, Maenad. Bonus Languages: Aquan, Draconic, Dwarven, Elven, Goblin. Maenads commonly know the languages of their enemies and of their friends, as well as Draconic, the language commonly found in ancient tomes of secret knowledge.
- Favored Class: Wilder.
- Level Adjustment: +0

XEPHS

- +2 Dexterity, -2 Strength
- Medium: As Medium creatures, xeph have no special bonuses or penalties due to their size.
- Xeph base land speed is 30 feet.
- Darkvision out to 60 feet.
- +1 racial bonus on saving throws against powers, spells, and spell-like effects. Xeph have an innate resistance to psionics and magic.
- Naturally Psionic: Xeph gain 1 bonus power point at 1st level. This benefit does not grant them the ability to manifest powers unless they gain that ability through another source, such as levels in a psionic class.
- Burst (Su): Three times per day, a xeph can put on a burst of speed to increase her speed by 10 feet, plus 10 feet per four character levels beyond 1st, to a maximum increase of 30 feet at 9th character level and higher. These bursts of speed are considered a competence bonus to the xeph's base speed. A burst of speed lasts 3 rounds.
- Automatic Languages: Common, Xeph. Bonus Languages: Draconic, Elven, Gnoll, Goblin, Halfling, Sylvan.
- Favored Class: Soulknife.

PSIONIC CLASSES

THE POWER POINT RESERVE

Psionic characters fuel their abilities through a pool, or reserve, of power points. Your power point reserve is equal to your base power points gained from your class, bonus power points from a high key ability score (see Abilities and Manifesters, below), and any additional bonus power points from sources such as your character race and feat selections.

Multiclass Psionic Characters

If you have levels in more than one psionic class, you combine your power points from each class to make up your reserve. You can use these power points to manifest powers from any psionic class you have.

While you maintain a single reserve of power points from your class, race, and feat selections, you are still limited by the manifest level you have achieved with each power you know.

ABILITIES AND MANIFESTERS

The ability that your powers depend on—your key ability score as a manifest—*is related to what psionic class (or classes) you have levels in: Intelligence (psion), Wisdom (psychic warrior), and Charisma (wilder). The modifier for this ability is referred to as your key ability modifier. If your character's key ability score is 9 or lower, you can't manifest powers from that psionic class.*

Just as a high Intelligence score grants bonus spells to a wizard and a high Wisdom score grants bonus spells to a cleric, a character who manifests powers (psions, psychic warriors, and wilders) gains bonus power points according to his key ability score. Refer to Table: Ability Modifiers and Bonus Power Points.

How To Determine Bonus Power Points: Your key ability score grants you additional power points equal to your key ability modifier x your manifest level x1/2. Table: Ability Modifiers and Bonus Power Points shows these calculations for class levels 1st through 20th and key ability scores from 10 to 41.

Table: Ability Modifiers and Bonus Power Points

Class Skills

The psion's class skills (and the key ability for each skill) are Concentration* (Con), Craft (Int), Knowledge (all skills, taken individually)* (Int), Profession (Wis), and Psicraft* (Int). In addition, a psion gains access to additional class skills based on his discipline:

Seer (Clairsentience): Gather Information (Cha), Listen (Wis), and Spot (Wis).

Shaper (Metacreativity): Bluff (Cha), Disguise (Cha), and Use Psionic Device* (Cha).

Kineticist (Psychokinesis): Autohypnosis* (Wis), Disable Device (Dex), and Intimidate (Cha).

Egoist (Psychometabolism): Autohypnosis* (Wis), Balance (Dex) and Heal (Wis).

Nomad (Psychoportation): Climb (Str), Jump (Str), Ride (Dex), Survival (Wis), and Swim (Str).

Telepath (Telepathy): Bluff (Cha), Diplomacy (Cha), Gather Information (Cha), and Sense Motive (Wis).

*New skill or expanded use of existing skill.

Skill Points at 1st Level: (2 + Int modifier) x4.

Skill Points at Each Additional Level: 2 + Int modifier.

Class Features

All the following are class features of the psion.

Weapon and Armor Proficiency: Psions are proficient with the club, dagger, heavy crossbow, light crossbow, quarterstaff, and shortspear. They are not proficient with any type of armor or shield. Armor does not, however, interfere with the manifestation of powers.

Power Points/Day: A psion's ability to manifest powers is limited by the power points he has available. His base daily allotment of power points is given on Table: The Psion. In addition, he receives bonus power points per day if he has a high Intelligence score (see Table: Ability Modifiers and Bonus Power Points). His race may also provide bonus power points per day, as may certain feats and items.

Discipline: Every psion must decide at 1st level which psionic discipline he will specialize in. Choosing a discipline provides a psion with access to the class skills associated with that discipline (see above), as well as the powers restricted to that

discipline. However, choosing a discipline also means that the psion cannot learn powers that are restricted to other disciplines. He can't even use such powers by employing psionic items.

Powers Known: A psion begins play knowing three psion powers of your choice. Each time he achieves a new level, he unlocks the knowledge of new powers.

Choose the powers known from the psion power list, or from the list of powers of your chosen discipline. You cannot choose powers from disciplines other than your chosen discipline. (*Exception:* The feats Expanded Knowledge and Epic Expanded Knowledge do allow a psion to learn powers from the lists of other disciplines or even other classes.) A psion can manifest any power that has a power point cost equal to or lower than his manifest level.

The number of times a psion can manifest powers in a day is limited only by his daily power points.

A psion simply knows his powers; they are ingrained in his mind. He does not need to prepare them (in the way that some spellcasters prepare their spells), though he must get a good night's sleep each day to regain all his spent power points.

The Difficulty Class for saving throws against psion powers is $10 + \text{the power's level} + \text{the psion's Intelligence modifier}$.

Maximum Power Level Known: A psion begins play with the ability to learn 1st-level powers. As he attains higher levels, a psion may gain the ability to master more complex powers.

To learn or manifest a power, a psion must have an Intelligence score of at least $10 + \text{the power's level}$.

Bonus Feats: A psion gains a bonus feat at 1st level, 5th level, 10th level, 15th level, and 20th level. This feat must be a psionic feat, a metapsionic feat, or a psionic item creation feat.

These bonus feats are in addition to the feats that a character of any class gains every three levels. A psion is not limited to psionic feats, metapsionic feats, and psionic item creation feats when choosing these other feats.

PSIONIC DISCIPLINES

A discipline is one of six groupings of powers, each defined by a common theme. The six disciplines are clairsentience, metacreativity, psychokinesis, psychometabolism, psychoportation, and telepathy.

Clairsentience: A psion who chooses clairsentience is known as a seer. Seers can learn precognitive powers to aid their comrades in combat, as well as powers that permit them to gather information in many different ways.

Metacreativity: A psion specializing in metacreativity is known as a shaper. This discipline includes powers that draw ectoplasm or matter from the Astral Plane, creating semisolid and solid items such as armor, weapons, or animated constructs to do battle at the shaper's command.

Psychokinesis: Psions who specialize in psychokinesis are known as kineticists. They are the masters of powers that manipulate and transform matter and energy. Kineticists can attack with devastating blasts of energy.

Psychometabolism: A psion who specializes in psychometabolism is known as an egoist. This discipline consists of powers that alter the psion's psychobiology, or that of creatures near him. An egoist can both heal and transform himself into a fearsome fighter.

Psychoportation: A psion who relies on psychoporation powers is known as a nomad. Nomads can wield powers that propel or displace objects in space or time.

Telepathy: A psion who chooses the discipline of telepathy is known as a telepath. He is the master of powers that allow mental contact and control of other sentient creatures. A telepath can deceive or destroy the minds of his enemies with ease.

PSICRYSTALS

A psicrystal is a fragment of a psionic character's personality, brought into physical form and a semblance of life (via the Psicrystal Affinity feat). A psicrystal appears as a crystalline construct about the size of a human hand.

Because it is an extension of its creator's personality, a character's psicrystal is in some ways a part of him. That's why, for example, a psionic character can manifest a personal range power on his psicrystal even though normally he can manifest such a power only on himself.

A psicrystal is treated as a construct for the purposes of all effects that depend on its type.

A psicrystal grants special abilities to its owner, as shown on the Psicrystal Special Abilities table below. In addition, a psicrystal has a personality (being a fragment of the owner's personality), which gives its owner a bonus on certain types of checks or saving throws, as given on the Psicrystal Personalities table below. These special abilities and bonuses apply only when the owner and the psicrystal are within 1 mile of each other.

Psicrystal abilities are based on the owner's levels in psionic classes. Levels from other classes do not count toward the owner's level for purposes of psicrystal abilities.

A psicrystal can speak one language of its owner's choice (so long as it is a language the owner knows). A psicrystal can understand all other languages known by its owner, but cannot speak them. This is a supernatural ability.

Psicrystal Basics: Use the statistics for a psicrystal, but make the following changes.

Saving Throws: A psicrystal uses its owner's base saving throw bonuses and ability modifiers on saves, though it doesn't enjoy any other bonuses its owner might have (from magic items or feats, for example).

Abilities: When its self-propulsion ability is not activated, a psicrystal has no Strength score and no Dexterity score.

Skills: A psicrystal has the same skill ranks as its owner, except that it has a minimum of 4 ranks each in Spot, Listen, Move Silently, and Search. (Even if its owner has no ranks in these skills, a psicrystal has 4 ranks in each.) A psicrystal uses its own ability modifiers on skill checks.

Psicrystal Special Abilities

Owner Level	Natural Armor Adj.	Int Adj.	Special
1st–2nd	+0	+0	Alertness, improved evasion, personality, self-propulsion, share powers, sighted, telepathic link
3rd–4th	+1	+1	Deliver touch powers
5th–6th	+2	+2	Telepathic speech
7th–8th	+3	+3	—
9th–10th	+4	+4	Flight
11th–12th	+5	+5	Power resistance
13th–14th	+6	+6	Sight link
15th–16th	+7	+7	Channel power
17th–18th	+8	+8	—
19th–20th	+9	+9	—

Psicrystal Ability Descriptions: All psicrystals have special abilities (or impart abilities to their owners) depending on the level of the owner, as shown on the table above. The abilities on the table are cumulative.

Natural Armor Adj. (Ex): This number noted here is an improvement to the psicrystal's natural armor bonus (normally 0). It represents a psicrystal's preternatural durability.

Intelligence Adj. (Ex): Add this value to the psicrystal's Intelligence score. Psicrystals are as smart as people (though not necessarily as smart as smart people).

Alertness (Ex): The presence of a psicrystal sharpens its master's senses. While a psicrystal is within arm's reach (adjacent to or in the same square as its owner), its owner gains the Alertness feat.

Improved Evasion (Ex): If a psicrystal is subjected to an attack that normally allows a Reflex saving throw for half damage, it takes no damage if it makes a successful saving throw and half damage even if the saving throw fails.

Personality (Ex): Every psicrystal has a personality. See Psicrystal Personality, below.

Self-Propulsion (Su): As a standard action, its owner can will a psicrystal to form spidery, ectoplasmic legs that grant the psicrystal a land speed of 30 feet and a climb speed of 20 feet. The legs fade into nothingness after one day (or sooner, if the owner desires).

Share Powers (Su): At the owner's option, he can have any power (but not any psi-like ability) he manifests on himself also affect his psicrystal. The psicrystal must be within 5 feet of him at the time of the manifestation to receive the benefit. If the power has a duration other than instantaneous, it stops affecting the psicrystal if it moves farther than 5 feet away, and will not affect the psicrystal again, even if it returns to its owner before the duration expires.

Additionally, the owner can manifest a power with a target of "You" on his psicrystal (as a touch range power) instead of on himself. The owner and psicrystal cannot share powers if the powers normally do not affect creatures of the psicrystal's type (construct).

Sighted (Ex): Although it has no physical sensory organs, a psicrystal can telepathically sense its environment as well as a creature with normal vision and hearing. Darkness (even supernatural darkness) is irrelevant, as are areas of supernatural silence, though a psicrystal still can't discern invisible or ethereal beings. A psicrystal's sighted range is 40 feet.

Telepathic Link (Su): The owner has a telepathic link with his psicrystal out to a distance of up to 1 mile. The owner cannot see through the psicrystal's senses, but the two of them can communicate telepathically as if the psicrystal were the target of a *mindlink* power manifested by the owner. For instance, a psicrystal placed in a distant room could relay the activities occurring in that room.

Because of the telepathic link between a psicrystal and its owner, the owner has the same connection to an item or place that the psicrystal does. For instance, if his psicrystal has seen a room, the owner can teleport into that room as if he has seen it too.

Deliver Touch Powers (Su): If the owner is 3rd level or higher, his psicrystal can deliver touch powers for him. If the owner and psicrystal are in contact at the time the owner manifests a touch power, he can designate his psicrystal as the "toucher." The psicrystal can then deliver the touch power just as the owner could. As usual, if the owner manifests another power before the touch is delivered, the touch power dissipates.

Telepathic Speech (Ex): If the owner is 5th level or higher, the psicrystal can communicate telepathically with any creature that has a language and is within 30 feet of the psicrystal, while the psicrystal is also within 1 mile of the owner.

Flight (Su): If the owner is 9th level or higher, he can, as a standard action, will his psicrystal to fly at a speed of 50 feet (poor). The psicrystal drifts gently to the ground after one day (or sooner, if the owner desires).

Power Resistance (Ex): If the owner is 11th level or higher, the psicrystal gains power resistance equal to the owner's level + 5. To affect the psicrystal with a power, another manifester must get a result on a manifester level check that equals or exceeds the psicrystal's power resistance.

Sight Link (Sp): If the owner is 13th level or higher, the character can remote view the psicrystal (as if manifesting the *remote view* power) once per day.

Channel Power (Sp): If the owner is 15th level or higher, he can manifest powers through the psicrystal to a distance of up to 1 mile. The psicrystal is treated as the power's originator, and all ranges are calculated from its location.

When channeling a power through his psicrystal, the owner manifests the power by paying its power point cost. He is still subject to attacks of opportunity and other hazards of manifesting a power, if applicable (for instance, he becomes visible when manifesting an offensive power if *invisible*, as does the psicrystal).

Psicrystal Personality (Ex): Each psicrystal has a distinct personality, chosen by its owner at the time of its creation from among those given on the following table. At 1st level, its owner typically gets a feel for a psicrystal's personality only through occasional impulses, but as the owner increases in level the psicrystal's personality becomes more pronounced. At higher levels, it is not uncommon for a psicrystal to constantly ply its owner with observations and advice, often severely slanted toward the psicrystal's particular worldview. The owner always sees a bit of himself in his psicrystal, even if magnified and therefore distorted.

Psicrystal Personalities

Personality	Benefit to Owner
Artiste	+3 bonus on Craft checks
Bully	+3 bonus on Intimidate checks
Coward	+3 bonus on Hide checks
Friendly	+3 bonus on Diplomacy checks
Hero	+2 bonus on Fortitude saves

*The psychic warrior gains no power points from his class at 1st level. However, he does add any bonus power points he gains from a high Wisdom score, his race, and feats or other sources to his reserve. He can use these points (if any) to manifest his power.

Class Features

All the following are class features of the psychic warrior.

Weapon and Armor Proficiency: Psychic warriors are proficient with all simple and martial weapons, with all types of armor (heavy, medium, and light), and with shields (except tower shields).

Power Points/Day: A psychic warrior's ability to manifest powers is limited by the power points he has available. His base daily allotment of power points is given on Table: The Psychic Warrior. In addition, he receives bonus power points per day if he has a high Wisdom score (see Table: Ability Modifiers and Bonus Power Points). His race may also provide bonus power points per day, as may certain feats and items. A 1st-level psychic warrior gains no power points for his class level, but he gains bonus power points (if he is entitled to any), and can manifest the single power he knows with those power points.

Powers Known: A psychic warrior begins play knowing one psychic warrior power of your choice. Each time he achieves a new level, he unlocks the knowledge of a new power.

Choose the powers known from the psychic warrior power list. (*Exception:* The feats Expanded Knowledge and Epic Expanded Knowledge do allow a psychic warrior to learn powers from the lists of other classes.) A psychic warrior can manifest any power that has a power point cost equal to or lower than his manifest level.

The total number of powers a psychic warrior can manifest in a day is limited only by his daily power points.

A psychic warrior simply knows his powers; they are ingrained in his mind. He does not need to prepare them (in the way that some spellcasters prepare their spells), though he must get a good night's sleep each day to regain all his spent power points.

The Difficulty Class for saving throws against psychic warrior powers is $10 + \text{the power's level} + \text{the psychic warrior's Wisdom modifier}$.

Maximum Power Level Known: A psychic warrior begins play with the ability to learn 1st-level powers. As he attains higher levels, he may gain the ability to master more complex powers.

To learn or manifest a power, a psychic warrior must have a Wisdom score of at least $10 + \text{the power's level}$.

Bonus Feats: At 1st level, a psychic warrior gets a bonus combat-oriented feat in addition to the feat that any 1st level character gets and the bonus feat granted to a human character. The psychic warrior gains an additional bonus feat at 2nd level and every three levels thereafter (5th, 8th, 11th, 14th, 17th, and 20th). These bonus feats must be drawn from the feats noted as fighter bonus feats or psionic feats. The psychic warrior must still meet all prerequisites for the bonus feat, including ability score and base attack bonus minimums as well as class requirements. A psychic warrior cannot choose feats that specifically require levels in the fighter class unless he is a multiclass character with the requisite levels in the fighter class. These bonus feats are in addition to the feats that a character of any class gains every three levels. A psychic warrior is not limited to fighter bonus feats and psionic feats when choosing these other feats.

Class Features

All the following are class features of the soulknife.

Weapon and Armor Proficiency: Soulknives are proficient with all simple weapons, with their own mind blades, and with light armor and shields (except tower shields).

Mind Blade (Su): As a move action, a soulknife can create a semisolid blade composed of psychic energy distilled from his own mind. The blade is identical in all ways (except visually) to a short sword of a size appropriate for its wielder. For instance, a Medium soulknife materializes a Medium mind blade that he can wield as a light weapon, and the blade deals 1d6 points of damage (crit 19–20/x2). Soulknives who are smaller or larger than Medium create mind blades identical to short swords appropriate for their size, with a corresponding change to the blade's damage. The wielder of a mind blade gains the usual benefits to his attack roll and damage roll from a high Strength bonus.

The blade can be broken (it has hardness 10 and 10 hit points); however, a soulknife can simply create another on his next move action. The moment he relinquishes his grip on his blade, it dissipates (unless he intends to throw it; see below). A mind blade is considered a magic weapon for the purpose of overcoming damage reduction.

A soulknife can use feats such as Power Attack or Combat Expertise in conjunction with the mind blade just as if it were a normal weapon. He can also choose mind blade for feats requiring a specific weapon choice, such as Weapon Specialization. Powers or spells that upgrade weapons can be used on a mind blade.

A soulknife's mind blade improves as the character gains higher levels. At 4th level and every four levels thereafter, the mind blade gains a cumulative +1 enhancement bonus on attack rolls and damage rolls (+2 at 8th level, +3 at 12th level, +4 at 16th level, and +5 at 20th level).

Even in places where psionic effects do not normally function (such as within a *null psionics field*), a soulknife can attempt to sustain his mind blade by making a DC 20 Will save. On a successful save, the soulknife maintains his mind blade for a number of rounds equal to his class level before he needs to check again. On an unsuccessful attempt, the mind blade vanishes. As a move action on his turn, the soulknife can attempt a new Will save to rematerialize his mind blade while he remains within the psionics negating effect.

Weapon Focus (Mind Blade): A soulknife gains Weapon Focus (mind blade) as a bonus feat.

Wild Talent: A soulknife gains Wild Talent as a bonus feat. (This class feature provides the character with the psionic power he needs to materialize his mind blade, if he has no power points otherwise.)

Throw Mind Blade (Ex): A soul knife of 2nd level or higher can throw his mind blade as a ranged weapon with a range increment of 30 feet.

Whether or not the attack hits, a thrown mind blade then dissipates. A soulknife of 3rd level or higher can make a psychic strike (see below) with a thrown mind blade and can use the blade in conjunction with other special abilities (such as Knife to the Soul; see below).

Psychic Strike (Su): As a move action, a soulknife of 3rd level or higher can imbue his mind blade with destructive psychic energy. This effect deals an extra 1d8 points of damage to the next living, nonmindless target he successfully hits with a melee attack (or ranged attack, if he is using the throw mind blade ability). Creatures immune to mind-affecting effects are immune to psychic strike damage. (Unlike the rogue's sneak attack, the psychic strike is not precision damage and can affect creatures otherwise immune to extra damage from critical hits or more than 30 feet away, provided they are living, nonmindless creatures not immune to mind-affecting effects.)

A mind blade deals this extra damage only once when this ability is called upon, but a soulknife can imbue his mind blade with psychic energy again by taking another move action.

Once a soulknife has prepared his blade for a psychic strike, it holds the extra energy until it is used. Even if the soulknife drops the mind blade (or it otherwise dissipates, such as when it is thrown and misses), it is still imbued with psychic energy when the soulknife next materializes it.

At every four levels beyond 3rd (7th, 11th, 15th, and 19th), the extra damage from a soulknife's psychic strike increases as shown on the Table above.

Free Draw (Su): At 5th level, a soulknife becomes able to materialize his mind blade as a free action instead of a move action. He can make only one attempt to materialize the mind blade per round, however.

Shape Mind Blade (Su): At 5th level, a soulknife gains the ability to change the form of his mind blade. As a fullround action, he can change his mind blade to replicate a longsword (damage 1d8 for a Medium weapon wielded as a one-handed weapon) or a bastard sword (damage 1d10 for a Medium weapon, but he must wield it as a two-handed weapon unless he knows the Exotic Weapon Proficiency (bastard sword) feat). If a soulknife shapes his mind blade into the form of a bastard sword and wields it two-handed, he adds 1-1/2 times his Strength bonus to his damage rolls, just like when using any other two-handed weapon.

Alternatively, a soulknife can split his mind blade into two identical short swords, suitable for fighting with a weapon in each hand. (The normal penalties for fighting with two weapons apply.) However, both mind blades have an enhancement bonus 1 lower than the soulknife would otherwise create with a single mind blade.

Mind Blade Enhancement (Su): At 6th level, a soulknife gains the ability to enhance his mind blade. He can add any one of the weapon special abilities on the table below that has an enhancement bonus value of +1.

At every four levels beyond 6th (10th, 14th, and 18th), the value of the enhancement a soulknife can add to his weapon improves to +2, +3, and +4, respectively. A soulknife can choose any combination of weapon special abilities that does not exceed the total allowed by the soulknife's level.

The weapon ability or abilities remain the same every time the soulknife materializes his mind blade (unless he decides to reassign its abilities; see below). The ability or abilities apply to any form the mind blade takes, including the use of the shape mind blade or bladewind class abilities.

Weapon Special Ability	Enhancement Bonus Value
Defending	+1
Keen	+1
Lucky*	+1
Mighty cleaving	+1
Psychokinetic*	+1
Sundering*	+1

Soulbreaker*	+3

*New special abilities

A soulknife can reassign the ability or abilities he has added to his mind blade. To do so, he must first spend 8 hours in concentration. After that period, the mind blade materializes with the new ability or abilities selected by the soulknife.

Speed of Thought: A soulknife gains Speed of Thought as a bonus feat at 6th level.

Bladewind (Su): At 9th level, a soulknife gains the ability to momentarily fragment his mind blade into numerous identical blades, each of which strikes at a nearby opponent.

As a full attack, when wielding his mind blade, a soulknife can give up his regular attacks and instead fragment his mind blade to make one melee attack at his full base attack bonus against each opponent within reach. Each fragment functions identically to the soulknife's regular mind blade.

When using bladewind, a soulknife forfeits any bonus or extra attacks granted by other feats or abilities (such as the Cleave feat or the *haste* spell).

The mind blade immediately reverts to its previous form after the bladewind attack.

Greater Weapon Focus (Mind Blade): A soulknife gains Greater Weapon Focus (mind blade) as a bonus feat at 9th level.

Knife to the Soul (Su): Beginning at 13th level, when a soulknife executes a psychic strike, he can choose to substitute Intelligence, Wisdom, or Charisma damage (his choice) for extra dice of damage. For each die of extra damage he gives up, he deals 1 point of damage to the ability score he chooses. A soulknife can combine extra dice of damage and ability damage in any combination.

The soulknife decides which ability score his psychic strike damages and the division of ability damage and extra dice of damage when he imbues his mind blade with the psychic strike energy.

Multiple Throw (Ex): At 17th level and higher, a soulknife can throw a number of mind blades per round equal to the number of melee attacks he could make.

Class Features

All the following are class features of the wilder.

Weapon and Armor Proficiency: Wilders are proficient with all simple weapons, with light armor, and with shields (except tower shields).

Power Points/Day: A wilder's ability to manifest powers is limited by the power points she has available. Her base daily allotment of power points is given on Table: The Wilder. In addition, she receives bonus power points per day if she has a high Charisma score (see Table: Ability Modifiers and Bonus Power Points). Her race may also provide bonus power points per day, as may certain feats and items.

Powers Known: A wilder begins play knowing one wilder power of your choice. At every even-numbered class level after 1st, she unlocks the knowledge of new powers.

Choose the powers known from the wilder power list. (*Exception:* The feats Expanded Knowledge and Epic Expanded Knowledge do allow a wilder to learn powers from the lists of other classes.) A wilder can manifest any power that has a power point cost equal to or lower than her manifester level.

The total number of powers a wilder can manifest in a day is limited only by her daily power points.

A wilder simply knows her powers; they are ingrained in her mind. She does not need to prepare them (in the way that some spellcasters prepare their spells), though she must get a good night's sleep each day to regain all her spent power points.

The Difficulty Class for saving throws against wilder powers is $10 + \text{the power's level} + \text{the wilder's Charisma modifier}$.

Maximum Power Level Known: A wilder begins play with the ability to learn 1st-level powers. As she attains higher levels, she may gain the ability to master more complex powers.

To learn or manifest a power, a wilder must have a Charisma score of at least $10 + \text{the power's level}$.

Wild Surge (Su): A wilder can let her passion and emotion rise to the surface in a wild surge when she manifests a power.

During a wild surge, a wilder gains phenomenal psionic strength, but may harm herself by the reckless use of her power (see Psychic Enervation, below).

A wilder can choose to invoke a wild surge whenever she manifests a power. When she does so, she gains +1 to her manifester level with that manifestation of the power. The manifester level boost gives her the ability to augment her powers to a higher degree than she otherwise could; however, she pays no extra power point for this wild surge. Instead, the additional 1 power point that would normally be required to augment the power is effectively supplied by the wild surge. Level-dependent power effects are also improved, depending on the power a wilder manifests with her wild surge.

This improvement in manifester level does not grant her any other benefits (psicrystal abilities do not advance, she does not gain higher-level class abilities, and so on).

She cannot use the Overchannel psionic feat and invoke her wild surge at the same time.

At 3rd level, a wilder can choose to boost her manifester level by two instead of one. At 7th level, she can boost her manifester level by up to three; at 11th level, by up to four; at 15th level, by up to five; and at 19th level, by up to six.

In all cases, the wild surge effectively pays the extra power point cost that is normally required to augment the power; only the unaugmented power point cost is subtracted from the wilder's power point reserve.

Psychic Enervation (Ex): Pushing oneself by invoking a wild surge is dangerous. Immediately following each wild surge, a wilder may be overcome by the strain of her effort. The chance of suffering psychic enervation is equal to 5% per manifester level added with the wild surge.

A wilder who is overcome by psychic enervation is dazed until the end of her next turn and loses a number of power points equal to her wilder level.

Elude Touch (Ex): Starting at 2nd level, a wilder's intuition supersedes her intellect, alerting her to danger from touch attacks (including rays). She gains a bonus to Armor Class against all touch attacks equal to her Charisma bonus; however, her touch AC can never exceed her Armor Class against normal attacks.

Surging Euphoria (Ex): Starting at 4th level, when a wilder uses her wild surge ability, she gains a +1 morale bonus on attack rolls, damage rolls, and saving throws for a number of rounds equal to the intensity of her wild surge.

If a wilder is overcome by psychic enervation following her wild surge, she does not gain the morale bonus for this use of her wild surge ability.

At 12th level, the morale bonus on a wilder's attack rolls, damage rolls, and saving throws increases to +2. At 20th level, the bonus increases to +3.

Volatile Mind (Ex): A wilder's temperamental mind is hard to encompass with the discipline of telepathy. When any telepathy power is manifested on a wilder of 5th level or higher, the manifester of the power must pay 1 power point more than he otherwise would have spent.

The extra cost is not a natural part of that power's cost. It does not augment the power; it is simply a wasted power point. The wilder's volatile mind can force the manifester of the telepathy power to exceed the normal power point limit of 1 point per manifester level. If the extra cost raises the telepathy power's cost to more points than the manifester has remaining in his reserve, the power simply fails, and the manifester exhausts the rest of his power points.

At 9th level, the penalty assessed against telepathy powers manifested on a wilder is increased to 2 power points. At 13th level, the penalty increases to 3 power points, and at 17th level it increases to 4 power points.
As a standard action, a wilder can choose to lower this effect for 1 round.

PSIONIC PRESTIGE CLASSES

CEREBREMANCER

Hit Die: d4.

Requirements

To qualify to become a cerebremancer, a character must fulfill all the following criteria.

Skills: Knowledge (arcana) 6 ranks, Knowledge (psionics) 6 ranks.

Spells: Able to cast 2nd-level arcane spells.

Psionics: Able to manifest 2nd-level powers.

Class Skills

The cerebremancer's class skills (and the key ability for each skill) are Concentration (Con), Craft (Int), Decipher Script (Int), Knowledge (arcana) Int, Knowledge (psionics) (Int), Profession (Wis), Psicraft (Int), and Spellcraft (Int).

Skill Points at Each Level: 2 + Int modifier.

Table: The Cerebremancer

Level	Base				Spells per Day/Powers Known
	Attack Bonus	Fort Save	Ref Save	Will Save	
1st	+0	+0	+0	+2	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
2nd	+1	+0	+0	+3	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
3rd	+1	+1	+1	+3	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
4th	+2	+1	+1	+4	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
5th	+2	+1	+1	+4	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
6th	+3	+2	+2	+5	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
7th	+3	+2	+2	+5	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
8th	+4	+2	+2	+6	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
9th	+4	+3	+3	+6	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class
10th	+5	+3	+3	+7	+1 level of existing arcane spellcasting class/+1 level of existing manifesting class

Class Features

All the following are class features of the cerebremancer prestige class.

Weapon and Armor Proficiency: Cerebremancers gain no proficiency with any weapon or armor.

Spells per Day/Powers Known: When a new cerebremancer level is attained, the character gains new spells per day as if he had also attained a level in any one arcane spellcasting class he belonged to before he added the prestige class. He gains additional power points per day and access to new powers as if he had also gained a level in any one manifesting class he belonged to previously. He does not, however, gain any other benefit a character of either class would have gained (bonus metamagic, metapsionic, or item creation feats, psicrystal special abilities, and so on). This essentially means that he adds the level of cerebremancer to the level of whatever other arcane spellcasting class and manifesting class the character has, then determines spells per day, caster level, power points per day, powers known, and manifester level accordingly.

If a character had more than one arcane spellcasting class or more than one manifesting class before he became a cerebremancer, he must decide to which class he adds each level of cerebremancer for purpose of determining spells per day, caster level, power points per day, powers known, and manifester level.

ELOCATER

Hit Die: d6.

Requirements

To qualify to become an elocater, a character must fulfill all the following criteria.

Base Attack Bonus: +3.

Skills: Concentration 8 ranks.

Feats: Mobility, Spring Attack.

Psionics: Able to manifest 1st-level powers.

Class Skills

The elocater's class skills (and the key ability for each skill) are Autohypnosis (Wis), Balance (Dex), Climb (Str), Concentration (Con), Craft (Int), Disable Device (Int), Escape Artist (Dex), Gather Information (Cha), Hide (Dex), Jump (Str), Knowledge (local) (Int), Knowledge (psionics), Listen (Wis), Move Silently (Dex), Open Lock (Dex), Perform (Cha), Profession (Wis), Psicraft (Int), Search (Int), Sense Motive (Wis), Sleight of Hand (Dex), Spot (Wis), Swim (Str), Tumble (Dex), Use Psionic Device (Cha), and Use Rope (Dex).

Skill Points at Each Level: 6 + Int modifier.

Table: The Elocater

Base						Powers Known
Level	Attack Bonus	Fort Save	Ref Save	Will Save	Special	
1st	+0	+0	+2	+2	Scorn earth, Sidestep Charge	+1 level of existing manifesting class

9th	+6	+3	+6	+6	Dimension spring attack	+1 level of existing manifesting class
10th	+7	+3	+7	+7	Accelerated action	+1 level of existing manifesting class

Class Features

All the following are class features of the elocater prestige class.

Weapon and Armor Proficiency: Elocaters are proficient with all simple and martial weapons and with light armor.

Powers Known: At every level indicated on the table, the character gains additional power points per day and access to new powers as if she had also gained a level in whatever manifesting class she belonged to before she added the prestige class. She does not, however, gain any other benefit a character of that class would have gained (bonus feats, metapsionic or item creation feats, psicrystal special abilities, and so on). This essentially means that she adds the level of elocater to the level of whatever manifesting class the character has, then determines power points per day, powers known, and manifester level accordingly.

If a character had more than one manifesting class before she became an elocater, she must decide to which class she adds the new level of elocater for the purpose of determining power points per day, powers known, and manifester level.

Scorn Earth (Su): At 1st level, an elocater's feet lift from the ground. From now on, she can float a foot above the ground. Instead of walking she glides along, unconcerned with the hard earth or difficult terrain. While she remains within 1 foot of a flat surface of any solid or liquid, she can take normal actions and make normal attacks, and can move at her normal speed (she can even "run" at four times her normal speed). However, at distances higher than 1 foot above any surface, her speed diminishes to 10 feet per round.

While she remains within 1 foot of a surface, she can make melee and ranged attacks normally, but if she moves any higher, she incurs the penalties on melee and ranged attack rolls as if she were the subject of the *psionic levitate* power.

Sidestep Charge (Ex): At 1st level, an elocater gains Sidestep Charge as a bonus feat, even if she does not meet the prerequisites. If the character already has this feat, she gains no benefit.

Opportunistic Strike (Ex): Beginning at 2nd level, an elocater's hyperawareness of spatial relations gives her an instinctive view of the battlefield, which allows her to make a cunning attack against distracted opponents. The elocater gains a +2 insight bonus on her attack roll and her damage roll (if the attack hits) for the first attack she makes against an opponent that has been dealt damage in melee by another character since the elocater's last action. At 5th level the insight bonus increases to +4, and at 8th level the insight bonus increases to +6.

Dimension Step (Su): An elocater of 3rd level or higher can slip psionically between spaces as if using the *psionic dimension door* power, once per day. The elocater cannot bring any other creatures with her. Her manifester level for this effect is equal to her elocater level.

Flanker (Ex): An elocater of 4th level or higher can flank enemies from seemingly impossible angles. She can designate any adjacent square as the square from which flanking against an ally is determined (including the square where she stands, as normal). She can designate the square at the beginning of her turn or at any time during her turn. The designated square remains her effective square for flanking until she is no longer adjacent to it or until she chooses a different square (at the start of one of her turns). The character can even choose a square that is impassable or occupied.

Transporter (Ex): At 6th level, an elocater learns both *psionic teleport* and *psionic plane shift*. These powers are in addition to any powers the elocater normally learns by advancing a level.

The elocater treats these powers as if they were 3rd-level powers on her class list. This means, among other things, that manifesting these powers costs 5 power points. (If the character does not have a high enough manifester level to manifest 3rd-level powers the character cannot manifest these powers until she has attained the required manifester level.)

Capricious Step (Ex): At 7th level, an elocater can take an extra 5-foot step in any round when she doesn't perform any other movement (except for the first 5-foot step). Like the first, the second 5-foot step does not provoke attacks of opportunity. The character can take the extra 5-foot step immediately after taking the first, or wait until the end of her other actions for the round. In all other ways, the rules for taking a 5-foot step apply.

Dimension Spring Attack (Su): An elocater of 9th level or higher can use her dimension step ability in conjunction with her Spring Attack feat once per day. This ability can be used only against opponents within 60 feet to which the elocater has line of sight. She can dimension step up to the target, use Spring Attack, and then use dimension step to return to her starting point. (When she uses this ability, the total distance she can travel before and after the attack is not limited by her speed.) The use of this ability counts as her use of the dimension step ability on that day (and this ability is not available during a day when she has already used dimension step).

Accelerated Action (Su): When she attains 10th level, an elocater can accelerate herself and thereby take more actions than normal. An elocater can accelerate herself for a total of 5 rounds per day. She can choose to parcel out her accelerated actions in 1-round increments. (This effect is not cumulative with similar effects that provide additional actions, such as *schism* or a *haste* spell—and in fact an elocater can't take an accelerated action if affected by these or similar effects.)

If she makes a full attack while accelerated, an elocater can make one extra attack with any weapon she is holding. The attack is made using her full base attack bonus, plus any modifiers appropriate to the situation. If the elocater uses her accelerated action to move, she gains an enhancement bonus to her speed of +30 feet. The elocater can use her accelerated action to manifest a power, as long as she has not already manifested a power in the current round and the one she wants to manifest has a manifesting time of 1 standard action or shorter. While accelerated, she gains a +2 dodge bonus on attack rolls and Reflex saves and a +2 dodge bonus to Armor Class. Any condition that makes her lose her Dexterity bonus to Armor Class (if any) also makes her lose these dodge bonuses.

PSIONIC FIST

Hit Die: d6.

Requirements

To qualify to become a Psionic Fist, a character must fulfill all the following criteria.

Base Attack Bonus: +4.

Skill: Concentration 9 ranks.

Feat: Wild Talent.

Special: Still mind class feature.

Class Skills

The Psionic Fist's class skills (and the key ability for each skill) are Autohypnosis (Wis), Concentration (Con), Craft (Int), Escape Artist (Dex), Hide (Dex), Jump (Str), Knowledge (psionics) (Int), Knowledge (religion) (Int), Listen (Wis), Move Silently (Dex), Psicraft (Int), Sense Motive (Wis), Spot (Wis), Tumble (Dex).

Skill Points at Each Level: 4 + Int modifier.

Table: The Psionic Fist

Level	Base Attack Bonus	Fort Save	Ref Save	Will Save	Special	Points/ Day	Powers Known	Level Known
1st	+0	+0	+2	+2	Monk abilities	1	1	1st

9th	+6	+3	+6	+6	—	55	9	5th
10th	+7	+3	+7	+7	Bonus psionic feat	71	10	5th

Class Features

All the following are class features of the Psionic Fist prestige class.

Weapon and Armor Proficiency: Psionic Fists gain no proficiency with any weapon or armor.

Monk Abilities: A Psionic Fist's class levels stack with his monk levels for the purpose of determining his unarmed damage and bonuses to Armor Class and unarmored speed. His class levels do not apply to other monk abilities such as flurry of blows, slow fall, and so on.

Power Points/Day: A Psionic Fist can manifest powers. His ability to manifest powers is limited by the power points he has available. His base daily allotment of power points is given on Table: The Psionic Fist. In addition, he receives bonus power points per day if he has a high Wisdom score (see Table: Ability Modifiers and Bonus Power Points). His race may also provide bonus power points per day, as may certain feats and items. If a Psionic Fist has power points from a different class, those points are pooled together and usable to manifest powers from either class. Bonus power points from having a high ability score can be gained only for the character's highest psionic class.

Powers Known: A Psionic Fist chooses his powers from the psychic warrior power list. At 1st level, a Psionic Fist knows one psychic warrior power of your choice. Each time he attains a new level, he learns one new power. A Psionic Fist can manifest any power that has a power point cost equal to or lower than his manifest level. The total number of powers a Psionic Fist can manifest per day is limited only by his daily power points.

A Psionic Fist simply knows his powers; they are ingrained in his mind. He does not need to prepare them (in the way that some spellcasters prepare their spells), though he must get a good night's sleep each day to regain all his spent power points. The Difficulty Class for saving throws against Psionic Fist powers is $10 + \text{the power's level} + \text{the Psionic Fist's Wisdom modifier}$.

Maximum Power Level Known: A Psionic Fist gains the ability to learn one 1st-level power when he takes his first level in the prestige class. As he attains each new odd-numbered level, a Psionic Fist gains the ability to master more complex powers.

To learn or manifest a power, a Psionic Fist must have a Wisdom score of at least $10 + \text{the power's level}$.

Bonus Psionic Feat: At 5th and 10th level, a Psionic Fist can take any psionic feat as a bonus feat. He must still meet the prerequisites for the feat.

Multiclass Note: A monk who becomes a Psionic Fist may continue advancing as a monk.

SLAYER

Hit Die: d8.

Requirements

To qualify to become a slayer, a character must fulfill all the following criteria.

Base Attack Bonus: +4.

Skill: Knowledge (dungeoneering) 4 ranks.

Feat: Track.

Psionics: Must have a power point reserve of at least 1 power point.

Class Skills

The slayer's class skills (and the key ability for each skill) are Bluff (Cha), Concentration (Con), Knowledge (dungeoneering) (Int), Listen (Wis), Psicraft (Int), Sense Motive (Wis), Spot (Wis), and Survival (Wis).

Skill Points at Each Level: 4 + Int modifier.

Table: The Slayer

Level	Base Attack Bonus	Fort Save	Ref Save	Will Save	Special	Powers Known
1st	+1	+0	+0	+2	Favored enemy +2, enemy sense	—
2nd	+2	+0	+0	+3	Brain nausea	+1 level of existing manifesting class

4th	+4	+1	+1	+4	Favored enemy +4	+1 level of existing manifesting class
5th	+5	+1	+1	+4	—	+1 level of existing manifesting class
6th	+6	+2	+2	+5	Cerebral blind	+1 level of existing manifesting class
7th	+7	+2	+2	+5	Favored enemy +6	+1 level of existing manifesting class
8th	+8	+2	+2	+6	Breach power resistance	+1 level of existing manifesting class
9th	+9	+3	+3	+6	Cerebral immunity	+1 level of existing manifesting class
10th	+10	+3	+3	+7	Blast feedback, favored enemy +8	+1 level of existing manifesting class

Class Features

All the following are class features of the slayer prestige class.

Weapon and Armor Proficiency: Slayers are proficient with all simple and martial weapons and with all types of armor.

Powers Known: Beginning at 2nd level, a slayer gains additional power points per day and access to new powers as if she had also gained a level in whatever manifesting class she belonged to before she added the prestige class. She does not, however, gain any other benefit a character of that class would have gained (bonus feats, metapsionic or item creation feats, psicrystal special abilities, and so on). This essentially means that she adds the level of slayer to the level of whatever manifesting class the character has, then determines power points per day, powers known, and manifester level accordingly. If a character had more than one manifesting class before she became a slayer, she must decide to which class she adds the new level of slayer for the purpose of determining power points per day, powers known, and manifester level.

If the character did not belong to a manifesting class before taking this prestige class, she does not gain manifesting levels.

Favored Enemy (Ex): When she enters the class, a slayer formally declares a type of psionic creature as the enemy she detests above all others. Due to her extensive study of her foes and training in the proper techniques for combating them, she gains a +2 bonus on Bluff, Listen, Sense Motive, Spot, and Survival checks when using these skills against her favored enemy.

Likewise, she gets a +2 bonus on weapon damage rolls against creatures of this kind. At 4th level the bonuses increase to +4, at 7th level to +6, and at 10th level to +8.

Enemy Sense (Su): A slayer can sense the presence of her favored enemy within 60 feet of herself, even if they are hidden by darkness or walls, but she cannot discern their exact location.

Brain Nausea (Su): At 2nd level, a slayer gains a constant defensive ability somewhat similar to the *aversion* power. Any creature that attempts to eat the slayer's brain must succeed on a Will save (DC 15 + slayer's class level) or become disinclined to do so for 24 hours thereafter. A creature that fails this save may take any action it desires except extracting the slayer's brain (but does not realize it is being so affected). This ability is active even if the slayer is unconscious, stunned, or otherwise helpless.

Lucid Buffer (Ex): At 3rd level, a slayer becomes especially skilled at resisting mental attacks. She gains a +4 competence bonus on saving throws against all compulsions and mind-affecting effects. This ability is active even if the slayer is unconscious, stunned, or otherwise helpless.

Cerebral Blind (Su): After reaching 6th level, a slayer is protected from all devices, powers, and spells that reveal location. This ability protects against information gathering by clairsentience powers or effects that reveal location.

The ability even foils *bend reality*, *limited wish*, *miracle*, *reality revision*, and *wish* when they are used to gain information about the slayer's location (however, *metafaculty* can pierce this protective barrier). In the case of *remote viewing* or *scrying* that scans an area a slayer is in, the effect works, but the slayer simply isn't detected. *Remote viewing* or *scrying* attempts that are targeted specifically at a slayer do not work. This ability is active as long as the slayer is psionically focused.

Breach Power Resistance (Su): A slayer of 8th level or higher can enhance her weapon with psionic might. Each successful melee attack (or ranged attack if the target is within 30 feet) she makes with her weapon against a creature with power resistance temporarily reduces its power resistance by 1. Unless the creature is slain, its lost power resistance returns all at once 12 hours later. This ability is active as long as the slayer is psionically focused.

Cerebral Immunity (Su): On reaching 9th level, a slayer gains protection from all devices, powers, and spells that influence the mind. This ability shields her against almost all mind-affecting powers and effects (though the slayer can selectively allow powers or spells to affect her). The ability even foils *bend reality*, *limited wish*, *miracle*, *reality revision*, and *wish* when they are used to mentally influence a slayer. This ability is active as long as the slayer is psionically focused.

Blast Feedback (Su): At 10th level, if a slayer makes her saving throw when attacked with *mind blast*, the *mind blast* rebounds upon the attacker. Only the original attacker is targeted in the rebound effect. If the original attacker fails a Will saving throw (DC equal to that of the original attack), the attacker is affected normally by the *mind blast*.

METAMIND

Hit Die: d4.

Requirements

To qualify to become a metamind, a character must fulfill all the following criteria.

Skills: Knowledge (psionics) 8 ranks, Psicraft 4 ranks.

Feat: Psicrystal Affinity.

Psionics: Manifester level 4th.

Class Skills

The metamind's class skills are Autohypnosis (Wis), Concentration* (Con), Craft (any) (Int), Knowledge (psionics), and Psicraft (Int).

Skill Points at Each Level: 2 + Int modifier.

Table: The Metamind

Level	Base Attack Bonus	Fort Save	Ref Save	Will Save	Special	Powers Known
1st	+0	+0	+0	+2	Free manifesting 1st, 3/day	—
2nd	+1	+0	+0	+3	Cognizance psicrystal 5 points	+1 level of existing manifesting class
3rd	+1	+1	+1	+3	Free manifesting 2nd, 3/day	—
4th	+2	+1	+1	+4	Cognizance psicrystal 7 points	+1 level of existing manifesting class
5th	+2	+1	+1	+4	Free manifesting 3rd, 1/day	—
6th	+3	+2	+2	+5	Cognizance psicrystal 9 points	+1 level of existing manifesting class
7th	+3	+2	+2	+5	Free manifesting 4th, 1/day	—
8th	+4	+2	+2	+6	Cognizance psicrystal 11 points	+1 level of existing manifesting class
9th	+4	+3	+3	+6	Free manifesting 5th, 1/day	—
10th	+5	+3	+3	+7	Font of power	+1 level of existing manifesting class

Class Features

All the following are class features of the metamind prestige class.

Weapon and Armor Proficiency: Metaminds gain no proficiency with any weapon or armor.

Powers Known: At every even-numbered level, a metamind gains additional power points per day and access to new powers as if he had also gained a level in whatever manifesting class he belonged to before he added the prestige class. He does not, however, gain any other benefit a character of that class would have gained (bonus feats, metapsionic or item creation feats, and so on). This essentially means that he adds the level of metamind to the level of whatever manifesting class the character has, then determines power points per day, powers known, and manifester level accordingly.

If a character had more than one manifesting class before he became a metamind, he must decide to which class he adds the new level of metamind for the purpose of determining power points per day, powers known, and manifester level.

Free Manifesting (Ps): At 1st level, a metamind can manifest any 1st-level power he knows for free (without spending power points) three times per day.

At higher levels, a metamind gains the ability to freely manifest additional higher-level powers: three 2nd-level powers per day at 3rd level; one 3rd-level power per day at 5th level; one 4th-level power per day at 7th level; and one 5th-level power per day at 9th level.

This benefit applies only to the power point cost of an unaugmented power. Points spent to augment a power and an experience point cost (if any) must be paid as normal.

Cognizance Psicrystal (Ex): At 2nd level, a metamind masters the trick of storing excess power points in a psicrystal. The psicrystal is now treated as a *cognizance crystal* capable of storing 5 power points, in addition to its psicrystal abilities. At every even-numbered level, a metamind becomes able to store an additional 2 power points in his psicrystal, to a maximum of 11 points at 8th level.

Font of Power (Ps): A 10th-level metamind can act as a living *cognizance crystal*, producing seemingly endless power points once per day, for up to 1 minute. His eyes shine like tiny stars, and faint illumination seems to beam out of his mouth and the end of each of his fingers. While so empowered, he can manifest any of his powers without drawing from his power point reserve. He finds the power points he needs welling up within his own body.

If a metamind using this ability enters a metaconcert, his power point reserve is accessed normally for the purpose of his contributing to the pool.

PSION UNCARNATE

Hit Die: d4.

Requirements

To qualify to become a psion uncarnate, a character must fulfill all the following criteria.

Skills: Knowledge (psionics) 8 ranks, Psicraft 8 ranks.

Feat: Psionic Body.

Psionics: Able to manifest 3rd-level powers.

Special: Must have had some instruction by another psion uncarnate.

Class Skills

The psion uncarnate's class skills are Autohypnosis (Wis), Bluff (Cha), Concentration (Con), Craft (any) (Int), Disguise (Cha), Knowledge (the planes) (Int), Knowledge (psionics) (Int), Psicraft (Int), and Sense Motive (Wis).

Skill Points at Each Level: 2 + Int modifier.

Table: The Psion Uncarnate

Level	Base Attack Bonus	Fort Save	Ref Save	Will Save	Special	Powers Known
1st	+0	+0	+0	+2	Incorporeal touch 1d6, uncarnate armor	—

Class Features

All the following are class features of the psion uncarnate prestige class.

Weapon and Armor Proficiency: Psion uncarnates gain no proficiency with any weapon or armor.

Powers Known: At every level indicated on Table: The Psion Uncarnate, a psion uncarnate gains additional power points per day and access to new powers as if he had also gained a level in whatever manifesting class he belonged to before he added the prestige class. He does not, however, gain any other benefit a character of that class would have gained (bonus feats, metapsionic or item creation feats, psicrystal special abilities, and so on). This essentially means that he adds the level of psion uncarnate to the level of whatever manifesting class the character has, then determines power points per day, powers known, and manifester level accordingly.

If a character had more than one manifesting class before he became a psion uncarnate, he must decide to which class he adds the new level of psion uncarnate for the purpose of determining power points per day, powers known, and manifester level.

Incorporeal Touch (Su): Beginning at 1st level, a psion uncarnate can make up to three melee touch attacks per day that each deal 1d6 points of damage if they hit. The character's Strength modifier is not applied to this attack, but it is effective against incorporeal creatures (and against corporeal creatures while the psion uncarnate is incorporeal). The character's hand and arm seem to become slightly translucent when he makes these attacks. A miss still counts as a use of the ability.

While uncarnate (see below), a psion uncarnate can make melee touch attacks at will that do not count against his uses of this ability.

For every four levels higher than 1st the psion uncarnate attains, the damage on these attacks increases by 1d6 points.

Uncarnate Armor (Su): A psion uncarnate wearing armor (or using *inertial armor* or a similar effect) gets his armor bonus to AC even when he becomes incorporeal (see *Shed Body*, below). However, unlike other incorporeal creatures, a psion uncarnate does not gain a deflection bonus to Armor Class from his Charisma modifier. This ability works even if the armor being worn becomes incorporeal (such as through the use of the *assume equipment* ability described below).

Shed Body (Su): Starting at 2nd level, a psion uncarnate can become incorporeal (or "uncarnate") once per day as a standard action. The character can remain uncarnate for up to 1 minute. During this time, the character's body fades into an immaterial form that retains the character's basic likeness. While uncarnate, the character gains the incorporeal subtype (see below). He gains a fly speed equal to his land speed (perfect maneuverability). His material armor remains in place and continues to provide its armor bonus to AC (see *Uncarnate Armor*, above). His material weapons also remain corporeal. Losing his physical form allows the character to more easily access his mental abilities, and he gains a +1 bonus on all save DCs for powers he manifests while uncarnate.

He can use equipment normally, deriving benefits from items that enhance his capabilities; however, all his equipment remains material even when the character is uncarnate (but see the assume equipment ability, described below).

Often, a psion uncarnate appears almost like a ghost wearing items of the material world. This doesn't make his equipment more susceptible to attack (the normal rules for attended objects apply), but it does make it impossible for the character to enter or pass through solid objects while wearing solid equipment. If he drops his material equipment, he can pass through solid objects at will as described below.

At 6th level and higher, a psion uncarnate can shed his body twice per day for up to 1 minute each time.

Incorporeal Subtype: An incorporeal psion uncarnate has no physical body. He can be harmed only by other incorporeal creatures, magic weapons or creatures that strike as magic weapons, and spells, spell-like abilities, or supernatural abilities. He is immune to all nonmagical attack forms. Even when hit by spells or magic weapons, he has a 50% chance to ignore any damage from a corporeal source (except for positive energy, negative energy, force effects, or attacks made with *ghost touch* weapons).

An incorporeal psion uncarnate has no natural armor bonus—and, unlike other incorporeal creatures, does not gain a deflection bonus from his Charisma modifier. An incorporeal psion uncarnate can enter or pass through solid objects (subject to the restrictions described in the shed body and assume equipment abilities), but must remain adjacent to the object's exterior, and so cannot pass entirely through an object whose space is larger than his own. He can sense the presence of creatures or objects within a square adjacent to his current location, but enemies have total concealment (50% miss chance) from an incorporeal psion uncarnate that is inside an object. To see farther from the object he is in and attack normally, the incorporeal psion uncarnate must emerge. An incorporeal psion uncarnate inside an object has total cover, but when he attacks a creature outside the object he only has cover, so a creature outside with a readied action could strike at him as he attacks. An incorporeal psion uncarnate cannot pass through a force effect.

An incorporeal psion uncarnate's attacks pass through (ignore) natural armor, armor, and shields, although deflection bonuses and force effects work normally against him. He can pass through and operate in water as easily as he does in air. An incorporeal psion uncarnate cannot fall or take falling damage. He cannot make trip or grapple attacks, nor can he be tripped or grappled. In fact, he cannot take any physical action that would move or manipulate an opponent or its equipment, nor is he subject to such actions.

Incorporeal creatures have no weight and do not set off traps that are triggered by weight. An incorporeal creature moves silently and cannot be heard with Listen checks if it doesn't wish to be. It has no Strength score, so its Dexterity modifier applies to both its melee attack rolls and its ranged attack rolls. Nonvisual senses, such as scent and blindsight, are either ineffective or only partly effective with regard to incorporeal creatures. Incorporeal creatures have an innate sense of direction and can move at full speed even when they cannot see.

Assume Equipment (Su): Beginning at 3rd level, a psion uncarnate can designate a number of pieces of his worn equipment (including armor and weapons) equal to his psion uncarnate level to become incorporeal when he uses his shed body ability. This has no effect on the equipment's function, but now when the psion uncarnate is incorporeal, he can enter or pass through solid objects while wearing nothing other than the designated equipment. Once designated, the equipment automatically changes to incorporeal when the character sheds his body, and it returns to corporeality when the character does. The character can change his designations as he desires.

Assume Likeness (Su): At 4th level and higher, while incorporeal, a psion uncarnate can assume the likeness of any Small, Medium, or Large creature as a standard action that does not provoke attacks of opportunity. The character's abilities do not change, but he appears to be the creature that he assumes the likeness of, allowing him the ability to effectively disguise himself and bluff those who might wonder at his true nature. Each physical interaction with a creature requires a successful Bluff check (opposed by the creature's Sense Motive check) to convince the creature of the psion uncarnate's new appearance. The psion uncarnate must not do anything to give away his true (incorporeal) nature in order for the bluff to be successful; for instance, if he accepts an item from another creature only to have it fall through his immaterial hands, the Bluff check automatically fails. However, a Bluff check would be allowed if the psion uncarnate uses his telekinetic force ability (see below) to hold the received item.

When using his assume likeness ability, a psion uncarnate has an additional +10 circumstance bonus on Disguise checks. If he can read an opponent's mind, he gets a further +4 circumstance bonus on Bluff and Disguise checks.

Telekinetic Force (Su): Beginning at 7th level, while incorporeal, a psion uncarnate can use a telekinetic force effect as a standard action that does not provoke attacks of opportunity. The save DC is equal to $14 + \text{the psion uncarnate's key ability modifier}$ (either Int, Wis, or Cha). The character's manifester level is the manifester level of the effect.

Even while corporeal, a psion uncarnate can use this ability, but only three times per day (uses while he is uncarnate do not count against this use limit).

Uncarnate Bridge (Su): At 8th level, as a creature of almost pure mind, a psion uncarnate becomes more closely attuned to the minds of other creatures. He gains the ability to transport himself via the minds of living creatures. Once per day as a standard action while incorporeal, he can seamlessly enter any living creature with an Intelligence score and pass to another living creature with an Intelligence score that is within line of sight of the first creature.

The psion uncarnate must be in a space adjacent to the entry creature before transporting, and he appears in a space adjacent to the destination creature after transporting. The entry and destination creatures need not be familiar to the character. A psion uncarnate cannot use himself as the entry or destination creature. Neither creature need be a willing participant.

When exiting the destination creature, the psion uncarnate chooses an adjacent square in which to appear. Entering and leaving a creature is painless, unless the psion uncarnate wishes otherwise (see below). In most cases, though, the destination creature finds being the endpoint of a mental bridge surprising and quite unsettling.

If he desires, a psion uncarnate can destructively exit the destination creature. If the creature fails a Will save (DC 15 + psion uncarnate's key ability modifier), the exiting psion uncarnate tunes his mental form to destructively interfere with the target's mind. He bursts forth explosively from the creature's body, dealing it 10d6 points of damage.

Uncarnate (Ex): At 10th level, a psion uncarnate becomes a being of pure psionic consciousness. This ability is similar to shed body, except the character is permanently incorporeal (and gains that subtype). If the character desires, he can become corporeal once per day for up to 1 minute, but he spends the rest of his time as an entity of mind untethered by the physical world.

PYROKINETICIST

Hit Die: d8.

Requirements

To qualify to become a pyrokineticist, a character must fulfill all the following criteria.

Alignment: Any chaotic.

Skills: Concentration 8 ranks, Craft (alchemy) 1 rank, Knowledge (psionics) 2 ranks.

Psionics: Must have a power point reserve of at least 1 power point.

Special: Must have set fire to a structure of any size just to watch it burn.

Class Skills

The pyrokineticist's class skills (and the key ability for each skill) are Climb (Str), Concentration (Con), Craft (any) (Int), Intimidate (Cha), Jump (Str), and Psicraft (Int).

Skill Points at Each Level: 2 + Int modifier.

Table: The Pyrokineticist

Level	Base Attack Bonus	Fort Save	Ref Save	Will Save	Special
1st	+0	+2	+2	+0	<i>Fire lash</i>
2nd	+1	+3	+3	+0	<i>Fire adaptation, hand afire</i>
3rd	+2	+3	+3	+1	<i>Bolt of fire</i>
4th	+3	+4	+4	+1	<i>Weapon afire</i>
5th	+3	+4	+4	+1	<i>Nimbus</i>
6th	+4	+5	+5	+2	<i>Firewalk</i>
7th	+5	+5	+5	+2	<i>Fear no fire</i>
8th	+6	+6	+6	+2	<i>Greater weapon afire</i>
9th	+6	+6	+6	+3	<i>Heat death</i>
10th	+7	+7	+7	+3	<i>Conflagration</i>

Class Features

All the following are class features of the pyrokineticist prestige class.

Weapon and Armor Proficiency: Pyrokineticists gain no proficiency with any weapon or armor.

Fire Lash (Ps): A pyrokineticist gains the ability to fashion a 15-foot-long whip of fire from unstable ectoplasm as a move-equivalent action. She takes no damage from a fire lash she creates, and if she releases her hold, it immediately dissipates. The lash deals 1d8 points of fire damage to a target within 15 feet on a successful ranged touch attack. A pyro can take Weapon Focus and Weapon Specialization (if she otherwise meets the prerequisites) in conjunction with the fire lash, as well as any feats that apply to the use of a standard whip. The whip remains in existence as long as the pyrokineticist holds it.

Fire Adaptation (Ex): At 2nd level, a pyrokineticist becomes resistant to fire, gaining a +4 bonus on all saving throws against fire and heat spells and effects. In addition, she gains resistance to fire 10.

Hand Afire (Ps): A pyrokineticist of 2nd level or higher can activate this ability as a move-equivalent action. Flames engulf one of the pyrokineticist's hands (but do her no harm). Her unarmed attacks with that hand are treated as armed. Such attacks deal an extra 2d6 points of fire damage.

Bolt of Fire (Ps): Starting at 3rd level, as a standard action, a pyrokineticist can launch a bolt of psionically manifested fire at any target in line of sight within 60 feet. This effect is treated as a ranged touch attack and deals 1d6 points of fire damage for each class level the pyro has.

Weapon Afire (Ps): At 4th level and higher, a pyrokineticist can activate this ability as a move-equivalent action. Flames that harm neither her nor the weapon engulf one weapon she holds (which can be a projectile such as a stone, bullet, arrow, or bolt). The weapon deals an extra 2d6 points of fire damage on a successful hit. The weapon retains this effect for as long as the pyrokineticist wields it.

Nimbus (Ps): Beginning at 5th level, a pyrokineticist can activate this ability as a move-equivalent action. Flames that harm neither the pyrokineticist nor her equipment engulf her entire body. While she is aflame, the character's Charisma score increases by 4, she can make a melee touch attack for 2d6 points of fire damage, and she gains damage reduction 5/magic. If she is struck in melee, the attacker takes 2d6 points of fire damage. This ability lasts for up to 1 minute per pyrokineticist level and is usable once per day.

Firewalk (Su): Beginning at 6th level, as a free action a pyrokineticist can expend her psionic focus (see the Concentration skill description) to literally walk on air. She moves at her normal speed in all directions, including vertically, but cannot move more than double her speed in a round. A firewalking pyro leaves footprints of flame in the air that disperse in 2 rounds, but her tread does not deal damage. She must pay 1 power point per round spent traveling in this fashion.

Fear No Fire (Ex): At 7th level, a pyrokineticist becomes highly resistant to fire, gaining a +8 bonus on all saving throws against fire and heat spells and effects and also gaining resistance to fire 20.

Greater Weapon Afire (Ps): At 8th level, when a pyrokineticist activates her hand afire ability or her weapon afire ability, her unarmed attack or weapon deals an extra 4d6 points of fire damage instead of 2d6. Touch attacks made while she uses the nimbus ability likewise deal 4d6 points of damage instead of 2d6.

Heat Death (Ps): A pyrokineticist who reaches 9th level can expend her psionic focus and take a full attack action to raise the internal temperature of one living creature within 30 feet to lethal levels. The target must succeed on a Fortitude saving throw (DC 14 + pyro's Cha modifier) or die horrifically as its blood (or other internal fluid) boils. Even on a successful save, the target takes 4d8 points of fire damage from the heat.

Conflagration (Ps): At 10th level, a pyrokineticist gains the ability to create a massive burst of raging flames around herself, burning everything in the area. Once per day, as a standard action, she can use this ability to deal 15d6 points of fire damage in a 30-foot-radius burst emanating from herself. Any creature or object caught in the burst can make a Reflex saving throw (DC 15 + pyro's Cha modifier) for half damage. Anyone failing the Reflex save against the *conflagration* must also make a Fortitude saving throw (same DC) or die due to extreme shock from the intense heat.

THRALLHERD

Hit Die: d4.

Requirements

To qualify to become a thrallherd, a character must fulfill all the following criteria.

Skills: Diplomacy 4 ranks, Knowledge (psionics) 8 ranks.

Feat: Inquisitor.

Psionics: Manifester level 5th and able to manifest *mindlink*.

Class Skills

The thrallherd's class skills are Autohypnosis (Wis), Bluff (Cha), Concentration (Con), Craft (any) (Int), Diplomacy (Cha), Knowledge (psionics), Psicraft (Int), and Sense Motive (Wis).

Skill Points at Each Level: 2 + Int modifier.

Table: The Thrallherd

10th	+5	+3	+3	+7	Twofold master	—
------	----	----	----	----	----------------	---

Class Features

All the following are class features of the thrallherd prestige class.

Weapon and Armor Proficiency: Thrallherds gain no proficiency with any weapon or armor.

Powers Known: At every level from 2nd through 9th, a thrallherd gains additional power points per day and access to new powers as if she had also gained a level in whatever manifesting class she belonged to before she added the prestige class. She does not, however, gain any other benefit a character of that class would have gained (bonus feats, metapsionic or item creation feats, psicrystal special abilities, and so on). This essentially means that she adds the level of thrallherd to the level of whatever manifesting class the character has, then determines power points per day, powers known, and manifester level accordingly.

If a character had more than one manifesting class before she became a thrallherd, she must decide to which class she adds the new level of thrallherd for the purpose of determining power points per day, powers known, and manifester level.

Thrallherd (Ex): A thrallherd who has just entered the class sends out a subtle psychic call for servants, and that call is answered. Essentially, the character gains something akin to the Leadership feat, but with some important differences. Those who answer a thrallherd's call are not referred to as cohorts and followers, but rather as thralls and believers, respectively. They do not appear because they admire the character and want to serve her, but because a hidden psychic resonance connects the thrallherd and her servants.

As with the Leadership feat, a thrallherd has a Leadership score that determines the highest-level thrall and believers she can attract. A thrallherd's Leadership score is equal to her character level + her Cha modifier + her thrallherd level. (Note that her thrallherd level is counted twice.) This score is not affected by any of the modifiers mentioned in the Leadership feat.

As with the Leadership feat, the called thrall's level is limited, even if the character's Leadership score would indicate a higher-level thrall. Unlike with the Leadership feat, the level limit of a thrall is equal to the character's total level minus 1 (not level minus 2, as is true for cohorts).

A thrallherd cannot take the Leadership feat; if the character already has it, the feat is lost and replaced by this ability; those who were previously cohorts and followers go their separate ways, and those who are more mentally pliable show up later to take up roles as thralls and believers. A thrallherd's first thrall and believers arrive within 24 hours of her entry into this class; likewise, lost thralls and believers are replaced within 24 hours.

Use the following table instead of the one with the Leadership feat to determine the level of a thrallherd's thrall and the number of believers of various levels a thrallherd can attract.

Leadership Score	Thrall Level	Number of Believers by Level					
		1st	2nd	3rd	4th	5th	6th

24	17th	110	11	6	3	2	1
25 or higher	17th	135	13	7	4	2	2

Psionic Charm (Ex): At 3rd level, a thrallherd adds *psionic charm* to her powers known (if she doesn't already know it). Once per day, she can manifest *psionic charm* at a reduced power point cost. The cost of *psionic charm* is reduced by the thrallherd's level, to a minimum of 1 power point. The effect of this power is still restricted by the thrallherd's manifester level.

Psionic Dominate (Ex): At 5th level, a thrallherd adds *psionic dominate* to her powers known (if she doesn't already know it). Once per day, she can manifest *psionic dominate* at a reduced power point cost. The cost of *psionic dominate* is reduced by the thrallherd's level, to a minimum of 1 power point. The effect of this power is still restricted by the thrallherd's manifester level.

Greater Dominate (Ex): At 7th level and higher, a thrallherd does not have to pay 2 additional power points when she augments *psionic dominate* to affect animals, fey, giants, magical beasts, and monstrous humanoids. This reduced point cost does not increase the save DC of the power as if she had spent the additional power points.

Superior Dominate (Ex): At 9th level, a thrallherd does not have to pay 4 additional power points when she augments *psionic dominate* to affect aberrations, dragons, elementals, and outsiders (in addition to the creature types mentioned in the greater dominate ability). This reduced point cost does not increase the save DC of the power as if she had spent the additional power points.

Twofold Master (Ex): At 10th level, a thrallherd can add a second thrall to her herd. This second thrall's maximum level is equal to the thrallherd's level minus 2, even if her Leadership score would indicate a higher-level thrall.

WAR MIND

Hit Die: d10.

Requirements

To qualify to become a war mind, a character must fulfill all the following criteria.

Alignment: Any nonchaotic.

Base Attack Bonus: +3.

Skills: Knowledge (history) 2 ranks, Knowledge (psionics) 8 ranks.

Psionics: Must have a power point reserve of at least 1 power point.

Special: Must have had some instruction by another war mind.

Class Skills

The war mind's class skills (and the key ability for each skill) are Auto hypnosis (Wis), Concentration (Con), Intimidate (Cha), Knowledge (history) (Int), Knowledge (psionics) (Int), and Psicraft (Int).

Skill Points at Each Level: 2 + Int modifier.

10th	+10	+7	+7	+3	Chain of overwhelming force	70	6	5th

Class Features

All the following are class features of the war mind prestige class.

Weapon and Armor Proficiency: War minds gain no proficiency with any weapon or armor.

Power Points/Day: A war mind can manifest powers. His ability to manifest powers is limited by the power points he has available. His base daily allotment of power points is given on Table: The War Mind. In addition, he receives bonus power points per day if he has a high Wisdom score. His race may also provide bonus power points per day, as may certain feats and items. If a war mind has power points from a different class, those points are pooled together and usable to manifest powers

from either class. Bonus power points from having a high ability score can be gained only for the character's highest psionic class.

Powers Known: A war mind chooses his powers from the psychic warrior power list. At 1st level, a war mind knows one psychic warrior power of your choice. At every even-numbered level higher than 1st, he learns one new power. A war mind can manifest any power that has a power point cost equal to or lower than his manifester level. The total number of powers a war mind can manifest per day is limited only by his daily power points.

A war mind simply knows his powers; they are ingrained in his mind. He does not need to prepare them (in the way that some spellcasters prepare their spells), though he must get a good night's sleep each day to regain all his spent power points. The Difficulty Class for saving throws against war mind powers is $10 + \text{the power's level} + \text{the war mind's Wisdom modifier}$.

Maximum Power Level Known: A war mind gains the ability to learn one 1st-level power when he takes his first level in the prestige class. As he attains each even-numbered level beyond 2nd, a war mind gains the ability to master more complex powers.

To learn or manifest a power, a war mind must have a Wisdom score of at least $10 + \text{the power's level}$.

Chain of Personal Superiority (Ex): At 1st level, a war mind learns the first principle of warfare for the individual combatant: the ability to both deal punishment and take it. Calling upon inner reserves of knowledge and dedication, a war mind can provide himself with a +2 insight bonus to Strength and Constitution for up to 1 minute. A war mind can use this power three times per day. Activating this power is a free action. At 7th level, the insight bonus to Strength and Constitution improves to +4.

Chain of Defensive Posture (Ex): At 2nd level, a war mind learns the second principle of warfare for the individual combatant: the ability to avoid the enemy's counterattacks if that enemy is not immediately overwhelmed. Calling upon inner reserves of knowledge and dedication, a war mind can provide himself with a +2 insight bonus to Armor Class for up to 1 minute. A war mind can use this power three times per day. Activating this power is a free action. At 8th level, the insight bonus to Armor Class improves to +4.

Enduring Body (Ex): At 3rd level, a war mind learns the third principle of warfare for the individual combatant: to unleash in oneself the spirit of the enduring body. The spirit of the ideal body transforms a war mind, granting him damage reduction 1/-. At 6th level, his damage reduction improves to 2/-. At 9th level, his damage reduction improves to 3/-.

Sweeping Strike (Ex): At 5th level, a war mind gains the ability to make great, sweeping swings with a melee weapon. On each melee attack a war mind makes, he can choose squares he threatens that are adjacent to each other, and his attacks apply to creatures in those two squares equally. A war mind can use this ability on any attack, even an attack of opportunity or a cleave attempt.

A war mind cannot use this ability if he has moved more than 10 feet since the end of his last turn. If a war mind drops one or both of his foes with a sweeping strike, he can attempt a cleave normally; however, he makes only one cleave attempt per sweeping strike, even if he drops more than one foe.

Chain of Overwhelming Force (Su): At 10th level, a war mind learns the fourth principle of warfare for the individual combatant: to discover the underlying violence of the world and deliver it in a perfectly executed attack.

The war mind taps into this underlying energy and apply it to a single attack, dealing an extra 10d6 points of damage. A war mind can use this power once per day. Activating this power is a free action. If the attack misses, the power is wasted.

PSIONIC SKILLS

SKILL DESCRIPTIONS

The skills below relate to the use of psionics. In addition to three new skills (Autohypnosis, Psicraft, and Use Psionic Device), a new category is provided for the Knowledge skill, and new uses are given for Concentration.

Table: Skill Synergies

5 or more ranks in...	Gives a +2 bonus on...
Autohypnosis	Knowledge (psionics) checks
Concentration	Autohypnosis checks
Knowledge (psionics)	Psicraft
Psicraft	Use Psionic Device checks involving power stones
Use Psionic Device	Psicraft checks to address power stones

AUTOHYPNOSIS (WIS; TRAINED ONLY)

You have trained your mind to gain mastery over your body and the mind's own deepest capabilities.

Check: The DC and the effect of a successful check depend on the task you attempt.

Task	DC
Ignore caltrop wound	18
Memorize	15
Resist dying	20
Resist fear Fear effect	DC
Tolerate poison Poison's	DC
Willpower	20

Ignore Caltrop Wound: If you are wounded by stepping on a caltrop, your speed is reduced to one-half normal. A successful Autohypnosis check removes this movement penalty. The wound doesn't go away—it is just ignored through self-persuasion.

Memorize: You can attempt to memorize a long string of numbers, a long passage of verse, or some other particularly difficult piece of information (but you can't memorize magical writing or similarly exotic scripts). Each successful check allows you to memorize a single page of text (up to 800 words), numbers, diagrams, or sigils (even if you don't recognize their meaning). If a document is longer than one page, you can make additional checks for each additional page. You always retain this information; however, you can recall it only with another successful Autohypnosis check.

Resist Dying: You can attempt to subconsciously prevent yourself from dying. If you have negative hit points and are losing hit points (at 1 per round, 1 per hour), you can substitute a DC 15 Autohypnosis check for your d% roll to see if you become stable. If the check is successful, you stop losing hit points (you do not gain any hit points, however, as a result of the check). You can substitute this check for the d% roll in later rounds if you are initially unsuccessful.

Resist Fear: In response to any fear effect, you make a saving throw normally. If you fail the saving throw, you can make an Autohypnosis check on your next round even while overcome by fear. If your autohypnosis check meets or beats the DC for the fear effect, you shrug off the fear. On a failed check, the fear affects you normally, and you gain no further attempts to shrug off that particular fear effect.

Tolerate Poison: You can choose to substitute an Autohypnosis check for a saving throw against any standard poison's secondary damage or effect. This skill has no effect on the initial saving throw against poison.

Willpower: If reduced to 0 hit points (disabled), you can make an Autohypnosis check. If successful, you can take a normal action while at 0 hit points without taking 1 point of damage. You must make a check for each strenuous action you want to take. A failed Autohypnosis check in this circumstance carries no direct penalty—you can choose not to take the strenuous action and thus avoid the hit point loss. If you do so anyway, you drop to -1 hit points, as normal when disabled.

Action: None. Making an Autohypnosis check doesn't require an action; it is either a free action (when attempted reactively) or part of another action (when attempted actively).

Try Again: Yes, for memorize and willpower uses, though a success doesn't cancel the effects of a previous failure. No for the other uses.

Synergy: If you have 5 or more ranks in Autohypnosis, you get a +2 bonus on Knowledge (psionics) checks.

If you have 5 or more ranks in Concentration, you get a +2 bonus on Autohypnosis checks.

CONCENTRATION (CON)

You are particularly good at focusing your mind.

The following are additional uses for the concentration skill.

Check: You must make a Concentration check whenever you might potentially be distracted (by taking damage, by harsh weather, and so on) while engaged in some action that requires your full attention. Such actions include manifesting a power, concentrating on an active power, directing a power, or using a psi-like ability.

If the Concentration check succeeds, you can continue with the action as normal. If the check fails, the action automatically fails and is wasted. If you were in the process of manifesting a power, the power points are lost. If you were concentrating on an active power, the power ends as if you had ceased concentrating on it. If you were directing a power, the direction fails but the power remains active. If you were using a psi-like ability, that use of the ability is lost.

The table below summarizes various types of distractions that cause you to make a Concentration check. If the distraction occurs while you are trying to manifest a power, you must add the level of the power you are trying to manifest to the appropriate Concentration DC.

Concentration DC ¹	Distraction
10 + damage dealt	Damaged during the action. ²
10 + half of continuous damage last dealt	Taking continuous damage during the action. ³
15 + power level	Attempting to manifest a power without its display.
15	Entangled.
Distracting power's save DC	Distracted by nondamaging power. ⁴
20	Gain psionic focus.
20	Grappling or pinned. (You can manifest powers normally unless you fail your Concentration check.)
Distracting power's save DC	Weather caused by power ⁴

¹ If you are trying to manifest, concentrate on, or direct a power when the distraction occurs, add the level of the power to the indicated DC.

² Such as during the manifestation of a power with a manifesting time of 1 round or more. Also from an attack of opportunity or readied attack made in response to the power being manifested (for powers with a manifesting time of 1 action) or the action being taken (for activities requiring no more than a full-round action).

³ Such as from standing in natural fire or lava.

⁴ If the power allows no save, use the save DC it would have if it did allow a save.

Gain Psionic Focus: Merely holding a reservoir of psionic power points in mind gives psionic characters a special energy. Psionic characters can put that energy to work without actually paying a power point cost—they can become psionically focused as a special use of the Concentration skill.

If you have 1 or more power points available, you can meditate to attempt to become psionically focused. The DC to become psionically focused is 20. Meditating is a full-round action that provokes attacks of opportunity. When you are psionically focused, you can expend your focus on any single Concentration check you make thereafter. When you expend your focus in this manner, your Concentration check is treated as if you rolled a 15. It's like taking 10, except that the number you add to your Concentration modifier is 15. You can also expend your focus to gain the benefit of a psionic feat—many psionic feats are activated in this way.

Once you are psionically focused, you remain focused until you expend your focus, become unconscious, or go to sleep (or enter a meditative trance, in the case of elans), or until your power point reserve drops to 0.

Action: Usually none. In most cases, making a Concentration check doesn't require an action; it is either a free action (when attempted reactively) or part of another action (when attempted actively). Meditating to gain psionic focus is a full-round action.

Try Again: Yes, though a success doesn't cancel the effects of a previous failure, such as the loss of the power points for a power being manifested or the disruption of a power being concentrated on.

Special: You can use Concentration to manifest a power or use a psi-like ability defensively, so as to avoid attacks of opportunity altogether. The DC of the check is 15 + the power's level. If the Concentration check succeeds, you can manifest normally without provoking any attacks of opportunity. If the Concentration check fails, the power also automatically fails and the power points are wasted, just as if your concentration had been disrupted by a distraction.

A character with the Combat Manifestation feat gets a +4 bonus on Concentration checks made to manifest a power or use a psi-like ability while on the defensive or while grappling or pinned.

Synergy: If you have 5 or more ranks in Concentration, you get a +2 bonus on Autohypnosis checks.

KNOWLEDGE (PSIONICS) (INT)

Like the Craft and Profession skills, Knowledge actually encompasses a number of unrelated skills. This entry specifically relates to the body of lore dealing with the phenomena of psionics in all its many manifestations.

Knowledge (psionics) covers ancient mysteries, psionic traditions, psychic symbols, cryptic phrases, astral constructs, and psionic races. You can use this skill to identify psionic monsters and their special powers or vulnerabilities.

Synergy: If you have 5 or more ranks in Knowledge (psionics), you get a +2 bonus on Psicraft checks.

If you have 5 or more ranks in Autohypnosis, you get a +2 bonus on Knowledge (psionics) checks.

Untrained: An untrained Knowledge (psionics) check is simply an Intelligence check. Without actual training, you know only common knowledge (DC 10 or lower).

PSICRAFT (INT; TRAINED ONLY)

Use this skill to identify powers as they are manifest or powers already in place.

Check: You can identify powers and psionic effects. The DCs for Psicraft checks relating to various tasks are summarized on the table below.

Psicraft DC	Task
15 + power level	Identify a power being manifested. (You must sense the power's display, or see some visible effect, to identify a power.) No action required. No retry.
15 + power level	When manifesting detect psionics, determine the discipline involved in the aura of a single item or creature you can see. (If the aura is not a power effect, the DC is 15 + 1/2 manifester level.) No action required.
15 + power level	Address a power stone to figure out what power or powers it contains.
20 + power level	Identify a power that's already in place and in effect. You must be able to see or detect the effects of the power. No action required. No retry.
20 + power level	Identify materials created or shaped by psionics, such as noting that a particular object was created using a metacreativity power. No action required. No retry.
25 + power level	After rolling a saving throw against a power targeted on you, determine what that power was. No action required. No retry.
25	Identify a psionic tattoo. Requires 1 minute. No retry.
20	Draw a diagram to enhance manifestation of psionic dimensional anchor on a summoned creature. Requires 10 minutes. No retry. The player does not see the result of this check.
30 or higher	Understand a strange or unique psionic effect, such as the effects of an outcrop of psionically resonant crystal. Time required varies. No retry.

Additionally, certain powers allow you to gain information about psionic effects, provided that you make a successful Psicraft check as detailed in the power description.

Action: Varies, as noted above.

Try Again: See above.

Special: A psion gains a +2 bonus on Psicraft checks when dealing with a power or effect from his discipline.

If you have the Psionic Affinity feat, you get a +2 bonus on Psicraft checks.

Synergy: If you have 5 or more ranks in Psicraft, you get a +2 bonus on Use Psionic Device checks related to power stones.

If you have 5 or more ranks in Use Psionic Device, you get a +2 bonus on Psicraft checks to address power stones.

USE PSIONIC DEVICE (CHA; TRAINED ONLY)

Use this skill to activate psionic devices, including power stones (chunks of crystal that store specific powers) and dorjes (slender crystal wands charged with several uses of the same power), that otherwise you could not activate.

Check: You can use this skill to address a power stone (to learn what powers are encoded on it) or to activate a psionic item. This skill lets you use a psionic item as if you had the manifesting ability or class features of another class, as if you were a different race, or as if you were a different alignment.

You make Use Psionic Device checks each time you activate a device such as a dorje. If you are using the check to emulate an alignment or some other quality in an ongoing manner, you need to make the relevant emulation checks once per hour. You must consciously choose what to emulate. That is, you must know what you are trying to emulate when you make an emulation check. The DCs for various tasks involving Use Psionic Device are summarized on the table below.

Use Psionic Device DC	Task
25	Activate blindly
25 + power level	Address a power stone

See text	Emulate an ability score
30	Emulate an alignment
20	Emulate a class feature
25	Emulate a race
20	Use a dorje
20 + manifester level	Use a power stone

Activate Blindly: Some psionic items are activated by special specific thoughts or conceptions. You can activate such items as if you were using the activation method, even if you're not and even if you don't know it. You do have to use something equivalent. You have to wave the item around or otherwise attempt to get it to activate. You get a special +2 bonus if you've activated the item at least once before.

If you fail the check by 10 or more, you suffer brainburn. This brainburn affects you in the same way as brainburn that can occur when you attempt to manifest a power from a power stone, except that the damage is 1d4 points per power level instead of 1d6. Brainburn damage from activating blindly is in addition to brainburn damage from manifesting a power from a power stone.

Address a Power Stone: Successfully addressing a power stone allows you to find out what power or powers it contains. Doing this requires 1 minute of concentration.

Emulate an Ability Score: To manifest a power from a power stone, you need a high ability score in the appropriate ability. Your effective ability score (appropriate to the class you're emulating when you try to manifest the power from the power stone) is your check result minus 15. If you already have a high enough score in the appropriate ability, you don't need to make this check.

Emulate an Alignment: Some psionic items have positive or negative effects based on your alignment. Use Psionic Device lets you use these items as if you were of an alignment of your choice. You can emulate only one alignment at a time.

Emulate a Class Feature: Sometimes you need to use a class feature to activate a psionic item. Your effective level in the emulated class equals your check result minus 20. This skill does not let you use the class feature of another class. It just lets you activate items as if you had the class feature.

If the class whose feature you are emulating has an alignment requirement, you must meet it, either honestly or by emulating an appropriate alignment as a separate check (see above).

Emulate a Race: Some psionic items work only for certain races, or work better for those of certain races. You can use such an item as if you were a race of your choice. You can emulate only one race at a time.

Use a Dorje: Normally, to use a dorje, you must have the dorje's power on your class power list. This use of the skill allows you to use a dorje as if you had a particular power on your class power list. This use of the skill applies to other power trigger psionic items, if applicable.

Use a Power Stone: Normally, to manifest a power from a power stone, you must have the power stone's power on your class power list. This use of the skill allows you to use a power stone as if you had a particular power on your class power list. The DC is equal to 20 + the manifester level of the power you are trying to manifest from the power stone. **Note:** Before you use a power stone, you must first have addressed it to determine what powers it contains. In addition, manifesting a power from a power stone requires a minimum score (10 + power level) in the appropriate ability. If you don't have a high enough score, you must emulate the ability score with a separate check (see above). This use of the skill applies to other power completion psionic items.

Action: None. The Use Psionic Device check is made as part of the action (if any) required to activate the psionic item.

Try Again: Yes, but if you ever roll a natural 1 while attempting to activate an item and you fail, you can't try to activate it again for a day.

Special: You cannot take 10 with this skill.

You can't aid another on Use Psionic Device checks. Only the user of the item can attempt such a check.

A character with the Psionic Affinity feat gets a +2 bonus on Use Psionic Device checks.

Synergy: If you have 5 or more ranks in Psicraft, you get a +2 bonus on Use Magic Device checks related to power stones. If you have 5 or more ranks in Use Psionic Device, you get a +2 bonus on Psicraft checks to address power stones.

PSIONIC FEATS

Psionic feats are available only to characters and creatures with the ability to manifest powers. (In other words, they either have a power point reserve or have psi-like abilities.)

Because psionic feats are supernatural abilities—a departure from the general rule that feats do not grant supernatural abilities—they cannot be disrupted in combat (as powers can be) and generally do not provoke attacks of opportunity (except as noted in their descriptions). Supernatural abilities are not subject to power resistance and cannot be dispelled; however, they do not function in areas where psionics is suppressed, such as a *null psionics field*. Leaving such an area immediately allows psionic feats to be used.

Many psionic feats can be used only when you are psionically focused; others require you to expend your psionic focus to gain their benefit. Expending your psionic focus does not require an action; it is part of another action (such as using a feat). When you expend your psionic focus, it applies only to the action for which you expended it.

PSIONIC ITEM CREATION FEATS

Manifesters can use their personal power to create lasting psionic items. Doing so, however, is draining. A manifester must put a little of himself or herself into every psionic item he or she creates.

A psionic item creation feat lets a manifester create a psionic item of a certain type. Regardless of the type of items they involve, the various item creation feats all have certain features in common.

XP Cost: Power and energy that the manifester would normally keep is expended when making a psionic item. The experience point cost of using a psionic item creation feat equals 1/25 the cost of the item in gold pieces. A character cannot spend so much XP on an item that he or she loses a level. However, upon gaining enough XP to attain a new level, he or she can immediately expend XP on creating an item rather than keeping the XP to advance a level.

Raw Materials Cost: Creating a psionic item requires costly components, most of which are consumed in the process. The cost of these materials equals 1/2 the cost of the item.

Using a psionic item creation feat also requires access to a laboratory or psionic workshop, special tools, and other equipment. A character generally has access to what he or she needs unless unusual circumstances apply (such as if he's traveling far from home).

Time: The time to create a psionic item depends on the feat and the cost of the item. The minimum time is one day.

Item Cost: Craft Dorje, Imprint Stone, and Scribe Tattoo create items that directly reproduce the effects of powers, and the strength of these items depends on their manifester level—that is, a power from such an item has the strength it would have if manifested by a manifester of that level. Often, that is the minimum manifester level necessary to manifest the power.

(Randomly discovered items usually follow this rule.) However, when making such an item, the item's strength can be set higher than the minimum. Any time a character creates an item using a power augmented by spending additional power points, the character's effective manifester level for the purpose of calculating the item's cost increases by 1 for each 1 additional power point spent. (Augmentation is a feature of many powers that allows the power to be amplified in various ways if additional power points are spent.) All other level-dependent parameters of the power forged into the item are set according to the effective manifester level.

The price of psionic items (and thus the XP cost and the cost of the raw materials) depends on the level of the power and a character's manifester level. The character's manifester level must be high enough that the item creator can manifest the power at the chosen level. To find the final price in each case, multiply the character's manifester level by the power level, then multiply the result by a constant, as shown below.

Power Stones: Base price = power level x manifester level x 25 gp

Psionic Tattoos: Base price = power level x manifester level x 50 gp

Dorjes: Base price = power level x manifester level x 750 gp

Extra Costs: Any dorje, power stone, or psionic tattoo that stores a power with an XP cost also carries a commensurate cost. For psionic tattoos and power stones, the creator must pay the XP cost when creating the item. For a dorje, the creator must pay fifty times the XP cost.

Some psionic items similarly incur extra costs in XP, as noted in their descriptions.

METAPSIONIC FEATS

As a manifester's knowledge of psionics grows, he can learn to manifest powers in ways slightly different from how the powers were originally designed or learned. Of course, manifesting a power while using a metapsionic feat is more expensive than manifesting the power normally.

Manifesting Time: Powers manifested using metapsionic feats take the same time as manifesting the powers normally unless the feat description specifically says otherwise.

Manifestation Cost: To use a metapsionic feat, a psionic character must both expend his psionic focus (see the Concentration skill description) and pay an increased power point cost as given in the feat description.

Limits on Use: As with all powers, you cannot spend more power points on a power than your manifester level. Metapsionic feats merely let you manifest powers in different ways; they do not let you violate this rule.

Effects of Metapsionic Feats on a Power: In all ways, a metapsionic power operates at its original power level, even though it costs additional power points. The modifications to a power made by a metapsionic feat have only their noted effect on the power. A manifester can't use a metapsionic feat to alter a power being cast from a power stone, dorje, or other device. Manifesting a power modified by the Quicken Power feat does not provoke attacks of opportunity. Some metapsionic feats apply only to certain powers, as described in each specific feat entry.

Psionic Items and Metapsionic Powers: With the right psionic item creation feat, you can store a metapsionic power in a power stone, psionic tattoo, or dorje. Level limits for psionic tattoos apply to the power's higher metapsionic level.

A character doesn't need the appropriate metapsionic feat to activate an item in which a metapsionic power is stored, but does need the metapsionic feat to create such an item.

FEAT DESCRIPTIONS

These feat descriptions follow the standard format.

ALIGNED ATTACK [PSIONIC]

Your melee or ranged attack overcomes your opponent's alignment-based damage reduction and deals additional damage.

Prerequisite: Base attack bonus +6.

Benefit: When you take this feat, choose either chaos, good, evil or law. (Your choice must match one of your alignment components. Once you've made this alignment choice, it cannot be changed.)

To use this feat, you must expend your psionic focus. When you make a successful melee or ranged attack, you deal an extra 1d6 points of damage, and your attack is treated as either a good, evil, chaotic, or lawful attack (depending on your original choice) for the purpose of overcoming damage reduction.

You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

ANTIPSIONIC MAGIC [GENERAL]

Your spells are more potent when used against psionic characters and creatures.

Prerequisite: Spellcraft 5 ranks.

Benefit: You get a +2 bonus on caster level checks made to overcome a psionic creature's power resistance.

This bonus stacks with the bonus conferred by Spell Penetration and Greater Spell Penetration. Moreover, whenever a psionic creature attempts to dispel a spell you cast, it makes its manifester level check against a DC of 13 + its manifester level.

The benefits of this feat apply only to power resistance.

The bonus does not apply to spell resistance. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

AUTONOMOUS [GENERAL]

You have a knack for psionic self-sufficiency.

Benefit: You get a +2 bonus on all Autohypnosis checks and Knowledge (psionics) checks.

BODY FUEL [PSIONIC]

You can expand your power point total at the expense of your health.

Benefit: You can recover 2 power points by taking 1 point of ability burn damage to each of your three ability scores: Strength, Dexterity, and Constitution.

You can recover additional power points for a proportional cost to Strength, Dexterity, and Constitution. These recovered points are added to your power point reserve as if you had gained them by resting overnight.

Special: Only living creatures can use this feat. You can take advantage of this feat only while in your own body.

BOOST CONSTRUCT [PSIONIC]

Your astral constructs have more abilities.

Benefit: When you create an astral construct, you can give it one additional special ability from any menu that the construct currently has an ability from.

BURROWING POWER [METAPSIONIC]

Your powers sometimes bypass barriers.

Benefit: To use this feat, you must expend your psionic focus. You can attempt to manifest your powers against targets that are sheltered behind a wall or force effect. Your power briefly skips through the Astral Plane to bypass the barrier. The strength and thickness of the barrier determine your chance of success. To successfully bypass the barrier with your power, you make a Psicraft check against a DC equal to $10 + \text{hardness of the barrier} + 1 \text{ per foot of thickness}$ (minimum 1). Assign a hardness of 20 to barriers without a hardness rating, such as force effects (or a *wall of ectoplasm*). Force walls or *walls of ectoplasm* are assumed to have less than 1 foot of thickness unless noted otherwise. If a power requires line of sight (which includes most powers that affect a target or targets instead of an area), you cannot manifest it as a burrowing power unless you can somehow see the target, such as with *clairvoyant sense*. Using this feat increases the power point cost of the power by 2. The power's total cost cannot exceed your manifester level.

CHAIN POWER [METAPSIONIC]

You can manifest powers that arc to hit other targets in addition to the primary target.

Benefit: To use this feat, you must expend your psionic focus. You can chain any power that affects a single target and that deals either acid, cold, electricity, fire, or sonic damage. After the primary target is struck, the power can arc to a number of secondary targets equal to your manifester level (maximum twenty). The secondary arcs each strike one target and deal half as much damage as the primary one did (round down).

Each target gets to make a saving throw, if one is allowed by the power. You choose secondary targets as you like, but they must all be within 30 feet of the primary target, and no target can be struck more than once. You can choose to affect fewer secondary targets than the maximum (to avoid allies in the area, for example).

Using this feat increases the power point cost of the power by 6. The power's total cost cannot exceed your manifester level.

CHAOTIC MIND [GENERAL]

The turbulence of your thoughts prevents others from gaining insight into your actions.

Prerequisite: Chaotic alignment, Cha 15.

Benefit: Creatures and characters who have an insight bonus on their attack rolls, an insight bonus to their Armor Class, or an insight bonus on skill checks or ability checks do not gain those bonuses against you.

The benefit of this feat applies only to insight bonuses gained from psionic powers and psi-like abilities. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

CLOAK DANCE [GENERAL]

You are skilled at using optical tricks to make yourself seem to be where you are not.

Prerequisites: Hide 10 ranks, Perform (dance) 2 ranks.

Benefit: You can take a move action to obscure your exact position. Until your next turn, you have concealment.

Alternatively, you can take a full-round action to entirely obscure your exact position. Until your next action, you have total concealment.

CLOSED MIND [GENERAL]

Your mind is better able to resist psionics than normal.

Benefit: You get a +2 bonus on all saving throws to resist powers.

The benefit of this feat applies only to psionic powers and psi-like abilities. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

COMBAT MANIFESTATION [PSIONIC]

You are adept at manifesting powers in combat.

Benefit: You get a +4 bonus on Concentration checks made to manifest a power or use a psi-like ability while on the defensive or while you are grappling or pinned.

CRAFT COGNIZANCE CRYSTAL [ITEM CREATION]

You can create psionic *cognizance crystals* that store power points.

Prerequisite: Manifester level 3rd.

Benefit: You can create a *cognizance crystal*. Doing so takes one day for each 1,000 gp in its base price. The base price of a *cognizance crystal* is equal to the highest-level power it could manifest using all its stored power points, squared, multiplied by 1,000 gp. To create a *cognizance crystal*, you must spend 1/25 of its base price in XP and use up raw materials costing one-half its base price.

CRAFT DORJE [ITEM CREATION]

You can create slender crystal wands called dorjes than manifest powers when charges are expended.

Prerequisite: Manifester level 5th.

Benefit: You can create a dorje of any psionic power you know (barring exceptions, such as *bestow power*, as noted in a power's description). Crafting a dorje takes one day for each 1,000 gp in its base price. The base price of a dorje is its manifester level x the power level x 750 gp. To craft a dorje, you must spend 1/25 of this base price in XP and use up raw materials costing one-half of this base price.

A newly created dorje has 50 charges.

Any dorje that stores a power with an XP cost also carries a commensurate cost. In addition to the XP cost derived from the base price, you must pay fifty times the XP cost.

CRAFT PSICROWN [ITEM CREATION]

You can create psicrowns, which have multiple psionic effects.

Prerequisite: Manifester level 12th.

Benefit: You can create any psicrown whose prerequisites you meet. Crafting a psicrown takes one day for each 1,000 gp in its base price. To craft a psicrown, you must spend 1/25 of its base price in XP and use up raw materials costing one-half of its base price. Some psicrowns incur extra costs in XP as noted in their descriptions. These costs are in addition to those derived from the psicrown's base price.

CRAFT PSIONIC ARMS AND ARMOR [ITEM CREATION]

You can create psionic weapons, armor, and shields.

Prerequisite: Manifester level 5th.

Benefit: You can create any psionic weapon, armor, or shield whose prerequisites you meet. Enhancing a weapon, suit of armor, or shield takes one day for each 1,000 gp in the price of its psionic features. To enhance a weapon, you must spend 1/25 of its features' total price in XP and use up raw materials costing one-half of this total price.

The weapon, armor, or shield to be enhanced must be a masterwork item that you provide. Its cost is not included in the above cost.

You can also mend a broken psionic weapon, suit of armor, or shield if it is one that you could make. Doing so costs half the XP, half the raw materials, and half the time it would take to enhance that item in the first place.

CRAFT PSIONIC CONSTRUCT [ITEM CREATION]

You can create golems and other psionic automatons that obey your orders.

Prerequisites: Craft Psionic Arms and Armor, Craft Universal Item.

Benefit: You can create any psionic construct whose prerequisites you meet. Creating a construct takes one day for each 1,000 gp in its base price. To create a construct, you must spend 1/25 of the construct's base price in XP and use up raw materials costing one-half of this price. A newly created construct has average hit points for its Hit Dice.

CRAFT UNIVERSAL ITEM [ITEM CREATION]

You can create universal psionic items.

Prerequisite: Manifester level 3rd.

Benefit: You can create any universal psionic item whose prerequisites you meet. Crafting a universal psionic item takes one day for each 1,000 gp in its base price. To craft a universal psionic item, you must spend 1/25 of the item's base price in XP and use up raw materials costing one-half of this price.

You can also mend a broken universal item if it is one that you could make. Doing so costs half the XP, half the raw materials, and half the time it would take to craft that item in the first place.

Some universal items incur extra costs in XP, as noted in their descriptions. These costs are in addition to those derived from the item's base price. You must pay such a cost to create an item or to mend a broken one.

DEADLY PRECISION [GENERAL]

You empty your mind of all distracting emotion, becoming an instrument of deadly precision.

Prerequisite: Dex 15, base attack bonus +5.

Benefit: You have deadly accuracy with your sneak attacks. You can reroll any result of 1 on your sneak attack's extra damage dice. You must keep the result of the reroll, even if it is another 1.

DEEP IMPACT [PSIONIC]

You can strike your foe with a melee weapon as if making a touch attack.

Prerequisite: Str 13, Psionic Weapon, base attack bonus +5.

Benefit: To use this feat, you must expend your psionic focus. You can resolve your attack with a melee weapon as a touch attack. You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

DELAY POWER [METAPSIONIC]

You can manifest powers that go off up to 5 rounds later.

Benefit: To use this feat, you must expend your psionic focus. You can manifest a power as a delayed power. A delayed power doesn't activate immediately. When you manifest the power, you choose one of three trigger mechanisms: (1) The power activates when you take a standard action to activate it; (2) It activates when a creature enters the area that the power will affect (only powers that affect areas can use this trigger condition); or (3) It activates on your turn after 5 rounds pass. If you choose one of the first two triggers and the conditions are not met within 5 rounds, the power activates automatically on the fifth round.

Only area and personal powers can be delayed.

Any decisions you would make about the delayed power, including attack rolls, designating targets, or determining or shaping an area, are decided when the power is manifested. Any effects resolved by those affected by the power, including saving throws, are decided when the delay period ends.

A delayed power can be dispelled normally during the delay, and can be detected normally in the area or on the target by the use of powers that can detect psionic effects.

Using this feat increases the power point cost of the power by 2. The power's total cost cannot exceed your manifester level.

EMPOWER POWER [METAPSIONIC]

You can manifest powers to greater effect.

Benefit: To use this feat, you must expend your psionic focus.

You can empower a power. All variable, numeric effects of an empowered power are increased by one-half. An empowered power deals half again as much damage as normal, cures half again as many hit points, affects half again as many targets, and so forth, as appropriate. Augmented powers can also be empowered (multiply 1-1/2 times the damage total of the augmented power). Saving throws and opposed checks (such as the one you make when you manifest *dispel psionics*) are not affected, nor are powers without random variables.

Using this feat increases the power point cost of the power by 2. The power's total cost cannot exceed your manifester level.

ENLARGE POWER [METAPSIONIC]

You can manifest powers farther than normal.

Benefit: To use this feat, you must expend your psionic focus. You can alter a power with a range of close, medium, or long to increase its range by 100%. An enlarged power with a range of close has a range of 50 feet + 5 feet per level, a medium-range power has a range of 200 feet + 20 feet per level, and a long-range power has a range of 800 feet + 80 feet per level. Powers whose ranges are not defined by distance, as well as powers whose ranges are not close, medium, or long, are not affected.

Using this feat does not increase the power point cost of the power.

EXPANDED KNOWLEDGE [PSIONIC]

You learn another power.

Prerequisites: Manifester level 3rd.

Benefit: Add to your powers known one additional power of any level up to one level lower than the highest-level power you can manifest. You can choose any power, including powers from another discipline's list or even from another class's list.

Special: You can gain this feat multiple times. Each time, you learn one new power at any level up to one less than the highest-level power you can manifest.

EXTEND POWER [METAPSIONIC]

You can manifest powers that last longer than normal.

Benefit: To use this feat, you must expend your psionic focus.

You can manifest an extended power. An extended power lasts twice as long as normal. A power with a duration of concentration, instantaneous, or permanent is not affected by this feat.

Using this feat increases the power point cost of the power by 2. The power's total cost cannot exceed your manifester level.

FELL SHOT [PSIONIC]

You can strike your foe with a ranged weapon as if making a touch attack.

Prerequisite: Dex 13, Point Blank Shot, Psionic Shot, base attack bonus +5.

Benefit: To use this feat, you must expend your psionic focus. You can resolve your ranged attack as a ranged touch attack. You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

FOCUSED SUNDER [PSIONIC]

You can sense the stress points on others' weapons.

Prerequisite: Str 13, Power Attack, Improved Sunder.

Benefit: To use this feat, you must expend your psionic focus.

When you strike at an opponent's weapon, you ignore half of the weapon's total hardness (round down). Total hardness includes any magical or psionic enhancements possessed by the weapon that increase its hardness.

Special: You can also sense the stress points in any hard construction, such as wooden doors or stone walls, and can ignore half of the object's total hardness (round down) when attacking that object.

FORCE OF WILL [GENERAL]

You are able to resist psionic attacks with extreme force of will.

Prerequisite: Iron Will.

Benefit: Once per round, when targeted by a psionic effect that allows a Reflex save or a Fortitude save, you can instead make a Will saving throw to avoid the effect.

The benefit of this feat applies only to psionic powers and psi-like abilities. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

GHOST ATTACK [PSIONIC]

Your deadly strikes against incorporeal foes always find their mark.

Prerequisite: Base attack bonus +3.

Benefit: You must be psionically focused to use this feat. When you make a melee attack or a ranged attack against an incorporeal creature, you can make two rolls to check for the miss chance. If either is successful, the attack is treated as if it were made with a ghost touch weapon for the purpose of affecting the creature. Your weapon or natural weapon actually appears to become briefly incorporeal as the attack is made.

GREATER MANYSHOT [GENERAL]

You are skilled at firing many arrows at once, even at different opponents.

Prerequisites: Dex 17, Manyshot, Point Blank Shot, Rapid Shot, base attack bonus +6.

Benefit: When you use the Manyshot feat, you can fire each arrow at a different target instead of firing all of them at the same target. You make a separate attack roll for each arrow, regardless of whether you fire them at separate targets or the same target. Your precision-based damage applies to each arrow fired, and, if you score a critical hit with more than one of the arrows, each critical hit deals critical damage.

Special: A fighter may select this feat as one of his fighter bonus feats.

GREATER POWER PENETRATION [PSIONIC]

Your powers are especially potent at breaking through power resistance.

Prerequisite: Power Penetration.

Benefit: To use this feat, you must expend your psionic focus. You get a +4 bonus on manifester level checks to overcome a creature's power resistance. This bonus stacks with the bonus from Power Penetration.

GREATER POWER SPECIALIZATION [PSIONIC]

You deal more damage with your powers.

Prerequisites: Power Specialization, Weapon Focus (ray), manifester level 12th.

Benefit: Your powers that deal damage deal an extra 2 points of damage. This damage stacks with other bonuses on damage rolls to powers, including the one from Power Specialization. The damage bonus applies only if the target or targets are within 30 feet.

GREATER PSIONIC ENDOWMENT [PSIONIC]

You can use meditation to focus your powers.

Prerequisite: Psionic Endowment.

Benefit: When you use the Psionic Endowment feat, you add +2 to the save DC of a power you manifest instead of +1.

GREATER PSIONIC FIST [PSIONIC]

You can charge your unarmed strike or natural weapon with additional damage potential.

Prerequisite: Str 13, Psionic Fist, base attack bonus +5.

Benefit: When you use the Psionic Fist feat, your unarmed attack or attack with a natural weapon deals an extra 4d6 points of damage instead of an extra 2d6 points.

GREATER PSIONIC SHOT [PSIONIC]

You can charge your ranged attacks with additional damage potential.

Prerequisite: Point Blank Shot, Psionic Shot, base attack bonus +5.

Benefit: When you use the Psionic Shot feat, your ranged attack deals an extra 4d6 points of damage instead of an extra 2d6 points.

GREATER PSIONIC WEAPON [PSIONIC]

You can charge your melee weapon with additional damage potential.

Prerequisite: Str 13, Psionic Weapon, base attack bonus +5.

Benefit: When you use the Psionic Weapon feat, your attack with a melee weapon deals an extra 4d6 points of damage instead of an extra 2d6 points.

HOSTILE MIND [GENERAL]

Your mind recoils violently against those who use psionics against you.

Prerequisite: Cha 15.

Benefit: Whenever you are subject to a power from the telepathy discipline (regardless of whether the power is harmful or beneficial to you), the manifester must make a Will saving throw against a DC of $10 + 1/2$ your character level + your Charisma bonus or take 2d6 points of damage.

The benefit of this feat applies only to psionic powers and psi-like abilities. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

IMPRINT STONE [ITEM CREATION]

You can create power stones to store psionic powers.

Prerequisite: Manifester level 1st.

Benefit: You can create a power stone of any power that you know. Encoding a power stone takes one day for each 1,000 gp in its base price. The base price of a power stone is the level of the stored power x its manifester level x 25 gp. To imprint a power stone, you must spend 1/25 of this base price in XP and use up raw materials costing one-half of this base price. Any power stone that stores a power with an XP cost also carries a commensurate cost. In addition to the costs derived from the base price, you must pay the XP when encoding the stone.

IMPROVED PSICRYSTAL [PSIONIC]

You can upgrade your psicrystal.

Prerequisites: Psicrystal Affinity.

Benefit: You can implant another personality fragment in your psicrystal. You gain the benefits of both psicrystal personalities. Your psicrystal's personality adjusts and becomes a blend between all implanted personality fragments. From now on, when determining the abilities of your psicrystal, treat your manifester level as one higher than your normal manifester level.

Special: You can gain this feat multiple times. Each time, you implant a new personality fragment in your psicrystal, from which you derive the noted benefits, and you treat your level as one higher for the purpose of determining your psicrystal's abilities.

INQUISITOR [PSIONIC]

You know when others lie.

Prerequisite: Wis 13.

Benefit: To use this feat, you must expend your psionic focus.

You gain a +10 bonus on a Sense Motive check to oppose a Bluff check.

You must decide whether or not to use this feat prior to making a Sense Motive check. If your check fails, or if the opponent isn't lying, you still expend your psionic focus.

MAXIMIZE POWER [METAPSIONIC]

You can manifest powers to maximum effect.

Benefit: To use this feat, you must expend your psionic focus.

You can maximize a power. All variable, numeric effects of a power modified by this feat are maximized. A maximized power deals maximum damage, cures the maximum number of hit points, affects the maximum number of targets, and so on, as appropriate. Saving throws and opposed checks are not affected, nor are powers without random variables.

Augmented powers can be maximized; a maximized augmented power deals the maximum damage (or cures the maximum hit points, and so on) of the augmented power.

An empowered and maximized power gains the separate benefits of each feat: the maximum result plus one-half the normally rolled result.

Using this feat increases the power point cost of the power by 4. The power's total cost cannot exceed your manifester level.

MENTAL LEAP [PSIONIC]

You can make amazing jumps.

Prerequisite: Str 13, Jump 5 ranks.

Benefit: To use this feat, you must expend your psionic focus. You gain a +10 bonus on a Jump check.

MENTAL RESISTANCE [GENERAL]

Your mind is armored against mental intrusion.

Prerequisite: Base Will save bonus +2.

Benefit: Against psionic attacks that do not employ an energy type to deal damage you gain damage reduction 3/-. In addition, when you are hit with ability damage (but not ability drain or ability burn damage) from a psionic attack, you take 3 points less than you would normally take.

The benefit of this feat applies only to psionic powers and psi-like abilities. This is an exception to the psionics-magic transparency rule.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

METAMORPHIC TRANSFER [PSIONIC]

You can gain a supernatural ability of a metamorphed form.

Prerequisite: Wis 13, manifester level 5th.

Benefit: Each time you change your form, such as through the *metamorphosis* power, you gain one of the new form's supernatural abilities, if it has any.

You gain only three uses of the metamorphic ability per day, even if the creature into which you metamorph has a higher limit on uses (You are still subject to other restrictions on the use of the ability.) The save DC to resist a supernatural ability gained through Metamorphic Transfer (if it is an attack) is $10 + \text{your Cha modifier} + 1/2 \text{ your Hit Dice}$.

Normal: You cannot use the supernatural abilities of creatures whose form you assume.

Special: You can gain this feat multiple times. Each time, you can gain one additional supernatural ability.

MIND OVER BODY [GENERAL]

Your ability damage heals more rapidly.

Prerequisite: Con 13.

Benefit: You heal ability damage and ability burn damage more quickly than normal. You heal a number of ability points per day equal to $1 + \text{your Constitution bonus}$.

Normal: You heal ability damage and ability burn damage at a rate of 1 point per day.

NARROW MIND [PSIONIC]

Your ability to concentrate is as keen as an arrowhead, allowing you to gain your psionic focus even in the most turbulent situations.

Prerequisite: Wis 13.

Benefit: You gain a +4 bonus on Concentration checks you make to become psionically focused.

OPEN MINDED [GENERAL]

You are naturally able to reroute your memory, mind, and skill expertise.

Benefit: You immediately gain an extra 5 skill points. You spend these skill points as normal. If you spend them on a cross-class skills they count as 1/2 ranks. You cannot exceed the normal maximum ranks for your level in any skill.

Special: You can gain this feat multiple times. Each time, you immediately gain another 5 skill points.

OPPORTUNITY POWER [METAPSIONIC]

You can make power-enhanced attacks of opportunity.

Benefit: To use this feat, you must expend your psionic focus. When you make an attack of opportunity, you can use any power you know with a range of touch, if you have at least one hand free.

Manifesting this power is an immediate action.

You cannot use this feat with a touch power whose manifesting time is longer than 1 full-round action.

Using this feat increases the power point cost of the power by 6. The power's total cost cannot exceed your manifester level.

Normal: Attacks of opportunity can be made only with melee weapons.

OVERCHANNEL [PSIONIC]

You burn your life force to strengthen your powers.

Benefit: While manifesting a power, you can increase your effective manifester level by one, but in so doing you take 1d8 points of damage. At 8th level, you can choose to increase your effective manifester level by two, but you take 3d8 points of damage. At 15th level, you can increase your effective manifester level by three, but you take 5d8 points of damage.

The effective increase in manifester level increases the number of power points you can expend on a single power manifestation, as well as increasing all manifester level-dependent effects, such as range, duration, and overcoming power resistance.

Normal: Your manifester level is equal to your total levels in classes that manifest powers.

POWER PENETRATION [PSIONIC]

Your powers are especially potent, breaking through power resistance more readily than normal.

Benefit: To use this feat, you must expend your psionic focus. You get a +4 bonus on manifester level checks made to overcome a creature's power resistance.

POWER SPECIALIZATION [PSIONIC]

You deal more damage with your powers.

Prerequisites: Weapon Focus (ray), manifester level 4th.

Benefit: With rays and ranged touch attack powers that deal damage, you deal an extra 2 points of damage. If you expend your psionic focus when you manifest a ray or a ranged touch attack power that deals damage, you add your key ability bonus to the damage (instead of adding 2).

PSICRYSTAL AFFINITY [PSIONIC]

You have created a psicrystal.

Prerequisites: Manifester level 1st.

Benefit: This feat allows you to gain a psicrystal.

PSICRYSTAL CONTAINMENT [PSIONIC]

Your psicrystal has advanced enough that it can hold a psionic focus that you store within it.

Prerequisites: Psicrystal Affinity, manifester level 3rd.

Benefit: You can spend a full-round action attempting to psionically focus your psicrystal. At any time when you need to expend your psionic focus, you can expend your psicrystal's psionic focus instead, as long as the crystal is within 5 feet of you. Psionically focusing your psicrystal works just like focusing yourself. The psicrystal cannot focus itself—only the owner can spend the time to focus the crystal.

PSIONIC AFFINITY [GENERAL]

You have a knack for psionic endeavors.

Benefit: You get a +2 bonus on all Psicraft checks and Use Psionic Device checks.

PSIONIC BODY [PSIONIC]

Your mind reinforces your body.

Benefit: When you take this feat, you gain 2 hit points for each psionic feat you have (including this one). Whenever you take a new psionic feat, you gain 2 more hit points.

PSIONIC CHARGE [PSIONIC]

You can charge in a crooked line.

Prerequisite: Dex 13, Speed of Thought.

Benefit: To use this feat, you must expend your psionic focus. When you charge, you can make one turn of up to 90 degrees during your movement. All other restrictions on charges still apply; for instance, you cannot pass through a square that blocks or slows movement, or that contains a creature. You must have line of sight to the opponent at the start of your turn.

PSIONIC DODGE [PSIONIC]

You are proficient at dodging blows.

Prerequisite: Dex 13, Dodge.

Benefit: You must be psionically focused to use this feat. You receive a +1 dodge bonus to your Armor Class. This bonus stacks with the bonus from the Dodge feat (but only applies on attacks made by the opponent you have designated).

PSIONIC ENDOWMENT [PSIONIC]

You can endow your manifestations with more concentrated focus.

Benefit: To use this feat, you must expend your psionic focus. You add 1 to the save DC of a power you manifest.

PSIONIC FIST [PSIONIC]

You can charge your unarmed strike or natural weapon with additional damage potential.

Prerequisite: Str 13.

Benefit: To use this feat, you must expend your psionic focus. Your unarmed strike or attack with a natural weapon deals an extra 2d6 points of damage.

You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

PSIONIC HOLE [GENERAL]

You are anathema to psionic creatures and characters.

Prerequisite: Con 15.

Benefit: When a foe strikes you in melee combat, the foe immediately loses its psionic focus, if any. Also, if you are the target of a power, the manifester of the power must spend an additional number of power points equal to your Wisdom bonus, or the power fails (all the power points spent on the power are still lost). This extra cost does not count toward the maximum power points a manifester can spend on a single power.

Special: You cannot take or use this feat if you have the ability to use powers (if you have a power point reserve or psi-like abilities).

PSIONIC MEDITATION [PSIONIC]

You can focus your mind faster than normal, even under duress.

Prerequisite: Wis 13, Concentration 7 ranks.

Benefit: You can take a move action to become psionically focused.

Normal: A character without this feat must take a full-round action to become psionically focused.

PSIONIC SHOT [PSIONIC]

You can charge your ranged attacks with additional damage potential.

Prerequisite: Point Blank Shot.

Benefit: To use this feat, you must expend your psionic focus. Your ranged attack deals +2d6 points of damage. You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

PSIONIC TALENT [PSIONIC]

You gain additional power points to supplement those you already had.

Prerequisite: Having a power point reserve.

Benefit: When you take this feat for the first time, you gain 2 power points.

Special: You can take this feat multiple times. Each time you take the feat after the first time, the number of power points you gain increases by 1.

PSIONIC WEAPON [PSIONIC]

You can charge your melee weapon with additional damage potential.

Prerequisite: Str 13.

Benefit: To use this feat, you must expend your psionic focus.

Your attack with a melee weapon deals an extra 2d6 points of damage. You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

QUICKEN POWER [METAPSIONIC]

You can manifest a power with a moment's thought.

Benefit: To use this feat, you must expend your psionic focus. You can quicken a power. You can perform another action, even manifest another power, in the same round that you manifest a quickened power. You can manifest only one quickened power per round. A power whose manifesting time is longer than 1 round cannot be quickened.

Using this feat increases the power point cost of the power by 6. The power's total cost cannot exceed your manifester level. Manifesting a quickened power does not provoke attacks of opportunity.

RAPID METABOLISM [GENERAL]

Your wounds heal rapidly.

Prerequisite: Con 13.

Benefit: You naturally heal a number of hit points per day equal to the standard healing rate + double your Constitution bonus. You heal even if you do not rest. This healing replaces your normal natural healing. If you are tended successfully by someone with the Heal skill, you instead regain double the normal amount of hit points + double your Constitution bonus.

RECKLESS OFFENSE [GENERAL]

You can shift your focus from defense to offense.

Prerequisite: Base attack bonus +1.

Benefit: When you use the attack action or full attack action in melee, you can take a penalty of -4 to your Armor Class and add a +2 bonus on your melee attack roll. The bonus on attack rolls and penalty to Armor Class last until the beginning of your next turn.

RETURN SHOT [PSIONIC]

You can return incoming arrows, as well as crossbow bolts, spears, and other projectile or thrown weapons.

Prerequisite: Point Blank Shot, Psionic Shot, Fell Shot, base attack bonus +3.

Benefit: To use this feat, you must expend your psionic focus and have at least one hand free. Once per round when you would normally be hit by a projectile or a thrown weapon no more than one size category larger than your size, you can deflect the attack so that you take no damage from it. The attack is deflected back at your attacker, using the attack bonus of the original attack on you. You must be aware of the attack and not flat-footed. Attempting to return a shot is a free action.

Special: If you also have the Deflect Arrows feat, the deflected attack is made with the original attack bonus plus your Dexterity bonus.

SCRIBE TATTOO [ITEM CREATION]

You can create psionic tattoos, which store powers within their designs.

Prerequisite: Manifester level 3rd.

Benefit: You can create a psionic tattoo of any power of 3rd level or lower that you know and that targets one or more creatures. Scribing a psionic tattoo takes one day. When you create a psionic tattoo, you set the manifester level. The manifester level must be sufficient to manifest the power in question and no higher than your own level. The base price of a

psionic tattoo is its power level x its manifester level x 50 gp. To scribe a tattoo, you must spend 1/25 of this base price in XP and use up raw materials (special inks, masterwork needles, and so on) costing one-half of this base price. When you create a psionic tattoo, you make any choices that you would normally make when manifesting the power. When its wearer physically activates the tattoo, the wearer is the target of the power. Any psionic tattoo that stores a power with an XP cost also carries a commensurate cost. In addition to the costs derived from the base price, you must pay the XP when creating the tattoo.

SIDESTEP CHARGE [PSIONIC]

You are skilled at dodging past charging opponents and taking advantage when they miss.

Prerequisite: Dex 13, Dodge.

Benefit: You get a +4 dodge bonus to Armor Class against charge attacks. If a charging opponent fails to make a successful attack against you, you gain an immediate attack of opportunity. This feat does not grant you more attacks of opportunity than you are normally allowed in a round. If you are flat-footed or otherwise denied your Dexterity bonus to Armor Class, you do not gain the benefit of this feat.

SPEED OF THOUGHT [PSIONIC]

The energy of your mind energizes the alacrity of your body.

Prerequisite: Wis 13.

Benefit: As long as you are psionically focused and not wearing heavy armor, you gain an insight bonus to your speed of 10 feet.

SPLIT PSIONIC RAY [METAPSIONIC]

You can affect two targets with a single ray.

Prerequisite: Any other metapsionic feat.

Benefit: To use this feat, you must expend your psionic focus. You can split psionic rays you manifest. The split ray affects any two targets that are both within the power's range and within 30 feet of each other. If the ray deals damage, each target takes as much damage as a single target would take.

Using this feat increases the power point cost of the power by 2.

STAND STILL [GENERAL]

You can prevent foes from fleeing or closing.

Prerequisite: Str 13.

Benefit: When a foe's movement out of a square you threaten grants you an attack of opportunity, you can give up that attack and instead attempt to stop your foe in his tracks. Make your attack of opportunity normally. If you hit your foe, he must succeed on a Reflex save against a DC of 10 + your damage roll (the opponent does not actually take damage), or immediately halt as if he had used up his move actions for the round.

Since you use the Stand Still feat in place of your attack of opportunity, you can do so only a number of times per round equal to the number of times per round you could make an attack of opportunity (normally just one).

Normal: Attacks of opportunity cannot halt your foes in their tracks.

TALENTED [PSIONIC]

You can overchannel powers with less cost to yourself.

Prerequisite: Overchannel.

Benefit: To use this feat, you must expend your psionic focus. When manifesting a power of 3rd level or lower, you do not take damage from overchanneling.

TWIN POWER [METAPSIONIC]

You can manifest a power simultaneously with another power just like it.

Benefit: To use this feat, you must expend your psionic focus. You can twin a power. Manifesting a power altered by this feat causes the power to take effect twice on the area or target, as if you were simultaneously manifesting the same power two times on the same location or target. Any variables in the power (such as duration, number of targets, and so on) are the same for both of the resulting powers. The target experiences all the effects of both powers individually and receives a saving throw (if applicable) for each. In some cases, such as a twinned *psionic charm*, failing both saving throws results in redundant effects (although, in this example, any ally of the target would have to succeed on two dispel attempts to free the target from the charm effect).

Using this feat increases the power point cost of the power by 6. The power's total cost cannot exceed your manifester level.

UNAVOIDABLE STRIKE [PSIONIC]

You can make an unarmed strike or use a natural weapon against your foe as if delivering a touch attack.

Prerequisite: Str 13, Psionic Fist, base attack bonus +5.

Benefit: To use this feat, you must expend your psionic focus. You can resolve your unarmed strike or attack with a natural weapon as a touch attack.

You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

UNCONDITIONAL POWER [METAPSIONIC]

Disabling conditions do not hold you back.

Benefit: To use this feat, you must expend your psionic focus. Your mental strength is enough to overcome some otherwise disabling conditions. You can manifest an unconditional power when you are dazed, *confused*, nauseated, shaken, or stunned. Only personal powers and powers that affect your person can be manifested as unconditional powers.

Using this feat increases the power point cost of the power by 8. The power's total cost cannot exceed your manifester level.

UP THE WALLS [PSIONIC]

You can run on walls for brief distances.

Prerequisite: Wis 13.

Benefit: While you are psionically focused, you can take part of one of your move actions to traverse a wall or other relatively smooth vertical surface if you begin and end your move on a horizontal surface. The height you can achieve on the wall is limited only by this movement restriction. If you do not end your move on a horizontal surface, you fall prone, taking falling damage as appropriate for your distance above the ground. Treat the wall as a normal floor for the purpose of measuring your movement. Passing from floor to wall or wall to floor costs no movement; you can change surfaces freely. Opponents on the ground can make attacks of opportunity as you move up the wall.

Special: You can take other move actions in conjunction with moving along a wall. For instance, the Spring Attack feat allows you to make an attack from the wall against a foe standing on the ground who is within the area you threaten; however, if you are somehow prevented from completing your move, you fall. Likewise, you could tumble along the wall to avoid attacks of opportunity.

WIDEN POWER [METAPSIONIC]

You can increase the area of your powers.

Benefit: To use this feat, you must expend your psionic focus. You can alter a burst, emanation, line, or spread-shaped power to increase its area. (Powers that do not have an area of one of these four sorts are not affected by this feat.) Any numeric measurements of the power's area increase by 100%.

Using this feat increases the power point cost of the power by 4. The power's total cost cannot exceed your manifester level.

WILD TALENT [GENERAL]

Your mind wakes to a previously unrealized talent for psionics.

Benefit: Your latent power of psionics flares to life, conferring upon you the designation of a psionic character. As a psionic character, you gain a reserve of 2 power points and can take psionic feats, metapsionic feats, and psionic item creation feats. You do not, however, gain the ability to manifest powers simply by virtue of having this feat.

WOUNDING ATTACK [PSIONIC]

Your vicious attacks wound your foe.

Prerequisite: Base attack bonus +8.

Benefit: To use this feat, you must expend your psionic focus. You can make an attack with such vicious force that you wound your opponent. A wound deals 1 point of Constitution damage to your foe in addition to the usual damage dealt. You must decide whether or not to use this feat prior to making an attack. If your attack misses, you still expend your psionic focus.

PSIONIC POWERS OVERVIEW

Psionic powers spring from sentient minds. Even an undead creature or a being that has no physical form can create a reserve of inner strength necessary to manifest powers, as long as it has an Intelligence score of at least 1. Vermin possessed of a hive mind ability are an exception to this rule.

A psionic power is a one-time psionic effect. Psionic characters and creatures need not prepare their powers for use ahead of time. They either have sufficient power points to manifest a power or they do not.

A power is manifested when a psionic character pays its power point cost. Some psionic creatures automatically manifest powers, called psi-like abilities, without paying a power point cost. Other creatures pay power points to manifest their powers, just as characters do.

Each power has a specific effect. A power known to a psionic character can be used whenever he or she has power points to pay for it.

MANIFESTING POWERS

Psionic characters and creatures manifest powers. Whether they cost power points when manifest by a psionic character, or are manifested as psi-like abilities, powers' effects remain the same. The process of manifesting a power is akin to casting a spell, but with significant differences.

CHOOSING A POWER

First you must choose which power to manifest. You can select any power you know, provided you are capable of manifesting powers of that level or higher. To manifest a power, you must pay power points, which count against your daily total. You can manifest the same power multiple times if you have points left to pay for it.

CONCENTRATION

To manifest a power, you must concentrate. If something threatens to interrupt your concentration while you're manifesting a power, you must succeed on a Concentration check or lose the power points without manifesting the power. The more distracting the interruption and the higher the level of the power that you are trying to manifest, the higher the DC. (Higher-level powers require more mental effort.)

Injury: Getting hurt or being affected by hostile psionics while trying to manifest a power can break your concentration and ruin a power. If you take damage while trying to manifest a power, you must make a Concentration check (DC 10 + points of damage taken + the level of the power you're manifesting). The interrupting event strikes during manifestation if it occurs between when you start and when you complete manifesting a power (for a power with a manifesting time of 1 round or longer) or if it comes in response to your manifesting the power (such as an attack of opportunity provoked by the manifesting of the power or a contingent attack from a readied action).

If you are taking continuous damage half the damage is considered to take place while you are manifesting a power. You must make a Concentration check (DC 10 + 1/2 the damage that the continuous source last dealt + the level of the power you're manifesting).

If the last damage dealt was the last damage that the effect could deal then the damage is over, and it does not distract you. Repeated damage does not count as continuous damage.

Power: If you are affected by a power while attempting to manifest a power of your own, you must make a Concentration check or lose the power you are manifesting. If the power affecting you deals damage, the Concentration DC is 10 + points of damage + the level of the power you're manifesting. If the power interferes with you or distracts you in some other way, the Concentration DC is the power's save DC + the level of the power you're manifesting. For a power with no saving throw, it's the DC that the power's saving throw would have if a save were allowed.

Grappling or Pinned: To manifest a power while grappling or pinned, you must make a Concentration check (DC 20 + the level of the power you're manifesting) or lose the power.

Vigorous Motion: If you are riding on a moving mount, taking a bouncy ride in a wagon, on a small boat in rough water, belowdecks in a storm-tossed ship, or simply being jostled in a similar fashion, you must make a Concentration check (DC 10 + the level of the power you're manifesting) or lose the power.

Violent Motion: If you are on a galloping horse, taking a very rough ride in a wagon, on a small boat in rapids or in a storm, on deck in a storm-tossed ship, or being tossed roughly about in a similar fashion, you must make a Concentration check (DC 15 + the level of the power you're manifesting) or lose the power.

Violent Weather: If you are in a high wind carrying blinding rain or sleet, the DC is 5 + the level of the power you're manifesting. If you are in wind-driven hail, dust, or debris, the DC is 10 + the level of the power you're manifesting. In either

case, you lose the power if you fail the Concentration check. If the weather is caused by a power, use the rules in the Power subsection above.

Manifesting Powers on the Defensive: If you want to manifest a power without provoking attacks of opportunity, you need to dodge and weave. You must make a Concentration check (DC 15 + the level of the power you're manifesting) to succeed. You lose the power points without successful manifestation if you fail.

Entangled: If you want to manifest a power while entangled in a net or while affected by a power with similar effects you must make a DC 15 Concentration check to manifest the power. You lose the power if you fail.

MANIFESTER LEVEL

The variables of a power's effect often depend on its manifester level, which is equal to your psionic class level. A power that can be augmented for additional effect is also limited by your manifester level (you can't spend more power points on a power than your manifester level). See Augment under Descriptive Text, below.

You can manifest a power at a lower manifester level than normal, but the manifester level must be high enough for you to manifest the power in question, and all level-dependent features must be based on the same manifester level.

In the event that a class feature or other special ability provides an adjustment to your manifester level, this adjustment applies not only to all effects based on manifester level (such as range, duration, and augmentation potential) but also to your manifester level check to overcome your target's power resistance and to the manifester level used in dispel checks (both the dispel check and the DC of the check).

POWER FAILURE

If you try to manifest a power in conditions where the characteristics of the power (range, area, and so on) cannot be made to conform, the manifestation fails and the power points are wasted.

Powers also fail if your concentration is broken (see Concentration, above).

THE POWER'S RESULT

Once you know which creatures (or objects or areas) are affected, and whether those creatures have made successful saving throws (if any were allowed), you can apply whatever results a power entails.

SPECIAL POWER EFFECTS

Certain special features apply to all powers.

Attacks: Some powers refer to attacking. All offensive combat actions, even those that don't damage opponents, such as disarm and bull rush, are considered attacks. All powers that opponents can resist with saving throws, that deal damage, or that otherwise harm or hamper subjects are considered attacks. *Astral construct* and similar powers are not considered attacks because the powers themselves don't harm anyone.

Bonus Types: Many powers give creatures bonuses to ability scores, Armor Class, attacks, and other attributes. Each bonus has a type that indicates how the power grants the bonus. The important aspect of bonus types is that two bonuses of the same type don't generally stack. With the exception of dodge bonuses, most circumstance bonuses, and racial bonuses, only the better bonus works (see Combining Psionic and Magical Effects, below). The same principle applies to penalties—a character taking two or more penalties of the same type applies only the worst one.

Bringing Back the Dead: Of all the psionic powers, only *reality revision* has the ability to restore slain characters to life. When a living creature dies, its soul departs the body, leaves the Material Plane, travels through the Astral Plane, and goes to abide on the plane where the creature's deity resides. If the creature did not worship a deity, its soul departs to the plane corresponding to its alignment. Bringing someone back from the dead means retrieving his or her soul and returning it to his or her body.

Level Loss: The passage from life to death and back again is a wrenching journey for a being's soul. Consequently, any creature brought back to life usually loses one level of experience. The character's new experience point total is midway between the minimum needed for his or her new (reduced) level and the minimum needed for the next one. If the character was 1st level at the time of death, he or she loses 2 points of Constitution instead of losing a level. This level loss or Constitution loss cannot be repaired by any mortal means, even the spells *wish* or *miracle*. A revived character can regain a lost level by earning XP through further adventuring. A revived character who was 1st level at the time of death can regain lost points of Constitution by improving his or her Constitution score when he or she attains a level that allows an ability score increase.

Preventing Revivation: Enemies can take steps to make it more difficult for a character to be returned from the dead. Keeping the body prevents others from using a single manifestation of *reality revision* to restore the slain character to life.

Revivation Against One's Will: A soul cannot be returned to life if it does not wish to be. A soul knows the name, alignment, and patron deity (if any) of the character attempting to revive it and may refuse to return on that basis.

COMBINING PSIONIC AND MAGICAL EFFECTS

The default rule for the interaction of psionics and magic is simple: Powers interact with spells and spells interact with powers in the same way a spell or normal spell-like ability interacts with another spell or spell-like ability. This is known as psionics-magic transparency.

Psionics-Magic Transparency: Though not explicitly called out in the spell descriptions or magic item descriptions, spells, spell-like abilities, and magic items that could potentially affect psionics do affect psionics.

When the rule about psionics-magic transparency is in effect, it has the following ramifications.

Spell resistance is effective against powers, using the same mechanics. Likewise, power resistance is effective against spells, using the same mechanics as spell resistance. If a creature has one kind of resistance, it is assumed to have the other. (The effects have similar ends despite having been brought about by different means.)

All spells that dispel magic have equal effect against powers of the same level using the same mechanics, and vice versa.

The spell *detect magic* detects powers, their number, and their strength and location within 3 rounds (though a Psicraft check is necessary to identify the discipline of the psionic aura).

Dead magic areas are also dead psionics areas.

Multiple Effects: Powers or psionic effects usually work as described no matter how many other powers, psionic effects, spells, or magical effects happen to be operating in the same area or on the same recipient. Except in special cases, a power does not affect the way another power or spell operates. Whenever a power has a specific effect on other powers or spells, the power description explains the effect (and vice versa for spells that affect powers). Several other general rules apply when powers, spells, magical effects, or psionic effects operate in the same place.

Stacking Effects: Powers that provide bonuses or penalties on attack rolls, damage rolls, saving throws, and other attributes usually do not stack with themselves. More generally, two bonuses of the same type don't stack even if they come from different powers, or one from a power and one from a spell. You use whichever bonus gives you the better result.

Different Bonus Types: The bonuses or penalties from two different powers, or a power and a spell, stack if the effects are of different types. A bonus that isn't named (just a "+2 bonus" rather than a "+2 insight bonus") stacks with any bonus.

Same Effect More than Once in Different Strengths: In cases when two or more similar or identical effects are operating in the same area or on the same target, but at different strengths, only the best one applies. If one power or spell is dispelled or its duration runs out, the other power or spell remains in effect (assuming its duration has not yet expired).

Same Effect with Differing Results: The same power or spell can sometimes produce varying effects if applied to the same recipient more than once. The last effect in a series trumps the others. None of the previous spells or powers are actually removed or dispelled, but their effects become irrelevant while the final spell or power in the series lasts.

One Effect Makes Another Irrelevant: Sometimes, a power can render another power irrelevant.

Multiple Mental Control Effects: Sometimes psionic or magical effects that establish mental control render one another irrelevant. Mental controls that don't remove the recipient's ability to act usually do not interfere with one another, though one may modify another. If a creature is under the control of two or more creatures, it tends to obey each to the best of its ability, and to the extent of the control each effect allows. If the controlled creature receives conflicting orders simultaneously, the competing controllers must make opposed Charisma checks to determine which one the creature obeys.

Powers and Spells with Opposite Effects: Powers and spells with opposite effects apply normally, with all bonuses, penalties, or changes accruing in the order that they apply. Some powers and spells negate or counter each other. This is a special effect that is noted in a power's or spell's description.

Instantaneous Effects: Two or more magical or psionic effects with instantaneous durations work cumulatively when they affect the same object, place, or creature.

POWERS AND POWER POINTS

Psionic characters manifest powers, which involve the direct manipulation of personal mental energy. These manipulations require natural talent and personal meditation. A psionic character's level limits the number of power points available to manifest powers. A psionic character's relevant high score might allow him to gain extra power points. He can manifest the same power more than once, but each manifestation subtracts power points from his daily limit. Manifesting a power is an arduous mental task. To do so, a psionic character must have a key ability score of at least 10 + the power's level.

Daily Power Point Acquisition: To regain used daily power points, a psionic character must have a clear mind. To clear his mind, he must first sleep for 8 hours. The character does not have to slumber for every minute of the time, but he must refrain from movement, combat, manifesting powers, skill use, conversation, or any other demanding physical or mental task during the rest period. If his rest is interrupted, each interruption adds 1 hour to the total amount of time he has to rest to clear his mind, and he must have at least 1 hour of rest immediately prior to regaining lost power points. If the character does not need to sleep for some reason, he still must have 8 hours of restful calm before regaining power points.

Recent Manifesting Limit/Rest Interruptions: If a psionic character has manifested powers recently, the drain on his resources reduces his capacity to regain power points. When he regains power points for the coming day, all power points he has used within the last 8 hours count against his daily limit.

Peaceful Environment: To regain power points, a psionic character must have enough peace, quiet, and comfort to allow for proper concentration. The psionic character's surroundings need not be luxurious, but they must be free from overt distractions, such as combat raging nearby or other loud noises. Exposure to inclement weather prevents the necessary concentration, as does any injury or failed saving throw the character might incur while concentrating on regaining power points.

Regaining Power Points: Once the character has rested in a suitable environment, it takes only an act of concentration spanning 1 full round to regain all power points of the psionic character's daily limit.

Death and Power Points: If a character dies, all daily power points stored in his mind are wiped away. A potent effect (such as *reality revision*) can recover the lost power points when it recovers the character.

ADDING POWERS

Psionic characters can learn new powers when they attain a new level. A psion can learn any power from the psion/wilder list and powers from his chosen discipline's list. A wilder can learn any power from the psion/wilder list. A psychic warrior can learn any power from the psychic warrior list.

Powers Gained at a New Level: Psions and other psionic characters perform a certain amount of personal meditation between adventures in an attempt to unlock latent mental abilities. Each time a psionic character attains a new level, he or she learns additional powers according to his class description. Psions, psychic warriors, and wilders learn new powers of their choice in this fashion. These powers represent abilities unlocked from latency. The powers must be of levels the characters can manifest.

Independent Research: A psion also can research a power independently, duplicating an existing power or creating an entirely new one. If characters are allowed to develop new powers, use these guidelines to handle the situation. Any kind of manifestor can create a new power. The research involved requires access to a retreat conducive to uninterrupted meditation. Research involves an expenditure of 200 XP per week and takes one week per level of the power. At the end of that time, the character makes a Psicraft check (DC 10 + spell level). If that check succeeds, the character learns the new power if her research produced a viable power. If the check fails, the character must go through the research process again if she wants to keep trying.

Manifest an Unknown Power from Another's Powers Known

A psionic character can attempt to manifest a power from a source other than his own knowledge (usually a power stone or another willing psionic character). To do so, the character must first make contact (a process similar to addressing a power stone, requiring a Psicraft check against a DC of 15+ the level of the power to be manifested). A psionic character can make contact with only a willing psionic character or creature (unconscious creatures are considered willing, but not psionic characters under the effects of other immobilizing conditions). Characters who can't use power stones for any reason are also banned from attempting to manifest powers from the knowledge of other psionic characters. Mental contact requires 1 full round of physical contact, which can provoke attacks of opportunity. Once contact is achieved, the character becomes aware of all the powers stored in the power stone or all the powers the other character knows up to the highest level of power the contactor knows himself.

Next, the psionic character must choose one of the powers and make a second Psicraft check (DC 15 + the power's level) to see if he understands it. If the power is not on his class list, he automatically fails this check.

Upon successfully making contact with another willing psionic character or creature and learning what he can of one power in particular, the character can immediately attempt to manifest that power even if he doesn't know it (and assuming he has power points left for the day). He can attempt to manifest the power normally on his next turn, and he succeeds if he makes one additional Psicraft check (DC 15 + the power's level). He retains the ability to manifest the selected power for only 1 round. If he doesn't manifest the power, fails the Psicraft check, or manifests a different power, he loses his chance to manifest that power for the day.

USING STORED POWER POINTS

A variety of psionic items exist to store power points for later use, in particular a storage device called a *cognizance crystal*. Regardless of what sort of item stores the power points, all psionic characters must follow strict rules when tapping stored power points.

A Single Source: When using power points from a storage item to manifest a power, a psionic character may not pay the power's cost with power points from more than one source. He must either use an item, his own power point reserve, or some other discrete power point source to pay the manifestation cost.

Recharging: Most power point storage devices allow psionic characters to "recharge" the item with their own power points. Doing this depletes the character's power point reserve on a 1-for-1 basis as if he had manifested a power; however, those power points remain indefinitely stored. The opposite is not true—psionic characters may not use power points stored in a storage item to replenish their own power point reserves.

SPECIAL ABILITIES

Psionic creatures can create psionic effects without having levels in a psionic class (although they can take a psionic class to further enhance their abilities); such creatures have the psionic subtype.

Characters using dorjes, *cognizance crystals*, and other psionic items can also create psionic effects. In addition to existing spell-like and supernatural abilities, creatures can also have psi-like abilities. (Psionic creatures may also have extraordinary and natural abilities.)

Psi-Like Abilities (Ps): The manifestation of powers by a psionic character is considered a psi-like ability, as is the manifestation of powers by creatures without a psionic class (creatures with the psionic subtype, also simply called psionic creatures). Usually, a psionic creature's psi-like ability works just like the power of that name. A few psi-like abilities are unique; these are explained in the text where they are described.

Psi-like abilities have no verbal, somatic, or material components, nor do they require a focus or have an XP cost (even if the equivalent power has an XP cost). The user activates them mentally. Armor never affects a psi-like ability's use. A psi-like ability has a manifesting time of 1 standard action unless noted otherwise in the ability description. In all other ways, a psi-like ability functions just like a power. However, a psionic creature does not have to pay a psi-like ability's power point cost. Psi-like abilities are subject to power resistance and to being dispelled by *dispel psionics*. They do not function in areas where psionics is suppressed or negated.

Supernatural Abilities: Some creatures have psionic abilities that are considered supernatural. Psionic feats are also supernatural abilities. These abilities cannot be disrupted in combat, as powers can be, and do not provoke attacks of opportunity (except as noted in their descriptions). Supernatural abilities are not subject to power resistance and cannot be negated or dispelled; however, they do not function in areas where psionics is suppressed.

PSIONIC MALADIES

Ability Burn: This is a special form of ability damage that cannot be magically or psionically healed. It is caused by the use of certain psionic feats and powers. It returns only through natural healing.

Disease, Cascade Flu: Spread by brain moles and other vermin; injury; DC 13; incubation one day; damage psionic cascade. A psionic cascade is a loss of control over psionic abilities. Using power points becomes dangerous for a character infected by cascade flu, once the incubation period has run its course. Every time an afflicted character manifests a power, she must make a DC 16 Concentration check. On a failed check, a psionic cascade is triggered. The power operates normally, but during the following round, without the character's volition, two additional powers she knows manifest randomly, and their power cost is deducted from the character's reserve. During the next round, three additional powers manifest, and so on, until all the psionic character's power points are drained. Powers with a range of personal or touch always affect the diseased character. For other powers that affect targets, roll d%: On a 01–50 result, the power affects the diseased character, and 51–00 indicates that the power targets other creatures in the vicinity. Psionic creatures (those that manifest their powers without paying points) cascade until all the powers they know have manifested at least twice.

As with any disease, a psionic character who is injured or attacked by a creature carrying a disease or parasite, or who otherwise has contact with contaminated material, must make an immediate Fortitude save. On a success, the disease fails to gain a foothold. On a failure, the character takes damage (or incurs the specified effect) after the incubation period. Once per day afterward, the afflicted character must make a successful Fortitude save to avoid repeating the damage. Two successful saving throws in a row indicate she has fought off the disease.

Disease, Cerebral Parasites: Spread by contact with infected psionic creatures; contact; DC 15; incubation 1d4 days; damage 1d8 power points.

Cerebral parasites are tiny organisms, undetectable to normal sight. An afflicted character may not even know he carries the parasites—until he discovers he has fewer power points for the day than expected. Psionic creatures with cerebral parasites are limited to using each of their known powers only once per day (instead of freely manifesting them). See the note about diseases under Cascade Flu, above.

Negative Levels: Psionic characters can gain negative levels just like members of other character classes. A psionic character loses access to one power per negative level from the highest level of power he can manifest; he also loses a number of power points equal to the cost of that power. If two or more powers fit these criteria, the manifest者 decides which one becomes inaccessible. The lost power becomes available again as soon the negative level is removed, providing the manifest者 is capable of using it at that time. Lost power points also return.

POWER DESCRIPTIONS

The description of each power is presented in a standard format. Each category of information is explained and defined below.

NAME

The first line of every power description gives the name by which the power is generally known. A power might be known by other names in some locales, and specific manifesters might have names of their own for their powers.

DISCIPLINE (SUBDISCIPLINE)

Beneath the power name is a line giving the discipline (and the subdiscipline in parentheses, if appropriate) that the power belongs to.

Every power is associated with one of six disciplines. A discipline is a group of related powers that work in similar ways. Each of the disciplines is discussed below.

Clairsentience

Clairsentience powers enable you to learn secrets long forgotten, to glimpse the immediate future and predict the far future, to find hidden objects, and to know what is normally unknowable.

For the purpose of psionics—magic transparency, clairsentience powers are equivalent to powers of the divination school (thus, creatures immune to divination spells are also immune to clairsentience powers).

Many clairsentience powers have cone-shaped areas. These move with you and extend in the direction you look. The cone defines the area that you can sweep each round. If you study the same area for multiple rounds, you can often gain additional information, as noted in the descriptive text for the power.

Scrying: A power of the scrying subdiscipline creates an invisible sensor that sends you information. Unless noted otherwise, the sensor has the same powers of sensory acuity that you possess. This includes any powers or effects that target you, but not powers or effects that emanate from you. However, the sensor is treated as a separate, independent sensory organ of yours, and thus functions normally even if you have been blinded, deafened, or otherwise suffered sensory impairment. Any creature with an Intelligence score of 12 or higher can notice the sensor by making a DC 20 Intelligence check. The sensor can be dispelled as if it were an active power. Lead sheeting or psionic protection blocks scrying powers, and you sense that the power is so blocked.

Metacreativity

Metacreativity powers create objects, creatures, or some form of matter. Creatures you create usually, but not always, obey your commands.

A metacreativity power draws raw ectoplasm from the Astral Plane to create an object or creature in the place the psionic character designates (subject to the limits noted above). Objects created in this fashion are as solid and durable as normal objects, despite their originally diaphanous substance. Psionic creatures created with metacreativity powers are considered constructs, not outsiders.

A creature or object brought into being cannot appear inside another creature or object, nor can it appear floating in an empty space. It must arrive in an open location on a surface capable of supporting it. The creature or object must appear within the power's range, but it does not have to remain within the range.

For the purpose of psionics—magic transparency, metacreativity powers are equivalent to powers of the conjuration school (thus, creatures immune to conjuration spells are also immune to metacreativity powers).

Creation: A power of the creation subdiscipline creates an object or creature in the place the manipster designates (subject to the limits noted above). If the power has a duration other than instantaneous, psionic energy holds the creation together, and when the power ends, the created creature or object vanishes without a trace, except for a thin film of glistening ectoplasm that quickly evaporates. If the power has an instantaneous duration, the created object or creature is merely assembled through psionics. It lasts indefinitely and does not depend on psionics for its existence.

Psychokinesis

Psychokinesis powers manipulate energy or tap the power of the mind to produce a desired end. Many of these powers produce spectacular effects above and beyond the power's standard display (see Display, below), such as moving, melting, transforming, or blasting a target. Psychokinesis powers can deal large amounts of damage.

For the purpose of psionics—magic transparency, psychokinesis powers are equivalent to powers of the evocation school (thus, creatures immune to evocation spells are also immune to psychokinesis powers).

Psychometabolism

Psychometabolism powers change the physical properties of some creature, thing, or condition.

For the purpose of psionics—magic transparency, psychometabolism powers are equivalent to powers of the transmutation school (thus, creatures immune to transmutation spells are also immune to psychometabolism powers).

Healing: Psychometabolism powers of the healing subdiscipline can remove damage from creatures. However, psionic healing usually falls short of divine magical healing, in direct comparisons.

Psychoportation

Psychoportation powers move the manifester, an object, or another creature through space and time.

For the purpose of psionics—magic transparency, psychoportation powers do not have an equivalent school.

Teleportation: A power of the teleportation subdiscipline transports one or more creatures or objects a great distance. The most potent of these powers can cross planar boundaries. Usually the transportation is one-way (unless otherwise noted) and not dispellable. Teleportation is instantaneous travel through the Astral Plane. Anything that blocks astral travel also blocks teleportation.

Telepathy

Telepathy powers can spy on and affect the minds of others, influencing or controlling their behavior.

Most telepathy powers are mind-affecting.

For the purpose of psionics—magic transparency, telepathy powers are equivalent to powers of the enchantment school (thus, creatures resistant to enchantment spells are equally resistant to telepathy powers).

Charm: A power of the charm subdiscipline changes the way the subject views you, typically making it see you as a good friend.

Compulsion: A power of the compulsion subdiscipline forces the subject to act in some manner or changes the way her mind works. Some compulsion powers determine the subject's actions or the effects on the subject, some allow you to determine the subject's actions when you manifest them, and others give you ongoing control over the subject.

[DESCRIPTOR]

Appearing on the same line as the discipline and subdiscipline (when applicable) is a descriptor that further categorizes the power in some way. Some powers have more than one descriptor.

The descriptors that apply to powers are acid, cold, death, electricity, evil, fire, force, good, language-dependent, light, mind-affecting, and sonic.

Most of these descriptors have no game effect by themselves, but they govern how the power interacts with other powers, with spells, with special abilities, with unusual creatures, with alignment, and so on.

A language-dependent power uses intelligible language as a medium.

A mind-affecting power works only against creatures with an Intelligence score of 1 or higher.

LEVEL

The next line of the power description gives a power's level, a number between 1 and 9 that defines the power's relative strength. This number is preceded by the name of the class whose members can manifest the power. If a power is part of a discipline's list instead of the psion's general power list, this will be indicated by the name of the discipline's specialist. The specialists a power can be associated with include Egoist (psychometabolism), Kineticist (psychokinesis), Nomad (psychoportation), Seer (clairsentience), Shaper (metacreativity), and Telepath (telepathy).

DISPLAY

When a power is manifested, a display may accompany the primary effect. This secondary effect may be auditory, material, mental, olfactory, or visual. No power's display is significant enough to create consequences for the psionic creatures, allies, or opponents during combat. The secondary effect for a power occurs only if the power's description indicates it. If multiple powers with similar displays are in effect simultaneously, the displays do not necessarily become more intense. Instead, the overall display remains much the same, though with minute spikes in intensity. A Psicraft check (DC 10 + 1 per additional power in use) reveals the exact number of simultaneous powers in play.

Dispense with Displays: Despite the fact that almost every power has a display, a psionic character can always choose to manifest the power without the flashy accompaniment. To manifest a power without any display (no matter how many displays it might have), a manifester must make a Concentration check (DC 15 + the level of the power). This check is part of the action of manifesting the power. If the check is unsuccessful, the power manifests normally with its display.

Even if a manifester manifests a power without a display, he is still subject to attacks of opportunity in appropriate circumstances. (Of course, another Concentration check can be made as normal to either manifest defensively or maintain the power if attacked.)

Auditory: A bass-pitched hum issues from the manifester's vicinity or in the vicinity of the power's subject (manifester's choice), eerily akin to many deep-pitched voices. The sound grows in a second from hardly noticeable to as loud as a shout strident enough to be heard within 100 feet. At the manifester's option, the instantaneous sound can be so soft that it can be heard only within 15 feet with a successful DC 10 Listen check. Some powers describe unique auditory displays.

Material: The subject or the area is briefly slicked with a translucent, shimmering substance. The glistening substance evaporates after 1 round regardless of the power's duration. Sophisticated psions recognize the material as ectoplasmic seepage from the Astral Plane; this substance is completely inert.

Mental: A subtle chime rings once in the minds of creatures within 15 feet of either the manifester or the subject (at the manifester's option). At the manifester's option, the chime can ring continuously for the power's duration. Some powers describe unique mental displays.

Olfactory: An odd but familiar odor brings to mind a brief mental flash of a long-buried memory. The scent is difficult to pin down, and no two individuals ever describe it the same way. The odor originates from the manifester and spreads to a distance of 20 feet, then fades in less than a second (or lasts for the duration, at the manifester's option).

Visual: The manifester's eyes burn like points of silver fire while the power remains in effect. A rainbow-flash of light sweeps away from the manifester to a distance of 5 feet and then dissipates, unless a unique visual display is described. This is the case when the Display entry includes "see text," which means that a visual effect is described somewhere in the text of the power.

MANIFESTING TIME

Most powers have a manifesting time of 1 standard action. Others take 1 round or more, while a few require only a free action.

A power that takes 1 round to manifest requires a full-round action. It comes into effect just before the beginning of your turn in the round after you began manifesting the power. You then act normally after the power is completed.

A power that takes 1 minute to manifest comes into effect just before your turn 1 minute later (and for each of those 10 rounds, you are manifesting a power as a full-round action, as noted above for 1-round manifesting times). These actions must be consecutive and uninterrupted, or the power points are lost and the power fails.

When you use a power that takes 1 round or longer to manifest, you must continue the concentration from the current round to just before your turn in the next round (at least). If you lose concentration before the manifesting time is complete, the power points are lost and the power fails.

You make all pertinent decisions about a power (range, target, area, effect, version, and so forth) when the power comes into effect.

New Action Types

Swift Action: A swift action consumes a very small amount of time, but represents a larger expenditure of effort and energy than a free action. You can perform one swift action per turn without affecting your ability to perform other actions. In that regard, a swift action is like a free action. However, you can perform only a single swift action per turn, regardless of what other actions you take. You can take a swift action any time you would normally be allowed to take a free action. Swift actions usually involve psionics or the activation of psionic items; many characters (especially those who don't use psionics) never have an opportunity to take a swift action.

Manifesting a quickened power is a swift action. In addition, manifesting any power with a casting time of 1 swift action is a swift action.

Manifesting a power with a manifesting time of 1 swift action does not provoke attacks of opportunity.

Immediate Action: Much like a swift action, an immediate action consumes a very small amount of time, but represents a larger expenditure of effort and energy than a free action. However, unlike a swift action, an immediate action can be performed at any time—even if it's not your turn. Using an immediate action on your turn is the same as using a swift action, and counts as your swift action for that turn. You cannot use another immediate action or a swift action until after your next turn if you have used an immediate action when it is not currently your turn (effectively, using an immediate action before your turn is equivalent to using your swift action for the coming turn). You also cannot use an immediate action if you are currently flat-footed.

RANGE

A power's range indicates how far from you it can reach, as defined in the Range entry of the power description. A power's range is the maximum distance from you that the power's effect can occur, as well as the maximum distance at which you can designate the power's point of origin. If any portion of the area would extend beyond the range, that area is wasted. Standard ranges include the following.

Personal: The power affects only you.

Touch: You must touch a creature or object to affect it. A touch power that deals damage can score a critical hit just as a weapon can. A touch power threatens a critical hit on a natural roll of 20 and deals double damage on a successful critical hit.

Some touch powers allow you to touch multiple targets. You can touch as many willing targets as you can reach, but all targets of the spell must be touched in the same round that you manifest the power.

Close: The power reaches as far as 25 feet away from you. The maximum range increases 5 feet for every two manifester levels you have.

Medium: The power reaches as far as 100 feet + 10 feet per manifester level.

Long: The power reaches as far as 400 feet + 40 feet per manifester level.

Range Expressed in Feet: Some powers have no standard range category, just a range expressed in feet.

AIMING A POWER

You must make some choice about whom the power is to affect or where the power's effect is to originate, depending on the type of power. The next entry in a power description defines the power's target (or targets), its effect, or its area, as appropriate.

Target or Targets: Some powers have a target or targets. You manifest these powers on creatures or objects, as defined by the power itself. You must be able to see or touch the target, and you must specifically choose that target. However, you do not have to select your target until you finish manifesting the power.

If you manifest a targeted power on the wrong type of target the power has no effect. If the target of a power is yourself (the power description has a line that reads "Target: You"), you do not receive a saving throw and power resistance does not apply. The Saving Throw and Power Resistance lines are omitted from such powers.

Some powers can be manifested only on willing targets. Declaring yourself as a willing target is something that can be done at any time (even if you're flat-footed or it isn't your turn). Unconscious creatures are automatically considered willing, but a character who is conscious but immobile or helpless (such as one who is bound, cowering, grappling, paralyzed, pinned, or stunned) is not automatically willing. The Saving Throw and Power Resistance lines are usually omitted from such powers, since only willing subjects can be targeted.

Effect: Some powers, such as most metacreativity powers, create things rather than affect things that are already present. Unless otherwise noted in the power description, you must designate the location where these things are to appear, either by seeing it or defining it. Range determines how far away an effect can appear, but if the effect is mobile, it can move regardless of the power's range once created.

Ray: Some effects are rays. You aim a ray as if using a ranged weapon, though typically you make a ranged touch attack rather than a normal ranged attack. As with a ranged weapon, you can fire into the dark or at an invisible creature and hope you hit something. You don't have to see the creature you're trying to hit, as you do with a targeted power. Intervening creatures and obstacles, however, can block your line of sight or provide cover for the creature you're aiming at.

If a ray power has a duration, it's the duration of the effect that the ray causes, not the length of time the ray itself persists. If a ray power deals damage, you can score a critical hit just as if it were a weapon. A ray power threatens a critical hit on a natural roll of 20 and deals double damage on a successful critical hit.

Spread: Some effects spread out from a point of origin (which may be a grid intersection, or may be the manifester) to a distance described in the power. The effect can extend around corners and into areas that you can't see. Figure distance by actual distance traveled, taking into account turns the effect may take. When determining distance for spread effects, count around walls, not through them. As with movement, do not trace diagonals across corners. You must designate the point of origin for such an effect (unless the effect is centered on you), but you need not have line of effect (see below) to all portions of the effect.

(S) Shapeable: If an Effect line ends with "(S)" you can shape the power. A shaped effect can have no dimension smaller than 10 feet.

Area: Some powers affect an area. Sometimes a power description specifies a specially defined area, but usually an area falls into one of the categories defined below.

Regardless of the shape of the area, you select the point where the power originates, but otherwise you usually don't control which creatures or objects the power affects. The point of origin of a power that affects an area is always a grid intersection. When determining whether a given creature is within the area of a power, count out the distance from the point of origin in squares just as you do when moving a character or when determining the range for a ranged attack. The only difference is that instead of counting from the center of one square to the center of the next, you count from intersection to intersection.

You can count diagonally across a square, but every second diagonal counts as 2 squares of distance. If the far edge of a square is within the power's area, anything within that square is within the power's area. If the power's area touches only the near edge of a square, however, anything within that square is unaffected by the power.

Burst, Emanation, or Spread: Most powers that affect an area function as a burst, an emanation, or a spread. In each case, you select the power's point of origin and measure its effect from that point. A burst power affects whatever it catches in its area, even including creatures that you can't see. It can't affect creatures with total cover from its point of origin (in other words, its effects don't extend around corners). The default shape for a burst effect is a sphere, but some burst powers are specifically described as cone-shaped.

A burst's area defines how far from the point of origin the power's effect extends.

An emanation power functions like a burst power, except that the effect continues to radiate from the point of origin for the duration of the power.

A spread power spreads out like a burst but can turn corners. You select the point of origin, and the power spreads out a given distance in all directions. Figure the area the power effect fills by taking into account any turns the effect takes.

Cone, Line, or Sphere: Most powers that affect an area have a particular shape, such as a cone, line, or sphere. A cone-shaped power shoots away from you in a quarter-circle in the direction you designate. It starts from any corner of your square and widens out as it goes. Most cones are either bursts or emanations (see above), and thus won't go around corners.

A line-shaped power shoots away from you in a line in the direction you designate. It starts from any corner of your square and extends to the limit of its range or until it strikes a barrier that blocks line of effect. A line-shaped power affects all creatures in squares that the line passes through or touches.

A sphere-shaped power expands from its point of origin to fill a spherical area. Spheres may be bursts, emanations, or spreads.

Other: A power can have a unique area, as defined in its description.

Line of Effect: A line of effect is a straight, unblocked path that indicates what a power can affect. A solid barrier cancels a line of effect, but it is not blocked by fog, darkness, and other factors that limit normal sight. You must have a clear line of effect to any target that you manifest a power on or to any space in which you wish to create an effect. You must have a clear line of effect to the point of origin of any power you manifest.

A burst, cone, or emanation power affects only an area, creatures, or objects to which it has line of effect from its origin (a spherical burst's center point, a cone-shaped burst's starting point, or an emanation's point of origin). An otherwise solid barrier with a hole of at least 1 square foot through it does not block a power's line of effect. Such an opening means that the 5-foot length of wall containing the hole is no longer considered a barrier for the purpose of determining a power's line of effect.

DURATION

A power's Duration line tells you how long the psionic energy of the power lasts.

Timed Durations: Many durations are measured in rounds, minutes, hours, or some other increment. When the time is up, the psionic energy sustaining the effect fades, and the power ends. If a power's duration is variable it is rolled secretly.

Instantaneous: The psionic energy comes and goes the instant the power is manifested, though the consequences might be long-lasting.

Permanent: The energy remains as long as the effect does. This means the power is vulnerable to *dispel psionics*.

Concentration: The power lasts as long as you concentrate on it. Concentrating to maintain a power is a standard action that does not provoke attacks of opportunity. Anything that could break your concentration when manifesting a power can also break your concentration while you're maintaining one, causing the power to end. You can't manifest a power while concentrating on another one. Some powers may last for a short time after you cease concentrating. In such a case, the power keeps going for the given length of time after you stop concentrating, but no longer. Otherwise, you must concentrate to maintain the power, but you can't maintain it for more than a stated duration in any event. If a target moves out of range, the power reacts as if your concentration had been broken.

Subjects, Effects, and Areas: If the power affects creatures directly the result travels with the subjects for the power's duration. If the power creates an effect, the effect lasts for the duration. The effect might move or remain still. Such an effect can be destroyed prior to when its duration ends. If the power affects an area then the power stays with that area for its duration. Creatures become subject to the power when they enter the area and are no longer subject to it when they leave.

Touch Powers and Holding the Charge: In most cases, if you don't discharge a touch power on the round you manifest it, you can hold the charge (postpone the discharge of the power) indefinitely. You can make touch attacks round after round. If you touch anything with your hand while holding a charge, the power discharges. If you manifest another power, the touch power dissipates.

Some touch powers allow you to touch multiple targets as part of the power. You can't hold the charge of such a power; you must touch all the targets of the power in the same round that you finish manifesting the power. You can touch one friend (or yourself) as a standard action or as many as six friends as a full round action.

Discharge: Occasionally a power lasts for a set duration or until triggered or discharged.

(D) Dismissible: If the Duration line ends with "(D)," you can dismiss the power at will. You must be within range of the power's effect and must mentally will the dismissal, which causes the same display as when you first manifested the power. Dismissing a power is a standard action that does not provoke attacks of opportunity. A power that depends on concentration is dismissible by its very nature, and dismissing it does not take an action or cause a display, since all you have to do to end the power is to stop concentrating on your turn.

SAVING THROW

Usually a harmful power allows a target to make a saving throw to avoid some or all of the effect. The Saving Throw line in a power description defines which type of saving throw the power allows and describes how saving throws against the power work.

Negates: The power has no effect on a subject that makes a successful saving throw.

Partial: The power causes an effect on its subject, such as death. A successful saving throw means that some lesser effect occurs (such as being dealt damage rather than being killed).

Half: The power deals damage, and a successful saving throw halves the damage taken (round down).

None: No saving throw is allowed.

(object): The power can be manifested on objects, which receive saving throws only if they are psionic or if they are attended (held, worn, grasped, or the like) by a creature resisting the power, in which case the object uses the creature's saving throw bonus unless its own bonus is greater. (This notation does not mean that a power can be manifested only on objects. Some powers of this sort can be manifested on creatures or objects.) A psionic item's saving throw bonuses are each equal to 2 + one-half the item's manifester level.

(harmless): The power is usually beneficial, not harmful, but a targeted creature can attempt a saving throw if it desires.

Saving Throw Difficulty Class: A saving throw against your power has a DC 10 + the level of the power + your key ability modifier (Intelligence for a psion, Wisdom for a psychic warrior, or Charisma for a wilder). A power's level can vary depending on your class. Always use the power level applicable to your class.

Succeeding on a Saving Throw: A creature that successfully saves against a power that has no obvious physical effects feels a hostile force or a tingle, but cannot deduce the exact nature of the attack. Likewise, if a creature's saving throw succeeds against a targeted power you sense that the power has failed. You do not sense when creatures succeed on saves against effect and area powers.

Failing a Saving Throw against Mind-Affecting Powers: If you fail your save, you are unaware that you have been affected by a power.

Automatic Failures and Successes: A natural 1 (the d20 comes up 1) on a saving throw is always a failure, and the power may deal damage to exposed items (see Items Surviving after a Saving Throw, below). A natural 20 (the d20 comes up 20) is always a success.

Voluntarily Giving up a Saving Throw: A creature can voluntarily forego a saving throw and willingly accept a power's result. Even a character with a special resistance to psionics can suppress this quality.

Items Surviving after a Saving Throw: Unless the descriptive text for the power specifies otherwise, all items carried or worn by a creature are assumed to survive a psionic attack. If a creature rolls a natural 1 on its saving throw against the effect, however, an exposed item is harmed (if the attack can harm objects). Refer to Table: Items Affected by Psionic Attacks.

Determine which four objects carried or worn by the creature are most likely to be affected and roll randomly among them. The randomly determined item must make a saving throw against the attack form or take whatever damage the attack deals.

Table: Items Affected by Psionic Attacks

Order ¹	Item
1st	Shield
2nd	Armor
3rd	Psionic or magic helmet, or psicrown
4th	Item in hand (including weapon, dorje, or the like)
5th	Psionic or magic cloak
6th	Stowed or sheathed weapon
7th	Psionic or magic bracers
8th	Psionic or magic clothing
9th	Psionic or magic jewelry (including rings)
10th	Anything else

1 In order of most likely to least likely to be affected.

POWER RESISTANCE

Power resistance is a special defensive ability. If your power is being resisted by a creature with power resistance, you must make a manifester level check (d20 + manifester level) at least equal to the creature's power resistance for the power to affect that creature. The defender's power resistance functions like an Armor Class against psionic attacks. Spell resistance is equivalent to power resistance unless the Psionics Is Different option is in use. Include any adjustments to your manifester level on this manifester level check.

The Power Resistance line and the descriptive text of a power description tell you whether power resistance protects creatures from the power. In many cases, power resistance applies only when a resistant creature is targeted by the power, not when a resistant creature encounters a power that is already in place.

The terms “object” and “harmless” mean the same thing for power resistance as they do for saving throws. A creature with power resistance must voluntarily lower the resistance (a standard action) to be affected by a power noted as harmless. In such a case, you do not need to make the manifester level check described above.

POWER POINTS

All powers have a Power Points line, indicating the power’s cost.

The psionic character class tables show how many power points a character has access to each day, depending on level.

A power’s cost is determined by its level, as shown below. Every power’s cost is noted in its description for ease of reference.

Table: Power Points by Power Level

Power Level	1	2	3	4	5	6	7	8	9
Power Point Cost	1	3	5	7	9	11	13	15	17

Power Point Limit: Some powers allow you to spend more than their base cost to achieve an improved effect, or augment the power. The maximum number of points you can spend on a power (for any reason) is equal to your manifester level.

XP Cost (XP): On the same line that the power point cost of a power is indicated, the power’s experience point cost, if any, is noted. Particularly powerful effects entail an experience point cost to you. No spell or power can restore XP lost in this manner. You cannot spend so much XP that you lose a level, so you cannot manifest a power with an XP cost unless you have enough XP to spare. However, you can, on gaining enough XP to attain a new level, use those XP for manifesting a power rather than keeping them and advancing a level. The XP are expended when you manifest the power, whether or not the manifestation succeeds.

DESCRIPTIVE TEXT

This portion of a power description details what the power does and how it works. If one of the previous lines in the description included “see text,” this is where the explanation is found. If the power you’re reading about is based on another power you might have to refer to a different power for the “see text” information. If a power is the equivalent of a spell an entry of “see spell text” directs you to the appropriate spell description.

Augment: Many powers have variable effects based on the number of power points you spend when you manifest them. The more points spent, the more powerful the manifestation. How this extra expenditure affects a power is specific to the power. Some augmentations allow you to increase the number of damage dice, while others extend a power’s duration or modify a power in unique ways. Each power that can be augmented includes an entry giving how many power points it costs to augment and the effects of doing so. However, you can spend only a total number of points on a power equal to your manifester level.

Augmenting a power takes place as part of another action (manifesting a power). Unless otherwise noted in the Augment section of an individual power description, you can augment a power only at the time you manifest it.

POWER LIST

An ^A appearing at the end of a power's name in the power lists denotes an augmentable power. An ^X denotes a power with an XP component paid by the manifester.

Power Chains: Some powers reference other powers that they are based upon. Only information in a power later in the power chain that is different from the base power is covered in the power being described. Header entries and other information that are the same as the base power are not repeated. The same holds true for powers that are the equivalents of spells, only the way the power varies from the spell is noted, such as power point cost.

Order of Presentation: In the power lists and the power descriptions that follow them, the powers are presented in alphabetical order by name—except for those belonging to certain power chains and those that are psionic equivalents of spells. When a power's name begins with “lesser,” “greater,” “mass,” or a similar kind of qualifier, the power description is alphabetized under the second word of the power description instead. When the effect of a power is essentially the same as that of a spell, the power's name is simply “Psionic” followed by the name of the spell, and it is alphabetized according to the spell name.

Manifester Level: A power's effect often depends on the manifester level, which is the manifester's psionic class level. A creature with no classes has a manifester level equal to its Hit Dice unless otherwise specified. The word “level” in the power lists always refers to manifester level.

Creatures and Characters: “Creatures” and “characters” are used synonymously in the power descriptions.

Augment: Many powers vary in strength depending on how many power points you put into them. The more power points you spend, the more powerful the manifestation. However, you can spend only a total number of points on a power equal to your manifester level, unless you have an ability that increases your effective manifester level.

Many powers can be augmented in more than one way. When the Augment section contains numbered paragraphs, you need to spend power points separately for each of the numbered options. When a paragraph in the Augment section begins with “In addition,” you gain the indicated benefit according to how many power points you have already decided to spend on manifesting the power.

PSION/WILDER POWERS

1ST-LEVEL PSION/WILDER POWERS

Astral Traveler: Enable yourself or another to join an *astral caravan*-enabled trip.

Attraction^A: Subject has an attraction you specify.

Bolt^A: You create a few enhanced short-lived bolts, arrows, or bullets.

Call to Mind: Gain additional Knowledge check with +4 competence bonus.

Catfall^A: Instantly save yourself from a fall.

Conceal Thoughts: You conceal your motives.

Control Flames^A: Take control of nearby open flame.

Control Light: Adjust ambient light levels.

Create Sound: Create the sound you desire.

Crystal Shard^A: Ranged touch attack for 1d6 points of piercing damage.

Daze, Psionic^A: Humanoid creature of 4 HD or less loses next action.

Deceleration^A: Target's speed is halved.

Déjà Vu^A: Your target repeats his last action.

Demoralize^A: Enemies become shaken.

Detect Psionics: You detect the presence of psionics.

Disable^A: Subjects incorrectly believe they are disabled.

Dissipating Touch^A: Touch deals 1d6 damage.

Distract: Target gets –4 bonus on Listen, Search, Sense Motive, and Spot checks.

Ecto Protection^A: An astral construct gains bonus against *dismiss ectoplasm*.

Empathy^A: You know the subject's surface emotions.

Empty Mind^A: You gain +2 on Will saves until your next action.

Energy Ray^A: Deal 1d6 energy (cold, electricity, fire, or sonic) damage.

Entangling Ectoplasm: You entangle a foe in sticky goo.

Far Hand^A: Move small objects at a limited distance.

Float^A: You buoy yourself in water or other liquid.

Force Screen^A: Invisible disc provides +4 shield bonus to AC.

Grease, Psionic: Makes 10-ft. square or one object slippery.

Hammer^A: Melee touch attack deals 1d8/round.

Inertial Armor^A: Tangible field of force provides you with +4 armor bonus to AC.

Know Direction and Location: You discover where you are and what direction you face.

Matter Agitation: You heat a creature or object.

Mind Thrust^A: Deal 1d10 damage.

Missive^A: Send a one-way telepathic message to subject.

My Light^A: Your eyes emit 20-ft. cone of light.

Precognition, Defensive^A: Gain +1 insight bonus to AC and saving throws.

Precognitionion, Offensive^A: Gain +1 insight bonus on your attack rolls.

Prescience, Offensive^A: Gain +2 insight bonus on your damage rolls.

Sense Link^A: You sense what the subject senses (single sense).

Skate: Subject slides skillfully along the ground.

Synesthete: You receive one kind of sense when another sense is stimulated.

Telempathic Projection: Alter the subject's mood.

Vigor^A: Gain 5 temporary hit points.

2ND-LEVEL PSION/WILDER POWERS

Bestow Power^A: Subject receives 2 power points.

Biofeedback^A: Gain damage reduction 2/-.

Body Equilibrium: You can walk on nonsolid surfaces.

Cloud Mind: You erase knowledge of your presence from target's mind.

Concealing Amorpha: Quasi-real membrane grants you concealment.

Concussion Blast^A: Deal 1d6 force damage to target.

Control Sound: Create very specific sounds.

Detect Hostile Intent: You can detect hostile creatures within 30 ft. of you.

Ego Whip^A: Deal 1d4 Cha damage and daze for 1 round.

Elfsight: Gain low-light vision, +2 bonus on Search and Spot checks, and notice secret doors.

Energy Adaptation, Specified^A: Gain resistance 10 against one energy type.

Energy Push^A: Deal 2d6 damage and knock subject back.

Energy Stun^A: Deal 1d6 damage and stun target if it fails both saves.

Feat Leech^A: Borrow another's psionic or metapsionic feats.

Id Insinuation^A: Swift tendrils of thought disrupt and confuse your target.

Identify, Psionic: Learn the properties of a psionic item.

Inflict Pain^A: Telepathic stab gives your foe -4 on attack rolls, or -2 if he makes the save.

Knock, Psionic: Opens locked or psionically sealed door.

Levitate, Psionic: You move up and down, forward and back via mental support.

Mental Disruption^A: Daze creatures within 10 feet for 1 round.

Missive, Mass^A: You send a one-way telepathic message to an area.

Psionic Lock: Secure a door, chest, or portal.

Recall Agony^A: Foe takes 2d6 damage.

Sense Link, Forced: Sense what subject senses.

Share Pain: Willing subject takes some of your damage.

Sustenance: Go without food and water for one day.

Swarm of Crystals^A: Crystal shards are sprayed forth doing 3d4 slashing damage.

Thought Shield^A: Gain PR 13 against mind-affecting powers.

Tongues, Psionic: You can communicate with intelligent creatures.

3RD-LEVEL PSION/WILDER POWERS

Body Adjustment^A: You heal 1d12 damage.

Body Purification^A: You restore 2 points of ability damage.

Danger Sense^A: You gain +4 bonus against traps.

Darkvision, Psionic: See 60 ft. in total darkness.

Dismiss Ectoplasm: Dissipates ectoplasmic targets and effects.

Dispel Psionics^A: Cancels psionic powers and effects.

Energy Bolt^A: Deal 5d6 energy damage in 120-ft. line.

Energy Burst^A: Deal 5d6 energy damage in 40-ft. burst.

Energy Retort^A: Ectoburst of energy automatically targets your attacker for 4d6 damage once each round.

Energy Wall: Create wall of your chosen energy type.

Eradicate Invisibility^A: Negate invisibility in 50-ft. burst.

Keen Edge, Psionic: Doubles normal weapon's threat range.

Mental Barrier^A: Gain +4 deflection bonus to AC until your next action.

Mind Trap^A: Drain 1d6 power points from anyone who attacks you with a telepathy power.

Psionic Blast: Stun creatures in 30-ft. cone for 1 round.

Share Pain, Forced^A: Unwilling subject takes some of your damage.

Solicit Psicrystal^A: Your psicrystal takes over your concentration power.

Telekinetic Force^A: Move an object with the sustained force of your mind.

Telekinetic Thrust^A: Hurl objects with the force of your mind.

Time Hop^A: Subject hops forward in time 1 round/level.

Touchsight^A: Your telekinetic field tells you where everything is.

Ubiquitous Vision: You have all-around vision.

4TH-LEVEL PSION/WILDER POWERS

Aura Sight^A: Reveals creatures, objects, powers, or spells of selected alignment axis.

Correspond: Hold mental conversation with another creature at any distance.

Death Urge^A: Implant a self-destructive compulsion.

Detect Remote Viewing: You know when others spy on you remotely.

Dimension Door, Psionic: Teleports you short distance.

Divination, Psionic: Provides useful advice for specific proposed action.

Empathic Feedback^A: When you are hit in melee, your attacker takes damage.

Energy Adaptation^A: Your body converts energy to harmless light.

Freedom of Movement, Psionic: You cannot be held or otherwise rendered immobile.

Intellect Fortress^A: Those inside fortress take only half damage from all powers and psi-like abilities until your next action.

Mindwipe^A: Subject's recent experiences wiped away, bestowing negative levels.

Personality Parasite: Subject's mind calves self-antagonistic splinter personality for 1 round/level.

Power Leech: Drain 1d6 power points/round while you maintain concentration; you gain 1/round.

Psychic Reformation^X: Subject can choose skills, feats, and powers anew for previous levels.

Telekinetic Maneuver^A: Telekinetically bull rush, disarm, grapple, or trip your target.

Trace Teleport^A: Learn destination of subject's *teleport*.

Wall of Ectoplasm: You create a protective barrier.

5TH-LEVEL PSION/WILDER POWERS

Adapt Body: Your body automatically adapts to hostile environments.

Catapsi^A: Psychic static inhibits power manifestation.

Ectoplasmic Shambler: Foglike predator deals 1 point of damage/two levels each round to an area.

Incarnate^X: Make some powers permanent.

Leech Field^A: Leech power points each time you make a saving throw.

Major Creation, Psionic: As *psionic minor creation*, plus stone and metal.

Plane Shift, Psionic: Travel to other planes.

Power Resistance: Grant PR equal to 12 + level.

Psychic Crush^A: Brutally crush subject's mental essence, reducing subject to -1 hit points.

Shatter Mind Blank: Cancels target's *mind blank* effect.

Tower of Iron Will^A: Grant PR 19 against mind-affecting powers to all creatures within 10 ft. until your next turn.

True Seeing, Psionic^A: See all things as they really are.

6TH-LEVEL PSION/WILDER POWERS

Aura Alteration^A: Repairs psyche or makes subject seem to be something it is not.

Breath of the Black Dragon^A: Breathe acid for 11d6 damage.

Cloud Mind, Mass: Erase knowledge of your presence from the minds of one creature/level.

Contingency, Psionic^X: Sets trigger condition for another power.

Co-opt Concentration: Take control of foe's concentration power.

Disintegrate, Psionic^A: Turn one creature or object to dust.

Fuse Flesh^A: Fuse subject's flesh, creating a helpless mass.

Overland Flight, Psionic: You fly at a speed of 40 ft. and can hustle over long distances.

Remote View Trap: Deal 8d6 points electricity damage to those who seek to view you at a distance.

Retrieve^A: Teleport to your hand an item you can see.

Suspend Life: Put yourself in a state akin to suspended animation.

Temporal Acceleration^A: Your time frame accelerates for 1 round.

7TH-LEVEL PSION/WILDER POWERS

Decerebrate: Remove portion of subject's brain stem.

Divert Teleport: Choose destination for another's *teleport*.

Energy Conversion: Offensively channel energy you've absorbed.

Energy Wave^A: Deal 13d4 damage of your chosen energy type in 120-ft. cone.

Evade Burst^A: You take no damage from a burst on a successful Reflex save.

Insanity^A: Subject is permanently *confused*.

Mind Blank, Personal: You are immune to scrying and mental effects.

Moment of Prescience, Psionic: You gain insight bonus on single attack roll, check, or save.

Oak Body^A: Your body becomes as hard as oak.

Phase Door, Psionic: Invisible passage through wood or stone.

Sequester, Psionic^X: Subject invisible to sight and remote viewing; renders subject comatose.

Ultrablast^A: Deal 13d6 damage in 15-ft. radius.

8TH-LEVEL PSION/WILDER POWERS

Bend Reality^X: Alters reality within power limits.

Iron Body, Psionic: Your body becomes living iron.

Matter Manipulation^X: Increase or decrease an object's base hardness by 5.

Mind Blank, Psionic: Subject immune to mental/emotional effects, scrying, and remote viewing.

Recall Death: Subject dies or takes 5d6 damage.

Shadow Body: You become a living shadow (not the creature).

Teleport, Psionic Greater: As *psionic teleport*, but no range limit and no off-target arrival.

True Metabolism: You regenerate 10 hit points/round.

9TH-LEVEL PSION/WILDER POWERS

Affinity Field: Effects that affect you also affect others.

Apopsi^X: You delete target's psionic powers.

Assimilate: Incorporate creature into your own body.

Etherealness, Psionic: Become ethereal for 1 min./level.

Microcosm^A: Creature or creature lives forevermore in world of his own imagination.

Reality Revision^X: As *bend reality*, but fewer limits.

Timeless Body: Ignore all harmful, and helpful, effects for 1 round.

PSIONIC POWERS (A-C)

Adapt Body

Psychometabolism

Level: Psion/wilder 5, psychic warrior 5

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level (D)

Power Points: 9

Your body automatically adapts to hostile environments. You can adapt to underwater, extremely hot, extremely cold, or airless environments, allowing you to survive as if you were a creature native to that environment. You can breathe and move (though penalties to movement and attacks, if any for a particular environment, remain), and you take no damage simply from being in that environment. You need not specify what environment you are adapting to when you manifest this power; simply activate it, and your body will instantly adapt to any hostile environment as needed throughout the duration. You can somewhat adapt to extreme environmental features such as acid, lava, fire, and electricity. Any environmental feature that normally directly deals 1 or more dice of damage per round deals you only half the usual amount of damage.

Affinity Field

Psychometabolism

Level: Psion/wilder 9

Display: Material and visual

Manifesting Time: 1 standard action

Range: 20 ft.

Area: 20-ft.-radius emanation, centered on you

Duration: 1 round/level (D)

Saving Throw: Fortitude negates (potentially harmless)

Power Resistance: Yes

Power Points: 17

You create an affinity feedback loop with all creatures within the area. While the duration lasts, affected creatures take all damage (including ability damage) as you do and heal all wounds as you do. Hit points gained or lost persist after this power ends.

Creatures in range are also subject to magical and psionic effects of 3rd level or lower. Creatures that have an affinity to you gain a saving throw against each new power transferred through the *affinity field* as if the power were manifested upon them normally. All magical and psionic effects transferred to subjects fade at the end of this power's duration, although instantaneous effects remain. If you suddenly become immune to a particular effect or power, the effect or power to which you are immune cannot be transferred to creatures that have affinity to you.

Anchored Navigation

Clairsentience

Level: Seer 4

Display: Material and olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: 7

You know where you are in relation to a fixed starting point, which is essential for setting up a mishap-free *teleport* beacon. While the duration lasts, you are aware of your exact distance and route (physical or psychoportive) back to a fixed starting point. The "anchored" starting point is your exact location when you manifest the power. To designate other anchored starting points, you must manifest this power multiple times and be present at the desired locations when you do so.

You can also retrace your steps through a maze automatically while the power lasts, without resorting to a map.

Anchored navigation grants you a *mindlink* with one designated creature who remains within a 60-foot radius of the starting point, regardless of the distance between you and the creature. The use of *anchored navigation* is confined to the plane of existence where you manifest it.

Augment: If you spend 6 additional power points, the effect of this power extends across all planar boundaries.

Animal Affinity

Psychometabolism

Level: Egoist 2, psychic warrior 2

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 3

You forge a psychometabolic affinity with an idealized animal form, thereby boosting one of your ability scores (choose either Strength, Dexterity, Constitution, Intelligence, Wisdom, or Charisma). The power grants a +4 enhancement bonus to the ability score you choose, adding the usual benefits provided by a high ability bonus. Because you are emulating the idealized form of an animal, you also take on minor aspects of the animal you choose. If you choose to increase the ability you use to manifest powers, you do not gain the benefit of an increased ability score long enough to gain any bonus power points for a high ability score, but the save DCs of your powers increase for the duration of this power.

Augment: For every 5 additional power points you spend, this power grants a +4 enhancement bonus to another ability.

Apopsi

Telepathy [Mind-Affecting]

Level: Psion/wilder 9

Display: Auditory, material, and visual

Manifesting Time: 1 round

Range: Close (25 ft. + 5 ft./2 levels)

Target: One living psionic creature

Duration: Instantaneous

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 17, XP

By using this power, you delete 1d4 powers permanently from the subject's mind. You specify the level of each power, and the DM randomly determines which of the subject's powers is actually deleted. *Psychic chirurgery* or *reality revision* can be used to restore the lost powers, but it must be performed within 1 week of losing the powers.

XP Cost: 50 XP per level of the deleted powers.

Assimilate

Psychometabolism

Level: Psion/wilder 9

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Touch

Target: One living creature touched

Duration: Instantaneous and 1 hour; see text

Saving Throw: Fortitude half

Power Resistance: Yes

Power Points: 17

Your pointing finger turns black as obsidian. A creature touched by you is partially assimilated into your form and takes 20d6 points of damage. Any creature reduced to 0 or fewer hit points by this power is killed, entirely assimilated into your form, leaving behind only a trace of fine dust. An assimilated creature's equipment is unaffected.

A creature that is partially assimilated into your form (that is, a creature that has at least 1 hit point following your use of this power) grants you a number of temporary hit points equal to half the damage you dealt for 1 hour.

A creature that is completely assimilated grants you a number of temporary hit points equal to the damage you dealt and a +4 bonus to each of your ability scores for 1 hour. If the assimilated creature knows psionic powers, you gain knowledge of one of its powers for 1 hour. You gain some semblance of a creature you completely assimilate for 1 hour, granting you a +10 bonus on Disguise checks made to appear as that creature during that time.

Astral Caravan

Psychoportation

Level: Nomad 3

Display: None

Manifesting Time: 1 hour

Range: Personal

Targets: You and touched willing creatures

Duration: See text

Power Points: 5

You lead a caravan into the Astral Plane, leaving the Material Plane behind. Since the Astral Plane touches upon other planes, you can travel astrally to any of these other planes as you wish, but only if you know your way (see below).

You can bring other willing creatures with you, provided that these subjects have each manifested *astral traveler* and are linked hand to hand with you at the time of the *astral caravan*'s manifestation. These fellow travelers are dependent upon you and must accompany you at all times. If something happens to you during the journey that causes you to break hand-to-hand contact, your companions are stranded wherever you leave them. Because the planes are a dangerous place, those who lead *astral caravans* usually choose to manifest this power only if they have a large party of travelers assembled. Sometimes groups of lower-level adventurers may hire you to lead forays beyond the Material Plane.

The *astral caravan* power lasts while you and your fellow travelers maintain your original formation, until (1) you reach your intended destination plane, (2) you desire to end the power while still traversing the Astral Plane, (3) you or anyone traveling with you breaks the hand-to-hand chain connecting the travelers for 2 consecutive rounds, or (4) the power is terminated by some outside means, such as *dispel psionics*. When the power ends, you and your fellow travelers halt in whatever portion of the Astral Plane you happen to be traversing (the Astral Plane is in many ways subjective in location; in any event, one place on the Astral looks much like any other).

While you are traveling through the Astral Plane, those natives who happen to glimpse you and your fellow travelers perceive you to be moving at a speed of 30 feet (you can't run), with you flying in the lead and your fellow travelers strung out behind you, each linked to the next by one hand.

Depending on your knowledge of the planes, your journey through the subjective space that is the Astral Plane may take a longer or shorter period of time. For each 24 hours you travel, make a Knowledge (the planes) check. Unless a location is particularly hard to find and well guarded, or conversely easy to find and well advertised, the average DC for an *astral caravan* journey should be set at 20. You cannot take 20 on this check, though you can take 10. Each check may be modified by your degree of familiarity with the destination or by some connection you have with the place; see the tables below.

Destination Knowledge (the planes)

Knowledge	Check Modifier
None*	n/a
Secondhand (you have heard of the destination)	-10
Firsthands (you have visited before)	+0
Familiar (you have visited three or more times)	+5

*If you have no direct knowledge of your destination, you must have some connection to it in order to travel there; see below.

Knowledge (the planes)

Knowledge	Check Modifier
Connection	
Likeness or picture of destination	+2
Object from destination	+4
Planar Cartographer's map of destination	+10

Each successful check indicates that you are one step closer to your goal. To finally arrive at your location, you must succeed on six checks within a span of 12 days. (If you fail to make six successful checks within the first 12 days, you can continue to make one check per day until you get the requisite six successes within a span of 12 consecutive days). When you successfully make the requisite number of checks, the journey ends, and you appear on your chosen plane within 10–1,000 (1d% x 10) miles of your intended destination on that plane.

Augment: If you spend 2 additional power points, this power weaves a quasi-real filmy membrane around yourself and all those adjacent to each other in the caravan (being linked by hand is not required if this membrane is used). You remain visible within the translucent, amorphous enclosure. You can pick up or drop willing passengers, easily reaching through the film. Anything you hold is enveloped by the film. Any attacks made through the enclosure in either direction have a 25% miss chance due to the rippling membrane.

When you manifest this power in its augmented form, your apparent speed to those observing on the Astral Plane is 40 feet, and you can make a Knowledge (the planes) check once every 12 hours to attempt to make it to your destination (six successful checks within 12 consecutive days still sees you to your desired goal).

Astral Construct

Metacreativity (Creation)

Level: Shaper 1

Display: Visual; see text

Manifesting Time: 1 round

Range: Close (25 ft. + 5 ft./2 levels)

Effect: One created astral construct

Duration: 1 round/level (D)

Saving Throw: None

Power Resistance: No

Power Points: 1

This power creates one 1st-level astral construct of solidified ectoplasm that attacks your enemies. It appears where you designate and acts immediately, on your turn. It attacks your opponents to the best of its ability. As a free action, you can mentally direct it not to attack, to attack particular enemies, or to perform other actions. The astral construct acts normally on the last round of the power's duration and dissipates at the end of its turn.

Astral constructs are not summoned; they are created on the plane you inhabit (using ectoplasm drawn from the Astral Plane). Thus, they are not subject to effects that hedge out or otherwise affect outsiders; they are constructs, not outsiders.

Augment: For every 2 additional power points you spend, the level of the astral construct increases by one.

Astral Seed

Metacreativity

Level: Shaper 8

Display: Material; see text

Manifesting Time: 10 minutes

Range: 0 ft.

Effect: One storage crystal

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 15

This power weaves strands of astral ectoplasm into a crystal containing the seed of your living mind (hardness 1 and 1 hit point). You can have only one *astral seed* in existence at any one time. Until such time as you perish, the *astral seed* (also called the storage crystal) is utterly inert. If you are slain at some later date, your soul transfers into the storage crystal, which begins to dimly glow.

Upon transference, your physical remains (should they still exist) become inert matter and cannot thereafter be restored to life. The transfer from the slain body to the *astral seed* works over any distance, physical or extradimensional.

Once your body's physical demise activates the storage crystal, you have the abilities of a psicrystal of the appropriate level, plus all the powers you knew and the maximum power points you possessed when *astral seed* was manifested—but you also have a negative level that cannot be healed and that does not convert to real level loss in your current crystalline form. You have thirty days to grow an organic body, after which time your sentience fades and your soul passes on if it hasn't entered a new body.

To grow a body, you (in the storage crystal) must spend ten days in uninterrupted solitude. The body's constituent parts are pulled as ectoplasm from the Astral Plane, then slowly molded and transformed into a living, breathing body that is an exact duplicate of your body at the time you manifested *astral seed* (the crystal itself breaks down and becomes a part of the new organic body). When the tenth day ends, you completely and totally inhabit the new body. You possess all the abilities you possessed when *astral seed* was manifested, at one level lower, but you have none of your equipment.

If the body is struck for any amount of damage during the ten-day period when it is growing, it is destroyed and your soul passes on.

Conceivably, you could manifest *mind switch* to utilize a temporary body, but only an evil creature would smash his own temporarily empty storage crystal to permanently usurp a subject's organic body (unless the subject is itself irredeemably evil).

Astral Traveler

Psychoportation

Level: Psion/wilder 1, psychic warrior 1

Display: None

Manifesting Time: 1 hour

Range: Touch

Target: Creature touched

Duration: See text

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 1

This power allows you or a creature you touch to participate in an astral caravan created through use of the *astral caravan* power. While participating in a journey allowed by the *astral caravan* power, you must hold the hand of both your fellow passenger ahead of you (or the caravan leader) and your fellow passenger behind you (unless you happen to be the last in the hand-linked line). If you or any one of your fellow passengers breaks the hand-to-hand link for 2 consecutive rounds, the impetus through the Astral Plane provided by *astral caravan* fails. See the *astral caravan* power for more information.

All those who are part of the caravan who are capable of performing purely mental actions, such as manifesting a power, may do so while maintaining hand-to-hand contact with their fellow travelers. When astral travelers begin their journey, each one is connected to the Material Plane by an insubstantial silvery cord. Very few weapons exist that can damage a silvery cord. The last creature in the line of those making up the caravan is sometimes referred to as the rear guard, because he or she has one hand free and can use it to wield a weapon without relinquishing his or her grip on the next traveler in line. The weightless, subjective environment of the Astral Plane allows the caravan to flex and bend as necessary to bring the rear guard's weapon to bear.

Attraction

Telepathy (Charm) [Mind-Affecting]

Level: Psion/wilder 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: 1 hour/level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

You plant a compelling attraction in the mind of the subject. The attraction can be toward a particular person or an object. The subject will take reasonable steps to meet, get close to, attend, or find the object of its implanted attraction. For the purpose of this power, "reasonable" means that, while attracted, the subject doesn't suffer from blind obsession. He will act on this attraction only when not engaged in combat. The subject won't perform obviously suicidal actions. He can still recognize danger but will not flee unless the threat is immediate. If you make the subject feel an attraction to yourself, you can't command him indiscriminately, although he will be willing to listen to you (even if he disagrees). This power grants you a +4 bonus on any interaction checks you make involving the subject (such as Bluff, Diplomacy, Intimidate, and Sense Motive).

Augment: For every 2 additional power points you spend, this power's save DC increases by 1 and the bonus on interaction checks increases by 1.

Aura Alteration

Telepathy [Mind-Affecting]

Level: Psion/wilder 6

Display: Material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One willing creature

Duration: 10 min./level or instantaneous; see text

Power Points: 11

You can use this power in one of two ways: to disguise the subject's aura (alignment) and level, or to remove a compulsion or charm effect from the subject.

Disguise: If you use this power to disguise the subject's alignment and level, the power has a duration of 10 minutes per level. You can change the subject's alignment by only one step. You can adjust the subject's apparent level up or down by a number equal to one-half your own level (rounded down) or less.

Remove Compulsion: If you use this power to attempt to cleanse the subject's aura of a baleful or controlling effect, the duration is instantaneous. This power can remove the compulsion of a curse or a *geas/quest* effect. It can also negate any charm and compulsion powers of 6th level or lower, such as *crisis of breath* or *death urge*. When *aura alteration* is

manifested for this purpose, the subject gains another saving throw to remove the compulsion afflicting it against the original save DC, but with a +2 bonus.

Augment: You can augment this power in one or both of the following ways.

1. For every additional power point you spend, the duration of the disguise aura increases by 10 minutes.
2. If you spend 2 additional power points, the subject's alignment shifts an additional step; if you spend 4 additional power points, the subject's alignment changes to its opposite.

Aura Sight

Clairsentience

Level: Psion/wilder 4

Display: Visual

Manifesting Time: 1 standard action

Range: 60 ft.

Area: Cone-shaped emanation centered on you

Duration: Concentration, up to 10 min./level

Saving Throw: None

Power Resistance: No

Power Points: 7

You discern auras. Auras are invisible to the naked eye, but to a psionic viewer manifesting this power they appear as glowing halos or envelopes of colored light that surround all objects. The color of each aura reveals information to the psionic character. The amount of information revealed depends on how long you study a particular area.

1st Round: Presence of good and evil auras in the area. You can't pin an aura to a particular object or individual at this stage; instead, you see a colored haze suffusing the area. (This power can detect lawful and chaotic auras as well, but doing so requires a separate manifestation that focuses only on that alignment axis.)

2nd Round: Number of auras (creatures, objects, powers, or spells) in the area. You know how many auras are in the area, even though each aura doesn't resolve to its actual location quite yet.

3rd Round: The owner of each aura is revealed, unless the individual is outside your line of sight. If a creature whose aura you detect has 5 or more Hit Dice than you do, you are overwhelmed by its presence and dazed for 1 round, and the power ends.

Augment: For every 2 additional power points you spend, this power's range increases by 5 feet.

Aversion

Telepathy (Compulsion) [Mind-Affecting]

Level: Telepath 2

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: 1 hour/level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

You plant a powerful aversion in the mind of the subject. If the object of the implanted aversion is an individual or a physical object, she will prefer not to approach within 30 feet of it. If it is a word, she will try not to utter it; if it is an action, she will not willingly attempt to perform it; and if it is an event, she will not willingly attend it. The subject will take reasonable steps to avoid the object of its aversion, but will not put herself in jeopardy by doing so.

If the subject is forced into taking an action she has an aversion to, she takes a -2 penalty on any attack rolls, ability checks, or skill checks involved.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1 and the duration increases by 1 hour.

Baleful Teleport

Psychoportation (Teleportation)

Level: Nomad 5

Display: Material and visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One corporeal creature

Duration: Instantaneous

Saving Throw: Fortitude half

Power Resistance: Yes

Power Points: 9

You psychoprotively disperse minuscule portions of the subject, dealing 9d6 points of damage. Targets can be protected from the effects of *baleful teleport* by *dimensional anchor*.

Augment: For every additional power point you spend, this power's damage increases by 1d6 points. For each extra 2d6 points of damage, this power's save DC increases by 1 and your manifester level increases by 1 for the purpose of overcoming power resistance.

Banishment, Psionic

Psychoportation

Level: Nomad 6

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Targets: One or more extraplanar creatures, no two of which can be more than 30 ft. apart

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 11

As the *banishment* spell, except as noted here.

Psions gain no benefit from presenting objects or substances that the target hates, fears, or otherwise opposes.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1 and your manifester level increases by 1 for the purpose of overcoming power resistance.

Bend Reality

Clairsentience

Level: Psion/wilder 8

Display: Visual

Manifesting Time: 1 standard action

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Power Resistance: Yes

Power Points: 15, XP

Bend reality lets you create nearly any type of effect. For example, *bend reality* can do any of the following:

- Duplicate any psion power of 6th level or lower, provided the power is not of a discipline prohibited to you.
- Duplicate any other power (but not a spell) of 5th level or lower, provided the power is not of a discipline prohibited to you.
- Duplicate any psion power of 5th level or lower, even if it's of a prohibited discipline.
- Duplicate any other power (but not a spell) of 4th level or lower, even if it's of a prohibited discipline.
- Undo the harmful effects of many powers, such as *psionic dominate*, *geas/quest*, or *insanity*.
- Produce any other effect whose power level is in line with the above effects, such as a single creature automatically hitting on its next attack or taking a -8 penalty on its next saving throw.

A duplicated power allows saving throws and power resistance as normal (but the save DC is for a 8th-level power).

When *bend reality* duplicates a power that has an XP cost, you must pay that cost or 300 XP, whichever is more. When *bend reality* duplicates a spell with a material component, you must pay additional XP equal to the value of the material component divided by 5.

XP Cost: 300 XP or more (see above).

Bestow Power

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: Mental

Manifesting Time: 1 standard action

Range: 20 ft.

Target: One psionic creature

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 3

You link your mind with another psionic creature's mind, creating a brief conduit through which mental energy can be shared. When you manifest this power, the subject gains up to 2 power points. You can transfer only as many power points to a subject as it has manifester levels.

Because of the intimate nature of this power, it cannot be fabricated into a psionic item—only power points generated by a psionic creature in the moment can be shared using *bestow power*.

Augment: For every 3 additional power points you spend, the subject gains 2 additional power points.

Biofeedback

Psychometabolism

Level: Psion/wilder 2, psychic warrior 1

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: Psion/wilder 3, psychic warrior 1

You can toughen your body against wounds, lessening their impact. During the duration of this power, you gain damage reduction 2/–.

Augment: For every 3 additional power points you spend, your damage reduction increases by 1.

Bite of the Wolf

Psychometabolism

Level: Psychic warrior 1

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 1

Your posture becomes stooped forward, and you grow a muzzle complete with fangs. You gain one bite attack each round, instead of or in addition to any other attacks you have, that deals 1d8 points of damage (assuming you are a Medium creature) when it hits.

Your bite attack is a natural weapon, so you are considered armed when attacking with it, and it can be affected by powers, spells, and effects that enhance or improve natural weapons. You can choose to deal nonlethal damage with your bite, taking the standard –4 penalty on your attack roll. If you bite as your only attack, you use your highest base attack bonus on the attack roll, and you can apply your full Strength bonus to damage. If you bite in addition to making other attacks, the bite is a secondary attack.

If you are not a Medium creature, your bite attack's base damage varies as follows: Fine 1d2, Diminutive 1d3, Tiny 1d4, Small 1d6, Large 2d6, Huge 2d8, Gargantuan 4d6, Colossal 6d6.

Based on your psychic warrior level, your bite increases in ferocity as noted here: at 5th level your bite deals an extra 1d8 points of damage, at 10th level an extra 2d8, at 15th level an extra 3d8, and at 20th level an extra 4d8 points.

Body Adjustment

Psychometabolism (Healing)

Level: Psion/wilder 3, psychic warrior 2

Display: Auditory and material

Manifesting Time: 1 round

Range: Personal

Target: You

Duration: Instantaneous

Power Points: Psion/wilder 5, psychic warrior 3

You take control of your body's healing process, curing yourself of 1d12 points of damage. As usual, when regular damage is healed, an equal amount of nonlethal damage is also healed.

Augment: For every 2 additional power points you spend, this power heals an additional 1d12 points of damage.

Body Equilibrium

Psychometabolism

Level: Psion/wilder 2, psychic warrior 2

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level (D)

Power Points: 3

You can adjust your body's equilibrium to correspond with any solid or liquid that you stand on. Thus, you can walk on water, quicksand, or even a spider's web without sinking or breaking through (this effect does not confer any resistance to particularly sticky webs). You can move at your normal speed, but you cannot run (x4 speed) on an unfirm surface without sinking or breaking through.

If you fall from any height while using this power, damage from the impact is halved.

Body Purification

Psychometabolism (Healing)

Level: Psion/wilder 3, psychic warrior 2

Display: Auditory and material

Manifesting Time: 1 round

Range: Personal

Target: You

Duration: Instantaneous

Power Points: Psion/wilder 5, psychic warrior 3

You restore up to 2 points of damage to a single ability score. You cannot use *body purification* to heal ability drain.

Augment: For every additional power point you spend, this power heals 1 additional point of damage to the same ability score.

Bolt

Metacreativity (Creation)

Level: Psion/wilder 1

Display: Material

Manifesting Time: 1 standard action

Range: 0 ft.

Effect: A normal bolt, arrow, or sling bullet

Duration: 1 min./level

Saving Throw: None

Power Resistance: No

Power Points: 1

You create 2d4 ectoplasmic crossbow bolts, arrows, or sling bullets, appropriate to your size, which dissipate into their constituent ectoplasmic particles when the duration ends or after being fired. Ammunition you create has a +1 enhancement bonus on attack rolls and damage rolls.

Augment: For every 3 additional power points you spend, this power improves the ammunition's enhancement bonus on attack rolls and damage rolls by 1.

Brain Lock

Telepathy (Compulsion) [Mind-Affecting]

Level: Telepath 2

Display: Material and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One humanoid

Duration: Concentration + 1 round

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

The subject's higher mind is locked away. He stands dazed, unable to take any psionic actions (including manifesting powers or using psionic feats that require a decision to be used) nor any mental actions at all.

A *brain locked* subject is not stunned, so attackers get no special advantage against him.

A *brain locked* flyer must descend to the closest safe level area below it. An air-breathing swimmer must make for the surface.

Augment: You can augment this power in one or both of the following ways.

1. If you spend 2 additional power points, this power can also affect an animal, fey, giant, magical beast, or monstrous humanoid.
2. If you spend 4 additional power points, this power can also affect an aberration, dragon, elemental, or outsider in addition to the creature types mentioned above.

Breath of the Black Dragon

Psychometabolism [Acid]

Level: Psion/wilder 6, psychic warrior 6

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Area: Cone-shaped burst centered on you

Duration: Instantaneous

Saving Throw: Reflex half

Power Resistance: Yes

Power Points: 11

Your mouth spews forth vitriolic acid that deals 11d6 points of acid damage to any targets in the area.

Augment: For every additional power point you spend, this power's damage increases by 1d6 points.

Burst

Psychoporation

Level: Nomad 1, psychic warrior 1

Display: Auditory

Manifesting Time: 1 swift action

Range: Personal

Target: You

Duration: 1 round

Power Points: 1

This power increases your land speed by 10 feet. (This adjustment counts as an enhancement bonus to speed.)

You can manifest this power with an instant thought, quickly enough to gain the benefit of the power on your turn before you move. Manifesting this power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

Call to Mind

Telepathy [Mind-Affecting]

Level: Psion/wilder 1

Display: Mental

Manifesting Time: 1 minute

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 1

By meditating on a subject, you can recall natural memories and knowledge otherwise inaccessible to you.

On a failed Knowledge check, you can manifest this power to gain a new check with a +4 competence bonus. If successful, you instantly recall what was previously buried in your subconscious.

Call Weaponry

Psychoporation (Teleportation)

Level: Psychic warrior 1

Display: Material

Manifesting Time: 1 round

Range: 0 ft.

Effect: One weapon; see text

Duration: 1 min./level; see text (D)

Saving Throw: None

Power Resistance: No

Power Points: 1

You call a weapon “from thin air” into your waiting hand (actually, it is a real weapon hailing from another location in space and time). You don’t have to see or know of a weapon to call it—in fact, you can’t call a specific weapon; you just specify the kind. If you call a projectile weapon, it comes with 3d6 nonmagical bolts, arrows, or sling bullets, as appropriate. The weapon is made of ordinary materials as appropriate for its kind. If you relinquish your grip on the weapon you called for 2 or more consecutive rounds, it automatically returns to wherever it originated.

Weapons gained by *call weaponry* are distinctive due to their astral glimmer. They are considered magic weapons and thus are effective against damage reduction that requires a magic weapon to overcome.

Augment: For every 4 additional power points you spend, this power improves the weapon’s enhancement bonus on attack rolls and damage rolls by 1.

Catapsi

Telepathy [Mind-Affecting]

Level: Psion/wilder 5, psychic warrior 5

Display: Mental and visual

Manifesting Time: 1 standard action

Range: 30 ft.

Area: 30-ft.-radius emanation centered on you

Duration: 1 round/level

Saving Throw: Will negates; see text

Power Resistance: Yes

Power Points: 9

By manifesting this power, you generate psychic static, interfering with the ability of other psionic characters to manifest their powers or use psi-like abilities (you are not affected by your own *catapsi* manifestation). All psionic activity within the area requires 4 more power points to manifest than normal, unless a character makes a Will save each time he attempts to manifest a power. Using a psi-like ability becomes a full-round action, instead of a standard action, in a *catapsi* field. If two or more fields of *catapsi* overlap, the effects are not cumulative.

The limit on the number of power points a subject can spend on a power remains in effect; thus, a subject may not be able to manifest its highest-level powers. If manifesting a power would cause the manifester to exceed his available power points or his spending limits, the manifestation fails automatically, but no power points are expended.

Augment: For every 4 additional power points you spend, this power’s range and the radius of its area both increase by 5 feet.

Catfall

Psychoportation

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: Until landing or 1 round/ level

Power Points: 1

You recover instantly from a fall and can absorb some damage from falling. You land on your feet no matter how far you fall, and you take damage as if the fall were 10 feet shorter than it actually is. This power affects you and anything you carry or hold (up to your maximum load). You can manifest this power with an instant thought, quickly enough to gain the benefit of the power while you fall. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can manifest this power even when it isn’t your turn.

Augment: For every additional power point you spend, this power reduces your damage as if the fall were an additional 10 feet shorter.

Chameleon

Psychometabolism

Level: Egoist 2, psychic warrior 1

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level (D)

Power Points: 1

Your skin and equipment take on the color and texture of nearby objects, including floors and walls. You receive a +10 enhancement bonus on Hide checks.

Charm, Psionic

Telepathy (Charm) [Mind-Affecting]

Level: Telepath 1

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One humanoid

Duration: 1 hour/level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

As the *charm person* spell, except as noted here.

Augment: You can augment this power in one or more of the following ways.

1. If you spend 2 additional power points, this power can also affect an animal, fey, giant, magical beast, or monstrous humanoid.
2. If you spend 4 additional power points, this power can also affect an aberration, dragon, elemental, or outsider in addition to the creature types mentioned above.
3. If you spend 4 additional power points, this power's duration increases to one day per level.

In addition, for every 2 additional power points you spend to achieve any of these effects, this power's save DC increases by 1.

Clairtangent Hand

Clairsentience (Scrying)

Level: Seer 5

Display: Auditory, mental, and visual

Manifesting Time: 1 standard action

Range: See text

Area: See text

Duration: Up to 1 min./level; see text (D)

Saving Throw: None

Power Resistance: No

Power Points: 9

You can emulate a *far hand* effect at any distance while simultaneously emulating *clairvoyant sense* to target your *far hand*; see the appropriate power descriptions. *Clairtangent hand*'s duration is up to 1 minute per level when used with a *far hand* effect.

Augment: If you spend 8 additional power points, you can emulate *clairvoyant sense* in conjunction with either *telekinetic force*, *telekinetic maneuver*, or *telekinetic thrust*, but this power's duration expires as soon as any of the noted telekinetic powers deals damage.

Clairvoyant Sense

Clairsentience (Scrying)

Level: Seer 2

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: See text

Effect: Psionic sensor

Duration: 1 min./level (D)

Saving Throw: None

Power Resistance: No

Power Points: 3

You can see and hear a distant location almost as if you were there. You don't need line of sight or line of effect, but the locale must be known—a place familiar to you or an obvious one, such as behind a door, around a corner, or in a grove of trees. Once you have selected the locale, the focus of your *clairvoyant sense* doesn't move, but you can rotate it in all directions to view the area as desired. Unlike other scrying powers, this power does not allow psionically or supernaturally enhanced senses to work through it.

If the chosen locale is magically or psionically dark, you see nothing. If it is naturally pitch black, you can see in a 10- foot radius around the center of the power's effect or out to the extent of your natural darkvision. The power does not work across planes.

Claw of Energy

Psychokinesis [see text]

Level: Psychic warrior 4

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level

Power Points: 7

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*), you can use this power to energize that weapon. The claw attack deals an extra 1d6 points of cold, electricity, or fire damage (as chosen by you at the time of manifestation) on a successful hit. On a critical hit, it deals an extra 1d10 points of energy damage. If the claw's critical multiplier is x3, add 2d10 points of energy damage instead; if the multiplier is x4, add 3d10 points of energy damage.

This power can be manifested on a claw attack that already deals energy damage, but if the claw already deals the same type of damage as the power, the effects stack. If this power is manifested on a claw attack already benefiting from the effect of the power, the newer manifestation supersedes the older manifestation, even if both manifestations are of different energy types.

This power's subtype is the same as the type of energy infused in the natural weapon.

Claws of the Beast

Psychometabolism

Level: Psychic warrior 1

Display: Visual

Manifesting Time: 1 swift action

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: see text

You call forth the aggressive nature of the beast inherent in yourself, psionically transforming your hands into deadly claws. You gain two natural attacks with your claws, each dealing 1d4 points of damage (1d6 if you are Large, or 1d3 if you are Small) plus your Strength bonus.

Your claws are natural weapons, so you are considered armed when attacking with them, and they can be affected by powers, spells, and effects that enhance or improve natural. You can choose to deal nonlethal damage with your claws, taking the standard -4 penalty on your attack roll.

Your claws work just like the natural weapons of many monsters. You can make an attack with one claw or a full attack with two claws at your normal attack bonus, replacing your normal attack routine. You take no penalties for two-weapon fighting, and neither attack is a secondary attack. If your base attack bonus is +6 or higher, you do not gain any additional attacks—you simply have two claw attacks at your normal attack bonus.

You can manifest this power with an instant thought, quickly enough to gain the benefit of the power on your turn before you attack. Manifesting this power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

You can call or dismiss the claws as a swift action during the duration of the power. If you attack with a manufactured weapon or another natural attack, you can't make any claw attacks in that round. You can still hold and manipulate items with your claws or cast spells just as well as you could with your hands.

Augment: If you spend additional power points, you can create larger, sharper, and more deadly claws, as shown on the table below.

Power	Claw Damage		
Points	Small	Medium	Large

1	1d3	1d4	1d6
3	1d4	1d6	1d8
5	1d6	1d8	2d6
7	1d8	2d6	3d6
11	2d6	3d6	4d6
15	3d6	4d6	5d6
19	4d6	5d6	6d6

Claws of the Vampire

Psychometabolism

Level: Psychic warrior 3

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level

Power Points: 5

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*), you can use this power to change the nature of that weapon. When this power is manifested, your claws take on an ominous glimmer. Each time you make a successful claw attack against a living creature of Small or larger size, you are healed of some amount of damage.

You heal a number of hit points equal to half the base damage dealt by your *claws of the vampire*, rounded down (additional damage dealt because of a high Strength score or other enhancements does not count toward the amount you heal). You heal as many hit points as can be gained while the creature remains at 1 hit point or higher. Any damage that would reduce the creature to 0 or fewer hit points does not benefit you.

You do not heal damage if your attack deals nonlethal damage, such as when you attack a creature that has the regeneration ability. Moreover, you gain no healing from attacking any creature that is under the effect of *biofeedback*. Using *fission* on yourself and then attacking your duplicate also fails to grant any healing.

Cloud Mind

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: None

Manifesting Time: 1 standard action

Range: Close (25 ft. +5 ft./2 levels)

Target: One creature

Duration: 1 min./level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

You make yourself completely undetectable to the subject by erasing all awareness of your presence from its mind. This power has the following effects.

First, you are invisible and inaudible to the creature. It cannot even detect your presence by means of blindsense, blindsight, scent, or tremorsense. It cannot pinpoint your location by any means.

Second, the subject remains unaware of your actions, provided you do not make any attacks or cause any obvious or directly threatening changes in the subject's environment. If you attack the subject creature, the effect ends.

If you take an action that creates a sustained and obvious change in the subject's environment—for example, attacking a creature aside from the subject or moving a large or attended object the subject can see—the subject immediately gains a new saving throw against the power. An ally of the subject creature that is able to see or perceive you can use a move action to warn the subject and thereby grant it a new saving throw.

Cloud Mind, Mass

Telepathy [Mind-Affecting]

Level: Psion/wilder 6

Target: One creature/level

Power Points: 11

As *cloud mind*, except as noted above. Each creature is affected individually.

Compression

Psychometabolism

Level: Psychic warrior 1

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 1

This power causes instant diminution, halving your height, length, and width and dividing your weight by 8. This decrease changes your size category to the next smaller one. You gain a +2 size bonus to Dexterity, a -2 size penalty to Strength (to a minimum effective Strength score of 1), a +1 size bonus on attack rolls, and a +1 size bonus to Armor Class due to your reduced size. If your new size is Tiny, you have a space of 2 1/2 feet and a natural reach of 0 feet (meaning that you must enter an opponent's square to attack). If your new size is Diminutive, you have a space of 1 foot and a natural reach of 0 feet. This power doesn't change your speed.

All your equipment, worn or carried, is similarly reduced by the power. Melee and projectile weapons deal less damage. Other psionic or magical properties are not affected by this power. Any affected item that leaves your possession (including a projectile or thrown weapon) instantly returns to its normal size. This means that thrown weapons deal their normal damage (projectiles deal damage based on the size of the weapon that fired them). Multiple effects that reduce size do not stack, which means (among other things) that you can't use a second manifestation of this power to further reduce yourself.

Augment: You can augment this power in one or more of the following ways.

1. If you spend 6 additional power points, this power decreases your size by two size categories. You gain a +4 size bonus to Dexterity, a -4 size penalty to Strength (to a minimum effective Strength score of 1), a +2 size bonus on attack rolls, and a +2 size bonus to Armor Class due to your reduced size.
2. If you spend 6 additional power points, you can manifest this power as a swift action instead of a standard action.
3. If you spend 2 additional power points, this power's duration is 1 minute per level rather than 1 round per level.

Conceal Thoughts

Telepathy [Mind-Affecting]

Level: Psion/wilder 1, psychic warrior 1

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One willing creature

Duration: 1 hour/level

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 1

You protect the subject's thoughts from analysis. While the duration lasts, the subject gains a +10 circumstance bonus on Bluff checks against those attempting to discern its true intentions with Sense Motive. It also gains a +4 bonus on its saving throw against any power or spell used to read its mind (such as *read thoughts* or *mind probe*).

Concealing Amorpha

Metacreativity (Creation)

Level: Psion/wilder 2, psychic warrior 2

Display: Material; see text

Manifesting Time: 1 standard action

Range: 0 ft.

Effect: Quasi-real amorphous film centered on you

Duration: 1 min./level (D)

Power Points: 3

Using *concealing amorpha*, you weave a quasi-real membrane around yourself. You remain visible within the translucent, amorphous enclosure. This distortion grants you concealment (opponents have a 20% miss chance), thanks to the rippling membrane encasing your form. You can pick up or drop objects, easily reaching through the film. Anything you hold is enveloped by the amorpha. Likewise, you can engage in melee, make ranged attacks, and manifest powers without hindrance.

Concealing Amorpha, Greater

Metacreativity (Creation)

Level: Shaper 3, psychic warrior 3

Duration: 1 round/level (D)

Power Points: 5

As *concealing amorphia*, except the quasi-real membrane so distorts your image and actual position that you gain total concealment (opponents have a 50% miss chance), but for a shorter period of time.

Concussion Blast

Psychokinesis [Force]

Level: Psion/wilder 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One creature or object

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes

Power Points: 3

A subject you select is pummeled with telekinetic force for 1d6 points of force damage. You can choose to have the power deal an equal amount of nonlethal damage instead. *Concussion blast* always affects a subject within range that you can see, even if the subject is in melee or has cover or concealment (you cannot use this power against creatures with total cover or total concealment).

Nonmagical, unattended objects (including doors, walls, locks, and so on) may also be damaged by this power.

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, this power's damage increases by 1d6 points.

2. For every 2 additional power points you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Contingency, Psionic

Clairsentience

Level: Psion/wilder 6

Display: Olfactory

Manifesting Time: 10 minutes or longer; see text

Range: Personal

Target: You

Duration: One day/level (D) or until discharged

Power Points: 11, XP

You can place another power upon your person so that it comes into effect under some condition you dictate when manifesting *psionic contingency*. The *psionic contingency* power and the companion power are manifest at the same time. The 10-minute manifesting time is the minimum total for both manifestations; if the companion power has a manifesting time longer than 10 minutes, use that instead. The power to be brought into effect by the *psionic contingency* must be one that affects your person and be of a power level no higher than one-third your manifester level (rounded down, maximum 6th level).

The conditions needed to bring the power into effect must be clear, although they can be general. In all cases, the *psionic contingency* immediately brings into effect the companion power, the latter being “manifested” instantaneously only when the prescribed circumstances occur. If complicated or convoluted conditions are prescribed, the power combination (*psionic contingency* and the companion power) may fail when called on.

You can use only one *psionic contingency* companion power at a time; if a second is manifested, the first one (if still active) is dismissed.

XP Cost: 15 XP.

Control Air

Psychokinesis

Level: Kineticist 2

Display: Mental

Manifesting Time: 1 standard action

Range: Long (400 ft. + 40 ft./level)

Area: 50-ft.-radius spread

Duration: Concentration, up to 1 min./level

Saving Throw: None

Power Resistance: No

Power Points: 3

You have some control over wind speed and direction. The speed of the wind within the area of this power can be increased or decreased by up to 10 miles per hour.

You can spend as many as 5 additional power points to augment this power, with each point allowing you to modify the wind speed by an additional 10 miles per hour, to a maximum change in wind speed of 60 miles per hour.

This power also gives you the ability to alter the direction of the wind by as much as 90 degrees.

Powerful enough winds can cause creatures to be blown away, knocked down, or checked.

Augment: See above.

Control Body

Psychokinesis

Level: Kineticist 4

Display: Material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One Medium or smaller creature with humanoid physiology

Duration: Concentration, up to 1 min./level

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 7

You psychokinetically control the actions of any humanoid (including undead or outsiders with a humanoid physiology) that is within range and to which you have line of sight. *Control body* doesn't require mental contact with the subject, since you are actually forcing limb movements independent of the target's mind. You can force the subject to stand up, sit down, walk, turn around, and so on, but operating the vocal cords is too difficult. You can also hold the subject immobile, rendering it helpless. You cannot force the subject to manifest powers, cast spells, or use any special ability that is not a function of just its body movements. If you lose line of sight to the subject, the effect of this power ends.

If you force the subject to engage in combat, its attack bonus is equal to your base attack bonus + your Intelligence bonus, and its bonus on damage rolls is equal to your Intelligence bonus. A subject of this power cannot make attacks of opportunity. The subject gains no benefit to Armor Class from its Dexterity, but it does gain a bonus to its AC equal to your Intelligence bonus.

Although the subject's body is under your control, the subject's mind is not. Creatures capable of taking purely mental actions (such as manifesting powers) can do so.

Augment: For every 2 additional power points you spend, this power can affect a target one size category larger.

Control Flames

Psychokinesis [Fire]

Level: Psion/wilder 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Area: One nonmagical fire source; see text

Duration: Concentration, up to 1 min./level

Saving Throw: See text

Power Resistance: No

Power Points: 1

You pyrokinetically control the intensity or movements of one fire source. A nonmagical fire source can be controlled if it is equal to or smaller than the maximum size of fire you can control according to your manifester level, as noted on the accompanying table. You can freely switch control between fire sources, or change the nature of your control, while you maintain concentration, but only one specified change (keeping a fire burning, animating it, or altering its size) can be made to one fire source in a round. When your control over a fire source lapses, that fire immediately returns to its original state (or goes out if it has no fuel or has been moved away from its original location). With this power, you can artificially keep a fire burning that would normally expire for lack of fuel; even dousing a controlled flame with water does not put it out (though completely submerging the flame would). Normally, a creature at risk of catching on fire can avoid this fate by making a DC 15 Reflex saving throw, with success indicating that the fire has gone out. If the fire is one that has been kept burning by the use of *control flames*, then the DC of the Reflex save needed to put out the flames increases to 25.

This power also enables you to make a fire move as if it were a living creature. You can animate only a naturally burning fire; if you attempt to animate one that has been increased or decreased in size by your augmentation of this power, the fire immediately returns to its original size. An animated fire moves at a speed of 30 feet. A fire that moves away from its fuel or its original location dies as soon as your control over it lapses.

An animated fire can enter any square, even if a creature already occupies it. If an animated fire enters a square occupied by a creature, that creature can make a Reflex save to get out of the way (DC 11 + the number of dice of damage the fire does + your Int modifier if you are a psion or your Cha modifier if you are a wilder). A successful Reflex save moves the creature to the nearest unoccupied square. The flames deal the indicated damage to any creature that is either on fire or surrounded by the flames (in the fire's space); see the accompanying table.

At the start of your turn, the animated fire deals damage to any creature in its space, and the creature catches on fire unless it makes a Reflex save (DC as noted above). A victim on fire takes 1d6 points of damage each round. Additional rounds in the same space as the animated fire occupies mean additional chances of ignition. The damage from multiple normal fires stacks, but the victim gets a saving throw each round to negate each fire. It is possible to switch control from the animated fire (causing it to disappear) to intensify flames that are already burning (thus denying the foe Reflex saves after the first).

Control Flames

Manifester Level	Fire Size	Example	Maximum Damage	
			per Round	Space
1st–2nd	Fine	Tindertwig	1	1 foot square
3rd–4th	Diminutive	Torch	1d3	1 foot square
5th–6th	Tiny	Small campfire	1d6	1 foot square
7th–8th	Small	Large campfire	2d6	1 foot square
9th–10th	Medium	Forge	3d6	1 foot square
11th–12th	Large	Bonfire	4d6	2-by-2-foot square
13th–14th	Huge	Burning shack	5d6	3-by-3-foot square
15th–16th	Gargantuan	Burning tavern	6d6	4-by-4-foot square
17th or higher	Colossal	Burning inn	7d6	5-by-5-foot square

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, you can increase the size of a fire you want to control by one step, up to the maximum size of fire you can control according to your manifester level.
2. For every 2 additional power points you spend, you can decrease the size of a fire you want to control by one step. You can reduce a Tiny or smaller fire to nothing, extinguishing it.

Control Light

Psychokinesis [Light]

Level: Psion/wilder 1

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Area: Nine 10-ft. cubes + three 10-ft. cubes/level

Duration: Concentration, up to 1 min./level, or 1 round; see text

Saving Throw: None

Power Resistance: No

Power Points: 1

By manipulating the ambient light level, you can decrease or increase the illumination of an area. The change in illumination can be gradual (taking as long as 1 minute) or sudden (occurring immediately when you manifest this power). You can alter the level of illumination from its original level at any time during the power's duration.

Decrease: You can decrease the illumination of an area by as little as 5% (barely perceptible) or as much as 100% (total darkness). If you decrease the light by 50% or more, the visual ability of creatures that depend on light to see declines accordingly. If you decrease the ambient light in an area by 100%, even those with lowlight vision are unable to see within the affected area. For each 25% decrease in ambient light, characters in the area gain a cumulative +1 circumstance bonus on Hide checks (to a maximum of +4 when all the light is gone).

Increase: You can increase the illumination of an area by as little as 5% (barely perceptible) or as much as 100%. If you increase the light by 50% or more, the visual ability of creatures that depend on light to see improves accordingly.

You can use this power to increase the illumination of an area by 200% (improving visual abilities accordingly), but in such a case the power's duration is only 1 round.

Control Object

Psychokinesis

Level: Kineticist 1

Display: Material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One unattended object weighing up to 100 lb.

Duration: Concentration, up to 1 round/level

Saving Throw: None

Power Resistance: No

Power Points: 1

You telekinetically “bring to life” an inanimate object. Though it is not actually alive, the object moves under your control. Live vegetation cannot be controlled in this fashion, nor can already animated objects or undead. The controlled object moves like a puppet, with jerky and clumsy movements, at a speed of up to 20 feet. If its form is rigid, it makes creaking, groaning, or grating sounds as you control it.

A controlled object can attack an opponent if you direct it to do so. It has one slam attack, at a base attack bonus equal to your base attack bonus plus your Intelligence modifier. If the attack hits, it deals points of damage equal to 1d6 plus your Intelligence modifier. A controlled object has its usual hardness and hit points.

You can use this power on a nonmagical lock, making it move in such a way as to attempt to unlock itself. If another character makes an Open Lock check involving a lock that you are concentrating on controlling, the character gains a +4 bonus on the check.

Control Sound

Psychokinesis [Sonic]

Level: Psion/wilder 2

Display: Auditory; see text

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One sound or mixture of related sounds

Duration: Concentration, up to 1 min./level; see text

Saving Throw: None

Power Resistance: No

Power Points: 3

You shape and alter existing sounds. You can target one sound, such as a person speaking or singing, or a group of related sounds, such as the patter of many raindrops or the tramp of soldiers passing by. A sound as quiet as a snapping finger can be controlled. You can substitute any sound you have heard for the target sound. If you attempt to exactly duplicate the voice of a specific individual, or an inherently terrifying sound (such as a dragon’s roar), you must succeed on a Bluff check with a +5 circumstance bonus opposed by the intended listener’s Sense Motive check to avoid arousing suspicion.

You can entirely muffle a noise or magnify a sound to such loudness that it drowns out all other conversation in the immediate area. In this way, you can provide yourself or any with a +4 circumstance bonus on Move Silently and Listen checks.

Alternatively, you can use up the power in an instant. You do this by modulating a sound into a one-time destructive impetus that shatters nonmagical/nonpsionic, unattended objects of crystal, glass, ceramics, or porcelain (vials, bottles, flasks, jugs, mirrors, and so forth) in the area.

Co-Opt Concentration

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 6

Display: Mental

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One creature

Duration: Concentration, up to 1 round/level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 11

You take over control of a power that was manifested by the subject and that must be maintained through concentration. Once you wrest control of the power from the subject, you have

several options.

- Allow the power to function as normal.
- Keep the power targeted on the subject (if a personal power) but decide how the power fulfills its function each round.
- Retarget the power on yourself (if a personal power).
- Choose not to concentrate on the co-opted power in the next round, ending the power at that point.

When the duration of *co-opt concentration* expires, the power you took control of ends (even if this would mean that the power ends earlier than normal).

Correspond

Telepathy [Mind-Affecting]

Level: Psion/wilder 4

Display: Mental

Manifesting Time: 10 minutes

Range: See text

Target: One creature with an Intelligence score of 3 or higher

Duration: 1 round/level

Saving Throw: None

Power Resistance: No

Power Points: 7

You forge a passive mental link with a creature with which you have previously had physical or mental contact. The subject need not be within sight or even on the same plane as you are. The subject recognizes you, and you can mentally communicate with it for the duration (though nothing forces the subject to respond to you), exchanging messages of twenty-five words or less once per round. Receiving a message is not an action and does not provoke attacks of opportunity; however, sending a message is equivalent to a standard action that can provoke attacks of opportunity.

Create Sound

Metacreativity (Creation) [Sonic]

Level: Psion/wilder 1

Display: Auditory; see text

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: Sounds; see text

Duration: 1 round/level (D)

Saving Throw: None

Power Resistance: No

Power Points: 1

You create a volume of sound that rises, recedes, approaches, or remains at a fixed place. You choose what type of sound the power creates when manifesting it and cannot thereafter change its basic character. The volume of sound created, however, depends on your level. You can produce as much noise as four normal humans per manifester level (maximum twenty humans). Thus, talking, singing, shouting, walking, marching, or running sounds can be created. The noise produced can be virtually any type of sound within the volume limit. A horde of rats running and squeaking is about the same volume as eight humans running and shouting. A roaring lion is equal to the noise from sixteen humans, while a roaring dire lion is equal to the noise from twenty humans.

If you wish to create a specific message, up to twenty-five words can be created, and those words repeat over and over until the duration expires or the power is dismissed. If you attempt to exactly duplicate the voice of a specific individual or an inherently terrifying sound (such as a dragon's roar), you must succeed on a Bluff check with a +2 circumstance bonus opposed by the listener's Sense Motive check to avoid arousing suspicion.

Create sound can be used to bring sounds into existence that you later manipulate by manifesting *control sound*.

Crisis of Breath

Telepathy (Compulsion) [Mind-Affecting]

Level: Telepath 3

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One breathing humanoid

Duration: 1 round/level

Saving Throw: Will negates, Fortitude partial; see text

Power Resistance: Yes

Power Points: 5

You compel the subject to purge its entire store of air in one explosive exhalation, and thereby disrupt the subject's autonomic breathing cycle. The subject's lungs do not automatically function again while the power's duration lasts.

If the target succeeds on a Will save when *crisis of breath* is manifested, it is unaffected by this power. If it fails its Will save, it can still continue to breathe by taking a standard action in each round to gasp for breath.

An affected creature can attempt to take actions normally (instead of consciously controlling its breathing), but each round it does so, beginning in the round when it failed its Will save, the subject risks blacking out from lack of oxygen. It must succeed on a Fortitude save at the end of any of its turns in which it did not consciously take a breath. The DC of this save increases by 1 in every consecutive round after the first one that goes by without a breath; the DC drops back to its original value if the subject spends an action to take a breath.

If a subject fails a Fortitude save, it is disabled (0 hp). In the following round, it drops to -1 hit points and is dying. Curing powers or spells can revive a dying subject normally, so long as this power's duration has expired; if the power is still in effect, a revived creature is still subject to Fortitude saves in each round when it does not consciously breathe.

Augment: You can augment this power in one or more of the following ways.

1. If you spend 2 additional power points, this power can also affect an animal, fey, giant, magical beast, or monstrous humanoid.
2. If you spend 4 additional power points, this power can also affect an aberration, dragon, elemental, or outsider in addition to the creature types mentioned above.
3. If you spend 6 additional power points, this power can affect up to four creatures all within a 20-ft.-radius burst.

In addition, for every 2 additional power points you spend to achieve any of these effects, this power's save DC increases by 1.

Crisis of Life

Telepathy [Mind-Affecting, Death]

Level: Telepath 7

Display: Mental

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One creature

Duration: Instantaneous

Saving Throw: Fortitude partial; see text

Power Resistance: Yes

Power Points: 13

You interrupt the subject's autonomic heart rhythm, killing it instantly on a failed saving throw if it has 11 Hit Dice or less. If the target makes its saving throw or has more than 11 Hit Dice, it takes 7d6 points of damage.

Augment: For every additional power point you spend, this power can kill a subject that has Hit Dice equal to 11 + the number of additional points.

Crystal Shard

Metacreativity (Creation)

Level: Psion/wilder 1

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: Ray

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 1

Upon manifesting this power, you propel a razor-sharp crystal shard at your target. You must succeed on a ranged touch attack with the ray to deal damage to a target. The ray deals 1d6 points of piercing damage.

Augment: For every additional power point you spend, this power's damage increases by 1d6 points.

Crystallize

Metacreativity

Level: Shaper 6

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One living creature

Duration: Permanent

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 11

You seed the subject's flesh with supersaturated crystal. In an eyeblink, the subject's form seems to freeze over, as its flesh and fluids are instantly crystallized. Following the application of this power, the subject appears lifeless. In fact, it is not dead (though no life can be detected with powers or spells that detect such).

This power has a chance of being dispelled only by a manifeste of a higher level than you when you manifested this power. When the power is dispelled, crystal melts back into flesh, and the subject is in exactly the state he was prior being affected by *crystallize*.

PSIONIC POWERS (D-F)

Danger Sense

Clairsentience

Level: Psion/wilder 3, psychic warrior 3

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level (D)

Power Points: 5

You can sense the presence of danger before your senses would normally allow it. Your intuitive sense alerts you to danger from traps, giving you a +4 insight bonus on Reflex saves to avoid traps and a +4 insight bonus to Armor Class against attacks by traps.

Augment: If you spend 3 additional power points, this power also gives you the uncanny dodge ability; if you spend 6 additional power points, this power gives you the improved uncanny dodge ability as well.

Darkvision, Psionic

Clairsentience

Level: Psion/wilder 3, psychic warrior 2

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: Psion/wilder 5, psychic warrior 3

As the *darkvision* spell, except as noted here.

Daze, Psionic

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 1

Display: Material and mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One humanoid creature that has 4 HD or less

Duration: 1 round

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

As the *daze* spell, except as noted here.

Augment: For every additional power point you spend, this power can affect a target that has Hit Dice equal to 4 + the additional points.

Death Urge

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 4

Display: Mental

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One living creature

Duration: 1 round

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

You plant a hidden death-urge impulse in the subject's unconscious. On the subject's next turn, it looks for the quickest method to end its life and attempts to do so. The subject takes no other action on its turn except attempting to harm itself.

If armed, the subject attacks itself as a full-round action. The attack automatically succeeds and deals damage as a critical hit. If unarmed, the subject moves adjacent to the nearest enemy and provokes an attack of opportunity, offering its opponent an opening, which the opponent may or may not choose to take advantage of.

If the subject is unarmed and no enemy is nearby, the subject simply does nothing at all. A subject close to an immediate and lethal hazard such as a cliff or a fire might hurl itself off the cliff or into the fire instead of striking itself with a weapon.

Augment: For every 4 additional power points you spend, this power's save DC increases by 2 and its duration increases by 1 round.

Deceleration

Psychoportation

Level: Psion/wilder 1

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./level)

Target: One Medium or smaller creature

Duration: 1 min./level

Saving Throw: Reflex negates

Power Resistance: Yes

Power Points: 1

You warp space around an individual, hindering the subject's ability to move. The subject's speed (in any movement mode it possesses) is halved. A subsequent manifestation of *deceleration* on the subject does not further decrease its speed.

Augment: For every 2 additional power points you spend, this power can affect a target one size category larger.

Decerebrate

Psychoportation [Teleportation]

Level: Psion/wilder 7

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./level)

Target: One living creature

Duration: Instantaneous

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 13

With *decerebrate*, you selectively remove a portion of the subject's brain stem. The creature loses all cerebral function, vision, hearing, and other sensory abilities, and all voluntary motor activity. The subject becomes limp and unresponsive. Without extreme measures, such as *greater restoration* or some other suitable effect of 7th level or higher, the creature perishes in 1d4 days.

Déjà Vu

Telepathy [Mind-Affecting]

Level: Psion/wilder 1

Display: Mental

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One creature

Duration: 1 round

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

Your mental impulse forces the subject to repeat the actions it took on its previous turn. If the situation has changed in such a way that the subject can't take the same actions again (if its foe is dead, or the subject has run out of power points, and so on), the subject stands still and takes no actions for 1 round. In any event, the subject can still defend itself, and it retains its Dexterity bonus to AC even if it stands still.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Demoralize

Telepathy [Mind-Affecting]

Level: Psion/wilder 1
Display: Mental and olfactory
Manifesting Time: 1 standard action
Range: 30 ft.
Area: 30-ft.-radius spread centered on you
Duration: 1 min./level
Saving Throw: Will negates
Power Resistance: Yes
Power Points: 1

You fill your enemies with self-doubt. Any enemy in the area that fails its save becomes shaken for the duration of the power. Allies and creatures without an Intelligence score are unaffected.

Augment: For every 2 additional power points you spend, this power's range and the radius of its area both increase by 5 feet, and the power's save DC increases by 1.

Destiny Dissonance
Clairsentience

Level: Seer 1
Display: Material and mental
Manifesting Time: 1 standard action
Range: Touch
Target: Creature touched
Duration: 1 round/level
Saving Throw: None
Power Resistance: Yes
Power Points: 1

Your mere touch grants your foe an imperfect, unfocused glimpse of the many possible futures in store. Unaccustomed to and unable to process the information, the subject becomes sickened for 1 round per level of the manifester.

Detect Hostile Intent
Telepathy [Mind-Affecting]

Level: Psion/wilder 2, psychic warrior 2
Display: Olfactory
Manifesting Time: 1 standard action
Range: 30 ft.
Area: 30-ft.-radius emanation centered on you
Duration: 10 min./level (D)
Saving Throw: None
Power Resistance: No
Power Points: 3

While the duration of this power lasts, you become aware of the presence of any creatures with hostile intent within 30 feet of you, and their direction from you (but not their specific location). The power detects active aggression, as opposed to vigilance. In addition, while this power is active you cannot be surprised or caught flatfooted by creatures that are susceptible to mind-affecting powers.

While under the effect of this power, you can make Sense Motive checks as a free action against anyone within 30 feet of you.

The power can penetrate barriers, but 3 feet of stone, 3 inches of common metal, 1 inch of lead, or 6 feet of wood or dirt blocks it.

Detect Psionics
Clairsentience

Level: Psion/wilder 1, psychic warrior 1
Display: Auditory and visual
Manifesting Time: 1 standard action
Range: 60 ft.
Area: Cone -shaped emanation centered on you
Duration: Concentration, up to 1 min./level (D)
Saving Throw: None
Power Resistance: No

Power Points: 1

You detect psionic auras. A psionic aura is given off by any active or permanent power, or during the use of any psionic feat. Characters who have levels in a psionic class, creatures with the psionic subtype, and creatures with the Wild Talent feat possess psionic auras. The amount of information revealed by the manifestation of this power depends on how long you study a particular area or subject.

1st Round: Presence or absence of psionic auras.

2nd Round: Number of different psionic auras and the strength of the most potent aura.

3rd Round: The strength and location of each aura. If the items or creatures bearing the auras are in line of sight, you can make Psicraft checks to determine the discipline involved in each aura. (Make one check per aura; DC 15 + power level, or 15 + one-half manifester level for an effect that is not created by a power, such as that of a psionic item.)

Psionically charged locations, multiple disciplines, or strong local psionic emanations may confuse or conceal weaker auras.

Aura Strength: A psionic aura's strength depends on a functioning power's level or an item's manifester level. If an aura falls into more than one category, *detect psionics* indicates the stronger of the two. Detection of an overwhelming aura (see the accompanying table) dazes you for 1 round and the power ends.

Detect Psionics

Power or Item	Aura Strength			
	Faint	Moderate	Strong	Overwhelming
Functioning power (power level)	3rd or lower	4th–6th	7th–9th	10th+ (deity-level)
Psionic item (manifester level)	5th or lower	6th–11th	12th–20th	21st+ (artifact)

Lingering Aura: A psionic aura lingers after its original source dissipates (in the case of a power) or is destroyed (in the case of a psionic item). If *detect psionics* is manifested and directed at such a location, the power indicates an aura of dim (even weaker than a faint aura). How long the aura lingers at this dim level depends on its original strength:

Original Strength	Duration
Faint	1d6 minutes
Moderate	1d6 x 10 minutes
Strong	1d6 hours
Overwhelming	1d6 days

Each round, you can turn to detect psionics in a new area. You can tell the difference between magical and psionic auras. The power can penetrate barriers, but 1 foot of stone, 1 inch of common metal, a thin sheet of lead, or 3 feet of wood or dirt blocks it.

Detect Remote Viewing

Clairsentience

Level: Psion/wilder 4

Display: Mental and visual

Manifesting Time: 1 standard action

Range: 40 ft.

Area: 40-ft.-radius emanation centered on you

Duration: 24 hours

Saving Throw: None

Power Resistance: No

Power Points: 7

You immediately become aware of any attempt to observe you by means of a clairsentience (scrying) power or divination (scrying) spell. The power's effect radiates from you and moves as you move. You know the location of every psionic or magical sensor within the power's area.

If the viewing attempt originates within the area, you also know the viewer's location. Otherwise, you and the remote viewer immediately make opposed manifester level checks (1d20 + manifester level, or viewer's caster level as appropriate). If you at least match the remote viewer's result, you get a visual image of the remote viewer and an accurate sense of the remote viewer's direction and distance from you.

Detect Teleportation

Clairsentience

Level: Nomad 1

Display: Visual

Manifesting Time: 1 standard action

Range: 40 ft.

Area: 40-ft.-radius emanation centered on you

Duration: Concentration, up to 1 minute (D)

Saving Throw: No

Power Resistance: No

Power Points: 1

You sense the use of any effects of the teleportation subdiscipline within the area. You sense the use of these powers whether or not you have line of sight or line of effect (although a force effect prevents this detection). When you sense the use of an appropriate power, you know the direction in which the power was used, though not the distance or the exact effect.

Augment: If you spend 2 additional power points, this power's range increases to Medium (100 ft. + 10 ft./level).

Dimension Door, Psionic

Psychoportation (Teleportation)

Level: Psion/wilder 4, psychic warrior 4

Display: Visual

Manifesting Time: 1 standard action

Range: Long (400 ft. + 40 ft./level)

Target or Targets: You and touched objects or other touched willing creatures

Duration: Instantaneous

Saving Throw: None and Will negates (object)

Power Resistance: No and Yes (object)

Power Points: 7

As the *dimension door* spell, except as noted here.

Augment: If you spend 6 additional power points, you can manifest this power as a move action.

Dimension Slide

Psychoportation (Teleportation)

Level: Psychic warrior 3

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: You; see text

Duration: Instantaneous

Power Points: 5

You instantly transfer yourself from your current location to any other spot within range to which you have line of sight. You can bring along possessions that amount to as much as a medium load, including living creatures that weigh as much as 20 pounds. Movement caused by the use of *dimension slide* does not provoke attacks of opportunity.

If you somehow attempt to transfer yourself to a location occupied by a solid body or a location you can't see the power simply fails to function.

Augment: If you spend 4 additional power points, you can manifest this power as a move action.

Dimension Swap

Psychoportation (Teleportation)

Level: Nomad 2, psychic warrior 2

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Targets: You and one ally in range, or any two allies in range; see text

Duration: Instantaneous

Saving Throw: Will negates (harmless, object)

Power Resistance: Yes (harmless, object)

Power Points: 3

You instantly swap positions between your current position and that of a designated ally in range. Alternatively, you can swap the positions of any two allies in range. This power affects creatures of Large or smaller size. You can bring along objects, but not other creatures.

Special: A psychic warrior can manifest this power to swap positions with an ally, but not to swap the positions of two allies.

Augment: For every 2 additional power points you spend, this power can affect a target one size category larger.

Dimensional Anchor, Psionic

Psychoporation

Level: Nomad 4

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Effect: Ray

Duration: 1 min./level

Saving Throw: None

Power Resistance: Yes (object)

Power Points: 7

As the *dimensional anchor* spell, except as noted here.

Disable

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 1

Display: Visual

Manifesting Time: 1 standard action

Range: 20 ft.

Area: Cone-shaped emanation centered on you

Duration: 1 min./level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

You broadcast a mental compulsion that convinces one or more creatures of 4 Hit Dice or less that they are disabled (see page 307 of the *Player's Handbook*). Creatures with the fewest HD are affected first. Among creatures with equal Hit Dice, those who are closest to the power's point of origin are affected first. Hit Dice that are not sufficient to affect a creature are wasted. Creatures that are rendered helpless or are destroyed when they reach 0 hit points cannot be affected.

Creatures affected by this power believe that they have somehow been brought to the brink of unconsciousness and must act accordingly. While it's possible for an important nonplayer character to attempt some sort of "heroic" action, common NPCs and creatures under the effect of this power typically cower or retreat.

Any creature that attempts to take a standard action immediately breaks the compulsion and can act normally. A creature that attempts to heal itself or that receives healing is likewise freed of the compulsion, and if it is not actually wounded, the healing is wasted. A creature that takes damage is also instantly freed of the compulsion (although the damage still counts against its actual current hit points).

Augment: For every 2 additional power points you spend, this power's range increases by 5 feet and its save DC increases by 1.

In addition, for every additional power point you spend to increase the range and the save DC, this power can affect targets that have Hit Dice equal to 4 + the number of additional points.

Disintegrate, Psionic

Psychoporation

Level: Psion/wilder 6

Display: Auditory, material, and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Effect: Ray

Duration: Instantaneous

Saving Throw: Fortitude partial (object)

Power Resistance: Yes

Power Points: 11

A thin, green ray springs from your pointing finger. You must make a successful ranged touch attack to hit. Any creature struck by the ray takes 22d6 points of damage. Any creature reduced to 0 or fewer hit points by this power is entirely disintegrated, leaving behind only a trace of fine dust. A disintegrated creature's equipment is unaffected. When used against an object, the ray simply disintegrates as much as one 10-foot cube of nonliving matter. Thus, the power disintegrates only part of any very large object or structure targeted. The ray affects even objects constructed entirely of force, but not psionic effects such as a *null psionics field*. A creature or object that makes a successful Fortitude save is partially affected, taking only 5d6 points of damage. If this damage reduces the creature or object to 0 or fewer hit points, it is entirely disintegrated. Only the first creature or object struck can be affected; that is, the ray affects only one target per manifestation.

Augment: For every additional power point you spend, the damage this power deals to a subject that fails its saving throw increases by 2d6 points. Augmenting this power does not change the amount of damage the target takes if it succeeds on its saving throw.

Dismissal, Psionic

Psychoportation

Level: Nomad 4

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One extraplanar creature

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

As the *dismissal* spell, except as noted here.

Dismiss Ectoplasm

Metacreativity

Level: Psion/wilder 3

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Area: 30-ft.-radius burst

Duration: Instantaneous

Saving Throw: Will negates; see text

Power Resistance: No

Power Points: 5

You dismiss creatures, objects, or effects composed of ectoplasm, such as astral constructs or the *ectoplasmic cocoon* power, or that were formerly composed of ectoplasm, such as items created by metacreativity (creation) powers.

An ectoplasmic creature that fails its Will saving throw dissipates into so much constituent ectoplasm, which evaporates immediately.

A creature under the effect of the *ectoplasmic form* power that fails its saving throw is either destroyed outright or physically shifted to a random location on the Astral Plane (50% chance for either result).

Other ongoing powers that create ectoplasmic objects or effects, such as *ectoplasmic cocoon*, are dismissed if you succeed on a manifeste level check (1d20 + your manifeste level, maximum +10) against a DC of 11 + the power's manifeste level.

Dispel Psionics

Psychokinesis

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target or Area: One manifeste, creature, or object; or 20-ft.-radius burst

Duration: Instantaneous or 1d4 rounds; see text

Saving Throw: None

Power Resistance: No

Power Points: 5

You can use *dispel psionics* to end ongoing powers that have been manifested on a creature or object, to temporarily suppress the psionic abilities of a psionic item, or to end ongoing powers (or at least their effects) within an area. A dispelled power ends as if its duration had expired. Some powers, as detailed in their descriptions, can't be defeated by *dispel psionics*, or can be ended only if you manifest *dispel psionics* at a high enough manifester level. *Dispel psionics* can end spell-like effects just as it does powers.

The effect of a power with an instantaneous duration can't be dispelled, because the psionic effect is already over before the *dispel psionics* can take effect.

You choose to use *dispel psionics* in one of two ways: a targeted dispel or an area dispel.

Targeted Dispel: One object, creature, or power is the target of the *dispel psionics* power. You make a dispel check (1d20 + your manifester level, maximum +10) against the power or against each ongoing power currently in effect on the object or creature. The DC for this dispel check is 11 + the power's manifester level. If you succeed on a particular check, that power is dispelled; if you fail, that power remains in effect.

If you target an object or creature that is the effect of an ongoing power or is under the effect of an ongoing power, you make a dispel check to end the power or its effect. If the object that you target is a psionic item, you make a dispel check against the item's manifester level. If you succeed, all the item's psionic properties are suppressed for 1d4 rounds, after which the item recovers on its own. A suppressed item becomes nonpsionic for the duration of the effect. An interdimensional interface is temporarily closed. A psionic item's physical properties are unchanged: A suppressed psionic sword is still a sword (a masterwork sword, in fact). Artifacts and deities are unaffected by mortal power such as this.

You automatically succeed on your dispel check against any power that you manifested yourself.

Area Dispel: When *dispel psionics* is used in this way, the power affects everything within a 20-foot radius. For each creature within the area that is the subject of one or more powers, you make a dispel check against the power with the highest manifester level. If that check fails, you make dispel checks against progressively weaker powers until you dispel one power (which discharges the *dispel psionics* power so far as that target is concerned) or until you fail all your checks. The creature's psionic items are not affected.

For each object within the area that is the target of one or more powers, you make dispel checks as with creatures. Psionic items are not affected by an area dispel.

For each ongoing area or effect power whose point of origin is within the area of the *dispel psionics* power, you can make a dispel check to dispel the power.

For each ongoing power whose area overlaps that of the *dispel psionics* power, you can make a dispel check to end the effect, but only within the overlapping area.

If an object or creature that is the effect of an ongoing power is in the area, you can make a dispel check to end the power that created that object or construct in addition to attempting to dispel powers targeting the creature or object. You can choose to automatically succeed on dispel checks against any power that you have manifested.

Augment: For every additional power point you spend, the bonus on your dispel check increases by 2 (to a maximum bonus of +20 for a 5-point expenditure).

DisPELLING BUFFER

Psychokinesis

Level: Kineticist 6, psychic warrior 6

Display: Material and olfactory

Manifesting Time: 1 standard action

Range: Personal or close (25 ft. + 5 ft./2 levels); see text

Target: You or one willing creature or one object (object weighing up to 100 lb./level); see text

Duration: 1 hour/level (D)

Saving Throw: None

Power Resistance: Yes (harmless, object)

Power Points: 11

You create a psychokinetic shield around the subject that improves the chance that any powers affecting the subject will resist a *dispel psionics* power (or a *dispel magic* spell) or a negation effect that targets a specific power (such as *shatter mind blank*). When *disPELLING BUFFER* is manifested on a creature or object, add +5 to the DC of the dispel check for each ongoing effect that is subject to being dispelled.

Dispel psionics can negate *disPELLING BUFFER*, but against a targeted dispel, *disPELLING BUFFER* is always checked last (with the same +5 bonus). Against an area dispel, *disPELLING BUFFER* is checked in the order according to its level (with the same +5 bonus).

Special: When a psychic warrior manifests this power, the range is personal and the target is the manifester.

Dissipating Touch

Psychoporation (Teleportation)

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Touch

Target: Creature or object touched

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes (object)

Power Points: 1

Your mere touch can disperse the surface material of a foe or object, sending a tiny portion of it far away. This effect is disruptive; thus, your successful melee touch attack deals 1d6 points of damage.

Augment: For every additional power point you spend, this power's damage increases by 1d6 points.

Dissolving Touch

Psychometabolism [Acid]

Level: Psychic warrior 2

Display: Visual

Manifesting Time: 1 standard action

Range: Touch

Target: Creature or object touched

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 3

Your touch, claw, or bite is corrosive, and sizzling moisture visibly oozes from your natural weapon or hand. You deal 4d6 points of acid damage to any creature or object you touch with your successful melee touch attack. Acid you secrete denatures 1 round after use, losing all efficacy and ability to deal damage. You are immune to your own acid.

Augment: For every 2 additional power points you spend, this power's damage increases by 1d6 points.

Dissolving Weapon

Psychometabolism [Acid]

Level: Psychic warrior 2

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: One held weapon; see text

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 3

As *dissolving touch*, except your weapon is charged with acid until you make a successful attack.

Distract

Telepathy [Mind-Affecting]

Level: Psion/wilder 1, psychic warrior 1

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Concentration, up to 1 min./level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

You cause your subject's mind to wander, distracting her. Subjects under the effect of *distract* make all Listen, Spot, Search, and Sense Motive checks at a -4 penalty.

Divert Teleport

Psychoportation (Teleportation)

Level: Psion/wilder 7

Display: Visual

Manifesting Time: 1 immediate action; see text

Range: Medium (100 ft. + 10 ft./level)

Area: A circle, centered on you, with a radius of 50 ft. + 10 ft./level

Effect: Diverts the teleportation of any object or creature whose weight does not exceed your maximum load

Duration: 10 min./level (D)

Saving Throw: Will negates (foils diversion)

Power Resistance: Yes (foils diversion)

Power Points: 13

Similar to *detect teleportation*, except that you know the intended destination, and you can divert the final destination of any teleportation attempt made by others within the area. This is an immediate action, like manifesting a quickened power, and counts toward the limit of one quickened power per round. You can manifest this power even if it is not your turn.

You can divert the destination of both incoming and outgoing teleportations, psionic and magical. You must overcome the power resistance of creatures that possess it to make a successful diversion, and the teleporting creature can make a Will save to foil the diversion as well.

For the purpose of this power, “divert” means you choose the actual destination of any teleportation attempt you can affect, as if you yourself were teleporting to that location, regardless of the teleportation range of the effect you are diverting. The destination you choose must be a location with which you are very familiar or that you have studied carefully.

Divination, Psionic

Clairsentience

Level: Psion/wilder 4

Display: Mental and visual

Manifesting Time: 10 minutes

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 7

As the *divination* spell, except as noted here.

Dominate, Psionic

Telepathy (Compulsion) [Mind-Affecting]

Level: Telepath 4

Display: Mental

Manifesting Time: 1 round

Range: Medium (100 ft. + 10 ft./level)

Target: One humanoid

Duration: Concentration

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

As the *dominate person* spell, except as noted here.

Augment: You can augment this power in one or more of the following ways.

1. If you spend 2 additional power points, this power can also affect an animal, fey, giant, magical beast, or monstrous humanoid.

2. If you spend 4 additional power points, this power can also affect an aberration, dragon, elemental, or outsider in addition to the creature types mentioned above.

3. For every 2 additional power points you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

In addition, for every 2 additional power points you spend to achieve any of these effects, this power’s save DC increases by 1.

Dream Travel

Psychoportation

Level: Nomad 7

Display: Visual

Manifesting Time: 1 standard action

Range: Touch

Targets: You and touched creature or creatures (up to one/level)

Duration: 1 hour/level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 13

You and any creature you touch are drawn along a crystal arc of reverie to the edge of conscious thought and into the region of dreams. You can take more than one creature along with you (subject to your level limit), but each one must be touching another one. You physically enter the land of dreams, leaving nothing behind.

In the region of dreams, you move through a menagerie of thoughts, desires, and phantoms created by the minds of dreamers everywhere. For every minute you move through dream, you can “wake” to find yourself five miles displaced in the waking world. Thus, a character can use this power to travel rapidly by physically entering where only dreams normally prowl, moving the desired distance, and then stepping back into the waking world. You know where you will come out in the waking world.

Dream travel can also be used to travel to other planes that contain creatures that dream, but doing this requires crossing into the dreams of outsiders, where you are subject to the vagaries of many dream realities—a potentially perilous proposition.

Transferring to another plane of existence in this fashion requires 1d4 hours of uninterrupted travel.

Any creatures that come along when *dream travel* is manifested also make the transition to the borders of unconscious thought. A creature separated from you wanders off into the dreamscape. When the duration ends, all affected creatures return to the waking world as much as 1,000 miles ($d\% \times 10$) from their starting point. If a creature remains in the dreamscape, it is powerless to leave unless it can manifest the *dream travel* power itself or someone who manifests the power seeks out the lost creature.

Augment: For every 2 additional power points you spend, this power’s save DC increases by 1.

Duodimensional Claw

Psychometabolism

Level: Psychic warrior 3

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 5

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*), you can use this power to improve that weapon. One of your claws becomes two-dimensional, making it razorsharp. The weapon is now psionically keen, increasing its threat range from 20 to 19–20. This benefit does not stack with other effects that improve a weapon’s threat range.

The third spatial component of your hand still exists but is temporarily shunted into the Ethereal Plane, so against ethereal or incorporeal targets this power is ineffective.

Ecto Protection

Metacreativity

Level: Psion/wilder 1

Display: Visual; see text

Manifesting Time: 1 standard action; see text

Range: Close (25 ft. + 5 ft./2 levels)

Target: An astral construct you manifest

Duration: 1 min./level

Saving Throw: None

Power Resistance: No

Power Points: 1

This power reinforces an astral construct created by the *astral construct* power, giving you a +1 bonus on any manifester level checks you make to protect it against *dispel psionics* or a similar effect, and a +1 bonus on its saving throw to resist *dismiss ectoplasm*. This power can be manifested as a swift action in the same round that you manifest an astral construct, as long as the power points you spend to perform both actions does not exceed your manifester level.

Augment: For every 2 additional power points you spend, your bonus on manifester level checks to protect your astral construct increases by 1, and your astral construct's bonus on its saving throw to resist *dismiss ectoplasm* increases by 1.

Ectoplasmic Cocoon

Metacreativity

Level: Shaper 3

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One Medium or smaller creature

Duration: 1 round/level (D)

Saving Throw: Reflex negates

Power Resistance: No

Power Points: 5

You draw writhing strands of ectoplasm from the Astral Plane that wrap up the subject like a mummy. The subject can still breathe but is otherwise helpless, unable to see outside the cocoon, speak, or take any physical actions. The subject's nostrils are clear (air passes through the cocoon normally). The subject can execute purely mental actions (such as manifesting powers or casting spells with no verbal, somatic, or material components).

Cutting or damaging the cocoon can free a victim. The cocoon has hardness 8 and 20 hit points. Teleportation and other forms of travel provide a means of escape, but the cocoon extends into the Ethereal Plane, blocking ethereal travel. An *ectoplasmic cocoon* can't be affected by *dispel psionics*, but it can be dismissed with *dismiss ectoplasm*, or otherwise destroyed by extreme measures or items.

The creature within the cocoon is visible only as a vague shape (substantial enough to interrupt line of sight) and cannot be directly harmed or interacted with unless the cocoon is destroyed. The cocooned creature can be moved normally (the weight of the cocoon is negligible).

A creature that is cocooned while aloft begins to fall immediately, and a creature that is cocooned while swimming or underwater may drown.

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, this power's save DC increases by 1.

2. For every 2 additional power points you spend, this power can affect a target one size category larger.

Ectoplasmic Cocoon, Mass

Metacreativity

Level: Shaper 7

Range: Medium (100 ft. + 10 ft./level)

Area: 20-ft.-radius burst

Duration: 1 hour/level (D)

Saving Throw: Reflex negates

Power Resistance: No

Power Points: 13

As *ectoplasmic cocoon*, except you can cocoon several creatures (or a single big creature that fits in a 20-foot radius sphere or hemisphere) in a mass of writhing ectoplasm. Targets entirely within the area who fail their save are caught and cocooned. If a creature's body is only partially within the area, this power does not affect that creature.

Augment: For every 2 additional power points you spend, the radius of this power's area increases by 5 feet.

Ectoplasmic Form

Psychometabolism

Level: Egoist 3, psychic warrior 3

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 5

You and all your gear become a partially translucent mass of rippling ectoplasm that generally conforms to your normal shape. You gain damage reduction 10/psionics, and you gain immunity to poison and critical hits. Your material armor (including *inertial armor*) becomes meaningless, although your size, Dexterity, deflection bonuses, and armor bonuses from force effects (such as those gained by *inertial armor*) still apply to your Armor Class.

You can manifest powers while in *ectoplasmic form*, but you must make a Concentration check (DC 20 + power level) for each power you attempt to manifest.

You cannot physically attack, you lose supernatural abilities (if any), and you can't speak while in *ectoplasmic form*. You can't run, but you can fly at a speed of 20 feet (perfect). You can pass through small holes or narrow openings, even mere cracks, with all you were wearing or holding in your hands. You are subject to the effects of wind, and you can't enter water or other liquid. You also can't manipulate objects or activate items, even those carried along with you. Continuously active items remain active, though in some cases their effects may be moot (such as items that provide armor or natural armor bonuses).

Ectoplasmic Shambler

Metacreativity (Creation)

Level: Psion/wilder 5

Display: Auditory, material, and olfactory; see text

Manifesting Time: 1 round

Range: Long (400 ft. + 40 ft./level)

Effect: One ectoplasmic manifestation of a size equal to ten 10-ft. cubes (S)

Duration: 1 min./level

Saving Throw: None

Power Resistance: No

Power Points: 9

You fashion an ephemeral, manylegged mass of pseudo-living ectoplasm called an ectoplasmic shambler. You can direct the shambler as a free action. It has a speed of 10 feet. It can completely surround objects (and opponents) over which it is manifested or onto which it moves, because it has the consistency of thick mist. The vision of those within the shambler is limited to 5 feet, and manifesting powers (or casting spells) within the shambler is difficult due to the constant turbulence felt by those caught in the shambler's form.

Creatures enveloped by the shambler, regardless of Armor Class, take 1 point of damage for every two manifester levels you have in each round they become or remain within the roiling turbulence of the shambler. Anyone trying to manifest a power must make a Concentration check (DC 15 + power's or spell's level) to successfully manifest a power or cast a spell inside the shambler.

A wind stronger than 20 miles per hour that blows against the shambler reduces its speed to 0 feet during the first round, and in subsequent rounds moves it in the direction of the wind at a speed of 5 feet. A wind stronger than 20 miles per hour that blows in the direction the shambler travels increases its speed to 15 feet.

Ego Whip

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. +10 ft./level)

Target: One creature

Duration: Instantaneous

Saving Throw: Will half; see text

Power Resistance: Yes

Power Points: 3

Your rapid mental lashings assault the ego of your enemy, debilitating its confidence. The target takes 1d4 points of Charisma damage, or half that amount (minimum 1 point) on a successful save. A target that fails its save is also dazed for 1 round.

Augment: For every 4 additional power points you spend, this power's Charisma damage increases by 1d4 points and its save DC increases by 2.

Elfsight

Psychometabolism

Level: Psion/wilder 2, psychic warrior 1

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: Psion/wilder 3, psychic warrior 1

You gain low-light vision (as an elf) for the duration of the power, as well as a +2 bonus on Search and Spot checks. In addition, you gain the ability to notice secret or concealed doors by merely passing within 5 feet of one, getting to make a Search check as if you were actively looking for it.

If *elfsight* is used in conjunction with *my light*, the cone of light extends out to 40 feet instead of 20 feet.

Empathic Feedback

Telepathy [Mind-Affecting]

Level: Psion/wilder 4, psychic warrior 3

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: Psion/wilder 7, psychic warrior 5

You empathically share your pain and suffering with your attacker. Each time a creature strikes you in melee, it takes damage equal to the amount it dealt to you or 5 points, whichever is less. This damage is empathic in nature, so powers and abilities the attacker may have such as damage reduction and regeneration do not lessen or change this damage. The damage from *empathic feedback* has no type, so even if you took fire damage from a creature that has immunity to fire, *empathic feedback* will damage your attacker.

Augment: For every additional power point you spend, this power's damage potential increases by 1 point.

Empathic Transfer

Psychometabolism

Level: Egoist 2, psychic warrior 2

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Touch

Target: Willing creature touched

Duration: Instantaneous

Power Points: 3

You heal another creature's wounds, transferring some of its damage to yourself. When you manifest this power, you can heal as much as $2d10$ points of damage. The target regains a number of hit points equal to the dice result, and you lose hit points equal to half of that amount. (This loss can bring you to 0 or fewer hit points.) Powers and abilities you may have such as damage reduction and regeneration do not lessen or change this damage, since you are taking the target's pain into yourself in an empathic manner. The damage transferred by this power has no type, so even if you have immunity to the type of damage the target originally took, the transfer occurs normally and deals hit point damage to you.

Alternatively, you can use this power to absorb one poison or one disease afflicting the target creature into yourself. When you absorb a poison or disease, you do not take any of the damage previously dealt to the target by the affliction, but you do assume the burden of making the secondary and/or continuing Fortitude saves to combat the affliction.

Finally, you can use this power to transfer up to 1 point of ability damage per manifesting level from the target to yourself.

Augment: For every additional power point you spend, you can heal an additional $2d10$ points of damage (to a maximum of $10d10$ points per manifestation).

Empathic Transfer, Hostile

Telepathy [Mind-Affecting]

Level: Telepath 3, psychic warrior 3

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: Instantaneous

Saving Throw: Will half

Power Resistance: Yes

Power Points: 5

You transfer your hurt to another. When you manifest this power and then make a successful touch attack, you can transfer 50 points of damage (or less, if you choose) from yourself to the touched creature. You immediately regain hit points equal to the amount of damage you transfer.

You cannot use this power to gain hit points in excess of your full normal total. The transferred damage is empathic in nature, so powers and abilities the subject may have such as damage reduction and regeneration do not lessen or change this damage. The damage transferred by this power has no type, so even if the subject has immunity to the type of damage you originally took, the transfer occurs normally and deals hit point damage to the subject.

Augment: You can augment this power in one or both of the following ways.

1. For every additional power point you spend, you can transfer an additional 10 points of damage (maximum 90 points per manifestation).
2. If you spend 6 additional power points, this power affects all creatures in a 20-foot-radius spread centered on you.

Empathy

Telepathy [Mind-Affecting]

Level: Psion/wilder 1

Display: Mental

Manifesting Time: 1 standard action

Range: 30 ft.

Area: 30-ft.-radius spread centered on you

Duration: Concentration, up to 1 min./level (D)

Saving Throw: None

Power Resistance: No

Power Points: 1

You detect the surface emotions of any creature you can see that is in the power's area. You can sense basic needs, drives, and emotions. Thirst, hunger, fear, fatigue, pain, rage, hatred, uncertainty, curiosity, friendliness, and many other kinds of sensations and moods can all be perceived.

You gain a +2 insight bonus on any Bluff, Diplomacy, Intimidate, or Sense Motive checks that you make in the round when you cease concentrating on this power.

Augment: You can augment this power in one or both of the following ways.

1. For every additional power point you spend, this power's range and the radius of its area increases by 5 feet.
2. If you spend 2 additional power points, this power's maximum duration increases to 1 hour/level.

Empty Mind

Telepathy [Mind-Affecting]

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: 1 round

Power Points: 1

You empty your mind of all transitory and distracting thoughts, improving your self-control. You gain a +2 bonus on all Will saves until your next action.

You can manifest this power instantly, quickly enough to gain its benefit in an emergency. Manifesting this power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can use this power even when it is not your turn.

Augment: For every 2 additional power points you spend, the bonus on your Will saves increases by 1.

Energy Adaptation

Psychometabolism [see text]

Level: Psion/wilder 4, psychic warrior 4

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 7

Your body assimilates some of the effect of an energy attack and converts it to harmless light. You gain resistance 10 against any attack that deals acid, cold, electricity, fire, or sonic damage.

When you absorb damage, you can choose to radiate visible light that illuminates a 60-foot radius for a number of rounds equal to the points of damage you successfully resisted, or merely dissipate the energy without giving off a visual display.

The energy resistance provided by this power increases to 20 points at 9th manifestester level and to a maximum of 30 points at 13th level. The power protects your equipment as well.

The resistance provided by this power does not stack with other forms of energy resistance.

This power's subtype is the same as the type of damage it protects against.

Augment: If you spend 4 additional power points, you can manifest this power as an immediate action.

Energy Adaptation, Specified

Psychometabolism [see text]

Level: Psion/wilder 2, psychic warrior 2

Power Points: 3

As *energy adaptation*, except you must choose one type of energy to which you gain resistance when this power is manifested.

This power's subtype is the same as the type of damage it protects against.

Augment: If you spend 4 additional power points, you can manifest this power as an immediate action.

Energy Ball

Psychokinesis [see text]

Level: Kineticist 4

Display: Auditory

Manifesting Time: 1 standard action

Range: Long (400 ft. + 40 ft./level)

Area: 20-ft.-radius spread

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 7

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create an explosion of energy of the chosen type that deals 7d6 points of damage to every creature or object within the area. The explosion creates almost no pressure.

Cold: A ball of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold ball* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a ball of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifestester level checks for the purpose of overcoming power resistance.

Fire: A ball of this energy type deals +1 point of damage per die.

Sonic: A ball of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

Energy Bolt

Psychokinesis [see text]

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 standard action

Range: 120 ft.

Area: 120-ft. line

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 5

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You release a powerful stroke of energy of the chosen type that deals 5d6 points of damage to every creature or object within the area. The beam begins at your fingertips.

Cold: A bolt of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold bolt* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a bolt of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifestester level checks for the purpose of overcoming power resistance.

Fire: A bolt of this energy type deals +1 point of damage per die.

Sonic: A bolt of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

Energy Burst

Psychokinesis [see text]

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 standard action

Range: 40 ft.

Area: 40-ft-radius burst centered on you

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 5

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create an explosion of unstable ectoplasmic energy of the chosen type that deals 5d6 points of damage to every creature or object within the area. The explosion creates almost no pressure. Since this power extends outward from you, you are not affected by the damage.

Cold: A burst of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold burst* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a burst of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A burst of this energy type deals +1 point of damage per die.

Sonic: A burst of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

Energy Cone

Psychokinesis [see text]

Level: Kineticist 3

Display: Auditory

Manifesting Time: 1 standard action

Range: 60 ft.

Area: Cone-shaped spread

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 5

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create a cone of energy of the chosen type, extending outward from your hand, that deals 5d6 points of damage to every creature or object within the area.

Cold: A cone of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold cone* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a cone of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A cone of this energy type deals +1 point of damage per die.

Sonic: A cone of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

Energy Conversion

Psychometabolism [see text]

Level: Psion/wilder 7

Display: Mental

Manifesting Time: 1 standard action

Range: Personal and close (25 ft. + 5 ft./2 levels); see text

Effect: Ray; see text

Duration: 10 min./level

Saving Throw: None

Power Resistance: Yes

Power Points: 13

As *energy adaptation*, except that instead of radiating away energy as light, you store up the energy and can later discharge it as a ray. To discharge a ray requires a standard action. You can choose to fire any number of rays during the power's duration. The ray you fire must be of one of the energy types you have stored (if you have stored more than one type, you can choose what kind of energy to use for each ray). If a ray successfully strikes its target (requiring a ranged touch attack), the target takes damage equal to the amount of energy damage of that type you have stored, up to a maximum of three times your manifester level. As long as this power remains in effect, you can continue to absorb energy damage and fire additional rays using the stored damage.

This power's subtype is the same as the type of energy you discharge in a ray; thus, its subtype can change during the course of the power's duration.

Energy Current

Psychokinesis [see text]

Level: Kineticist 5

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: Any two creatures no more than 15 ft. apart

Duration: Concentration, up to 1 round/level

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 9

Upon manifesting this power, you choose cold, electricity, fire, or sonic. Your body's psionically fueled bioenergetic currents produce an arc of energy of the chosen type that targets a creature you designate as the primary foe for 9d6 points of damage in every round when the power remains in effect. Energy also arcs off the primary foe to strike one additional foe that is initially within 15 feet of the primary foe, or that subsequently moves within 15 feet of the primary foe while the duration lasts. Secondary foes take half the damage that the primary foe takes in every round while the duration lasts.

Should either the primary or secondary foe fall to less than 0 hit points (or should a target completely evade the effect with a special ability or power), the *energy current*'s arc randomly retargets another primary and/or secondary foe while the duration lasts. Targeted foes can move normally, possibly moving out of range of the effect, but each round they are targeted and remain in range they must make a saving throw to avoid taking full damage in that round.

Concentrating to maintain *energy current* is a full-round action. If you take damage while maintaining *energy current*, you must make a successful Concentration check (DC 10 + damage dealt) to avoid losing your concentration on the power.

Cold: A current of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold current* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a current of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A current of this energy type deals +1 point of damage per die.

Sonic: A current of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: You can augment this power in one or both of the following ways.

1. For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

2. For every 4 additional power points you spend, this power can affect an additional secondary target. Any additional secondary target cannot be more than 15 feet from another target of the power.

Energy Missile

Psychokinesis [see text]

Level: Kineticist 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Targets: Up to five creatures or objects; no two targets can be more than 15 ft. apart.

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 3

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You release a powerful missile of energy of the chosen type at your foe. The missile deals 3d6 points of damage to each creature or object you target, to the maximum of five targets. You cannot hit the same target multiple times with the same manifestation of this power.

Cold: A missile of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold missile* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a missile of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A missile of this energy type deals +1 point of damage per die.

Sonic: A missile of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6) and its save DC increases by 1.

Energy Push

Psychokinetic [see text]

Level: Psion/wilder 2

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Effect: Ray

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 3

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You project a solid blast of energy of the chosen type at a target, dealing it 2d6 points of damage. In addition, if a subject of up to one size category larger than you fails a Strength check (DC equal to the save DC of this power), the driving force of the energy blast pushes it back 5 feet plus another 5 feet for every 5 points of damage it takes. If a wall or other solid object prevents the subject from being pushed back, the subject instead slams into the object and takes an extra 2d6 points of damage from the impact (no save). The movement caused by *energy push* does not provoke attacks of opportunity.

Cold: A blast of this energy type deals +1 point of damage per die (damage from impact remains at 2d6 points). The saving throw to reduce damage from a *cold push* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a blast of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A blast of this energy type deals +1 point of damage per die (damage from impact remains at 2d6 points).

Sonic: A blast of this energy type deals -1 point of damage per die (damage from impact remains at 2d6 points) and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every 2 additional power points you spend, this power's damage increases by one die (d6) and its save DC increases by 1. The damage increase applies to both the initial blast and any damage from impact with an object.

Energy Ray

Psychokinesis [see text]

Level: Psion/wilder 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: Ray

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes

Power Points: 1

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create a ray of energy of the chosen type that shoots forth from your fingertip and strikes a target within range, dealing 1d6 points of damage, if you succeed on a ranged touch attack with the ray.

Cold: A ray of this energy type deals +1 point of damage per die.

Electricity: Manifesting a ray of this energy type provides a +3 bonus on your attack roll if the target is wearing metal armor and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A ray of this energy type deals +1 point of damage per die.

Sonic: A ray of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6).

Energy Retort

Psychokinesis [see text]

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: Personal and close (25 ft. + 5 ft./2 levels); see text

Targets: You and creature or object attacking you; see text

Duration: 1 min./level

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 5

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You weave a field of potential energy of the chosen type around your body. The first successful attack made against you in each round during the power's duration prompts a response from the field with out any effort on your part. The attack may be physical, the effect of a power, or the effect of a spell (including spell-like, supernatural, and extraordinary abilities). An "ectoburst" discharges from the field, targeting the source of the attack and dealing 4d6 points of damage of the chosen energy type. To be affected, a target must be within close range, you must have line of sight and line of effect to it, and you must be able to identify the source of the attack. The ectoburst is a ranged touch attack made using your base attack bonus plus your key ability modifier for your manifesting class.

Cold: A field of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold retort* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a field of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A field of this energy type deals +1 point of damage per die.

Sonic: A field of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's duration increases by 1 minute.

Energy Stun

Psychokinesis [see text]

Level: Psion/wilder 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Area: 5-ft.-radius burst

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 3

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You release a powerful stroke of the chosen energy type that encircles all creatures in the area, dealing 1d6 points of damage to each of them. In addition, any creature that fails its save for half damage must succeed on a Will save or be stunned for 1 round.

Cold: A stroke of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold stun* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a stroke of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A stroke of this energy type deals +1 point of damage per die.

Sonic: A stroke of this energy type deals -1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6) and its save DC increases by 1.

Energy Wall

Metacreativity (Creation) [see text]

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Area: An opaque sheet of energy up to 20 ft. long/level or a ring of energy with a radius of up to 5 ft./2 levels

Duration: Concentration + 1 round/ level

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: No

Power Points: 5

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create an immobile sheet of energy of the chosen type formed out of unstable ectoplasm. One side of the wall, selected by you, sends forth waves of energy, dealing 2d6 points of damage to creatures and objects within 10 feet and 1d6 points of damage to those beyond 10 feet but within 20 feet. In addition, anyone passing though the *energy wall* takes 2d6 points of damage +1 point per manifester level (maximum +20).

If you manifest the wall so that it appears where creatures are, each creature takes damage as if passing through the wall.

If you manifest this power in the form of a ring of energy, you choose whether the waves of energy radiate inward or outward from the ring.

Cold: A sheet of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold wall* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a sheet of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A sheet of this energy type deals +1 point of damage per die.

Sonic: A sheet of this energy type deals –1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Energy Wave

Psychokinesis [see text]

Level: Psion/wilder 7

Display: Auditory

Manifesting Time: 1 standard action

Range: 120 ft.

Area: Cone-shaped spread

Duration: Instantaneous

Saving Throw: Reflex half or Fortitude half; see text

Power Resistance: Yes

Power Points: 13

Upon manifesting this power, you choose cold, electricity, fire, or sonic. You create a flood of energy of the chosen type out of unstable ectoplasm that deals 13d6 points of damage to each creature and object in the area. This power originates at your hand and extends outward in a cone.

Cold: A wave of this energy type deals +1 point of damage per die. The saving throw to reduce damage from a *cold wave* is a Fortitude save instead of a Reflex save.

Electricity: Manifesting a wave of this energy type provides a +2 bonus to the save DC and a +2 bonus on manifester level checks for the purpose of overcoming power resistance.

Fire: A wave of this energy type deals +1 point of damage per die.

Sonic: A wave of this energy type deals –1 point of damage per die and ignores an object's hardness.

This power's subtype is the same as the type of energy you manifest.

Augment: For every additional power point you spend, this power's damage increases by one die (d6). For each extra two dice of damage, this power's save DC increases by 1.

Entangling Ectoplasm

Metacreativity (Creation)

Level: Psion/wilder 1

Display: Material and visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One Medium or smaller creature

Duration: 5 rounds

Saving Throw: None

Power Resistance: No

Power Points: 1

You draw forth a glob of ectoplasmic goo from the Astral Plane and immediately throw it as a ranged touch attack at any creature in range. On a successful hit, the subject is covered in goo and becomes entangled. The goo evaporates at the end of the power's duration.

Augment: For every 2 additional power points you spend, this power can affect a target one size category larger.

Eradicate Invisibility

Psychokinesis

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: 50 ft.

Targets: You and all invisible creatures and objects in a 50-ft.-radius burst centered on you

Duration: Instantaneous

Saving Throw: Reflex negates

Power Resistance: No

Power Points: 5

You radiate a psychokinetic burst that disrupts and negates all types of invisibility (though this power can't negate the effect of *cloud mind*). Any creature that fails its save to avoid the effect loses its invisibility.

Creatures that are naturally invisible, such as an invisible stalker, are revealed as a dim outline for 1 round (until the beginning of your next turn) and do not have total concealment during this period.

Augment: For every additional power point you spend, this power's range and the radius of the burst in which it functions both increase by 5 feet.

Escape Detection

Clairsentience

Level: Psychic warrior 3, seer 3

Display: None

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: 5

You (plus all your gear and any objects you carry) become difficult to detect by clairsentience powers such as *clairvoyant sense*, *remote viewing*, and *psionic true seeing*. If a clairsentience power or similar effect is attempted against you, the manifester of the power must succeed on a manifester level check (1d20 + manifester level, or caster level if the opponent is not a manifester) against a DC of 13 + your manifester level (maximum +10).

Ethereal Jaunt, Psionic

Psychoportation

Level: Nomad 7

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 13

As the *ethereal jaunt* spell, except as noted here.

Etherealness, Psionic

Psychoportation

Level: Psion/wilder 9

Manifesting Time: 1 standard action

Range: Touch

Targets: You and one other touched willing creature/three levels; all targets must be joined by linked hands

Duration: 1 min./level (D)

Saving Throw: None

Power Resistance: Yes (harmless)

Power Points: 17

As the *etherealness* spell, except as noted here.

Evade Burst

Psychometabolism

Level: Psion/wilder 7, psychic warrior 3

Display: Material

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: Psion/wilder 13, psychic warrior 5

You throw off a faux ectoplasmic shell, allowing you to slide out of range of a damaging effect. When you manifest this power in conjunction with making a successful Reflex save against an attack that normally deals half damage on a successful save, you instead take no damage.

You can manifest this power with an instant thought, quickly enough to save yourself if you unexpectedly come within range of a dangerous effect. Manifesting this power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can even manifest this power when it isn't your turn.

Augment: If you spend 4 additional power points, you take only half damage on a failed Reflex save.

Exhalation of the Black Dragon

Psychometabolism [Acid]

Level: Psychic warrior 3

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: Ray

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes

Power Points: 5

You spit forth vitriolic acid, originating from your mouth, at your target. If you succeed on a ranged touch attack, the target takes 3d6 points of acid damage.

Augment: For every 2 additional power points you spend, this power's damage increases by 1d6 points.

Expansion

Psychometabolism

Level: Psychic warrior 1

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round./level (D)

Power Points: 1

This power causes instant growth, doubling your height, length, and width and multiplying your weight by 8. This increase changes your size category to the next larger one. You gain a +2 size bonus to Strength, a -2 size penalty to Dexterity (to a minimum effective Dexterity score of 1), a -1 size penalty on attack rolls, and a -1 size penalty to Armor Class due to your increased size.

If your new size is Large or larger, you have a space of at least 10 feet and a natural reach of at least 10 feet. This power doesn't change your speed. If insufficient room is available for the desired growth, you attain the maximum possible size and can make a Strength check (using your increased Strength score) to burst any enclosures in the process. If you fail, you are constrained without harm by the materials enclosing you—you cannot crush yourself to death by increasing your size.

All your equipment, worn or carried, is similarly expanded by this power. Melee and projectile weapons deal more damage.

Other psionic or magical properties are not affected by this power. Any affected item that leaves your possession (including a projectile or thrown weapon) instantly returns to its normal size. This means that thrown weapons deal their normal damage (projectiles deal damage based on the size of the weapon that fired them). Multiple effects that increase size do not stack, which means (among other things) that you can't use a second manifestation of this power to further expand yourself.

Augment: You can augment this power in one or more of the following ways.

1. If you spend 6 additional power points, this power increases your size by two size categories instead of one. You gain a +4 size bonus to Strength, a -4 size penalty to Dexterity (to a minimum effective Dexterity score of 1), a -2 size penalty on attack rolls, and a -2 size penalty to Armor Class due to your increased size.
2. If you spend 6 additional power points, you can manifest this power as a swift action instead of a standard action.
3. If you spend 2 additional power points, this power's duration is 1 minute per level rather than 1 round per level.

Fabricate, Psionic

Metacreativity (Creation)

Level: Shaper 4

Display: Material

Manifesting Time: See spell text

Range: Close (25 ft. + 5 ft./2 levels)

Target: Up to 10 cu. ft./level; see spell text

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 7

As the *fabricate* spell, except as noted here.

Fabricate, Greater Psionic

Metacreativity (Creation)

Level: Shaper 6

Target: Up to 100 cu. ft./level

Power Points: 11

As *psionic fabricate*, except ten times as much material is affected by the power.

False Sensory Input

Telepathy [Mind-Affecting]

Level: Telepath 3

Display: Mental

Manifesting Time: 1 round

Range: Long (400 ft. + 40 ft./level)

Target: One creature

Duration: Concentration, up to 1 min./level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 5

You have a limited ability to falsify one of the subject's senses. The subject thinks she sees, hears, smells, tastes, or feels something other than what her senses actually report. You can't create a sensation where none exists, nor make the subject completely oblivious to a sensation, but you can replace the specifics of one sensation with different specifics. For instance, you could make a human look like a dwarf (or one human look like another specific human), a closed door look like it is open, a vat of acid smell like rose water, a parrot look like a bookend, stale rations taste like fresh fruit, a light pat feel like a dagger thrust, a scream sound like the howling wind, and so on.

You can switch between senses you falsify round by round. You can't alter the size of an object by more than 50% by using this power. Thus, you couldn't make a castle look like a hovel, but you could make it look like a different castle, or a rough hillock of approximately the same size. If this power is used to distract an enemy manifester who is attempting to use his powers, the enemy must make a Concentration check as if being grappled or pinned.

Because you override a victim's senses, you can fool a victim who is using *true seeing* or some other method of gathering information, assuming you know that the victim is actively using such an effect and you can maintain concentration.

Augment: For every 2 additional power points you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Far Hand

Psychokinesis

Level: Psion/wilder 1

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: A nonmagical, unattended object weighing up to 5 lb.

Duration: Concentration, up to 1 min.

Saving Throw: None

Power Resistance: No

Power Points: 1

You can mentally lift and move an object at will from a distance. As a move action, you can propel the object as far as 15 feet in any direction, though the power ends if the distance between you and the object exceeds the power's range.

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, this power's range increases by 5 feet.

2. For every additional power point you spend, the weight limit of the target increases by 2 pounds.

Fate Link

Clairsentience

Level: Seer 3

Display: Olfactory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: Any two living creatures that are initially no more than 30 ft. apart.

Duration: 10 min./level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 5

You temporarily link the fates of any two creatures, if both fail their saving throws. If either linked creature experiences pain, both feel it. When one loses hit points, the other loses the same amount. If one takes nonlethal damage, so does the other. If one creature is subjected to an effect to which it is immune (such as a type of energy damage), the linked creature is not subjected to it either. If one dies, the other must immediately succeed on a Fortitude save against this power's save DC or gain two negative levels.

No other effects are transferred by the *fate link*.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Fate of One

Clairsentience

Level: Seer 7

Display: Mental and visual

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 13

Your limited omniscience allows you to reroll a saving throw, attack roll, or skill check. Whatever the result of the reroll, you must use it even if it is worse than the original roll.

You can manifest this power instantly, quickly enough to gain its benefits in an emergency. Manifesting this power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. If you use the power to reroll a saving throw, you can manifest this power even when it is not your turn.

Feat Leech

Clairsentience

Level: Psion/wilder 2, psychic warrior 2

Display: Mental and visual

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: 1 min./level

Saving Throw: Will negates; see text

Power Resistance: Yes

Power Points: 3

You can use another's psionic or metapsionic feats for yourself. You make a melee touch attack against a target. If successful, you immediately are familiar with the target's psionic and metapsionic feats, if any, and you can choose a number of these feats to "leech" equal to your Wisdom modifier (minimum one).

While the power lasts, you are treated as if you possessed the stolen feats, despite the fact that you have more feats than normally allowed. During this same period, the target can make no use of the stolen feats. When the power's duration expires, you lose access to the feats, and the target gains immediate use of them. This transfer occurs regardless of the distance between you and the target.

If the duration of *feat leech* is extended by the use of a metapsionic feat, the target gains a Will saving throw every 10 minutes beyond the normal duration. If this save succeeds, the power's duration ends. If the target is killed before the duration expires, you immediately lose the benefit of the stolen feats.

You cannot steal a feat for which you do not meet the prerequisites, if any. However, you can use a stolen feat as the prerequisite for another stolen feat.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Fiery Discorporation

Psychokinesis [Fire]

Level: Kineticist 5

Display: Visual

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: Instantaneous and up to one day; see text

Power Points: 9

You use your mastery of energy to cheat death. If you are within 30 feet of an open flame, you can use this power. Any damage that would reduce you to 0 hit points or lower instead has a chance to disintegrate you. You attempt a Will save (DC 5 + damage dealt); if it succeeds, you simply break apart into dozens of flitting tongues of flame and vanish, along with all your gear and anything you are holding or carrying.

One day later, you reappear adjacent to an open flame nearest to the place where you disintegrated, seeming to materialize from the fire (you choose where you appear along the perimeter of that open flame). While disintegrated, you do not exist—you can do nothing, nor can any of your enemies do anything to you.

Augment: For every 3 additional power points you spend, you gain a +1 bonus on your Will save to determine whether you disintegrate.

Fission

Psychometabolism

Level: Egoist 7

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Effect: Duplicate of yourself

Duration: 1 round/level (D)

Power Points: 13

You can divide yourself, creating a duplicate that comes into existence 5 feet away. Your duplicate thinks and acts exactly as you do and follows your orders, although it will not do anything you wouldn't do yourself. Your duplicate has all your abilities but none of your psionic or magical equipment (it does possess a duplicate of all your mundane equipment, clothing, armor, and implements, as well as mundane versions of any psionic or magical equipment you have). You and your duplicate evenly split your power points, your remaining usages of pertinent special abilities for the day, and so on. You retain your psionic focus, if you maintain such when this power is manifested. Treat your duplicate as yourself with two negative levels for the purpose of determining the powers to which the duplicate has access (while the duration of this power lasts, those negative levels cannot be removed by any means). Your duplicate has all other physical traits you had at the time you manifest this power. Powers, spells, or other effects affecting you when you manifest this power do not transfer to your duplicate.

When the duration expires or when you dismiss the power, you and your duplicate rejoin, no matter how far from each other you are. You gain back any power points the duplicate has not spent. At the time of rejoining, you take half of the damage

your duplicate has taken since this power was manifested. This damage could potentially leave you with negative hit points, but it can't reduce your hit points to less than -9.

If your duplicate dies before the duration expires, no rejoining occurs, and you gain one negative level. If you die, your duplicate remains in existence, and is for all intents you, but with two negative levels. (Once the duration expires, one of the negative levels immediately converts to one lost level; the other negative level can be removed by standard means.)

You can have only one *fissioned* duplicate in existence at one time; your duplicate cannot use this power. You cannot use *fusion* or *metaconcert* with a duplicate, or share any other power or effect that pools abilities (the sum of you and you is still just you). Similarly, attempting to use powers such as *claws of the vampire* or *vampiric blade* to hurt your duplicate only damages your duplicate; these powers do not heal you. *Empathic transfer* and similar powers are likewise ineffective (transferring wounds to yourself isn't a good healing strategy).

All powers affecting a *fissioned* creature, either the original or the duplicate, end when the *fission* ends. All damage, including hit point damage, ability damage, ability drain, and ability burn damage, is added together.

Float

Psychoportation

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 1

You mentally support yourself in water or similar liquid. You can swim at a speed of 10 feet using the power alone, or use it to boost your swim speed by 10 feet.

Fly, Psionic

Psychoportation

Level: Nomad 4

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 7

As the *fly* spell, except as noted here.

Force Screen

Psychokinesis [Force]

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 1

You create an invisible mobile disk of force that hovers in front of you. The *force screen* provides a +4 shield bonus to Armor Class (which applies against incorporeal touch attacks, since the *force screen* is a force effect). Since it hovers in front of you, the effect has no armor check penalty associated with it.

Augment: For every 4 additional power points you spend, the shield bonus to Armor Class improves by 1.

Form of Doom

Psychometabolism

Level: Psychic warrior 6

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal; see text

Target: You

Duration: 1 round/level (D)

Power Points: 11

You wrench from your subconscious a terrifying visage of deadly hunger and become one with it. You are transformed into a nightmarish version of yourself, complete with an ooze-sleek skin coating, lashing tentacles, and a fright-inducing countenance. You effectively gain a +10 bonus on Disguise checks, though you retain your basic shape and can continue to use your equipment. This power cannot be used to impersonate someone; while horrible, your form is recognizably your own. You gain the frightful presence extraordinary ability, which takes effect automatically when you charge a foe. Opponents within 30 feet of you that have fewer Hit Dice or levels than you and that witness your charge become shaken for 5d6 rounds if they fail a Will save (DC 16 + your Cha modifier). An opponent that succeeds on the saving throw is immune to your frightful presence for 24 hours. Frightful presence is a mind-affecting fear effect.

Your horrific form grants you a natural armor bonus of +5, damage reduction 5/–, and a +4 bonus to your Strength score. In addition, you gain +10 feet to your land speed as well as a +10 bonus on Climb and Jump checks.

A nest of violently flailing black tentacles sprout from your hair and back. You can make up to four additional attacks with these tentacles in addition to your regular melee attacks in each round that you take a full attack action. You can make tentacle attacks within the space you normally threaten. If you make your tentacle attacks in addition to your regular melee attacks, each tentacle attacks at your highest base attack bonus with a –5 penalty. If you forgo all your other attacks, making only tentacle attacks, you make your tentacle attacks at your highest base attack bonus with no penalty. These tentacles deal 2d8 points of damage plus one-half your Strength bonus on each successful strike.

This power functions only while you inhabit your base form (for instance, you can't be metamorphed or polymorphed into another form, though you can use *breath of the black dragon*, *claws of the beast*, and *bite of the wolf* in conjunction with this power for your regular attacks), and while your mind resides within your own body.

Augment: For every additional power point you spend, this power's duration increases by 2 rounds.

Freedom of Movement, Psionic

Psychoporation

Level: Psion/wilder 4, psychic warrior 4

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 7

As the *freedom of movement* spell, except as noted here.

Fuse Flesh

Psychometabolism

Level: Psion/wilder 6

Display: Visual

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: 1 round/level

Saving Throw: Fortitude negates and Fortitude partial; see text

Power Resistance: Yes

Power Points: 11

You cause the touched subject's flesh to ripple, grow together, and fuse into a nearly seamless whole. The subject is forced into a fetal position (if humanoid), with only the vaguest outline of its folded arms and legs visible below the all-encompassing wave of flesh. The subject retains the ability to breathe, eat, and excrete, but may lose the use of its senses (see below). If the sudden transformation would prove fatal to the creature (such as fusing a swimming airbreathing subject, or a flying subject), the subject gets a +4 bonus on the save. Unless it loses the use of its senses (see below), the creature can still perform purely mental actions, such as manifesting powers.

If the target fails its Fortitude save to avoid the power's effect, the subject must immediately attempt a second Fortitude save. If this second save is failed, the creature's eyes and ears fuse over, effectively blinding and deafening it. Moreover, it loses its extraordinary, supernatural, and spell-like abilities, as well as its ability to manifest powers (if any), and is generally in sorry shape.

Incorporeal or gaseous creatures and creatures not composed of flesh are immune to *fuse flesh*, and a shapeshifter can revert to its unfused form as a standard action.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Fusion

Psychometabolism

Level: Egoist 8

Display: Auditory, material, and visual

Manifesting Time: 1 round

Range: Touch

Targets: You and one touched willing creature of your type and your size or smaller

Duration: 1 min./level (D)

Power Points: 15, XP

You and another willing, corporeal, living creature of the same or smaller size fuse into one being. As the manifester, you control the actions of the fused being. However, you can give up this control to the other creature. Once you give up control, you cannot regain it unless the other creature relinquishes it.

The fused being has your current hit points plus the other creature's current hit points. The fused being knows all the powers you and the other creature know, has the sum of your and the other creature's power points, and knows or has prepared any spells you or the other creature possesses (if any). Likewise, all feats, racial abilities, and class features are pooled (if both creatures have the same ability, the fused being gains it only once). For each of the six ability scores, the fused being's score is the higher of yours and the other creature's, and the fused being also has the higher Hit Dice or manifester level—this effectively means the fused being uses the better saving throws, attack bonus, and skill modifiers of either member, and it manifests powers at the higher of the manifester levels that you or the other creature possessed before becoming fused.

You decide what equipment is absorbed into the fused being and what equipment remains available for use. These fused items are restored once the power ends.

When the power ends, the fused being separates. The other creature appears in an area adjacent to you that you determine. If separation occurs in a cramped space, the other creature is expelled through the Astral Plane, finally coming to rest materially in the nearest empty space and taking 1d6 points of damage for each 10 feet of solid material passed through.

Damage taken by the fused being is split evenly between you and the other creature when the power ends. You do not leave the *fusion* with more hit points than you entered it with, unless you were damaged prior to the *fusion* and the fused being was subsequently healed. In a like manner, the fused being's remaining power points are split between you and the other creature (you can leave with more points than you entered with, as long as you don't exceed the maximum power points for your level and ability score). Ability damage and negative levels are also split between you and the other creature. (If an odd number of negative levels or ability score reductions must be split, you decide whether you or the other creature receives the additional loss.)

If a fused being is killed, it separates into its constituent creatures, both of which are also dead. You cannot use *fission* on a fused being.

XP Cost: 50 XP.

PSIONIC POWERS (G-P)

Genesis

Metacreativity (Creation)

Level: Shaper 9

Display: Material

Manifesting Time: One week (8 hours/day)

Range: 180 ft.; see text

Effect: A demiplane coterminous with the Astral Plane, centered on your location

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 17, XP

You create a finite plane with limited access: a demiplane. Demiplanes created by this power are very small, very minor planes. This power works best when manifested while you are on the Astral Plane. Manifestation of this power creates a local density fluctuation that precipitates the creation of a demiplane. At first, the fledgling plane grows in radius at a rate of 1 foot per day to an initial maximum radius of 180 feet as it rapidly draws substance from the surrounding astral ectoplasm. Once the new demiplane reaches its maximum size, it doesn't really stop growing, but its growth rate decreases to only 1 foot per week (approximately a 50-foot increase in radius per year). Once your demiplane is created, you can travel to it using *astral caravan*, *plane shift*, or some other power or permanent link that you arrange for separately.

You determine the environment within the demiplane when you manifest *genesis*, reflecting most any desire you can visualize. You determine factors such as atmosphere, water, temperature, and the general shape of the terrain. This power cannot create life (including vegetation), nor can it create construction (such as buildings, roads, wells, dungeons, and so forth). You must add these details in some other fashion if you desire. You can't create lingering psionic effects with this power; you have to add those separately, if desired. Similarly, you can't create a demiplane out of esoteric material, such as silver or uranium; you're limited to stone and dirt. You can't manipulate the time trait on your demiplane; its time trait is as the Material Plane. Once your demiplane reaches 180 feet in radius, you can manifest this power again to gradually add another 180 feet of radius to it, and so on.

Antigenesis: If *genesis* is manifested on the Material Plane, the power takes effect and the demiplane begins to grow at the rate noted above, but it gets no larger than a radius of 1 foot per level. The energies of the new plane are exactly canceled by the energies of the original plane, creating a dead spot like a limited cancer on the original plane. The expanding boundary of the dead spot wipes away all construction, crumbles natural land forms, and evaporates water, leaving behind a uniformly level area of inert dust. Living creatures that pass the boundary of the growing dead spot are not directly affected, but plants can find no sustenance in the dust of the dead spot, water-breathing creatures die quickly when water turns to dust, and mobile animals know enough to leave the area alone. Once the wave of change passes, no special essence remains in the dead spot, and it may be colonized naturally over the course of several years by bacteria, plants, and animals.

XP Cost: 1,000 XP.

Graft Weapon

Psychometabolism

Level: Psychic warrior 3

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 24 hours (D)

Power Points: 5

You attach any melee weapon you can use in one hand—mundane, psionic, or magical—onto the end of one of your arms. The weapon becomes a natural extension of your arm, and that hand blends seamlessly into the shaft, hilt, or head of the weapon. Now that the weapon and you are one, you gain a +1 competence bonus on all attack and damage rolls while using the weapon.

The grafted weapon is considered both a standard weapon and a natural weapon for the purpose of effects that distinguish between either weapon type. For instance, the grafted weapon is treated as a natural weapon for the purpose of delivering a touch attack with a power in conjunction with the weapon attack. As with any power (or spell) melee touch attack made in conjunction with a natural weapon attack, the touch attack effect is not delivered unless the natural weapon strikes normally; on a failed attack, the touch power (or spell) is wasted.

For a psychic warrior under the effect of the *claws of the beast* power, grafting a weapon means that attacks with this hand deal the base damage of the weapon, instead of the claw upon which a psychic warrior normally relies.

While your hand is grafted to a weapon, you lose the use of that hand and take a -2 penalty on all skill checks requiring the use of hands. Powers that temporarily polymorph or metamorph you can ignore the grafted weapon or alter it normally, at your discretion. If the weapon takes damage, you take damage as well. If you are healed, so is your grafted weapon. If your weapon is destroyed, you permanently lose 2 points of Constitution; the ability drain persists until you can restore your natural anatomy (by means of *regenerate* or a similar effect).

When this power's duration expires, the grafted weapon falls to the ground and your hand returns.

Grease, Psionic

Metacreativity (Creation)

Level: Psion/wilder 1

Display: Visual and olfactory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target or Area: One object or a 10-ft. square

Duration: 1 round/level (D)

Saving Throw: See spell text

Power Resistance: No

Power Points: 1

As the *grease* spell, except as noted here.

Sometimes this power is referred to as *ectoplasmic sheen*.

Grip of Iron

Psychometabolism

Level: Psychic warrior 1

Display: Visual

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: 1 round/level

Power Points: 1

You can improve your chances in a grapple as an immediate action, gaining a +4 enhancement bonus on your grapple checks. You can manifest this power with an instant thought, quickly enough to gain the benefit of the power in the current round.

Manifesting this power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can manifest this power when it isn't your turn (if you are grappled).

Augment: For every 4 additional power points you spend, the enhancement bonus on your grapple checks increases by 2.

Hail of Crystals

Metacreativity (Creation)

Level: Shaper 5

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Area: 20-ft.-radius burst

Duration: Instantaneous

Saving Throw: Reflex half

Power Resistance: No

Power Points: 9

A tiny ectoplasmic crystal emanates from your outstretched hand and rapidly expands to a 2-foot-diameter ball of crystal as it speeds toward the location you designate. You can choose to aim this crystal at a single target or at a specific point in space (a grid intersection).

If you aim the crystal at a single target, you must make a ranged touch attack to strike the target. Any creature or object struck by the ball of crystal takes 5d4 points of bludgeoning damage.

Whether the crystal hits its target, misses, or was aimed at a point in space, it explodes upon arrival at the location you designated. Anyone within 20 feet of the explosion takes 9d4 points of slashing damage from the thousands of crystal shards that spray forth.

Augment: For every additional power point you spend, this power's damage from the explosion of the crystal increases by 1d4 points.

Hammer

Psychometabolism

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round

Power Points: 1

This power charges your touch with the force of a sledgehammer. A successful melee touch attack deals 1d8 points of bludgeoning damage. This damage is not increased or decreased by your Strength modifier.

Augment: For every additional power point you spend, this power's duration increases by 1 round.

Hustle

Psychometabolism

Level: Egoist 3, psychic warrior 2

Display: Auditory

Manifesting Time: 1 swift action

Range: Personal

Target: You

Effect: 1 extra move action

Power Points: Egoist 5, psychic warrior 3

You gain an additional move action in the current round. Taking a full round's worth of attacks and then using this power to move away from your foe does provoke attacks of opportunity.

You can manifest this power with an instant thought, quickly enough to gain the benefit of the power before you move.

Manifesting the power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

Hypercognition

Clairsentience

Level: Seer 8

Display: Mental

Manifesting Time: 1 standard action or 1 immediate action; see text

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 15

You make lightning-fast deductions based on only the slightest clue, pattern, or scrap of memory resident in your mind. You can make reasonable statements about a person, place, or object, seemingly from very little knowledge. However, your knowledge is in fact the result of a rigorously logical process that you force your mind to undertake, digging up and correlating every possible piece of knowledge bearing on the topic (possibly even extracting echoes of knowledge from the Astral Plane).

The nature of the knowledge you gain concerning the subject of your analysis might include the answer to a riddle, the way out of a maze, stray bits of information about a person, legends about a place or an object, or even a conclusion concerning a dilemma that your conscious mind is unable to arrive at.

An Intelligence check may be required to obtain the desired information. If so, you can manifest *hypercognition* as an immediate action prior to making the check and receive a +20 bonus for doing so.

Id Insinuation

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. +5 ft./2 levels)

Target: One creature

Duration: Concentration + 1 round

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

As the *confusion* spell, except as noted here.

Swift tendrils of thought disrupt the unconscious mind of any one creature, sapping its might. As long as the manifest者 remains concentrating fully on this power, the subject is *confused*, making it unable to independently determine it will do. Roll on the following table at the beginning of each of the subject's turns to see what the subject does in that round.

d%	Behavior
01–10	Attack manifest者 with melee or ranged weapons (or move toward manifest者 if attack is not possible).
11–20	Act normally.
21–50	Do nothing but babble incoherently.
51–70	Flee from manifest者 at top possible speed.
71–	Attack nearest creature (for this purpose, a psicrystal counts as part of the subject's self).
100	

Augment: For every 2 additional power points you spend, this power's save DC increases by 1, and the power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Identify, Psionic

Clairsentience

Level: Psion/wilder 2

Display: Material and mental

Manifesting Time: One day

Range: Touch

Target: One touched object

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 3

As the *identify* spell, except as noted here.

This power is used to identify the abilities of psionic items.

Immovability

Psychometabolism

Level: Psychic warrior 4

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Concentration

Power Points: 7

You are almost impossible to move. Your weight does not vary; instead, you mentally attach yourself to the underlying fabric of the plane. Thus, you could conceivably anchor yourself in midair. Any creature attempting to physically move you must succeed on an opposed Strength check, and you gain a +20 bonus on the check. You can't voluntarily move to a new location unless you stop concentrating, which ends the power.

You cannot apply your Dexterity bonus to Armor Class; however, your anchored body gains damage reduction 15/–.

You cannot make physical attacks or perform any other large-scale movements (you can make smallscale movements, such as breathing, turning your head, moving your eyes, talking, and so on). Powers with the teleportation descriptor, or any telekinetic effect, manifested on you automatically fail.

Augment: If you spend 8 additional power points, you can manifest this power as an immediate action.

Incarnate

Metacreativity

Level: Psion/wilder 5

Display: Material

Manifesting Time: 2 rounds

Range: See text

Target, Effect, or Area: See text

Duration: Permanent; see text

Saving Throw: None

Power Resistance: No

Power Points: 9, XP

This power makes certain other powers permanent. Depending on the power to be affected, you must be of a minimum manifester level and must expend a number of XP.

You can make the following powers permanent only in regard to yourself.

Minimum

Power	Manifester Level	XP Cost
<i>Aura sight</i>	15th	2,000 XP
<i>Conceal thoughts</i>	9th	500 XP
<i>Danger sense</i>	13th	1,500 XP
<i>Detect psionics</i>	9th	500 XP
<i>Detect remote viewing</i>	15th	2,000 XP
<i>Detect teleportation</i>	9th	500 XP
<i>Elfsight</i>	11th	1,000 XP
<i>Know direction and location</i>	9th	500 XP
<i>My light</i>	9th	500 XP
<i>Psionic darkvision</i>	13th	1,500 XP
<i>Psionic tongues</i>	11th	1,000 XP
<i>Ubiquitous vision</i>	13th	1,500 XP

You manifest the desired power and then follow it with the *incarnate* manifestation.

Inertial Armor

Psychokinesis

Level: Psion/wilder 1, psychic warrior 1

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level (D)

Power Points: 1; see text

Your mind generates a tangible field of force that provides a +4 armor bonus to Armor Class. Unlike mundane armor, *inertial armor* entails no armor check penalty or speed reduction. Because *inertial armor* is composed of psychokinetic force, incorporeal creatures can't bypass it the way they do normal armor.

Your *inertial armor* can be invisible or can appear as a colored glow, at your option.

The armor bonus provided by *inertial armor* does not stack with the armor bonus provided by regular armor.

Augment: For every 2 additional power points you spend, the armor bonus to Armor Class increases by 1.

Inertial Barrier

Psychokinesis

Level: Kineticist 4, psychic warrior 4

Display: Auditory and mental

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 7

You create a skin-tight psychokinetic barrier around yourself that resists blows, cuts, stabs, and slashes, as well as providing some protection against falling. You gain damage reduction 5/-. *Inertial barrier* also absorbs half the damage you take from any fall.

Inflict Pain

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: Mental
Manifesting Time: 1 standard action
Range: Close (25 ft. + 5 ft./2 levels)
Target: One creature
Duration: 1 round/level
Saving Throw: Will partial; see text
Power Resistance: Yes
Power Points: 3

You telepathically stab the mind of your foe, causing horrible agony. The subject suffers wracking pain that imposes a -4 penalty on attack rolls, skill checks, and ability checks. If the target makes its save, it takes only a -2 penalty.
Augment: For every 2 additional power points you spend, this power's save DC increases by 1, and the power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Insanity
Telepathy (Compulsion) [Mind-Affecting]
Level: Psion/wilder 7
Display: Mental
Manifesting Time: 1 standard action
Range: Medium (100 ft. + 10 ft./level)
Target: One creature
Duration: Instantaneous
Saving Throw: Will negates
Power Resistance: Yes
Power Points: 13

As the *confusion* spell, except as noted here. Creatures affected by this power are permanently *confused* and constantly behave randomly. Roll on the following table at the beginning the subject's turn each round to see what the subject does in that round.

d%	Behavior
01–10	Attack manifester with melee or ranged weapons (or move toward manifester if attack is not possible).
11–20	Act normally.
21–50	Do nothing but babble incoherently.
51–70	Flee from manifester at top possible speed.
71–	Attack nearest creature (for this purpose, a psicrystal counts as part of the subject's self).
100	

Only *psychic chirurgery*, *reality revision*, and other similarly extreme measures can restore the subject's sanity.
Augment: For every 2 additional power points you spend, this power's save DC increases by 1, and the power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Intellect Fortress
Psychokinesis
Level: Psion/wilder 4
Display: Auditory
Manifesting Time: 1 immediate action
Range: 20 ft.
Area: 20-ft.-radius spread centered on you
Duration: 1 round
Saving Throw: None
Power Resistance: Yes
Power Points: 7

You encase yourself and your allies in a shimmering fortress of telekinetic force. All damage from powers and psi-like abilities taken by subjects inside the area of the *intellect fortress*, including ability damage, is halved. This lowering takes place prior to the effects of other powers or abilities that lessen damage, such as damage reduction and evasion.

Powers that are not subject to power resistance are not affected by an *intellect fortress*.

You can manifest this power instantly, quickly enough to gain its benefits in an emergency. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can use this power even when it's not your turn.

Augment: For every additional power point you spend, this power's duration increases by 1 round.

Iron Body, Psionic

Metacreativity (Creation)

Level: Psion/wilder 8

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 15

As the *iron body* spell, except as noted here.

Keen Edge, Psionic

Metacreativity

Level: Psion/wilder 3, psychic warrior 3

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Targets: One weapon or fifty projectiles, all of which must be in contact with each other at the time of manifestation

Duration: 10 min./level

Saving Throw: Will negates (harmless, object)

Power Resistance: Yes (harmless, object)

Power Points: 5

As the *keen edge* spell, except as noted here.

Knock, Psionic

Psychoportation

Level: Psion/wilder 2

Display: Material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One door, box, or chest with an area of up to 10 sq. ft./level

Duration: Instantaneous; see spell text

Saving Throw: None

Power Resistance: No

Power Points: 3

As the *knock* spell, except as noted here.

Know Direction and Location

Clairsentience

Level: Psion/wilder 1

Display: Mental

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 1

You generally know where you are. This power is useful to characters who end up at unfamiliar destinations after teleporting, using a *gate*, or traveling to or from other planes of existence. The power reveals general information about your location as a feeling or presentiment. The information is usually no more detailed than a summary that locates you according to a prominent local or regional site. Using this power also tells you what direction you are facing.

Using this power prior to making a Knowledge (the planes) check with *astral caravan* grants a +2 bonus on the check.

Leech Field

Psychometabolism

Level: Psion/wilder 5

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal; see text

Target: You

Duration: 1 min.

Power Points: 9

You raise a field of potentiality that drains the vitality from powers that you successfully save against. When you succeed on a saving throw to negate the effect of a foe's power on you, and the power is one that *leech field* is effective against (see below), your body erupts in a brief flash of crackling dark energy. You gain 1 power point for every 2 power points your foe spent to manifest the power you just saved against (to a maximum number of points equal to your manifester level). You cannot gain power points that would cause you to exceed your normal daily maximum.

This power is effective against any power that targets a single creature and allows the target a saving throw to negate it, except those that are delivered by a touch attack or a ranged touch attack (including a ray).

Augment: For every 2 additional power points you spend, this power's duration increases by 1 minute.

Levitate, Psionic

Psychoportation

Level: Nomad 2, psion/wilder 2, psychic warrior 2

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal or close (25 ft. + 5 ft./2 levels)

Target: You or one willing creature or one object (total weight up to 100 lb./level)

Duration: 10 min./level (D)

Saving Throw: None

Power Resistance: Yes (harmless, object)

Power Points: 3

As the *levitate* spell, except as noted here.

Special: When a psion, wilder, or a psychic warrior manifests this power, the target is the manifester (not a willing creature or an object).

Major Creation, Psionic

Metacreativity (Creation)

Level: Psion/wilder 5

Manifesting Time: 10 minutes

Range: Close (25 ft. + 5 ft./2 levels)

Duration: See spell text

Power Points: 9

As the *major creation* spell, except as noted here.

Matter Agitation

Psychokinesis

Level: Psion/wilder 1

Display: Auditory and material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Area: 2 sq. ft. of surface area of an object or creature

Duration: Concentration, up to 1 min./level

Saving Throw: None

Power Resistance: Yes

Power Points: 1

You can excite the structure of a nonpsionic, nonmagical object, heating it to the point of combustion over time. The agitation grows more intense in the second and third rounds after you manifest the power, as described below.

1st Round: Readily flammable material (paper, dry grass, tinder, torches) ignites. Skin redds (1 point of damage).

2nd Round: Wood smolders and smokes, metal becomes hot to the touch, skin blisters (1d4 points of damage), hair smolders, paint shrivels, water boils.

3rd and Subsequent Rounds: Wood ignites, metal scorches (1d4 points of damage for those holding metallic objects). Skin burns and hair ignites (1d6 points of damage), lead melts.

Matter Manipulation

Metacreativity

Level: Psion/wilder 8

Display: Auditory and mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Area: 1 cu. ft./level of inanimate material

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes

Power Points: 15, XP

You can weaken or strengthen the substance of an object or structure. You can affect both mundane and magical inanimate material. Weakening an object's substance decreases its hardness and hit points, and strengthening it increases its hardness and hit points. You can increase or decrease an object's hardness by up to 5 from its original hardness. When hardness increases, the object (or portion of an object) gains 3 hit points per inch of thickness for every point of increased hardness. When hardness decreases, the object (or portion of an object) loses 2 hit points per inch of thickness for every point of decreased hardness (to a minimum of 1 hit point per inch of thickness).

You can't decrease the hardness of an object that already has hardness 0.

Working Manipulated Metals: An object or portion thereof whose hardness is decreased or increased is permanently changed. Even hardening adamantine to 25 is possible. You can also harden or weaken a preforged weapon, a suit of armor, or some other finished item.

XP Cost: 250 XP for each point by which the object's hardness is altered.

Mental Barrier

Clairsentience

Level: Psion/wilder 3, psychic warrior 3

Display: Auditory

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: 1 round

Power Points: 5

You project a field of improbability around yourself, creating a fleeting protective shell. You gain a +4 deflection bonus to Armor Class.

You can manifest this power instantly, quickly enough to gain its benefits in an emergency. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can use this power even when it's not your turn; however, you must manifest it prior to an opponent's attack roll in order to gain this power's benefit against that attack.

Augment: You can augment this power in one or both of the following ways.

1. If you spend 4 additional power points, the deflection bonus to Armor Class increases by 1.
2. For every additional power point you spend, this power's duration increases by 1 round.

Mental Disruption

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: Mental

Manifesting Time: 1 standard action

Range: 10 ft.

Area: 10-ft.-radius spread centered on you

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

You generate a mental wave of confusion that instantly sweeps out from your location. All creatures you designate in the affected area (you can choose certain creatures to be unaffected) must make a Will save or become dazed for 1 round.

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, this power's save DC increases by 1.
2. For every 2 additional power points you spend, this power's range and the radius of its area both increase by 5 feet.

Metaconcert

Telepathy [Mind-Affecting]

Level: Psychic warrior 5, telepath 5

Display: Visual; see text

Manifesting Time: 1 minute

Range: 20 ft.

Target: You and up to nine other willing psionic creatures in range

Duration: 1 min./level (D)

Power Points: 9

You link your psychic might with other psionic creatures, creating an entity more powerful than the sum of its parts.

When you manifest this power, a number of power points you designate flows from each participant into a collective pool.

One individual is chosen as the *metaconcert* conductor by mutual consent of the other participants (this is usually the manifester, but doesn't have to be). Until the power ends, this conductor directs the efforts of the group. Misty strands of glowing power link the brows of all the participants in a complex and shifting pattern.

All the powers of each participant are known to the mental entity created with *metaconcert* (which is under the conductor's command). This entity can't take any more actions than a normal individual, but it manifests all its powers more effectively. Each participant contributing to the entity provides a cumulative +1 bonus to save DCs that apply when manifesting a power or using a psi-like ability. Likewise, each individual provides a cumulative +1 bonus when the entity makes its own saving throws in response to powers or psi-like abilities.

If the psionic entity takes ability damage from a psionic attack the total is divided among all the members as determined by the conductor.

If the entity manifests a power that has an XP cost, all the participants pay an equal share (the conductor pays the remainder if the cost can't be divided evenly).

Once linked, the participants must remain within a 20-foot-radius area, and as a group can move at a speed of 10 feet. If a participant moves outside the 20-foot-radius area occupied by the others (whether willingly or involuntarily), that individual drops out of the group, and the power point pool of the *metaconcert* is instantly recalculated.

All participants who leave before a *metaconcert* ends or is dismissed reclaim a number of power points equal to the current power point pool divided by the number of members. If the conductor drops out, the power ends. That same number of points is removed from the power point pool.

When a *metaconcert* ends normally or is dismissed, remaining power points in the pool are divided among all the participants (the conductor receives the remainder if the points can't be divided evenly).

Augment: For every additional power point you spend, this power's duration increases by 1 minute.

Metafaculty

Clairsentience

Level: Seer 9

Display: Mental, olfactory, and visual

Manifesting Time: 1 hour

Range: Personal

Target: You

Duration: Instantaneous and 1 min./level (D); see text

Power Points: 17, XP

You elevate your mind to a near-universal consciousness, cogitating countless impressions and predictions involving any creature you have seen before, whether personally or by means of another power such as *remote viewing*.

This process gives you an uncannily accurate vision of the creature's nature, activities, and whereabouts. When you manifest the power, you learn the following facts about the creature.

- Its name, race, alignment, and character class.
- A general estimate of its level or Hit Dice: low (5 HD or lower), medium (6 to 11 HD), high (12 to 20 HD), very high (21 HD to 40 HD), or deific (41 HD or higher).
- Its location (including place of residence, town, country, world, and plane of existence).
- Significant items currently in its possession.
- Any significant activities or actions the creature has undertaken in the previous 8 hours, including details such as locales traveled through, the names or races of those the creature fought, spells it cast, items it acquired, and items it left behind (including the location of those items).
- A current mental view of the creature, as described in the *remote viewing* power, which you can maintain for up to 1 minute per level.

Metafaculty can defeat spells, powers, and special abilities such as *screen* or *mind blank* (or even a *wish* spell) that normally obscure clairsentience powers. You can attempt a caster level check (DC 6 + caster level of the creator of the obscuring effect) to defeat these sorts of otherwise impervious defenses.

Metafaculty is defeated by epic powers, epic spells, and epic special abilities that obscure divinations and clairsentience powers.

XP Cost: 1,000.

Metamorphosis

Psychometabolism

Level: Egoist 4

Display: Material and olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D) for a creature; 1 hour/level (D) for an object

Power Points: 7

You assume the form of a creature of the same type as your normal form, or any other type except construct, elemental, outsider, and undead. The assumed form can have as many Hit Dice as your manifesting level, to a maximum of 15.

You can't assume a form smaller than Fine, nor can you assume an incorporeal, ectoplasmic, or gaseous form. You cannot take the form of any creature that has a template. Your type and subtype (if applicable) change to match the new form.

Upon changing, you regain lost hit points as if you had rested for a night (though this healing does not restore ability damage and provide other benefits of resting; and changing back does not heal you further). If you are slain while under the effect of this power, you revert to your original form, though you remain dead. You gain the Strength, Dexterity, and Constitution scores of the new form but retain your own Intelligence, Wisdom, and Charisma scores. You also gain all extraordinary special attacks possessed by the form (such as constrict, improved grab, and poison) but do not gain the extraordinary special qualities possessed by the new form (such as blindsense, fast healing, regeneration, and scent) or any supernatural, psionic, or spelllike abilities.

You retain all supernatural and spell-like special attacks and special qualities of your normal form, except for those requiring a body part that the new form does not have, if any. You keep all extraordinary special attacks and special qualities derived from class levels, but you lose any benefits of the racial traits of your normal form. If you have a template, special abilities it provides are likewise not retained. If the assumed form is capable of speech, you can communicate normally. You retain any manifesting ability you had in your original form.

You acquire the physical qualities of the new form while retaining your own mind. Physical qualities include natural size, mundane movement capabilities (such as burrowing, climbing, walking, swimming, and flight with wings, to a maximum speed of 120 feet for flying or 60 feet for nonflying movement), natural armor bonus, natural weapons (such as claws or a bite), racial bonuses on skill checks, racial bonus feats, and any anatomical qualities (presence or absence of wings, number of extremities, and so forth). A body with extra limbs does not allow you to make more attacks (or more advantageous two-weapon attacks) than normal.

You can freely designate the new form's minor physical qualities (such as hair color, hair texture, and skin color) within the normal ranges for a creature of that type. The new form's significant physical qualities (such as height, weight, and gender) are also under your control, but they must fall within the norms for the new form's species. You are effectively disguised as an average member of the new form's race. If you use this power to create a disguise, you get a +10 bonus on your Disguise check.

When the change occurs, your equipment either remains worn or held by the new form (if it is capable of wearing or holding the item in question) or melds into the new form and becomes nonfunctional. When you revert to your normal form, any objects previously melded into the new form reappear in the same location on your body they previously occupied and are once again functional. Any new items you wore in the assumed form and can't wear in your normal form fall off and land at your feet; any that you could wear in either form or carry in a body part common to both forms (mouth, hands, or the like) at the time of reversion are still held in the same way. Any part of the body or piece of equipment that is separated from the whole reverts to its normal form.

You can also use this power to assume the form of an inanimate object. You gain the object's hardness and retain your own hit points. You can take the shape of almost any simple object you can think of. If you attempt to take the form of a complex object, you must make an appropriate skill check.. If you fail the check, your manifestation of the power does not succeed. Likewise, you cannot take the form of a complex mechanical mechanism unless you have some sort of skill associated with the object. You cannot use this power to assume the form of a psionic item or a magic item, or any object with a hardness of 15 or higher. You also cannot take the form of a psionically animated mechanism or any object formed of ectoplasm.

As an inanimate object, you lose all mobility. You retain your normal senses and your ability to speak. You can manifest a power if you make a Concentration check (DC 20 + power level); however, doing so ends the duration of this power. If you

take damage while in the form of an object, your actual body also takes damage (but the object's hardness, if any, protects you).

Metamorphosis, Greater

Psychometabolism

Level: Egoist 9

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D) for a creature; 1 hour/level (D) for an object

Power Points: 17, XP

As *metamorphosis*, except that this power enables you to assume the form of any single nonunique object or creature (of any type) from Fine to Colossal size. The assumed form cannot have more Hit Dice than twice your manifester level (to a maximum of 50 HD). Unlike *metamorphosis*, this power allows incorporeal, ectoplasmic, or gaseous forms to be assumed. You gain all extraordinary and supernatural abilities (both special attacks and special qualities) of the assumed form, but you lose your own supernatural abilities. You also gain the type of the new form (for example, dragon or magical beast) in place of your own. The new form does not disorient you. Parts of your body or pieces of equipment that are separated from you do not revert to their original form.

You can become just about anything you are familiar with. You can change form once each round as a swift action.

The change takes place either immediately before your regular action or immediately after it, but not during the action.

If you use this power to create a disguise, you get a +10 bonus on your Disguise check.

As an inanimate object, you lose all mobility; however, you retain your ability to manifest powers normally.

XP Cost: 200 XP.

Metaphysical Claw

Psychometabolism

Level: Psychic warrior 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 1

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*) or a bite attack (which could be a natural bite attack or one you gain by means of the power *bite of the wolf*), you can use this power to provide one of your natural weapons a +1 enhancement bonus on attack rolls and damage rolls.

Augment: If you spend 4 additional power points, this power's duration increases to 1 hour per level.

In addition, for every 4 additional power points you spend, this power improves the natural weapon's enhancement bonus on attack rolls and damage rolls by 1.

Metaphysical Weapon

Metacreativity

Level: Psychic warrior 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Touch

Target: Weapon touched

Duration: 1 min./level

Saving Throw: Will negates (harmless, object)

Power Resistance: Yes (harmless, object)

Power Points: 1

Metaphysical weapon gives a weapon a +1 enhancement bonus on attack rolls and damage rolls. (An enhancement bonus does not stack with a masterwork weapon's +1 bonus on attack rolls.)

Alternatively, you can affect up to fifty arrows, bolts, or bullets. The projectiles must be of the same type, and they have to be together (such as in the same quiver). Projectiles, but not thrown weapons, lose their enhancement when used. (Treat shuriken as projectiles, rather than thrown weapons, for the purpose of this power.)

You can't manifest this power on most natural weapons, including a psychic warrior's claw strike. This power does work on a weapon brought into being by the *graft weapon* power.

Augment: If you spend 4 additional power points, this power's duration increases to 1 hour per level.

In addition, for every 4 additional power points you spend, this power improves the weapon's enhancement bonus on attack rolls and damage rolls by 1.

Microcosm

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 9

Display: Material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target or Area: One creature; or one or more creatures within a 15-ft.-radius sphere

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes

Power Points: 17

This power enables you to warp the consciousness and senses of one or more creatures, sending the victim into a catatonic state. When *microcosm* is manifested, you can target either a single creature within range or a group of creatures all located within the power's area.

Single Target: If *microcosm* targets a single creature, that creature's senses are pinched off from the real world if it currently has 100 or fewer hit points. The subject's senses are all completely fabricated from within its own mind, though it may not realize this. In reality, the subject sprawls limply, drooling and mewling, and eventually dies of thirst and starvation without care. The subject lives within its own made-up world until the time of its actual death.

Area Effect: If *microcosm* is manifested on an area, it sends all affected creatures into a shared catatonia (the world is a construct, but within the world, the victims can interact with each other). It affects only creatures that currently have 30 or fewer hit points, and only up to a total of 300 hit points of such creatures. The power affects creatures with the lowest hit point totals first. (Creatures with negative hit points count as having 0 hit points.)

Manifesting *microcosm* a second time on an affected creature turns its sensory pathways outward once more. Otherwise, only very potent powers (such as *psychic chirurgery* or *reality revision*) or similar effects (such as *miracle* or *wish*) can undo the mental crosswiring that this power brings about.

Augment: For every additional power point you spend, the number of individual and group hit points the power can affect increases by 10.

Mind Blank, Personal

Telepathy [Mind-Affecting]

Level: Psion/wilder 7, psychic warrior 6

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: One day

Power Points: Psion/wilder 13, psychic warrior 11

As *psionic mind blank* (see below), except as noted here.

Mind Blank, Psionic

Telepathy [Mind-Affecting]

Level: Psion/wilder 8

Display: Olfactory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: One day

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 15

The subject is protected from all devices, powers, and spells that detect, influence, or read emotions or thoughts. This power protects against powers with the mind-affecting or scrying descriptors. *Psionic mind blank* even foils *bend reality, limited*

wish, *miracle*, *reality revision*, and *wish* when they are used in such a way as to affect the subject's mind or to gain information about it (however, *metafaculty* can pierce the protective quality of *psionic mind blank*). In the case of *remote viewing* or scrying that scans an area the creature is in, the effect works but the creature simply isn't detected. *Remote viewing* (scrying) attempts that are targeted specifically at the subject do not work at all.

Mind Probe

Telepathy (Charm) [Mind-Affecting]

Level: Telepath 5

Display: Auditory, material, and visual

Manifesting Time: 1 minute

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: 1 round/level (D)

Saving Throw: Will partial; see text

Power Resistance: Yes

Power Points: 9

All the subject's memories and knowledge are accessible to you, from memories deep below the surface to those still easily called to mind. You can learn the answer to one question per round, to the best of the subject's knowledge. If the subject succeeds on a Will save, it is not required to answer the question; however, making a save does not end the power. You can ask the subject a new question (or the same question) in subsequent rounds for as long as the power's duration persists. You can probe a sleeping subject and automatically get an answer to your question. If the subject then succeeds on a Will save, it wakes after providing the answer and thereafter can resist answering by making Will saves as described above. Subjects that do not wish to be probed can attempt to move beyond the power's range, unless they are somehow hindered. You pose the questions telepathically, and the answers to those questions are imparted directly to your mind. You and the subject do not need to speak the same language, though less intelligent creatures may yield up only appropriate visual images in answer to your questions.

Mind Seed

Telepathy (Compulsion) [Evil, Mind-Affecting]

Level: Telepath 8

Display: Mental

Manifesting Time: 1 standard action

Range: Touch

Target: One touched Medium or smaller humanoid

Duration: Instantaneous; see text

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 15, XP

You impress the totality of your psyche into a subject's subconscious. If successfully implanted, the seed of your mind "germinates" over the period of one week. During this time, the subject begins to unconsciously take on your mannerisms. When integration is complete (after one week), the subject becomes you in mind as you were when you manifested the power, but the subject's level is eight lower than your own. (In effect, the subject has received eight negative levels—but these are negative levels that can't be removed.) The subject does not have any of your physical ability scores or equipment, but does have the Intelligence, Wisdom, and Charisma scores you had when you were eight levels lower. The subject also knows the powers you knew when you were eight levels lower.

While the subject is initially your mental duplicate, the two personalities diverge over time. Although the subject starts off with memories of your experiences, it possesses its original "soul" and physical body and is free to develop its own personality based on its own new experiences. Thus, the subject is not your slave or servant, but instead a nonplayer character in its own right that shares your earlier memories.

Protection from evil or a similar spell or power can prevent you from implanting *mind seed*, or prevent a seed from germinating while the protective power lasts. Otherwise, a germinating seed can be removed (prior to germination) only by *psychic chirurgery*, *reality revision*, or similarly high-level effects. Manifesting *mind seed* again during the germination period also cleanses the subject's mind.

XP Cost: 3,000 XP.

Mind Switch

Telepathy [Mind-Affecting]

Level: Telepath 6

Display: Visual

Manifesting Time: 1 round

Range: Close (25 ft. + 5 ft./2 levels)

Targets: You and one other creature

Duration: 10 min./level

Saving Throw: Will negates; see text

Power Resistance: Yes

Power Points: 11, XP

You can attempt to take control of a nearby living creature, forcing your mind (and soul) into its body, and its mind into your body. You can target any creature whose Hit Dice are equal to or less than your manifester level.

You possess the target's body and force the creature's mind into your body unless it succeeds on a Will save. You can move your mind back into your own body whenever you desire, which returns the subject's mind to its own body and ends the power. If the manifestation succeeds, your life force occupies the host body, and the host's life force takes over yours.

You can call on rudimentary or instinctive knowledge of the subject creature, but not upon its acquired or learned knowledge (such as skills and feats it possesses). The same is true for the subject in your body. The *mind switch* brings about the following changes.

- You gain the type of your assumed body.
- You gain the Strength, Dexterity, and Constitution scores of your assumed body.
- You gain the natural armor, natural attacks, movement, and other simple physical characteristics of your assumed body.
- You gain the extraordinary special attacks and qualities of your assumed body, but you do not gain supernatural or spell-like abilities.
- You gain the possessions and equipment of your assumed body.
- You retain your own hit points, saving throws (possibly modified by new ability scores), class abilities, supernatural and spell-like abilities, spells and powers, and skills and feats (although skill checks use your new ability scores, and you may be temporarily unable to use feats whose requirements you do not meet in your new body).

Supernatural abilities that require a certain body part may be unavailable in your new form.

If either body is killed while the power is in effect, the other participant also dies when the power ends. If one participant's body becomes petrified, imprisoned by *temporal stasis* or *imprisonment*, or incapacitated in some other way, the other participant will be incapacitated in that way when the power ends.

A targeted *dispel psionics* (or similar spells or effects) successfully manifested on either participant causes both minds to return to their original bodies.

XP Cost: 100 XP.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Mind Switch, True

Telepathy [Mind-Affecting]

Level: Telepath 9

Manifesting Time: 1 minute

Duration: Instantaneous

Saving Throw: Will negates; see text

Power Resistance: Yes

Power Points: 17, XP

As *mind switch*, except as noted here. You permanently exchange bodies with the subject. Since this power's duration is instantaneous, you cannot be forced to return to your natural body by means of *dispel psionics*, an *antimagic field*, or a similar effect. If the subject's body dies while you are in it, you are dead. The subject immediately loses one level, but otherwise survives the experience in your natural body. If your natural body dies while the subject is in it, you immediately lose one level, but you likewise survive the experience in your new body.

Your "natural" body is always considered to be the last one you switched out of. If you exchange bodies with a chain of multiple subjects, you need worry only about the welfare of the last body you switched with. In other words, if your mind is expelled from your current body, your mind returns to the last body you switched with, not to your original body. Similarly, if your original body dies but you have since switched minds with a second subject, you take no penalty. You lose a level only if the body you inhabited immediately prior to your current body is killed.

XP Cost: 10,000 XP.

Mind Thrust

Telepathy [Mind-Affecting]

Level: Psion/wilder 1

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

You instantly deliver a massive assault on the thought pathways of any one creature, dealing 1d10 points of damage to it.

Augment: For every additional power point you spend, this power's damage increases by 1d10 points. For each extra 2d10 points of damage, this power's save DC increases by 1.

Mind Trap

Telepathy [Mind-Affecting]

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: 1 round

Saving Throw: None

Power Resistance: Yes (harmless)

Power Points: 5

You set up a trap in your mind against psionic intruders. Anyone who attacks you with a telepathy power immediately loses 1d6 power points. This power's effect does not negate the power that is currently being used against you. You can manifest this power instantly, quickly enough to gain its benefit in an emergency. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can use this power even when it is not your turn.

Augment: For every additional power point you spend, this power's duration increases by 1 round.

Mindlink

Telepathy [Mind-Affecting]

Level: Telepath 1

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels); see text

Targets: You and one other willing creature within range that has an Intelligence score of 3 or higher

Duration: 10 min./level

Saving Throw: None; see text

Power Resistance: Yes (harmless)

Power Points: 1

You forge a telepathic bond with your target. You can communicate telepathically through the bond even if you do not share a common language. No special power or influence is established as a result of the bond. Once the bond is formed, it works over any distance (although not from one plane to another).

Augment: You can augment this power in one or both of the following ways.

1. If you spend 4 additional power points, you can attempt to create a telepathic bond with a creature that is not willing (Will save negates).

2. For every additional power point you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Mindlink, Thieving

Telepathy [Mind-Affecting]

Level: Telepath 4

Duration: 10 min./level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

As *mindlink*, except that if the target is a psionic character or creature that knows powers, you can temporarily borrow a power of your choice (you are aware of what powers the subject knows, up to the highest level of power you can manifest).

Borrowing the subject's power is a separate standard action that provokes an attack of opportunity. If that attack succeeds, the mental communication provided by this power ends immediately. The borrowed power fades from the subject's awareness and appears within your own. You can now spend power points to manifest the borrowed power just as if it were one of your powers known. You maintain knowledge of the borrowed power until the duration of your *thieving mindlink* expires, at which time you lose knowledge of the power and the power reappears in the mind of the subject, no matter how far from you the subject is. Even if the subject is slain, you lose knowledge of the borrowed power when this power's duration expires.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Mindwipe

Telepathy [Mind-Affecting]

Level: Psion/wilder 4

Display: Auditory, mental, and visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Instantaneous

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 7

You partially wipe your victim's mind of past experiences, bestowing two negative levels upon it. If the subject has at least as many negative levels as Hit Dice, it dies. For each negative level it gains, a psionic creature loses knowledge of one power from its highest available level, and a number of power points from its maximum power point total sufficient to manifest that power. The effects of multiple negative levels stack.

If the subject survives, it loses these two negative levels after 1 hour. (No Fortitude save is necessary to avoid gaining the negative level permanently.)

Augment: You can manifest this power in one or both of the following ways.

1. For every 2 additional power points you spend, this power's save DC increases by 1.

2. For every 3 additional power points you spend, this power bestows an additional negative level on the subject.

Minor Creation, Psionic

Metacreativity (Creation)

Level: Shaper 1

Display: Material

Manifesting Time: 1 minute

Range: 0 ft.

Effect: Unattended, nonpsionic, nonmagical object of nonliving plant matter, up to 1 cu. ft./level

Duration: 1 hour/level (D)

Saving Throw: None

Power Resistance: No

Power Points: 1

As the *minor creation* spell, except as noted here.

Missive

Telepathy [Mind-Affecting, Language-Dependent]

Level: Psion/wilder 1

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Effect: Mental message delivered to subject

Saving Throw: None

Power Resistance: Yes

Power Points: 1

You send a telepathic message of up to ten words to any living creature within range. *Missive* is strictly a one-way exchange from you to the subject. If you do not share a common language, the subject "hears" meaningless mental syllables.

Augment: For every 2 additional power points you spend, this power's range increases by 5 feet and its save DC increases by 1.

Missive, Mass

Telepathy [Mind-Affecting, Language-Dependent]

Level: Psion/wilder 2

Display: Mental

Manifesting Time: 1 standard action

Range: Long (400 ft. + 40 ft./level)

Targets: All creatures in a 400 ft. + 40 ft./level radius centered on you; see text

Effect: Mental message delivered to subjects

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 3

You send a telepathic message of up to twenty-five words to all creatures within range. You can include or exclude from this broadcast any creature you can see, as well as any creature that you know or know of. *Mass missive* is strictly a one-way exchange from you to the subjects. If you do not share a common language, the subjects “hear” meaningless mental syllables.

Augment: For every 2 additional power points you spend, this power’s range increases by 40 feet and its save DC increases by 1.

Modify Memory, Psionic

Telepathy (Compulsion) [Mind-Affecting]

Level: Telepath 4

Display: Mental

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Permanent

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

As the *modify memory* spell, except as noted here.

Moment of Prescience, Psionic

Clairsentience

Level: Psion/wilder 7

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level or until discharged

Power Points: 13

As the *Moment of prescience* spell, except as noted here.

My Light

Psychokinesis [Light]

Level: Psion/wilder 1, psychic warrior 1

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Personal

Effect: 20-ft. cone of light emanating from you

Duration: 10 min./level (D)

Power Points: 1

Your eyes beam forth a 20-foot cone of light. You and other creatures can see normally in the light. If you walk into an area filled with psionic or magical darkness, *my light* goes dark while you stay within that area.

If *my light* is used in conjunction with *elfsight*, the cone of light extends out to 40 feet instead of 20 feet.

Augment: If you spend 2 additional power points, you can manifest this power as a swift action.

Null Psionics Field

Psychokinesis

Level: Kineticist 6

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: 10 ft.

Area: 10-ft.-radius emanation centered on you

Duration: 10 min./level (D)

Saving Throw: None

Power Resistance: See text

Power Points: 11

An invisible barrier surrounds you and moves with you. The space within this barrier is impervious to most psionic effects, including powers, psi-like abilities, and supernatural abilities. Likewise, it prevents the functioning of any psionic items or powers within its confines. A *null psionics field* suppresses any power or psionic effect used within, brought into, or manifested into its area, but does not negate it. Time spent within a *null psionics field* counts against a suppressed effect's duration.

Astral constructs and summoned creatures wink out if they enter a *null psionics field*. They reappear in the same spot once the field goes away. Time spent winking out counts normally against the duration of the power that is maintaining the construct or summoned creature.

Creation powers with instantaneous durations and calling powers are not affected by a *null psionics field* because the power itself is no longer in effect, only its result.

A normal creature (a normally encountered construct rather than a created one, for instance) can enter the area, as can normal missiles. Furthermore, while a psionic sword does not function psionically within the area, it is still a sword (and a masterwork sword at that). The power has no effect on golems and other constructs that are imbued with magic during their creation process and are thereafter self-supporting (unless they have been summoned or have a limited duration, in which case they are treated like any other summoned creatures). Elementals, corporeal undead, and outsiders are likewise unaffected unless summoned. These creatures' spell-like or supernatural abilities, however, may be temporarily nullified by the field. *Dispel psionics* does not remove the field. Two or more *null psionics fields* sharing any of the same space have no effect on each other. Certain powers may be unaffected by *null psionics field* (see the individual power descriptions). Artifacts and deities are unaffected by mortal power such as this. Should a creature's space extend across the boundary of the area enclosed by the field, any part of the creature that lies outside the effect is unaffected by the field.

Oak Body

Psychometabolism

Level: Psion/wilder 7, psychic warrior 5

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: Psion/wilder 13, psychic warrior 9

This power transforms your body into living oak, which grants you several advantages.

You gain damage reduction 10/ slashing and a +5 bonus to natural armor that overlaps (does not stack with) any natural armor bonus you may already have. You are immune to ability damage, blindness, deafness, disease, drowning, poison, stunning, and all powers, spells, or attacks that affect your physiology or respiration, because you have no physiology or respiration while this power is in effect.

You take only half damage from cold effects of all kinds. However, you become susceptible to all special attacks that affect wood, and you gain vulnerability to fire.

You gain a +4 enhancement bonus to Strength, but you take a -2 penalty to Dexterity (to a minimum Dexterity score of 1), and your speed is reduced to half normal. You can speak but cannot drink (and thus can't use potions) or play wind instruments. You have an armor check penalty of -4 and an arcane spell failure chance of 25%.

Your unarmed attacks deal damage equal to a club sized for you (1d4 for Small characters, 1d6 for Medium characters), and you are considered armed when making unarmed attacks. When you make a full attack against an object or structure using your unarmed strike, you deal double damage.

Augment: For every additional power point you spend, this power's duration increases by 1 minute.

Object Reading

Clairsentience

Level: Seer 2

Display: Auditory and material

Manifesting Time: 1 minute

Range: Touch

Target: Object touched

Duration: Concentration, up to 10 min./level (D)

Saving Throw: None

Power Resistance: Yes

Power Points: 3

You can learn details of an inanimate object's previous owner. Objects accumulate psychic impressions left by their previous owners, which can be read by use of this power. The amount of information revealed depends on how long you study a particular object.

1st Minute: Last owner's race.

2nd Minute: Last owner's gender.

3rd Minute: Last owner's age.

4th Minute: Last owner's alignment.

5th Minute: How last owner gained and lost the object.

6th+ Minute: Next-to-last owner's race, and so on.

The power always correctly identifies the last owner of the item, and the original owner (if you keep the power active long enough).

There is a 90% chance that this power will successfully identify all other former owners in sequence, but there is a 10% chance that one former owner will be skipped and thus not identified.

This power will not identify casual users as owners. (Anyone who uses an object to attack someone or something is not thereafter considered a casual user.)

An object without any previous owners reveals no information. You can continue to run through a list of previous owners and learn details about them as long as the power's duration lasts. If you use this power additional times on the same object, the information yielded is the same as if you were using the power on the object for the first time.

Augment: For every additional power point you spend, this power's maximum duration increases by 10 minutes.

Overland Flight, Psionic

Psychoporation

Level: Psion/wilder 6

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level (D)

Power Points: 11

As the *overland flight* spell, except as noted here.

Painful Strike

Psychometabolism

Level: Psychic warrior 2

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level

Power Points: 3

Your natural weapons cause additional pain. Each successful attack you make with a natural weapon deals an extra 1d6 points of nonlethal damage to the target.

Augment: If you spend 6 additional power points, you can manifest this power as a swift action.

Personality Parasite

Telepathy [Mind-Affecting]

Level: Psion/wilder 4

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One Medium or smaller humanoid

Duration: 1 round/level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

You attempt to briefly partition the mind of your foe, calving off a minor personality that is antagonistic to the main personality. The parasitic personality functions with complete autonomy from the main personality. It does not control the body physically, but it can take one standard action each round that is purely mental, such as manifesting a power, in the same turn that the subject takes its normal actions.

The parasitic personality manifests powers using the subject's power point reserve and known powers, but can only manifest powers three or more levels lower than the highest level of power the subject can normally manifest.

The parasitic personality actively attempts to manifest powers that negatively impact the subject, using the highest-level powers possible (so as to deplete the subject's power point reserve), and the most deadly to the subject. You do not have control over what the parasitic personality does, though it always works against the interest of the subject.

Both minds communicate with each other telepathically. If a creature is targeted by a compulsion or charm effect while under the effect of this power, it can make a second saving throw if the first one fails. If both saving throws fail, then this power ends and the creature is affected by the charm or compulsion effect.

The parasitic personality does not gain any advantages if the main personality is subjected to a *haste* or *schism* effect.

Phase Door, Psionic

Psychoportation

Level: Psion/wilder 7

Display: Visual

Manifesting Time: 1 standard action

Range: 0 ft.

Effect: Ethereal 5-ft. by 8-ft. opening, 10 ft. deep + 5 ft. deep per three levels

Duration: One usage per two levels

Saving Throw: None

Power Resistance: No

Power Points: 13

As the *phase door* spell, except as noted here. This power is subject to *dispel psionics*.

Plane Shift, Psionic

Psychoportation

Level: Psion/wilder 5

Display: Visual

Manifesting Time: 1 standard action

Range: Touch

Targets: Willing creature touched, or up to eight willing creatures joining hands

Duration: Instantaneous

Power Points: 9

As the *plane shift* spell, except as noted here.

Power Leech

Telepathy (Compulsion) [Mind-Affecting]

Level: Psion/wilder 4

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: Any psionic creature

Duration: Concentration, up to 1 round/level; see text

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7

Your brow erupts with an arc of crackling dark energy that connects with your foe, draining it of 1d6 power points and adding 1 of those points to your reserve (unless that gain would cause you to exceed your maximum).

The drain continues in each round you maintain concentration while the subject of the drain remains in range. If the subject is drained to 0 power points, this power ends.

Concentrating to maintain *power leech* is a full-round action (you can take no other actions aside from a 5-foot step) instead of a standard action.

Power Resistance

Clairsentience

Level: Psion/wilder 5

Display: Material and visual

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: 1 min./level

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 9

The creature gains power resistance equal to 12 + your manifester level.

Precognition

Clairsentience

Level: Seer 1

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 1

Precognition allows your mind to glimpse fragments of potential future events—what you see will probably happen if no one takes action to change it. However, your vision is incomplete, and it makes no real sense until the actual events you glimpsed begin to unfold. That’s when everything begins to come together, and you can act, if you act swiftly, on the information you previously received when you manifested this power.

In practice, manifesting this power grants you a “precognitive edge.” Normally, you can have only a single precognitive edge at one time. You must use your edge within a period of no more than 10 minutes per level, at which time your preknowledge fades and you lose your edge.

You can use your precognitive edge in a variety of ways. Essentially, the edge translates into a +2 insight bonus that you can apply at any time to either an attack roll, a damage roll, a saving throw, or a skill check. You can elect to apply the bonus to the roll after you determine that your unmodified roll is lower than desired.

Precognition, Defensive

Clairsentience

Level: Psion/wilder 1, psychic warrior 1

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 1

Your awareness extends a fraction of a second into the future, allowing you to better evade an opponent’s blows.

You gain a +1 insight bonus to AC and on all saving throws. If caught in a situation where your Dexterity bonus isn’t applied to your Armor Class, this bonus to AC and saving throws does not apply.

Augment: You can augment this power in one or both of the following ways.

1. For every 3 additional power points you spend, the insight bonus gained increases by 1.

2. If you spend 6 additional power points, you can manifest this power as a swift action.

Precognition, Greater

Clairsentience

Level: Seer 6

Display: Auditory and visual

Manifesting Time: 10 minutes

Range: Personal

Target: You

Duration: 1 hour/level

Power Points: 11

As *precognition*, except as noted here.

You gain a +4 insight bonus instead of a +2 bonus.

Precognition, Offensive

Clairsentience

Level: Psion/wilder 1, psychic warrior 1

Display: Material and visual

Manifesting Time: 1 standard action; see text

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 1

Your awareness extends a fraction of a second into the future, allowing you to better land blows against your opponent. You gain a +1 insight bonus on your attack rolls.

Augment: You can augment this power in one or both of the following ways.

1. For every 3 additional power points you spend, the insight bonus gained on your attack rolls increases by 1.

2. If you spend 6 additional power points, you can manifest this power as a swift action.

Prescience, Offensive

Clairsentience

Level: Psion/wilder 1, psychic warrior 1

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 1

Your awareness extends a fraction of a second into the future, allowing you to better aim blows against your opponent. You gain a +2 insight bonus on your damage rolls.

Augment: You can augment this power in one or both of the following ways.

1. For every 3 additional power points you spend, the insight bonus gained on your attack rolls increases by 1.

2. If you spend 6 additional power points, you can manifest this power as a swift action.

Prevenom

Psychometabolism (Creation)

Level: Psychic warrior 1

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level or until discharged

Power Points: 1

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*), you can use this power to produce a mild venom that coats one of your claws. On your next successful melee attack, the venom deals 2 points of Constitution damage. A target struck by the poison can make a Fortitude save ($DC 10 + 1/2$ your manifester level + your key ability modifier) to negate the damage.

Augment: For every 6 additional power points you spend, this power's Constitution damage increases by 2 points.

Prevenom Weapon

Psychometabolism (Creation)

Level: Psychic warrior 1

Range: Touch

Target: Weapon touched

Power Points: 1

As *prevenom*, except your weapon gains the poison coating as long as it remains in your grip.

Prowess

Clairsentience

Level: Psychic warrior 2

Display: Mental

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 3

If an enemy provokes an attack of opportunity from you, you can make the attack even if you've already taken your allotted number of attacks of opportunity this round (usually one).

You can manifest this power instantly, quickly enough to gain an extra attack of opportunity in the same round. Manifesting this power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round.

Psionic Blast

Telepathy [Mind-Affecting]

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 standard action

Range: 30 ft.

Area: 30-ft. cone-shaped burst

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 5

The air ripples with the force of your mental attack, which blasts the minds of all creatures in range. *Psionic blast* stuns all affected creatures for 1 round.

Augment: For every 2 additional power points you spend, the duration of the stun effect increases by 1 round.

Psionic Lion's Charge

Psychometabolism

Level: Psychic warrior 2

Display: Mental

Manifesting Time: 1 swift action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 3

You gain the powerful charging ability of a lion. When you charge, you can make a full attack in the same round.

You can manifest this power with an instant thought, quickly enough to gain the benefit of the power as you charge.

Manifesting the power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

Augment: For every additional power point you spend, each of your attacks after a charge in the current round gains a circumstance bonus on damage equal to the number of additional points spent.

Psionic Lock

Psychoporation

Level: Psion/wilder 2

Display: Material

Manifesting Time: 1 standard action

Range: Touch

Target: Door, chest, or portal touched, up to 30 sq. ft./level in size

Duration: Permanent

Saving Throw: None

Power Resistance: No

Power Points: 3

A *psionic lock* manifested upon a door, chest, or portal psionically locks it. You can freely pass your own lock without affecting it; otherwise, a door or object secured with *psionic lock* can be opened only by breaking in or by a successful *dispel psionics* effect. Add +10 to the normal DC to break open a door or portal affected by this power.

Psionic Repair Damage

Metacreativity

Level: Shaper 2

Display: Material and visual

Manifesting Time: 1 standard action

Range: Touch

Target: Construct touched

Duration: Instantaneous

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 3

When laying your hands upon a construct that has at least 1 hit point remaining, you reknit its structure to repair damage it has taken. The power repairs 3d8 points of damage +1 point per manifester level. Constructs that are immune to psionics or magic cannot be repaired in this fashion.

Augment: For every 2 additional power points you spend, this power repairs an additional 1d8 points of damage.

Psionic Revivify

Psychometabolism (Healing) [Good]

Level: Egoist 5

Manifesting Time: 1 standard action

Range: Touch

Target: Dead creature touched

Duration: Instantaneous

Saving Throw: None

Power Resistance: Yes (harmless)

Power Points: 9, XP

Psionic revivify lets a manifester reconnect a corpse's psyche with its body, restoring life to a recently deceased creature. The power must be manifested within 1 round of the victim's death. Before the psyche of the deceased has completely left the body, this power halts its journey while repairing somewhat the damage to the body.

This power functions like the *raisdead* spell, except that the affected creature receives no level loss, no Constitution loss, and no loss of powers.

The creature has -1 hit points (but is stable) after being restored to life.

XP Cost: 200 XP.

Augment: For every 100 additional experience points that both you and the subject pay, the manifestation of this power can be delayed by 1 additional round.

Psionic Scent

Psychometabolism

Level: Psychic warrior 2

Display: Mental

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level

Power Points: 3

You gain an enhanced sense of smell, equivalent to the scent ability of some monsters. This ability allows you to detect approaching enemies, sniff out hidden foes, and track by sense of smell. With the scent ability, you can identify familiar odors just as humanoids do familiar sights.

You can detect opponents within 30 feet by sense of smell. If the opponent is upwind, the range increases to 60 feet; if downwind, it drops to 15 feet. Strong scents, such as smoke or rotting garbage, can be detected at twice the ranges noted above. Overpowering scents, such as skunk musk or troglodyte stench, can be detected at triple normal range.

When you detect a scent, the exact location of the source is not revealed—only its presence somewhere within range. You can take a move action to note the direction of the scent. Whenever you come within 5 feet of the source, you pinpoint the source's location.

If you have the Track feat, you can follow tracks by smell, making a Wisdom (or Survival) check to find or follow a track. The typical DC for a fresh trail is 10 (no matter what kind of surface holds the scent). This DC increases or decreases depending on how strong the quarry's odor is, the number of creatures, and the age of the trail. For each hour that the trail is cold, the DC increases by 2. The ability otherwise follows the rules for the Track feat. If you are tracking with *psionic scent*, you ignore the effects of surface conditions and poor visibility.

Psychic Chirurgery

Telepathy [Mind-Affecting]

Level: Telepath 9

Display: Auditory, mental, and visual

Manifesting Time: 10 minutes

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 17, XP; see text

You can repair psychic damage or grant another creature knowledge of powers you know, depending on the version of this power you manifest.

Repair Psychic Damage: You can remove any compulsions and charms affecting the subject. In fact, you can remove any instantaneous or permanent effect caused by a psychic power with *psychic chirurgery*. Unlike with *aura alteration*, these effects end or are negated as soon as this power is manifested, with no need for another saving throw.

You can remove all negative levels affecting the subject, regardless of how it lost those levels, restoring it to the highest level it had previously attained. Also, you can restore levels lost to energy drain or a similar effect if the level drain occurred within a number of hours equal to your manifester level.

You can also remove all psionic effects penalizing the subject's ability scores, heal all ability damage, and remove any ability drain affecting the subject. *Psychic chirurgery* negates all forms of insanity, confusion, the effect of such powers as *microcosm*, and so on, but it does not restore levels or Constitution points lost due to death.

Transfer Knowledge: If desired, you can use this power to directly transfer knowledge of a power you know to another psionic character. You can give a character knowledge of a power of any level that she can manifest, even if the power is not normally on the character's power list. Knowledge of powers gained through *psychic chirurgery* does not count toward the maximum number of powers a character can know per level.

XP Cost: Each time you use psychic chirurgery to implant knowledge of a power in another creature, you pay an XP cost equal to 1,000 x the level of the power implanted. If you and the subject are both willing to do so, you can split this cost evenly.

Psychic Crush

Telepathy [Mind-Affecting]

Level: Psion/wilder 5

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. +5 ft./2 levels)

Target: One creature

Duration: Instantaneous

Saving Throw: Will partial; see text

Power Resistance: Yes

Power Points: 9

Your will abruptly and brutally crushes the mental essence of any one creature, debilitating its acumen. The target must make a Will save with a +4 bonus or collapse unconscious and dying at -1 hit points. If the target succeeds on the save, it takes 3d6 points of damage.

Augment: For every 2 additional power points you spend, this power's damage increases by 1d6 points.

Psychic Reformation

Telepathy [Mind-Affecting]

Level: Psion/wilder 4

Display: Auditory, mental, and visual

Manifesting Time: 10 minutes

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 7, XP; see text

When this power is manifested, the subject can choose to spend its most recently gained skill points differently (picking new skills and abandoning old ones if it chooses) and to choose a different feat from the one it selected when advancing from its previous level to its current level.

The subject can also choose to forget powers it acquired when advancing to its current level, replacing them with new ones. The subject can undo decisions of these sorts that were made at lower levels, if both the subject and the manifester agree to pay the necessary XP before this power is manifested (see below). The subject must abide by the standard rules for selecting skills and feats, and so it cannot take feats for which it doesn't qualify or take crossclass skills as class skills.

XP Cost: This power costs 50 XP to manifest to reformat choices made when the character reached her current level. For each additional previous level into which the revision reaches, the power costs an additional 50 XP. The manifester and subject split all XP costs evenly.

Psychic Vampire

Psychometabolism

Level: Egoist 4, psychic warrior 4

Display: Mental

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: Instantaneous

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 7

This power shrouds your hand or a natural weapon you possess with darkness that you can use to drain an opponent's power. If you manifest this power to affect your hand, the next successful melee touch attack you make (if the victim fails its Fortitude save) drains 2 power points from your foe for every manifester level you have. The drained points simply dissipate. Your touch attack, charged with psionic power, is treated as an armed attack.

If you manifest this power to affect a natural weapon you possess, you must make a successful melee attack with the weapon to gain the power's benefit.

Against a psionic being that has no power points or a nonpsionic foe, your attack instead deals 2 points of Intelligence, Wisdom, or Charisma damage (your choice).

Psychofeedback

Psychometabolism

Level: Egoist 5, psychic warrior 5

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 9

You can readjust your body to boost one physical ability score at the expense of one or more other scores. Select one ability score you would like to boost, and increase it by the same amount that you decrease one or more other scores. All score decreases are treated as a special form of ability damage, called ability burn, which cannot be magically or psionically healed—it goes away only through natural healing.

You can boost your Strength, Dexterity or Constitution score by an amount equal to your manifester level (or any lesser amount), assuming you can afford to burn your other ability scores to such an extent.

When the duration of this power expires, your ability boost also ends, but your ability burn remains until it is healed naturally.

PSIONIC POWERS (Q-W)

Quintessence

Metacreativity (Creation)

Level: Shaper 4

Display: Material; see text

Manifesting Time: 1 round

Range: 0 ft.

Effect: 1-inch-diameter dollop of quintessence; see text

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 7

You collapse a bit of time from the continuum, forming a 1-ounce dollop of thick, gooey material called quintessence. This substance shimmers like a silver mirror when viewed from some angles but is transparent from other viewpoints. You can smooth a dollop of quintessence around any extremely small object.

Objects sealed within quintessence are protected from the effects of time; in practical terms, they enter a state of stasis.

Living flesh with only partial contact with quintessence is also partially pulled out of the time stream (the manifester is immune to this effect). This disruption deals 1 point of damage per round beginning 10 rounds after partial contact occurs. Quintessence can be manually scraped away from a protected object, freeing it to rejoin the time stream. When you do this, there is a 75% chance that the quintessence evaporates back into the continuum. Otherwise, it coalesces again into a 1-inch-diameter bead, available for later use.

Large quantities of quintessence could theoretically be gathered to preserve large items or structures (or even a complete living creature; if completely immersed, a living creature would not take the damage associated with partial contact).

However, psionic characters and creatures are generally loath to do so because accumulations of quintessence weighing 1 pound or more hinder psionic activity within a 5-foot radius of the accumulation: Powers require twice as many power points to manifest, unless the manifester makes a successful Will save each time he or she attempts to manifest a power. Also in these circumstances, manifesting a psi-like ability that is usable at will is a full-round action rather than a standard action.

Read Thoughts

Telepathy [Mind-Affecting]

Level: Telepath 2

Display: Mental

Manifesting Time: 1 standard action

Range: 60 ft.

Area: Cone-shaped emanation centered on you

Duration: Concentration, up to 1 min./level (D)

Saving Throw: Will negates; see text

Power Resistance: No

Power Points: 3

You know the surface thoughts of the mind of any creature in the area that fails a Will save. A target that succeeds on its save is not affected by this manifestation of the power, even if it leaves the area and then reenters the area before the duration expires.

Creatures of animal intelligence have simple, instinctual thoughts that you can pick up. If you read the thoughts of a creature with an Intelligence of 26 or higher (and at least 10 points higher than your own Intelligence score), you are stunned for 1 round and the power ends. This power does not let you pinpoint the location of an affected mind if you don't have line of sight to the subject.

Each round, you can turn to use this power in a new area. The power can penetrate barriers, but 1 foot of stone, 1 inch of common metal, a thin sheet of lead, or 3 feet of wood or dirt blocks it.

Reality Revision

Clairsentience

Level: Psion/wilder 9

Saving Throw: See text

Power Resistance: See text

Power Points: 17, XP

As *bend reality*, but with more farreaching effects. A *reality revision* can produce any one of the following effects.

- Duplicate any psion power of 8th level or lower, provided the power is not prohibited to you.
- Duplicate any other power (but not a spell) of 6th level or lower, such as a psychic warrior power.
- Duplicate any psion power of 7th level or lower even if it's a power prohibited to you.
- Undo the harmful effects of many other powers, such as *microcosm*, *geas/quest*, or *insanity*.
- Create a nonpsionic item of up to 25,000 gp in value.
- Create a psionic item, or add to the powers of an existing psionic item (see XP cost below).
- Grant a creature a +1 inherent bonus to an ability score. Two to five *reality revisions* manifested in immediate succession can grant a creature a +2 to +5 inherent bonus to an ability score. Inherent bonuses are instantaneous, so they cannot be negated or dispelled. An inherent bonus cannot exceed +5 for a single ability score. Inherent bonuses to a particular ability score do not stack; only the best one applies.
- Remove injuries and afflictions. A single *reality revision* can aid one creature per manifester level, and all subjects are cured of the same kind of affliction.

Reality revision can not restore the experience point loss from manifesting a power or casting a spell, or the level or Constitution loss from being returned to life by those effects that reduce level or Constitution.

- Revive the dead. *Reality revision* can bring a dead creature back to life by duplicating a *resurrection* spell. This power can revive a dead creature whose body has been destroyed, but the task takes two manifestations of *reality revision*, one to recreate the body and another to infuse the body with life again. *Reality revision* cannot prevent a character who is brought back to life from losing a level.
- Transport travelers. This power can lift one creature per manifester level from anywhere on any plane and place those creatures anywhere else on any plane regardless of local conditions. An unwilling target gets a Will save to negate the effect, and power resistance (if any) applies.
- Undo misfortune. *Reality revision* can undo a single recent event. Manifesting the power forces a reroll of any roll made within the last round (including your last turn). Reality reshapes itself to accommodate the new result. The reroll, however, may be as bad as or worse than the original roll. An unwilling target gets a Will save to negate the effect, and power resistance (if any) applies.

You can try to use *reality revision* to produce more powerful effects than these, but doing so is dangerous. The manifestation may pervert your intent into a literal but undesirable fulfillment or only a partial fulfillment.

Duplicated powers allow saves and power resistance as normal (but save DCs are calculated as though the power is 9th level).

XP Cost: The minimum XP cost for manifesting *reality revision* is 5,000

XP: When a manifestation duplicates a power that has an XP cost, you must pay 5,000 XP or that cost, whichever is more. When a manifestation creates or improves a psionic item, you must pay twice the normal XP cost for crafting or improving the item, plus an additional 5,000 XP.

Recall Agony

Clairsentience [Mind-Affecting]

Level: Psion/wilder 2

Display: Material

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One creature

Duration: Instantaneous

Saving Throw: Will half

Power Resistance: Yes

Power Points: 3

The fabric of time parts to your will, revealing wounds your foe has received in the past (or has yet to receive). That foe takes 2d6 points of damage as the past (or future) impinges briefly on the present.

Augment: For every additional power point you spend, this power's damage increases by 1d6 points. For each extra 2d6 points of damage, this power's save DC increases by 1.

Recall Death

Clairsentience [Death, Mind-Affecting]

Level: Psion/wilder 8

Saving Throw: Will partial; see text

Power Points: 15

As *recall agony*, except the wounds revealed by folding the fourth dimension are potentially fatal. If the target fails its Will save, it dies. If the save succeeds, the target instead takes 5d6 points of damage.

Reddopsi

Psychokinesis

Level: Kineticist 7

Display: Auditory, mental, and olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Until discharged or 10 min./level

Power Points: 13

When you manifest *reddopsi*, powers targeted against you rebound to affect the original manifester. This effect reverses powers that have only you as a target (except *dispel psionics* and similar powers or effects). Powers that affect an area and those that produce effects can't be reversed. *Reddopsi* also can't reverse any power with a range of touch.

Should you rebound a power back against a manifester who also is protected by *reddopsi*, the power rebounds once more upon you.

Remote View Trap

Clairsentience [Electricity]

Level: Psion/wilder 6

Display: Mental and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 24 hours + 1 hour/level

Saving Throw: Will half; see text

Power Resistance: No

Power Points: 11

When others use *clairvoyant sense*, *remote viewing*, or other means of scrying you from afar, your prepared trap gives them a nasty surprise. If the scryer fails its saving throw, you are undetected. Moreover, the would-be observer takes 8d6 points of electricity damage. If the scryer makes its saving throw, it takes only 4d6 points of electricity damage and is able to observe you normally. Either way, you are aware of the attempt to view you, but not of the viewer or the viewer's location. It is possible that you might recognize the quasireal viewpoint of someone using the *remote viewing* power if you could pierce its *invisibility* (which is true for *remote viewing* whether or not you use this power).

Remote Viewing

Clairsentience (Scrying; see text)

Level: Seer 4

Display: Mental

Manifesting Time: 1 hour

Range: See text

Effect: Quasi-real viewpoint

Duration: 1 min./level (D)

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 7, XP

You send your mind across space and dimensions, forming it into a quasireal viewpoint from which you can see and hear some creature located at any distance from you, even if planar boundaries separate you. If the subject succeeds on a Will save, the *remote viewing* attempt fails, and you can't attempt to view that creature again for at least 24 hours. The difficulty of the save depends on how well you know the subject and what sort of physical connection (if any) you have to that creature. Furthermore, if the subject is on another plane, it gets a +5 bonus on its Will save.

Knowledge	Will Save Modifier
None*	+10
Secondhand (you have heard of the subject)	+5
Firsthands (you have met the subject)	+0
Familiar (you know the subject well)	-5

*You must have some sort of connection to a creature you have no knowledge of.

Connection	Will Save Modifier
Likeness or picture	-2
Possession or garment	-4
Body part, lock of hair, bit of nail, etc.	-10
Subject on another plane	+5

If the subject fails its Will save, your mind coalesces a quasi-real viewpoint near enough to the subject to see and hear the subject and its immediate surroundings (up 30 feet in all directions away from the subject).

While the *remote viewing* lasts, your real body remains unmoving and unaware of your actual surroundings. On the other hand, your quasi-real viewpoint is treated in some ways as if it were an invisible *ectoplasmic form* of yourself, except as follows. This power is of the Scrying subdiscipline, but use the following information in place of the standard scrying sensor. As a quasi-real viewpoint, you can speak (though your voice is whispery).

You may potentially be sensed by the subject of your viewing (subjects who can see or sense invisible or hidden creatures automatically sense you; otherwise you make a Hide check with a +40 bonus to escape detection if immobile, or a +20 bonus if moving). You could be attacked (although if you become subject to *dispel psionics*, the *remote viewing* simply ends). If the subject moves, you can attempt to follow it at a speed of 20 feet, though if it gets farther than 30 feet from you (or you move farther than 30 feet from it), the power ends.

You can attempt to manifest one power through your quasi-real viewpoint, but you must make a Concentration check (DC 20 + level of the power you wish to manifest) to succeed. Manifesting (or attempting and failing to manifest) a power immediately ends the *remote viewing*.

Furthermore, all powers from your quasi-real viewpoint cost twice the usual number of power points (you can't exceed the power point limit set by your manifester level, so you are restricted to manifesting lower-level powers than you otherwise could). Power points you spend as a quasireal viewpoint are drained from your real body.

XP Cost: 20 XP.

Restoration, Psionic

Psychometabolism (Healing)

Level: Egoist 6

Display: Material

Manifesting Time: 3 rounds

Range: Touch

Target: Creature touched

Duration: Instantaneous

Saving Throw: Will negates (harmless)

Power Resistance: Yes (harmless)

Power Points: 11

This power cures all ability damage, and it restores all points drained from a single ability score (your choice if more than one score is drained). It also eliminates any fatigue or exhaustion suffered by the target. *Restoration* does not restore levels or Constitution points lost due to death.

Restoration can remove negative levels. It can also restore one level to a creature who has had a level drained, if the number of days since the creature lost the level is equal to or less than your manifester level. In such a case, *restoration* brings the creature up to the minimum number of experience points necessary to advance it to the next higher level, gaining it an additional Hit Die and level benefits accordingly.

Restore Extremity

Psychometabolism (Healing)

Level: Egoist 5

Display: Auditory

Manifesting Time: 1 standard action

Range: Touch

Target: Creature touched

Duration: Instantaneous

Saving Throw: Will half (harmless)

Power Resistance: Yes (harmless)

Power Points: 9

You restore a severed extremity to a creature that has lost a digit, hand, arm, leg, or even its head. This power does not restore life, but it returns a lost extremity to a living or dead creature if the creature is otherwise mostly intact. The original extremity

need not be present when this power is manifested; a new extremity is created by the power. If a head is restored to a body, the original head (if not already destroyed) loses all spark of identity, and can be considered so much dead tissue.

Retrieve

Teleportation [Mind-Affecting]

Level: Psion/wilder 6

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One object you can hold or carry in one hand, weighing up to 10 lb./level

Duration: Instantaneous

Saving Throw: Will negates; see text

Power Resistance: No

Power Points: 11

You automatically teleport an item you can see within range directly to your hand. If the object is in the possession of an opponent, it comes to your hand if your opponent fails a Will save.

Augment: For every additional power point you spend, the weight limit of the target increases by 10 pounds.

Schism

Telepathy [Mind-Affecting]

Level: Telepath 4

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 7

Your mind splits into two independent parts. Each part functions in complete autonomy, like two characters in one body. Your new “second mind” does not control your body physically but is free to take one standard action in each round if the action is purely mental (such as manifesting a power) in the same round you take your normal actions.

Your second mind can manifest powers using your power point reserve, but only as if your manifester level were six lower than it is. Your second mind doesn’t provoke attacks of opportunity when manifesting a power, because doing so doesn’t distract your primary mind.

Your second mind takes its first action on your turn in the round after *schism* is manifested.

Both your minds communicate with each other telepathically. If you are subject to a compulsion or charm effect while you are of two minds, make a second saving throw if you fail the first. If you fail both, then the *schism* ends and you are affected normally by the power. If you fail just one, the *schism* ends immediately, but you are not subject to the compulsion or charm. Your second mind does not gain any advantages if you are subject to a *haste* effect, although you gain the overall standard benefits.

Second Chance

Clairsentience

Level: Seer 5

Display: Mental

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level or until discharged

Power Points: 9

You take a hand in influencing the probable outcomes of your immediate environment. You see the many alternative branches that reality could take in the next few seconds, and with this foreknowledge you gain the ability to reroll one attack roll, one saving throw, one ability check, or one skill check each round. You must take the result of the reroll, even if it’s worse than the original roll. You do not have to make another roll if satisfied with your original roll.

Sense Link

Telepathy [Mind-Affecting]

Level: Psion/wilder 1

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./level)

Target: One willing creature

Duration: Concentration, up to 1min./level

Power Points: 1

You perceive what the subject creature perceives using its sight, hearing, taste, or smell. Only one sense is linked, and you cannot switch between senses with the same manifestation.

You make any skill checks involving senses, such as Spot or Listen, as the subject, and only within the subject's field of view.

You lose your Dexterity bonus to AC while directly sensing what the subject senses.

Once *sense link* is manifested, the link persists even if the subject moves out of the range of the original manifestation (but the link does not work across planes). You do not control the subject, nor can you communicate with it by means of this power.

The strength of the subject's linked sense could be enhanced by other powers or items, allowing you the same enhanced sense. You are subject to any gaze attack affecting the subject creature (if you linked vision). If you are blinded or deafened, or suffer some other sensory deprivation, the linked creature functions as an independent sensory organ, and provides you the benefit of the linked sense from its perspective while this power's duration lasts.

Augment: You can augment this power in one or both of the following ways.

1. If you spend 2 additional power points, you can have the subject perceive one of your senses instead of the other way around.

2. If you spend 4 additional power points, you can link to a second sense of the same subject.

Sense Link, Forced

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

As *sense link*, except you can use this power on any creature (willing or unwilling), and this power can't be augmented.

Sensitivity to Psychic Impressions

Clairsentience

Level: Seer 2

Display: Auditory and material

Manifesting Time: 1 hour

Range: Close (25 ft. + 5 ft./2 levels)

Area: Spread with a radius of 25 ft. + 5 ft./2 levels, centered on you

Duration: Concentration, up to 10 min./level

Saving Throw: None

Power Resistance: No

Power Points: 3

You gain historical vision in a given location. Rooms, streets, tunnels, and other discrete locations accumulate psychic impressions left by powerful emotions experienced in a given area. These impressions offer you a picture of the location's past.

The types of events most likely to leave psychic impressions are those that elicited strong emotions: battles and betrayals, marriages and murders, births and great pain, or any other event where one emotion dominates. Everyday occurrences leave no residue for a manifester to detect.

The vision of the event is dreamlike and shadowy. You do not gain special knowledge of those involved in the vision, though you might be able to read large banners or other writing if they are in your language.

Beginning with the most recent significant event at a location and working backward in time, you can sense one distinct event for every 10 minutes you maintain concentration, if any such events exist to be sensed. Your sensitivity extends into the past a maximum number of years equal to $100 \times$ your manifester level.

Sequester, Psionic

Clairsentience

Level: Psion/wilder 7

Display: None

Manifesting Time: 1 standard action

Range: Touch

Target: One willing creature or one object (up to a 2-ft. cube/level) touched

Duration: One day/level (D)

Saving Throw: None or Will negates (object)

Power Resistance: No or Yes (object)

Power Points: 13, XP

As the *sequester* spell, except as noted here.

XP Cost: 75 XP.

Shadow Body

Psychometabolism

Level: Psion/wilder 8

Display: Auditory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level (D)

Power Points: 15

Your body and all your equipment are subsumed by your shadow. As a living shadow, you blend perfectly into any other shadow and vanish in darkness. You appear as an unattached shadow in areas of full light.

You can move at your normal speed, on any surface, including walls and ceilings, as well as across the surfaces of liquids—even up the face of a waterfall.

Your space does not change, so you cannot move into locations you would not normally be able to move into.

While in your *shadow body*, you gain damage reduction 10/magic and darkvision out to 60 feet. You are immune to extra damage from critical hits, ability damage, disease, drowning, and poison. You take only half damage from acid, electricity, and fire of all kinds.

While affected by this power, you can be detected by powers that read thoughts, life, or presences (including *true seeing*), or if you make suspicious movements in lighted areas.

You cannot harm anyone physically or manipulate any objects, but you can use your powers normally. Doing so may attract notice, but if you remain in a shadowed area, you get a +15 bonus on your Hide check to remain unnoticed.

Share Pain

Psychometabolism

Level: Psion/wilder 2

Display: Material and mental

Manifesting Time: 1 standard action

Range: Touch

Targets: You and one willing creature, or two willing creatures; see text

Duration: 1 hour/level (D)

Power Points: 3

This power creates a psychometabolic connection between you and a willing subject so that some of your wounds are transferred to the subject. You take half damage from all attacks that deal hit point damage to you, and the subject takes the remainder. The amount of damage not taken by you is taken by the subject. If your hit points are reduced by a lowered Constitution score, that reduction is not shared with the subject because it is not a form of hit point damage. When this power ends, subsequent damage is no longer divided between the subject and you, but damage already shared is not reassigned.

If you and the subject move farther away from each other than close range, the power ends.

You can manifest this power on two willing subjects, one of which you designate to share its damage with the other.

Share Pain, Forced

Psychometabolism

Level: Psion/wilder 3

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: 1 round/level (D)

Saving Throw: Fortitude negates

Power Resistance: Yes

Power Points: 5

As *share pain*, except as noted here.

You attempt to force the sharing of your wounds with an unwilling creature, and for less time. If you are immune to the type of damage dealt, or if you convert lethal damage into nonlethal damage, the target takes no damage.

Augment: For every 2 additional power points you spend, this power's save DC increases by 1.

Shatter Mind Blank

Telepathy

Level: Psion/wilder 5

Display: Olfactory

Manifesting Time: 1 standard action

Range: 30 ft.

Area: 30-ft.-radius burst centered on you

Duration: Instantaneous

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 9

This power can negate a *psionic mind blank* or a *personal mind blank* affecting the target. If the target fails its save and does not overcome your attempt with its power resistance, you can shatter the mind blank by making a successful check ($1d20 +$ your manifester level, maximum +20) against a DC equal to $11 +$ the manifester level of the creator of the *mind blank* effect. If you succeed, the *psionic mind blank* or *personal mind blank* ends, allowing you to affect the target thereafter with mind-affecting powers.

Skate

Psychoportation

Level: Psion/wilder 1, psychic warrior 1

Display: Material and visual

Manifesting Time: 1 standard action

Range: Personal or touch; see text

Target: You or one willing creature or one unattended object (total weight up to 100 lb./level); see text

Duration: 1 min./level (D)

Saving Throw: None

Power Resistance: Yes (harmless, object)

Power Points: 1

You, another willing creature, or an unattended object can slide along solid ground as if on smooth ice. If you manifest *skate* on yourself or another creature, the subject of the power retains equilibrium by mental desire alone, allowing her to gracefully skate along the ground, turn, or stop suddenly as desired. The skater's land speed increases by 15 feet. (This adjustment is treated as an enhancement bonus.) As with any effect that increases speed, this power affects the subject's maximum jumping distance.

The subject can skate up or down any incline or decline she could normally walk upon without mishap, though skating up an incline reduces the subject's speed to normal, while skating down a decline increases her speed by an additional 15 feet. (This adjustment is treated as a circumstance bonus.)

If you manifest *skate* on an object, treat the object as having only one-tenth of its normal weight for the purpose of dragging it along the ground.

Solicit Psicrystal

Telepathy

Level: Psion/wilder 3

Display: Auditory

Manifesting Time: 1 swift action

Range: Close (25 ft. + 5 ft./2 levels)

Target: Your psicrystal

Duration: 1 round/level (D)

Saving Throw: No

Power Resistance: No

Power Points: 5

Your psicrystal takes over the responsibility of maintaining concentration on any single power you have manifested and are concentrating on. While maintaining this concentration, the psicrystal is limited to move actions in each round, as normal. When the duration of *solicit psicrystal* expires, the power you transferred to the psicrystal ends (even

if this would mean that the power ends earlier than normal). If necessary, the psicrystal makes Concentration checks using your Concentration modifier.

You can manifest this power (and transfer the responsibility) with an instant thought, quickly enough to gain the benefit of the power before you take any other actions in a round. Manifesting the power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

Augment: For every additional power point you spend, this power's maximum duration increases by 1 round.

Steadfast Perception

Clairsentience

Level: Psychic warrior 4

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level (D)

Power Points: 7

Your vision cannot be distracted or misled, granting you immunity to all figments and glamers (such as *invisibility*).

Moreover, your Spot and Search checks receive a +6 enhancement bonus for the duration of this power. This power also grants you another saving throw against someone using *false sensory input* on you, but you must realize that that power has been used in order to know enough to manifest *steadfast perception*.

Stomp

Psychokinesis

Level: Psychic warrior 1

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: 20 ft.

Area: Cone-shaped spread

Duration: Instantaneous

Saving Throw: Reflex negates

Power Resistance: No

Power Points: 1

Your foot stomp precipitates a psychokinetic shock wave that travels along the ground, toppling creatures and loose objects. The shock wave affects only creatures standing on the ground within the power's area. Creatures that fail their saves are thrown to the ground, become prone, and take 1d4 points of nonlethal damage.

Augment: For every additional power point you spend, this power's nonlethal damage increases by 1d4 points.

Strength of My Enemy

Psychometabolism

Level: Psychic warrior 2

Display: Visual; see text

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round/level (D)

Power Points: 3

You gain the ability to siphon away your enemy's strength for your own use. One of your natural or manufactured weapons becomes the instrument of your desire, and deals 1 point of Strength damage on each successful hit. You gain that point of Strength as an enhancement bonus to your Strength score. Strength you siphon from different foes is tracked separately—the total siphoned from each individual foe is considered a separate enhancement bonus to your Strength (maximum +8), and you gain only the highest total.

Augment: You can augment this power in one or both of the following ways.

1. For every 3 additional power points you spend, the maximum enhancement bonus you can add to your Strength increases by 2.

2. If you spend 6 additional power points, you can manifest this power as a swift action.

Suggestion, Psionic

Telepathy (Compulsion) [Mind-Affecting, Language-Dependent]

Level: Telepath 2

Display: Auditory

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Target: One creature

Duration: 1 hour/level or until completed

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 3

As the *suggestion* spell, except as noted here.

Augment: For every 2 additional power points you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Suspend Life

Psychometabolism

Level: Psion/wilder 6, psychic warrior 6

Display: Olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Permanent unless ended or dismissed; see text

Power Points: 11

You can place yourself into a trance so deep that you are almost in suspended animation. Even powers that detect life or thought are incapable of determining that you are alive.

While you are suspended, you are aware of your surroundings. You feel the passage of one day for every year that actually passes. Though on a slower schedule, you grow hungry after a “day” without food (though a year passes in actuality) and begin to suffer the effects of thirst and starvation as appropriate.

If you take any damage, you come out of your trance 4 rounds later. The trance can also be ended by a successful use of *dispel psionics*. If you choose to dismiss the power, your trance ends 10 rounds later.

Sustenance

Psychometabolism

Level: Psion/wilder 2, psychic warrior 2

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 3

You can go without food and water for one day. Each time you manifest this power, your body manufactures sufficient solid and liquid nourishment to satisfy your needs for that time.

Swarm of Crystals

Metacreativity (Creation)

Level: Psion/wilder 2

Display: Material

Manifesting Time: 1 standard action

Range: 15 ft.

Area: Cone-shaped spread

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 3

Thousands of tiny crystal shards spray forth in an arc from your hand. These razorlike crystals slice everything in their path. Anyone caught in the cone takes 3d4 points of slashing damage.

Augment: For every additional power point you spend, this power’s damage increases by 1d4 points.

Synesthete

Psychometabolism

Level: Psion/wilder 1, psychic warrior 1

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level (D)

Power Points: 1

You receive one kind of sensory input when a different sense is stimulated. In particular, you can either feel light or feel sound. You can shift your stimulated sense between these two options once per round as a swift action. Your senses continue to work normally as well, unless they are impaired for some reason.

Your face must be uncovered to use this power, because it is the skin of your face that acts as the sensory receiver.

If you are feeling light by absorbing ambient light onto your skin, you have your normal visual abilities (except for darkvision), even if your eyes are closed or you are blinded. If your eyes are working normally, you gain a +4 circumstance bonus on all Spot and Search checks. While feeling light, you are immune to gaze attacks.

If you are feeling sound by absorbing sound onto your skin and your ears are working normally, the expanded audio input provides you with a +4 circumstance bonus on Listen checks.

Psionic or magical displacement effects, invisibility effects, illusions, and other similar effects confuse your *synesthete* senses just as they would your normal senses.

You can also use this power to see sound if you are deafened, or hear light if you are blinded, thus removing all penalties associated with either condition (though you gain no bonuses for using the power in this way if you are not deafened or blinded).

Telekinetic Force

Psychokinesis [Force]

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One object at a time

Duration: Concentration, up to 1 round/level

Saving Throw: Will negates (object); see text

Power Resistance: Yes (object)

Power Points: 5

You move an object by concentrating your mind upon its current location and then the location you desire, creating a sustained force. You can move an object weighing no more than 250 pounds up to 20 feet per round. A creature can negate the effect on an object it possesses with a successful Will save or with power resistance. The weight can be moved across the ground or through the air. This power ends if the object is forced out of range. If you cease concentration, the object falls or stops.

You can drop a weight and pick up another during the power's duration, as long as you don't stop concentrating on maintaining the power. An object can be telekinetically manipulated as if you were moving it with one hand.

If you spend at least 5 rounds concentrating on an unattended object, you can attempt to break or burst it as if making a Strength check, except that you apply your key ability modifier to the check instead of your Strength modifier.

Augment: For every additional power point you spend, the weight limit of the target increases by 25 pounds.

Telekinetic Maneuver

Psychokinesis [Force]

Level: Psion/wilder 4

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One creature

Duration: Concentration, up to 1 round/level

Saving Throw: None

Power Resistance: Yes

Power Points: 7

You can affect a foe by concentrating your mind upon its current status and the status you desire, once per round. You can perform a bull rush, a disarm, a grapple (including a pin), or a trip. Resolve these attempts as normal, except that they don't provoke attacks of opportunity, you use your manifester level in place of your base attack bonus (for disarm and grapple attempts), you use your Intelligence modifier in place of your Strength modifier or Dexterity modifier, and a failed attempt doesn't allow a reactive attempt by the target (such as normally allowed on disarm or trip attempts). No save is allowed against these attempts, but power resistance applies normally.

Augment: For every 2 additional power points you spend, this power grants a +1 bonus on your checks involving bull rush, disarm, grapple, or trip attempts.

Telekinetic Sphere, Psionic

Psychokinesis [Force]

Level: Kineticist 8

Display: Material

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: 1-ft.-diameter/level sphere, centered around creatures or objects

Duration: 1 min./level (D)

Saving Throw: Reflex negates (object)

Power Resistance: Yes (object)

Power Points: 15

As the *telekinetic sphere* spell, except as noted here.

Telekinetic Thrust

Psychokinesis

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target or Targets: One or more objects or creatures with a total weight of 250 lb. or less

Duration: Instantaneous

Saving Throw: Will negates or Will negates (object); see text

Power Resistance: Yes or Yes (object); see text

Power Points: 5

You can affect one or more objects or creatures by concentrating your mind upon, sending them in a deadly hail at your foes—or simply by hurling your foe! You can hurl one object or creature per manifester level (maximum fifteen separate targets), as long as all are within the power's range and each is no more than 10 feet away from another one. Each object or creature can be hurled a maximum distance of 10 feet per level.

You must succeed on ranged attack rolls (one per creature or object thrown) to hit the target of the hurled items with the items, applying your Intelligence modifier to the attack roll instead of your Dexterity modifier. Hurled weapons deal their standard damage (your Strength bonus does not apply; arrows or bolts deal damage as daggers of their size when used in this manner). Other objects deal damage ranging from 1 point per 25 pounds of weight (for less dangerous objects such as an empty barrel) to 1d6 points per 25 pounds of weight (for hard, dense objects such as a boulder).

Creatures are allowed Will saves (and power resistance) to negate the effect, as are those whose held possessions are targeted by this power.

If you use this power to hurl a creature against a solid surface, it takes damage as if it had fallen 10 feet (1d6 points).

Augment: For every additional power point you spend, the weight limit of the target or targets increases by 25 pounds.

Telepathic Projection

Telepathy (Charm) [Mind-Affecting]

Level: Psion/wilder 1

Display: Visual

Manifesting Time: 1 standard action

Range: Medium (100 ft. + 10 ft./ level)

Target: One creature

Duration: 1 min./level

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 1

You alter the subject's mood, adjusting its attitude toward you by one step in a positive direction. For instance, an unfriendly creature can be made indifferent, or a hostile creature unfriendly. You can grant a +4 bonus on your own (or others') Bluff, Diplomacy, Intimidate, Perform, or Sense Motive checks involving the affected creature.

Teleport, Psionic

Psychoportation (Teleportation)

Level: Nomad 5

Display: Visual

Manifesting Time: 1 standard action

Range: Personal and touch

Target or Targets: You and touched objects or other touched willing creatures

Duration: Instantaneous

Saving Throw: None or Will negates (object)

Power Resistance: No or Yes (object)

Power Points: 9

As the *teleport* spell, except as noted here.

Teleport, Psionic Greater

Psychoportation (Teleportation)

Level: Psion/wilder 8

Power Points: 15

As the *greater teleport* spell, except as noted here.

Teleportation Circle, Psionic

Psychoportation (Teleportation)

Level: Nomad 9

Display: Mental

Manifesting Time: 10 minutes

Range: 0 ft.

Effect: 5-ft.-radius circle that teleports those who activate it

Duration: 10 min./level (D)

Saving Throw: None

Power Resistance: Yes

Power Points: 17

As the *teleportation circle* spell, except as noted here.

Teleport Trigger

Psychoportation (Teleportation)

Level: Nomad 5

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 hour/level (D)

Power Points: 9

You specify a situation that triggers your automatic manifestation of a *psionic teleport*, taking you to a predetermined location. You must know the *psionic teleport* power and have sufficient power points to manifest it when the specified situation occurs.

The *teleport trigger* goes off on the initiative count immediately after the specified situation occurs, even if you are flat-footed or you have already taken your turn in the current round. The specified situation can be described in general terms or specific terms.

Temporal Acceleration

Psychoportation

Level: Psion/wilder 6

Display: None

Manifesting Time: 1 swift action

Range: Personal

Target: You

Duration: 1 round (in apparent time); see text

Power Points: 11

You enter another time frame, speeding up so greatly that all other creatures seem frozen, though they are actually still moving at normal speed. You are free to act for 1 round of apparent time. You can manifest powers, cast spells, move, or perform other types of actions, subject to the restrictions outlined below.

While your *temporal acceleration* is in effect, other creatures are invulnerable to your attacks and powers. This means you cannot target a creature with any attack or power. However, a power you manifest that affects an area and has a duration longer than the remaining duration of your *temporal acceleration* has its normal effect on creatures in the area once this power ends.

You can affect an unattended object but not an object held, carried, or worn by another creature. You are undetectable by any means while your *temporal acceleration* lasts.

While under the effect of this power, you cannot enter an area protected by a *null psionics field* or by a power or spell that neutralizes high-level powers or spells. Normal and magical fire, cold, acid, and the like can still harm you.

When your *temporal acceleration* expires, you resume acting during your current turn in the standard time frame. You are shaken for 1 round upon your return to the standard time frame.

Splintered or partitioned minds within your own mind, such as might be in effect through the use of powers such as *schism*, are not temporally speeded up, even if your second mind manifested this power (your primary mind gains the benefit, while your second mind remains stuck in the standard time frame).

Manifesting this power is a swift action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You cannot manifest this power when it isn't your turn.

Augment: For every 4 additional power points you spend, this power's duration (in apparent time) increases by 1 round.

Thicken Skin

Psychometabolism

Level: Egoist 1, psychic warrior 1

Display: Material and olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 1

Your skin or natural armor thickens and spreads across your body, providing a +1 enhancement bonus to your Armor Class.

Augment: You can augment this power in one or both of the following ways.

1. For every 3 additional power points you spend, the enhancement bonus increases by 1.

2. If you spend 6 additional power points, you can manifest this power as a swift action.

Thought Shield

Telepathy [Mind-Affecting]

Level: Psion/wilder 2, psychic warrior 2

Display: Auditory

Manifesting Time: 1 immediate action

Range: Personal

Target: You

Duration: 1 round

Power Points: 3

You fortify your mind against intrusions, gaining power resistance 13 against all mind-affecting powers.

You can manifest this power instantly, quickly enough to gain its benefits in an emergency. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round. You can use this power even when it's not your turn.

Augment: For every additional power point you spend, this power's duration increases by 1 round, and the power resistance it provides increases by 1 point.

Time Hop

Psychoportation

Level: Psion/wilder 3

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Targets: One Medium or smaller creature, or one object weighing 300 lb. or less

Duration: 1 round/level; see text

Saving Throw: Will negates

Power Resistance: Yes

Power Points: 5

The subject of the power hops forward in time 1 round for every manifester level you have. In effect, the subject seems to disappear in a shimmer of silver energy, then reappear after the duration of this power expires. The subject reappears in exactly the same orientation and condition as before. From the subject's point of view, no time has passed at all.

In each round of the power's duration, on what would have been the subject's turn, it can attempt a DC 15 Wisdom check. Success allows the subject to return. The subject can act normally on its next turn after this power ends.

If the space from which the subject departed is occupied upon his return to the time stream, he appears in the closest unoccupied space, still in his original orientation. Determine the closest space randomly if necessary.

Augment: You can augment this power in one or both of the following ways.

1. For every 2 additional power points you spend, you can affect a creature of one size category larger, or double the weight of an object to be affected.

2. For every 2 additional power points you spend, this power can affect an additional target. Any additional target cannot be more than 15 feet from another target of the power.

Time Hop, Mass

Psychoporation

Level: Nomad 8

Display: Auditory and visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Targets: All willing creatures in range

Duration: Up to 1 hour/level; see text

Power Points: 15

As *time hop*, except you can affect any number of willing subjects in range, including yourself. You can choose which creatures are affected by the power. The subjects hop forward in time a number of hours equal to your manifester level, or some shorter number of hours; you decide how many hours the *mass time hop* lasts when you manifest the power.

Augment: If you spend 6 additional power points, you can manifest this power as an immediate action.

Time Regression

Psychoporation

Level: Nomad 9

Display: None

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: Instantaneous

Power Points: 17, XP

You can regress apparent time 1 round into the past. In effect, you "replay" the previous round of activity. The power regresses time to the point along the time stream just prior to your previous turn, undoing the effects of everyone else's actions in the meantime. Once you have used *time regression*, only you retain knowledge of what happened during the round that is being replayed; however, you can communicate that knowledge verbally to your companions, if desired. During the round that you live through a second time, you can act on knowledge you previously gained by already living through the immediate future. In all likelihood, you'll probably not choose to manifest *time regression* during your second pass through the time stream, instead taking completely new actions, but you pay the XP cost all the same.

XP Cost: 1,000 XP.

Timeless Body

Psychoporation

Level: Psion/wilder 9

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 round

Power Points: 17

Your body ignores all harmful (and helpful) effects, beginning when you finish manifesting this power and ending at the end of your next turn. While *timeless body* is in effect, you are invulnerable to all attacks and powers.

This power cannot be quickened.

Tongues, Psionic

Telepathy [Mind-Affecting]

Level: Psion/wilder 2

Display: None

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level

Power Points: 3

As the *tongues* spell, except as noted here. This power does not enable you to speak with creatures immune to mind-affecting powers.

Tornado Blast

Psychokinesis

Level: Kineticist 9

Display: Auditory and visual; see text

Manifesting Time: 1 round

Range: Long (400 ft. + 40 ft./level)

Area: 40-ft.-radius spread

Duration: Instantaneous

Saving Throw: Reflex half; see text

Power Resistance: No

Power Points: 17

You induce the formation of a slender vortex of fiercely swirling air. When you manifest it, a vortex of air visibly and audibly snakes out from your outstretched hand.

If you want to aim the vortex at a specific creature, you can make a ranged touch attack to strike the creature. If you succeed, direct contact with the vortex deals 8d6 points of damage to the creature (no save).

Regardless of whether your ranged touch attack hits (and even if you forgo the attack), all creatures in the area (including the one possibly damaged by direct contact) are picked up and violently dashed about, dealing 17d6 points of damage to each one. Creatures that make a successful Reflex save take half damage.

After being dashed about, each creature that was affected finds itself situated in a new space 1d4 x 10 feet away from its original space in a random direction. Walls and other barriers can restrict this relocation; in such a case, the creature ends up adjacent to the barrier.

Augment: For every additional power point you spend, this power's area damage (not the damage from direct contact dealt to a specific creature) increases by 1d6 points (to a maximum of 24d6 points). For each extra 2d6 points of damage, this power's save DC increases by 1.

Touchsight

Psychometabolism

Level: Psion/wilder 3

Display: Visual

Manifesting Time: 1 standard action

Range: Personal; see text

Target: You

Duration: 1 min./level (D)

Power Points: 5

You generate a subtle telekinetic field of mental contact, allowing you to "feel" your surroundings even in total darkness or when your sight would otherwise be obscured by your physical environment. Your *touchsight* field emanates from you out to 60 feet. You ignore invisibility, darkness, and concealment, though you must have line of effect to a creature or an object to discern it. You do not need to make Spot or Listen checks to notice creatures; you can detect and pinpoint all creatures within 60 feet. In many circumstances, comparing your regular senses to what you learn with *touchsight* is enough to tell you the difference between visible, invisible, hiding, and concealed creatures.

Augment: For every 2 additional power points you spend, the radius of your *touchsight* field increases by 10 feet.

Tower of Iron Will

Telepathy [Mind-Affecting]

Level: Psion/wilder 5

Display: Auditory

Manifesting Time: 1 immediate action

Range: 10 ft.

Area: 10-ft.-radius emanation centered on you

Duration: 1 round

Saving Throw: None (harmless)

Power Resistance: Yes (harmless)

Power Points: 9

You generate a bastion of thought so strong that it offers protection to you and everyone around you, improving the self-control of all. You and all creatures in the power's area gain power resistance 19 against all mindaffecting powers.

You can manifest this power instantly, quickly enough to gain its benefits in an emergency. Manifesting the power is an immediate action, like manifesting a quickened power, and it counts toward the normal limit of one quickened power per round.

You can use this power even when it is not your turn.

Augment: For every additional power point you spend, this power's duration increases by 1 round and the power resistance it provides increases by 1 point.

Trace Teleport

Clairsentience

Level: Psion/wilder 4

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Area: Spread with a radius of 25 ft. + 5 ft./2 levels, centered on you

Duration: Instantaneous

Saving Throw: None

Power Resistance: No

Power Points: 7

As *detect teleportation*, except you can trace the destination of any psionic or magical teleportation made by others within this power's area within the last minute.

You know the direction and distance the individuals traveled and could teleport to the location yourself if you so desired (and if you know the *psionic teleport* power), as if you had "seen casually" the location. This power does not grant you any information on the conditions at the other end of the trace beyond the mental coordinates of the location.

Augment: If you spend 2 additional power points, this power's range increases to Medium (100 ft. + 10 ft./level).

True Creation

Metacreativity (Creation)

Level: Shaper 9

Duration: Instantaneous

Power Points: 17, XP

As *psionic major creation*, except items created are enduring and cannot be negated by dispelling magic or negating powers. For all intents and purposes, these items are completely real.

XP Cost: 1/5 of the item's gold piece value, or a minimum of 1 XP.

True Metabolism

Psychometabolism

Level: Psion/wilder 8

Display: Material

Manifesting Time: 1 round

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 15

You are difficult to kill while this power persists. You automatically heal damage at the rate of 10 hit points per round. This power is not effective against damage from starvation, thirst, or suffocation. Also, attack forms that don't deal hit point damage (for example, most poisons) ignore *true metabolism*. You can also use this power to regrow lost portions of your body and to reattach severed limbs or body parts, if you do nothing but concentrate on regrowing the lost body part or reattaching the severed limb for the duration of the power. You do not gain the benefits described earlier when you manifest *true metabolism* for this purpose. You must have a Constitution score to gain any of this power's benefits.

True Seeing, Psionic

Clairsentience

Level: Psion/wilder 5

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 9

As the *true seeing* power, except as noted here.

Truevenom

Psychometabolism

Level: Psychic warrior 4

Display: Material; see text

Manifesting Time: 1 swift action

Range: Personal

Target: You

Duration: 1 min./level or until discharged

Saving Throw: None and Fortitude negates; see text

Power Points: 7

If you have a claw attack (either from an actual natural weapon or from an effect such as *claws of the beast*), you can use this power to produce a horrible poison that coats one of your claws. On your next successful melee attack with the claw during the power's duration, the poison deals 1d8 points of Constitution damage immediately and another 1d8 points of Constitution damage 1 minute later. The target of your attack can negate each instance of damage with a Fortitude save.

Truevenom Weapon

Psychometabolism (Creation)

Level: Psychic warrior 4

Range: Touch

Target: Weapon touched

Power Points: 7

As *truevenom*, except your weapon gains the poison coating as long as it remains in your grip, until the effect is discharged, or until the duration expires, whichever occurs first.

Ubiquitous Vision

Clairsentience

Level: Psion/wilder 3, psychic warrior 3

Display: Visual

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 10 min./level (D)

Power Points: 5

You have metaphoric "eyes in the back of your head," and on the sides and top as well, granting you benefits in specific situations. In effect, you have a 360-degree sphere of sight, allowing you a perfect view of creatures that might otherwise flank you. Thus, flanking opponents gain no bonus on their attack rolls, and rogues are denied their sneak attack ability because you do not lose your Dexterity bonus (but they may still sneak attack you if you are caught flat-footed). Your Spot and Search checks gain a +4 enhancement bonus. Concurrently, you take a -4 penalty on saves against all gaze attacks during the power's duration.

Ultrablast

Telepathy [Mind-Affecting]

Level: Psion/wilder 7

Display: Auditory; see text

Manifesting Time: 1 standard action

Range: 15 ft.

Area: 15-ft.-radius spread centered on you

Duration: Instantaneous

Saving Throw: Will half

Power Resistance: Yes

Power Points: 13

You “grumble” psychically (which both psionic and nonpsionic creatures can detect), then release a horrid shriek from your subconscious that disrupts the brains of all enemies in the power’s area, dealing 13d6 points of damage to each enemy.

Augment: For every additional power point you spend, this power’s damage increases by 1d6 points.

Vampiric Blade

Psychometabolism

Level: Psychic warrior 3

Display: Material and visual

Manifesting Time: 1 standard action

Range: 0 ft.

Target: One weapon you hold

Duration: 1 round/level

Power Points: 5

As *claws of the vampire*, except your weapon is affected as long as it remains in your grip or until this power’s duration expires.

Vigor

Psychometabolism

Level: Psion/wilder 1, psychic warrior 1

Display: Material and olfactory

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 1

You suffuse yourself with power, gaining 5 temporary hit points. Using this power again when an earlier manifestation has not expired merely replaces the older temporary hit points (if any remain) with the newer ones.

Augment: For every additional power point you spend, the number of temporary hit points you gain increases by 5.

Wall of Ectoplasm

Metacreativity (Creation)

Level: Psion/wilder 4

Display: Visual

Manifesting Time: 1 standard action

Range: Close (25 ft. + 5 ft./2 levels)

Effect: Wall whose area is up to one 10-ft. square/level or a sphere or hemisphere with a radius of up to 1 ft./level

Duration: 1 min./level (D)

Saving Throw: None

Power Resistance: No

Power Points: 7

You fashion a roiling wall of ectoplasm, imbuing it with solidity. The wall cannot move once it is formed. It is 1 inch thick per four manifeste levels and occupies up to one 5-foot square per level. Each 5-foot square of the wall has 10 hit points per inch of thickness and hardness 5. A section of the wall whose hit points drop to 0 is breached. If a creature tries to break through the wall, the DC for the Strength check is $15 + 2$ per inch of thickness.

The *wall of ectoplasm* is susceptible to *dispel psionics*, but it gains a +4 bonus on any check to determine whether the wall is negated. Spells, powers, and breath weapons cannot pass through the wall in either direction (though they could damage it). It blocks ethereal creatures as well as material creatures (though ethereal creatures can usually get around the wall by floating).

under or over it through material floors and ceilings). The wall is opaque, so neither vision nor gaze attacks operate through it. The wall does not block psychoportive travel, such as that provided by the *psionic teleport* power. You can form the wall into a flat, vertical plane whose area is up to one 10-foot square per level or into a sphere or hemisphere with a radius of up to 1 foot per level. The *wall of ectoplasm* must be continuous and unbroken when manifested. If its surface is interrupted by any object or creature, the power fails.

Wall Walker

Psychoporation

Level: Psychic warrior 2

Display: Material

Manifesting Time: 1 standard action

Range: Personal

Target: You

Duration: 1 min./level

Power Points: 3

You can walk on vertical surfaces or even traverse ceilings (you need not make Climb checks to traverse these surfaces). Because of the need to keep at least one foot in contact with the wall or ceiling at all times, you cannot jump or use the run action, and you can move at only half speed.

You retain your Dexterity bonus to Armor Class, if any, and opponents gain no special bonuses against you.

Weapon of Energy

Psychokinesis [see text]

Level: Psychic warrior 4

Display: Visual

Range: Touch

Target: Weapon touched

Duration: 1 round/level

Saving Throw: Fortitude negates (object, harmless)

Power Resistance: None

Power Points: 7

As *claw of energy*, except this power can be manifested on a touched weapon. This power's subtype is the same as the type of energy infused in the touched weapon.

PSIONIC MONSTERS

PSIONIC CREATURES

Any creature with psionic powers has the psionic subtype. A psionic creature can be born with the subtype or can gain the subtype during its life.

A creature meeting any one of the following criteria has the psionic subtype:

- Creatures with a power point reserve, including characters who have levels in a character class that grants them a power point reserve or creatures who have the Wild Talent feat.
- Creatures with psi-like abilities, including characters who have racial psi-like abilities.
- Creatures that have spell-like abilities described as “psionics.”

Traits: Other than the fact that all psionic creatures have psionic powers, power points, or psi-like abilities, psionic creatures have no specific traits. The psionic subtype serves to identify creatures that may be vulnerable to powers, spells, and effects targeting psionic creatures.

THE PSIONIC SUBTYPE

The psionic subtype applies to creatures that can use psionic powers or abilities or that have the ability to manifest powers. (In other words, a creature with the psionic subtype either has a power point reserve or has psi-like abilities.) It also applies to creatures from other sources that have spell-like abilities labeled as “psionics.”

Characters who have levels in any class that grants the use of psionics, or who have psi-like abilities as racial traits, gain the psionic subtype.

Traits: Other than the fact that all psionic creatures have psionic powers or psi-like abilities, psionic creatures have no specific traits. The psionic subtype simply identifies creatures that may be vulnerable to powers, spells, and effects targeting psionic creatures.

Undead Psionic Creatures

A psionic undead creature, although rare, is a force to be reckoned with.

Because undead are immune to mind-affecting effects (including charms and compulsions), they are particularly threatening to other psionic creatures and characters (especially telepaths). Psionic undead creatures can use mind-affecting powers on the living, even though they themselves are immune to such attacks. However, an undead creature may have the psionic subtype if it meets the criteria described above, and thus be vulnerable to non-mind-affecting powers or effects that specifically affect psionic creatures.

Intelligent constructs and plants with psionic powers or psi-like abilities also share this advantage.

PSIONIC POWERS

Creatures with psionic powers are similar to creatures with racial spellcasting ability. They have the ability to manifest powers just as a member of a psionic character class can (and can activate psionic items accordingly).

Creatures with the ability to use powers are subject to the same rules for manifesting powers that characters are, but they are not actually members of a class and do not gain any class abilities unless otherwise specified.

Creatures with psionic powers generally emulate the manifesting ability of a particular psionic class. When such a creature takes levels in that same class, it can stack its innate psionic powers and its class power progression together.

Creatures with psionic powers that take levels in a class other than the one they emulate combine their two power point reserves into a single reserve, but they manifest powers from each psionic class separately.

PSI-LIKE ABILITIES

Most psionic monsters have some number of psi-like abilities. These are very similar to spell-like abilities. Naturally, they are psionic and work just like powers or spells. A creature with psi-like abilities does not pay for these abilities with power points and does not pay any XP cost associated with manifesting the power the ability duplicates.

Psi-like abilities do not work in a *null psionics field* and are subject to power resistance if the power or spell the ability duplicates would be subject to power resistance. A psi-like ability usually has a limit on how often it can be used. A psi-like ability that can be used at will has no use limit. Using a psi-like ability is a standard action unless noted otherwise, and doing so while threatened provokes attacks of opportunity. It is possible to make a Concentration check to use a psi-like ability defensively and avoid provoking attacks of opportunity, just as when using a power or casting a spell. A psi-like ability can be interrupted just as a spell can be. Psi-like abilities cannot be used to counterspell, nor can they be counterspelled.

All creatures with psi-like abilities are assigned a manifester level, which indicates how difficult it is to dispel their psi-like effects and determines all level-dependent variables (such as range or duration) the abilities might have. When a creature uses a psi-like ability, the power is manifested as if the creature had spent a number of power points equal to its manifester level,

which may augment the power to improve its damage or save DC. However, the creature does not actually spend power points for its psi-like abilities, even if it has a power point reserve due to racial abilities, class levels, or some other psionic ability.

The DC of a saving throw (if applicable) against a creature's psi-like ability is $10 + \text{the level of the power or spell} + \text{the ability duplicates} + \text{the creature's Cha modifier}$. Remember to check the power's Augment entry to see if the creature's manifester level (and thus the effective power point expenditure) increases the DC of the saving throw. Changes to the effect's save DC, damage, and so on are noted in the psi-like ability entry.

Psionic Focus

Some creatures have feats that can be used only when the creature is psionically focused, or that require the creature to expend its psionic focus. Assume that such a creature is psionically focused before entering combat.

Psi-Like Abilities and Feats

Creatures with access to psi-like abilities can use the feats Empower Spell-Like Ability and Quicken Spell-Like Ability. These feats can be used only on psi-like abilities that do not have increased effects due to augmentation. Furthermore, the creature can empower only a psi-like ability with a level less than or equal to half its manifester level (round down) minus 2, and can quicken only a psi-like ability with a level less than or equal to half its manifester level (round down) minus 4.

Creatures with "Psionics" Entries

Psionic monsters often possess spell-like abilities that are identified as "psionics," instead of "spell-like abilities." For all intents and purposes, creatures with spell-like abilities described as psionics are considered to possess psi-like abilities, and they manifest their powers as described above.

Psionic Spells

In some cases, a creature's psi-like abilities (or abilities listed under a creature's psionics entry) may include an effect that does not duplicate any listed power. For such abilities, simply use the existing spell description. Treat the creature's manifester level as the caster level for the spell. The ability is still psionic in origin, so spells and powers that specifically affect psionic powers can negate or reduce its effects as they would any other psionic power.

Psionic Versions Of Creatures

Below are presented psionic versions of the following creatures: aboleth, couatl, and duergar,. These alternate versions are psionic equivalents of their standard counterparts.

Only the portions of the monster entry that are specifically changed by the addition of psionics rules have been listed. All other elements of the creature remain the same.

READING PSIONIC CREATURE ENTRIES

Creatures with Psi-Like Abilities

Each of a creature's psi-like abilities has a manifester level. Each ability that allows a saving throw also gives a save DC in parentheses following the power name.

Powers that have increased effects due to augmentation include information about the effect. An asterisk indicates that the power has already been augmented by the creature's innate ability.

Powers that can't be augmented, or that are manifested at their normal minimum level, do not contain any special notations. Resolve the effect of manifesting the power without augmentation at the creature's given manifester level.

Some creatures may have particular powers that are manifested at a higher or lower level than their normal manifester level. In such cases, the manifester level is given in the parenthetical information following the power name.

ABOLETH, PSIONIC

Huge Aberration (Aquatic, Psionic)

Special Attacks: Psi-like abilities, slime

Feats: Alertness, Combat Manifestation, Iron Will

COMBAT

A psionic aboleth does not possess spell-like abilities or the enslave ability of the standard aboleth. Instead, it has psi-like abilities, including *psionic dominate*.

Psi-Like Abilities: At will—*disable* (30-ft. cone, 12 HD, DC 20*), *false sensory input* (five targets, DC 16*), *mental disruption* (20-ft. radius, DC 18*), *mindlink* (unwilling, nine targets, DC 14*); 3/day—*ego whip* (ML 7th, 2d4, DC 17*), *id*

insinuation (ML 7th, three targets, DC 17*), *psionic dominate* (any target, 24 hours, DC 20*), *thought shield* (power resistance 21, 3 rounds*); 1/day—*psionic modify memory* (DC 17), *remote viewing* (DC 17), *wall of ectoplasm* (DC 17). Manifester level 13th. The save DCs are Charisma-based.

*Includes augmentation for the aboleth's manifester level.

ASTRAL CONSTRUCT

Astral constructs are brought into being by the metacreativity power *astral construct*. They are formed from raw ectoplasm (a portion of the astral medium drawn into the Material Plane). The power points spent by the construct's creator during the manifestation of the power determine the level of the astral construct created. However, even astral constructs of the same level vary somewhat from each other, depending on the whims of their creators.

COMBAT

Astral constructs act as directed by their creators. As a free action, a construct's manifester can direct the construct to attack particular enemies, use specific tactics or powers, perform other actions, or do nothing at all. The construct does exactly what its creator directs it to do.

An astral construct generally appears as an animate clump of ectoplasm with a vaguely humanoid shape, but the manifester can mold or sculpt one according to his or her whim within the limits imposed by the creature's size. The quality of such "construct sculpture" is determined by a Craft (sculpting) check. A result of 10 to 19 creates a creature that is recognizably similar to the desired creature shape; a result of 20 to 29 creates a construct that looks like an accurate portrayal of that creature type; a result of 30 or higher creates a construct that looks like a specific individual. No matter how high the Craft (sculpting) check result, though, an astral construct's appearance can't hide the otherworldly material from which it is formed.

Construct Traits: An astral construct has immunity to poison, *sleep*, paralysis, stunning, disease, death effects, necromancy effects, mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects), and any effect that requires a Fortitude save unless it also works on objects or is harmless. It is not subject to critical hits, nonlethal damage, ability damage, ability drain, fatigue, exhaustion, or energy drain. It cannot heal damage, but it can be repaired.

Special Abilities: Every time an astral construct is created, the manifester can choose to apply one special ability to the construct. When the manifester begins to manifest the *astral construct* power, he chooses one or more special abilities from a menu of abilities appropriate to that level of astral construct.

CREATING AN ASTRAL CONSTRUCT

When manifesting the *astral construct* power, the manifester assembles the desired creature from a menu of choices, as specified in the construct's statistics block. A manifester can always substitute two choices from a lesser menu for one of its given abilities. Multiple selections of the same menu choice do not stack unless the ability specifically notes that stacking is allowed.

Some menu choices grant an astral construct the ability to manifest specific powers as psi-like abilities. Unless using the ability is a free action, an astral construct manifesting such a power does so as a standard action that provokes attacks of opportunity. All such powers have a manifester level equal to the astral construct's Hit Dice or the creator's manifester level, whichever is lower.

An astral construct does not need to meet the prerequisites for a feat granted by a menu choice.

Astral Construct Menu A

A manifester creating a 1st-level, 2nd-level, or 3rd-level astral construct can choose one special ability from this menu.

Buff (Ex): The astral construct gains an extra 5 hit points.

Celerity (Ex): The astral construct's land speed is increased by 10 feet.

Cleave (Ex): The astral construct gains the Cleave feat.

Deflection (Ex): The astral construct gains a +1 deflection bonus to Armor Class.

Fly (Ex): The astral construct has physical wings and a fly speed of 20 feet (average).

Improved Bull Rush (Ex): The astral construct gains the Improved Bull Rush feat.

Improved Slam Attack (Ex): The astral construct gains the Improved Natural Attack feat.

Mobility (Ex): The astral construct gains the Mobility feat.

Power Attack (Ex): The astral construct gains the Power Attack feat.

Resistance (Ex): Choose one of the following energy types: fire, cold, acid, electricity, or sonic. The astral construct gains resistance 5 against that energy type.

Swim (Ex): The astral construct is streamlined and shark like, and gains a swim speed of 30 feet.

Trip (Ex): If the astral construct hits with a slam attack, it can attempt to trip the opponent as a free action without making a touch attack or provoking attacks of opportunity. If the attempt fails, the opponent cannot react to trip the astral construct.

Astral Construct Menu B

A manifester creating a 4th-level, 5th-level, or 6th-level astral construct can choose one special ability from this menu. Alternatively, the construct can have two special abilities from Menu A.

Energy Touch (Ex): If you are a kineticist, the astral construct's physical attacks are wreathed in your energy type, dealing an extra 1d6 points of energy damage. If you are not a kineticist, the astral construct deals an extra 1d4 points of damage of an energy type you choose (fire, cold, acid, or electricity) when you manifest the construct.

Extra Attack: If the astral construct is Medium or smaller, it gains two slam attacks instead of one when it makes a full attack. Its bonus on damage rolls for each attack is equal to its Strength modifier, not its Strength modifier \times 1-1/2. If the astral construct is Large or larger, it gains three slams instead of two when it makes a full attack. Its attacks are otherwise unchanged.

Fast Healing (Ex): The astral construct heals 2 hit points each round. It is still immediately destroyed when it reaches 0 hit points.

Heavy Deflection (Ex): The astral construct gains a +4 deflection bonus to Armor Class.

Improved Buff (Ex): The astral construct gains an extra 15 hit points.

Improved Critical (Ex): The astral construct gains the Improved Critical feat with its slam attacks.

Improved Damage Reduction (Ex): The astral construct's surface forms a hard carapace and provides an additional 3 points of damage reduction (or damage reduction 3/magic if it does not already have damage reduction).

Improved Fly (Ex): The astral construct has physical wings and a fly speed of 40 feet (average).

Improved Grab (Ex): To use this ability, the construct must hit with its slam attack. A construct can use this ability only on a target that is at least one size smaller than itself.

Improved Swim: The astral construct is streamlined and sharklike, and gains a swim speed of 60 feet.

Muscle (Ex): The astral construct gains a +4 bonus to its Strength score.

Poison Touch (Ex): If the astral construct hits with a melee attack, the target must make an initial Fortitude save (DC 10 + 1/2 astral construct's HD + astral construct's Cha modifier) or take 1 point of Constitution damage. One minute later, the target must save again or take 1d2 points of Constitution damage.

Pounce (Ex): If the astral construct charges a foe, it can make a full attack.

Smite (Su): Once per day the astral construct can make one attack that deals extra damage equal to its Hit Dice.

Trample (Ex): As a standard action during its turn each round, a Large or larger astral construct can literally run over an opponent at least one size smaller than itself. It merely has to move over the opponent to deal bludgeoning damage equal to 1d8 + its Str modifier. The target can attempt a Reflex save (DC 10 + 1/2 astral construct's Hit Dice + astral construct's Str modifier) to negate the damage, or it can instead choose to make an attack of opportunity at a -4 penalty.

Astral Construct Menu C

A manifester creating a 7th-level, 8th-level, or 9th-level astral construct can choose one special ability from this menu.

Alternatively, the astral construct can have two special abilities from Menu B. (One or both of the Menu B choices can be swapped for two choices from Menu A.)

Blindsight (Ex): The astral construct has blindsight out to 60 feet.

Concussion (Sp): The astral construct can manifest *concussion blast* (manifester level 7th) as a free action once per round.

Constrict (Ex): The astral construct has the improved grab ability with its slam attack. In addition, on a successful grapple check, the astral construct deals damage equal to its slam damage.

Dimension Slide (Sp): The astral construct can manifest *dimension slide* (manifester level equal to Hit Dice) as a move action once per round.

Energy Bolt (Sp): The astral construct can manifest *energy bolt* (manifester level 8th) as a standard action once per round. The creator sets the energy type that the astral construct can manifest when he creates it.

Extra Buff (Ex): The astral construct gains an extra 30 hit points.

Extreme Damage Reduction (Ex): The astral construct's surface forms hard, armor-like plates and provides an additional 6 points of damage reduction.

Extreme Deflection (Ex): The astral construct gains a +8 deflection bonus to Armor Class.

Natural Invisibility (Su): The astral construct is constantly invisible, even when attacking. This ability is inherent and not subject to the *invisibility purge* spell.

Power Resistance (Ex): The astral construct gains power resistance equal to 10 + its Hit Dice.

Rend (Ex): The astral construct makes claw attacks instead of slam attacks (it deals the same amount of damage as it would with its slam damage, but does slashing damage instead of bludgeoning damage). An astral construct that hits the same opponent with two claw attacks in the same round rends its foe, which deals extra damage equal to 2d6 + 1-1/2 times its Str modifier.

Spring Attack (Ex): The astral construct gains the Spring Attack feat.

Whirlwind Attack (Ex): The astral construct gains the Whirlwind Attack feat.

Blues are a subrace of goblins with an innate knack for psionics. A blue is often smaller than an average goblin, standing just about 3 feet tall and weighing about 40 pounds. Blues have noticeably blue-tinged skin, and their eyes are less dull than those of a common goblin. Otherwise, they resemble their kin. They generally dress in short leather robes, dyed black. Blues speak Goblin and Common.

Most blues encountered outside their homes are psions; the information in the statistics block is for a psion of 1st level.

COMBAT

Blues support goblin warriors in combat and are often called upon to lead a gang of goblins (from the rear) into battle.

Psionic Powers: The blue described here is a 1st-level psion.

Typical Psion Powers Known (power points 3*; save DC 12 + power level): 1st—*inertial armor, mind thrust* (DC 13), *psionic charm* (DC 13).

Manifester level 1st. The save DCs are Intelligence-based.

*The blue shown here has already manifested *inertial armor*; its reserve is normally 4 power points.

Skills: Blues have a +4 racial bonus on Move Silently checks and Ride checks.

The blue psion presented here had the following ability scores before racial adjustments: Str 8, Dex 11, Con 12, Int 13, Wis 10, Cha 9.

BLUES AS CHARACTERS

Blues tend to be psions, although blues raised in communities where their kind are rare may choose the path of the wilder.

Blue characters possess the following racial traits.

—2 Strength, +2 Intelligence, —2 Charisma.

- Small size: +1 bonus to Armor Class, +1 bonus on attack rolls, +4 bonus on Hide checks, -4 penalty on grapple checks, lifting and carrying limits 3/4 of those of Medium characters.
- Blue base land speed is 30 feet.
- Darkvision out to 60 feet.
- Naturally Psionic: Blues gain 1 bonus power point at 1st level.
- Racial Skills: A blue character has a +4 racial bonus on Move Silently checks and Ride checks.
- Automatic Languages: Common, Goblin. Bonus Languages: Draconic, Elven, Giant, Gnoll, Orc.
- Favored Class: Psion.
- Level Adjustment: +1.

Brain moles are burrowing animals that use psionic powers to overcome large psionic prey. Small, furry, and nearly blind, brain moles are almost indistinguishable from their common animal cousins.

Brain moles eat small insects when they can't get psionic energy.

COMBAT

Brain moles hunger for psionic energy. They hide in loose dirt and detritus on forest floors, watching for the approach of psionic creatures with their *detect psionics* power. When a suitable target comes in range, the brain moles then attack with their *power leech* ability. The moles remain hidden as long as possible. If threatened, they use *aversion* and *mind thrust* to discourage attackers, using their bite only as a last resort.

Cascade Flu (Ex): Disease—bite; Fortitude DC 9, incubation period one day, damage psionic cascade (every time an afflicted character manifests a power, she must make a DC 16 Concentration check; on a failed check, a psionic cascade is triggered [see Psionic Maladies]). The save DC is Constitution-based.

Psi-Like Abilities: At will—*detect psionics*, *power leech* (ML 5th, DC 14); 3/day—*aversion* (DC 12), *mind thrust* (DC 11). Manifester level 1st. The save DCs are Charisma-based.

Hide Mind (Su): A brain mole cannot be identified as psionic by divination spells or clairsentience powers.

Power Conversion (Su): When a brain mole drains a power point by means of its *power leech* power, it immediately heals 1 hit point. If it is already at full normal hit points, it instead gains psionic sustenance sufficient to supply its need for nourishment for 24 hours.

Skills: Brain moles have a +4 racial bonus on Hide and Move Silently checks and a -2 racial penalty on Spot checks.

A caller in darkness is an incorporeal creature composed of the minds of dozens of victims who died together in terror. It seeks to draw others into its fearwracked, hellish existence.

Callers in darkness rarely speak, but when they do, they speak Common.

COMBAT

Psi-Like Abilities: At will—*clairvoyant sense*, *concussion blast* (two targets, 3d6*), *detect psionics*, *ego whip* (2d4, DC 16*), *mind thrust* (7d10, DC 16*); 3/day—*death urge* (DC 16), *psychic crush* (DC 13**), *psionic suggestion* (three targets, DC 14*); 1/ day—*co-opt concentration* (DC 18). Manifester level 7th. The save DCs are Charisma-based.

*Includes augmentation for the caller's manifester level.

**Includes the inherent +4 save adjustment described in the power.

Steal Essence (Su): Any living, intelligent creature slain by a caller in darkness's touch attack is mentally absorbed into the monster's consciousness. (The physical body of the victim remains intact). Stealing a victim's essence is a free action; it grants the caller 12 temporary hit points, and a permanent new screaming face appears within its cloud.

A caller in darkness can also steal the essence of living, intelligent creatures within 30 feet that are paralyzed or sleeping, or that are helpless due to having a mental ability score reduced to 0 (often by the caller's *ego whip* attack). Doing so is a standard action that provokes attacks of opportunity. The victim dies, and the caller gains 12 temporary hit points.

Incorporeal Traits: A caller in darkness is harmed only by other incorporeal creatures, magic weapons, spells, spell-like abilities, and supernatural abilities. It has a 50% chance to ignore any damage from a corporeal source, except for force effects or attacks made with ghost touch weapons. It can pass through solid objects, but not force effects, at will. Its attacks ignore natural armor, armor, and shields, but deflection bonuses and force effects work normally against them. The creature always moves silently and cannot be heard with Listen checks if it doesn't wish to be.

Undead Traits: A caller in darkness is immune to mind-affecting effects, poison, *sleep*, paralysis, stunning, disease, death effects, and any effect that requires a Fortitude save unless it also works on objects or is harmless. It is not subject to critical hits, nonlethal damage, ability damage to its physical ability scores, ability drain, energy drain, fatigue, exhaustion, or death from massive damage. It cannot be raised, and *resurrection* works only if it is willing. It has darkvision out to 60 feet.
